
RU-400

with Built-In Circulating System Air or Water Cooled Condenser

General Purpose Refrigerated Package for

- Water or Special Coolants.
- Sealed Refrigeration System features high efficiency liquid to freon heat exchanger and hot gas bypass system for close temperature control and freeze protection.
- Wide variety of options available.
- Easy Installation – connect inlet and discharge lines to heat load, connect line power and interlock (if desired), and fill system with coolant.

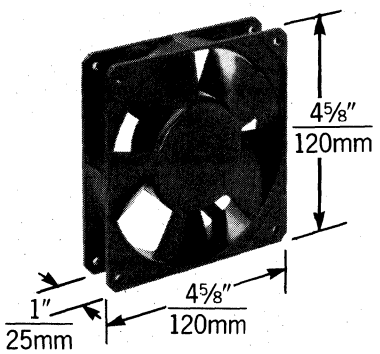
ETRI® tube

ETRI has long been a leader in the design of air-moving devices, from large mine ventilators to miniature flat axial fans. Today, ETRI® air movers are cooling and protecting the most sophisticated of electronic packages. Throughout this time, our basic commitment to uncompromising quality and high performance standards has not changed. Our history of innovative designs and materials, coupled with precise manufacturing techniques provide you with an efficient, quality product for long maintenance-free operation.

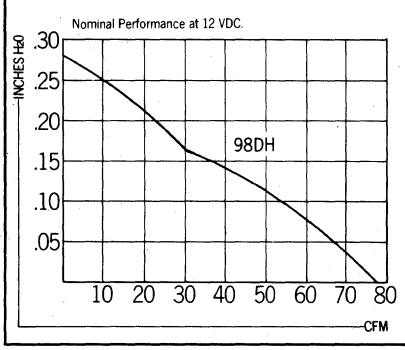
Model 98 BDC



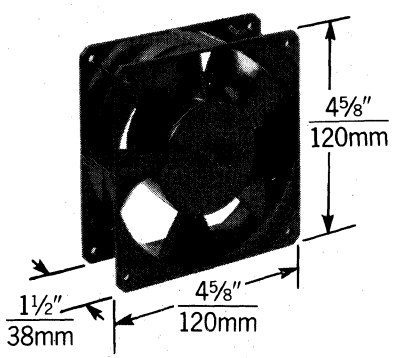
- Polarity and locked rotor protected
- Wide operational voltage/speed range 8-16 volts
- Complies with UL, CSA, VDE and FCC requirements
- Wire leads or terminals
- 12 or 24 volt, ball or sleeve bearing versions
- Operational monitor option
- 94V-O rated plastics

MODEL NUMBER	VDC	INPUT POWER (W)	LINE CURRENT (A)	RPM	NOISE dBSIL	AIR FLOW (CFM/l/s)
98DH 1LM 31000	12	4.5	.38	3,000	39	81/38

All fans described above are 12 volt sleeve bearing standard models.



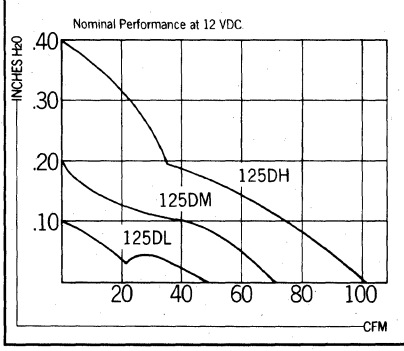
Model 125 BDC



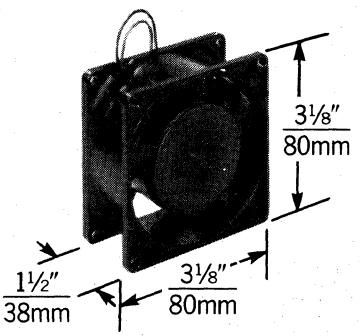
- High volume/pressure or low volume/low noise
- Three speed versions available in 12, 24 or 48 VDC
- Metal or 94V-O plastic housing
- Polarity and locked rotor protected
- Wire leads or standard terminals
- Wide operational voltage/speed range 8-16 volts
- Operational monitor option

MODEL NUMBER	VDC	INPUT POWER (W)	LINE CURRENT (A)	RPM	NOISE dBSIL	AIR FLOW (CFM/l/s)
125DL 1TM 21000	12	6.5	.54	3100	41	105/49
125DM 1TM 21000	12	2.6	.22	2200	33	72/34
125DH 1TM 21000	12	1.5	.125	1500	21	49/23

All fans described above are 12 volt, sleeve bearing, standard models.



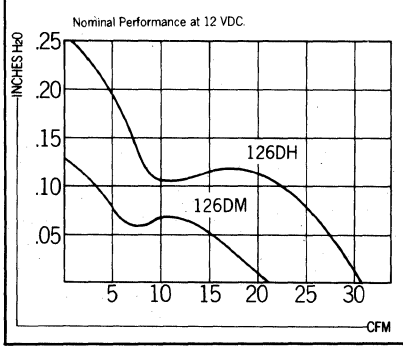
Model 126 BDC



- High performance and low noise
- Polarity and locked rotor protected
- Two speed versions available in 12 and 24 VDC
- 94V-O plastic housing, total weight 7.75 oz.
- Wire leads or terminals
- Wide operational voltage/speed range 8-16 volts
- Operational monitor option
- Complies with UL, CSA, VDE and FCC requirements

MODEL NUMBER	VDC	INPUT POWER (W)	LINE CURRENT (A)	RPM	NOISE dBSIL	AIR FLOW (CFM/l/s)
126DH 1LP 31000	12	3.1	.260	3600	30	32/15
126DM 1LP 31000	12	1.5	.125	2500	23	22/10

All fans described above are 12 volt, sleeve bearing standard models.



ETRI®

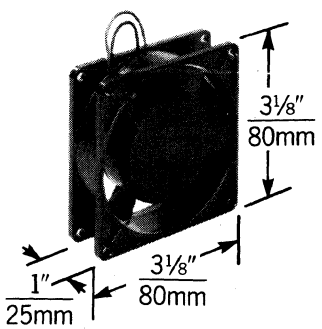
axial fans.

ETRI's new line of Brushless DC fans offers the design engineer a wide range of product. Options in various voltages, speeds, bearing systems and termination configurations allows the engineer to precisely select the performance for his particular application. All ETRI BDC units are designed and manufactured to comply with UL, CSA, VDE and FCC requirements. Whether you select our Brushless DC or AC products (following pages) your assurance of dependable air moving performance is backed up by our 40 years of air moving experience.

Model 146 BDC

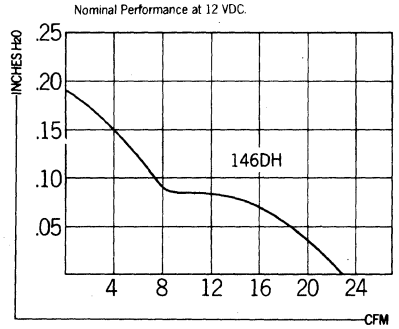


- High performance, low noise
- 94V-O plastic housing, total weight 4.5 oz.
- Sleeve or ball bearing 12 or 24 VDC
- Wire leads or terminals
- Polarity and locked rotor protected
- Complies with UL, CSA, VDE and FCC requirements
- Wide operational voltage/speed range 8-16 volts.

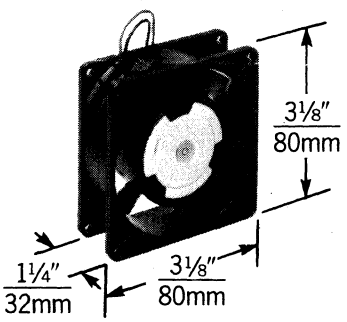
MODEL NUMBER	VDC	INPUT POWER (W)	LINE CURRENT (A)	RPM	NOISE dBSIL	AIR FLOW (CFM/ls)
146DH 1LP 31000	12	1.8	.15	3250	25	23/10.6

All fans described above are 12 volt, sleeve bearing standard models.

Nominal Performance at 12 VDC.



Model 159 BDC

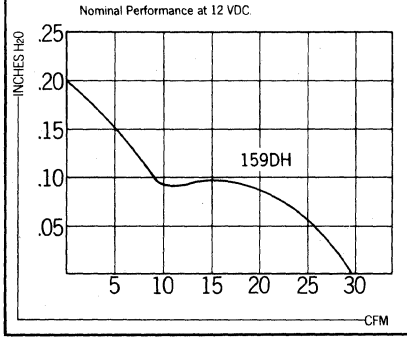


- Unprecedented low noise levels in 80 x 80 x 32mm fan
- Complies with UL, CSA, VDE and FCC requirements
- 94V-O plastic housing total weight 7 oz.
- Wire leads or terminals
- 12 and 24 VDC versions, sleeve or ball bearing
- Wide operational voltage/speed range 8-16 volts

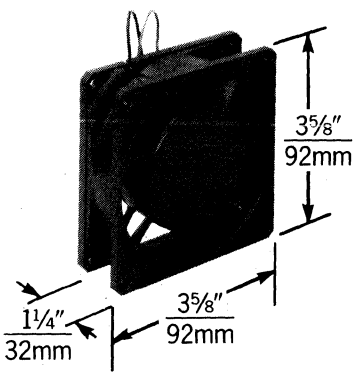
MODEL NUMBER	VDC	INPUT POWER (W)	LINE CURRENT (A)	RPM	NOISE dBSIL	AIR FLOW (CFM/ls)
159DH 1LP 31000	12	2.2	.18	3600	23	29/14

All fans described above are 12 volt, sleeve bearing standard models.

Nominal Performance at 12 VDC.



Model 162 BDC



- 92 x 92 x 32mm, 45 CFM, 31dB
- 94V-O plastic housing total weight 7.75 oz.
- Wire leads or terminals
- Polarity and locked rotor protected
- Sleeve or ball bearings
- High performance low noise
- Wide operational voltage/speed range
- Complies with UL, CSA, VDE and FCC requirements

MODEL NUMBER	VDC	INPUT POWER (W)	LINE CURRENT (A)	RPM	NOISE dBSIL	AIR FLOW (CFM/ls)
162DH 1LP 31000	12	3.4	.28	3200	31	45/21

All fans described above are 12 volt, sleeve bearing standard models.

Nominal Performance at 12 VDC.

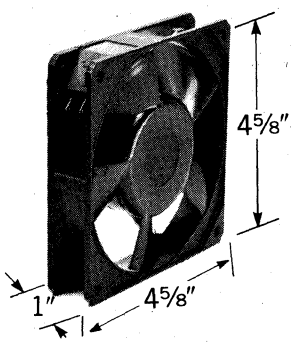
ETRI® tube

ETRI's popular-sized AC fans utilize rugged die cast housings for strength and durability. Glass-filled thermoplastic impellers (94V-O rated) are heat-stable and resistant to breakage. Rotors are lightweight and precision balanced for vibration-free operation. Bearings (either sleeve or ball) are

MODEL 98

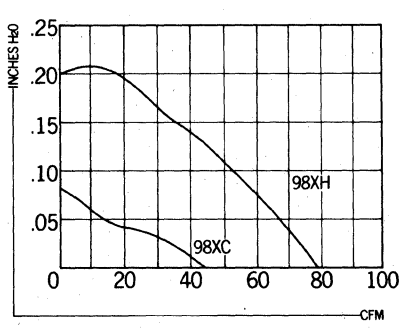


High volume/pressure performance where space is at a premium.

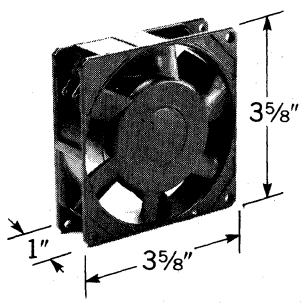
- Unique 1" thin profile on 4⅝" fan.
- Two RPM versions available.
- Available in either sleeve or ball bearing construction.
- Precision engineered blade-to-venturi fit.
- Low input power—as low as 10 watts.
- UL recognized/CSA certified.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
98XC-2182	115	60	10	110	1700	21	45
98XC-2181	220	60	12	70	1700	21	45
98XH-2182	115	60	11	110	3000	37	79
98XH-2181	220	60	13	65	3000	37	79

Model numbers shown are for sleeve bearing versions. To order ball bearing fans, omit the first "2" from the last group of digits.



MODEL 99



Slim 1" profile takes up less behind-the-panel space.

- Three different speed models in two voltage versions.
- Noise levels as low as 23 db (sil).
- True airfoil impeller blades move more air.
- Convenient standard terminals.
- Precision balanced lightweight rotor for longer vibration-free work life.
- UL recognized/CSA approved/VDE listed.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
99XM-2182	115	60	6	65	1700	19	21

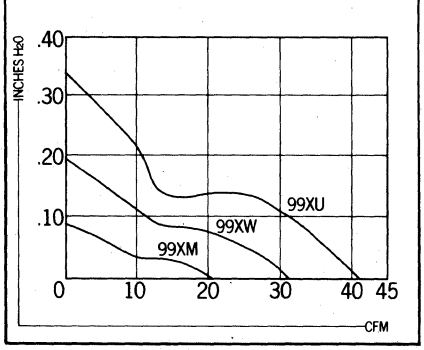
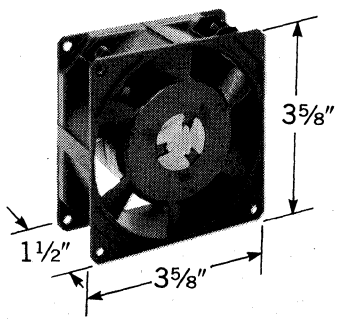
99XU-2181	220	60	11	60	3200	33	40

Model numbers shown are for sleeve bearing versions. To order ball bearing fans, omit the first "2" from the last group of digits.



MODEL 113



An intermediate size fan. Ideal for power supply applications.

- 3.25" mounting centers.
- Quiet, efficient operation with maximum volume/pressure delivery.
- 94V-O rated glass-filled impeller is heat-stable with high resistance to breakage.
- Available in either sleeve or ball bearing construction.
- UL recognized/CSA approved.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
113XN-2182	115	60	11	135	3300	35	53
113XN-2181	220	60	12	80	3300	35	53

Model numbers shown are for sleeve bearing versions. To order ball bearing fans, omit the first "2" from the last group of digits.

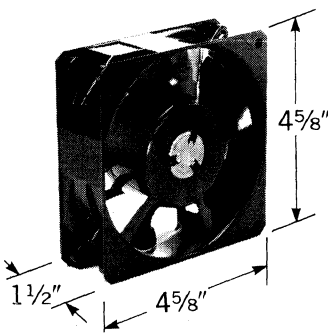
axial fans.

lifetime lubricated. All models operate efficiently at 50Hz or 60Hz and most are available in either 115VAC or 220VAC. Every model is UL Recognized (file E64887) and CSA Certified (file 43861). Many models are VDE approved. For more information call ETRI at 704/289-5423.

MODEL 125

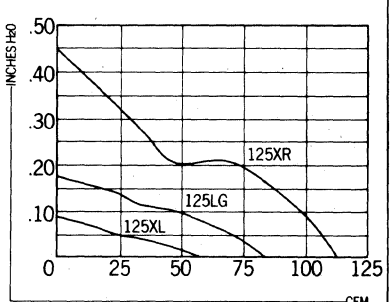


Extremely effective in high density applications where high pressure performance is required.

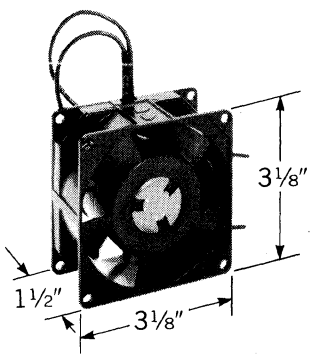
- Develops 90 CFM at .15" H O and 75 CFM at .2" H O.
- Can replace two conventional fans in demanding applications.
- Produces highest volume of air per watt of power of any fan of its type.
- Available in either sleeve or ball bearing construction.
- UL recognized CSA certified.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
125XL-2282	115	60	10	115	1650	29	57
125XL-2281	220	60	10	65	1650	29	57
125LG-2282	115	60	13	160	2400	36	83
125LG-2281	220	60	15	90	2400	36	83
125XR-2282	115	60	15	180	3250	40	112
125XR-2281	220	60	15	105	3250	40	112

Model numbers shown are for sleeve bearing versions. To order full bearing fans, omit the first "2" from the last group of digits



MODEL 126

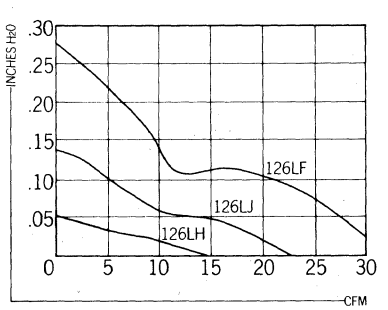


Low input power, low noise, high performance in this fan package.

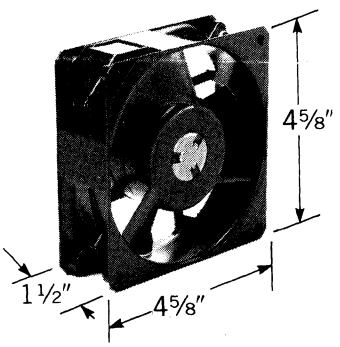
- 2.81" mounting centers.
- Very quiet operation—only 8 db (sil) on Model 126LH.
- Wire leads or terminal version.
- Three different RPM models.
- Available in either sleeve or ball bearing construction.
- UL recognized/CSA certified/VDE listed.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
126LH-2182	115	60	3	40	1550	9	15
126LJ-2182	115	60	5	60	2400	19	23
126LF-2182	115	60	8	100	3200	26	32
126LF-2181	220	60	8	60	3200	26	32

Model numbers shown are for sleeve bearing versions. To order full bearing fans, omit the first "2" from the last group of digits.



MODEL 141



105, 75, and 55 CFM versions are available in this most popular size fan.

- 4.125" mounting centers and standard terminal configuration.
- Low power consumption—only 8 watts on 141LV model.
- Tight blade-to-venturi fit assures optimum performance.
- Available in either sleeve or ball bearing construction.
- UL recognized/CSA certified/VDE listed.
- Reverse flow models available.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
141LV-2282	115	60	8	100	1700	23	55

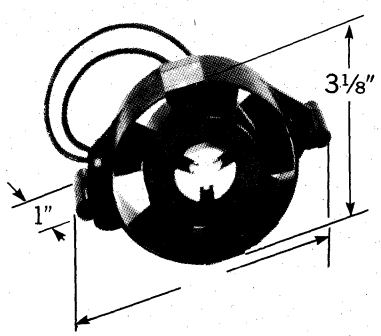
ETRI® fans

ETRI's flat tubeaxial fans are quiet, efficient, cost effective components that are ideal for most electronic cooling applications. For complete technical specifications and delivery information call the ETRI factory at (704) 289-5423.

and accessories.

Accessory items assure correct fit on ETRI fans. Finger Guards will retro fit most existing fans.

MODEL 146

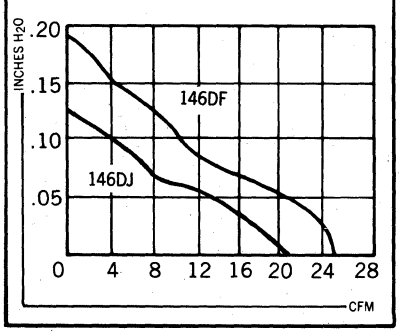


3" x 1" fan specially designed for desk-top electronic applications

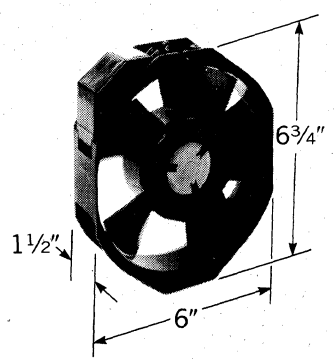
- Low acoustical levels.
- 25 CFM at free air delivery.
- Simplified time saving mounting with bosses and speed nuts provides real economy for high volume installation.
- 115 or 220 volt.
- UL recognized/CSA certified/VDE approved.
- Will fit 3⅛" designs in a 1" profile.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
146DJ-2182	115	60	5	60	2600	23	21
146DF-2182	115	60	5	60	3100	24.7	25
146DF-2181	220	60	9	50	3100	24.7	25

Model numbers shown are for sleeve bearing versions. To order ball bearing fans, omit the first "2" from the last group of digits.



MODEL 148



Ideal for high pressure/high flow applications. Develops 180 CFM at .3" H_2O.

- 1½" thick—less than most 6" fans.
- Efficient, permanent split-capacitor motor, thermally protected.
- Pre-loaded ABEC-3, double-shielded, ball bearing system runs quietly in any position.
- UL recognized/CSA certified.
- Reduced speed versions available.
- Provides wide range cooling with low acoustical disturbances.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)

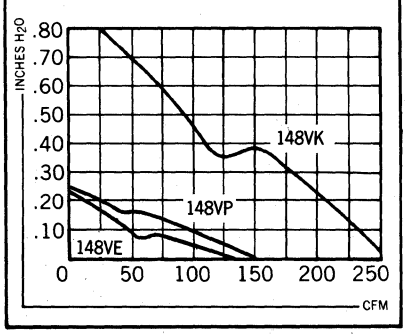
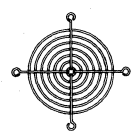
148VK281	220	60	33	170	3200	50.5	255



FINGER GUARDS

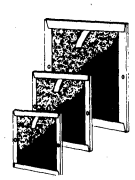
Ensures safe operation in situations that require guarding.



- Standard mounting centers for versatile installation.
- Meets UL Spacing requirements.
- Sturdy .062" steel wire rings welded to .080" ribs.
- Bright zinc-plated finish.

FILTERS

Provides maximum air flow while permitting effective filtering.



- Expanded/slit aluminum foil traps dust particles.
- Minimum pressure loss.
- Complies with UL requirements.

CORDS

All cords are UL recognized #18AWG wire.

- Black SPT-1 type wire in several lengths.

the reliable alternative for fans, blowers and cooling devices

hi-tech

MODULAR CABINET BLOWERS
Applications include heat exchangers, slot blowers, coolers, filter boxes. As a solid state temperature control, unit maintains optimum temperature range.

PACKAGE BLOWERS
Fully assembled high performance blowers feature standard double inlet wheels and automatic reset thermal protection. Housings are heavy-weight steel with a durable flat black finish.

BLOWER HOUSINGS/PARTS
Housings, inlet flanges, cover plates and outlet collars in sizes from 2" to 13" are available for prompt delivery. All parts can be furnished either unpainted or with a hard wearing flat black finish.

AXIAL FLOW FANS
Hi-Tech's axial flow fans are the economical solution for high volume, low static pressure applications; for limited space, spot cooling installations; and where extremely low sound levels are required.

TANGENTIAL BLOWERS
LAMINA-FLO tangential blowers are designed for low profile, wide outlet installations and feature high CFM, even air flow patterns and extremely quiet operation.

SINGLE/DUAL CENTRIFUGAL BLOWERS
Smooth, vibration-free performance assured with balanced wheels and motors. Single and three phase UL approved motors. Static pressures from 0" to 3.0"; outputs to 2000 CFM; wheel diameters from 3" to 12".

When you need a backup source you need them now! When you need assistance with a custom fan or blower you need it now! Hi-Tech will provide that bend-over-backwards service plus first line quality and uncompromising product reliability.

Hi-Tech designs and builds all kinds of cooling components, from axial fans to solid state temperature controllers. Send us your needs. Hi-Tech — The reliable alternative.

IMC COMPONENTS CORPORATION

For the products you trust today, the innovations you'll need tomorrow!

Boxer® fans. The Micro, Pewee, Mini and Boxer. Names that have become synonymous with the best AC and DC fans in the industry. Now your most vital and reliable source for these trusted products is IMC Components Corporation. And it's the same when it comes to PM, VR, and Hybrid stepping motors.

IMC Components Corporation

Created to more sharply focus on the special needs of electronics OEMs...a new link between the ingenuity and creative resources of Minebea Company, Ltd. and your present and future component requirements. Staffed by technical application specialists with the experience and know-how to get you exactly the components you need, exactly when you need them, IMC Components Corporation is a powerful resource designed to make your job easier.

Today and tomorrow. IMC Components Corporation.

On top and there to stay.

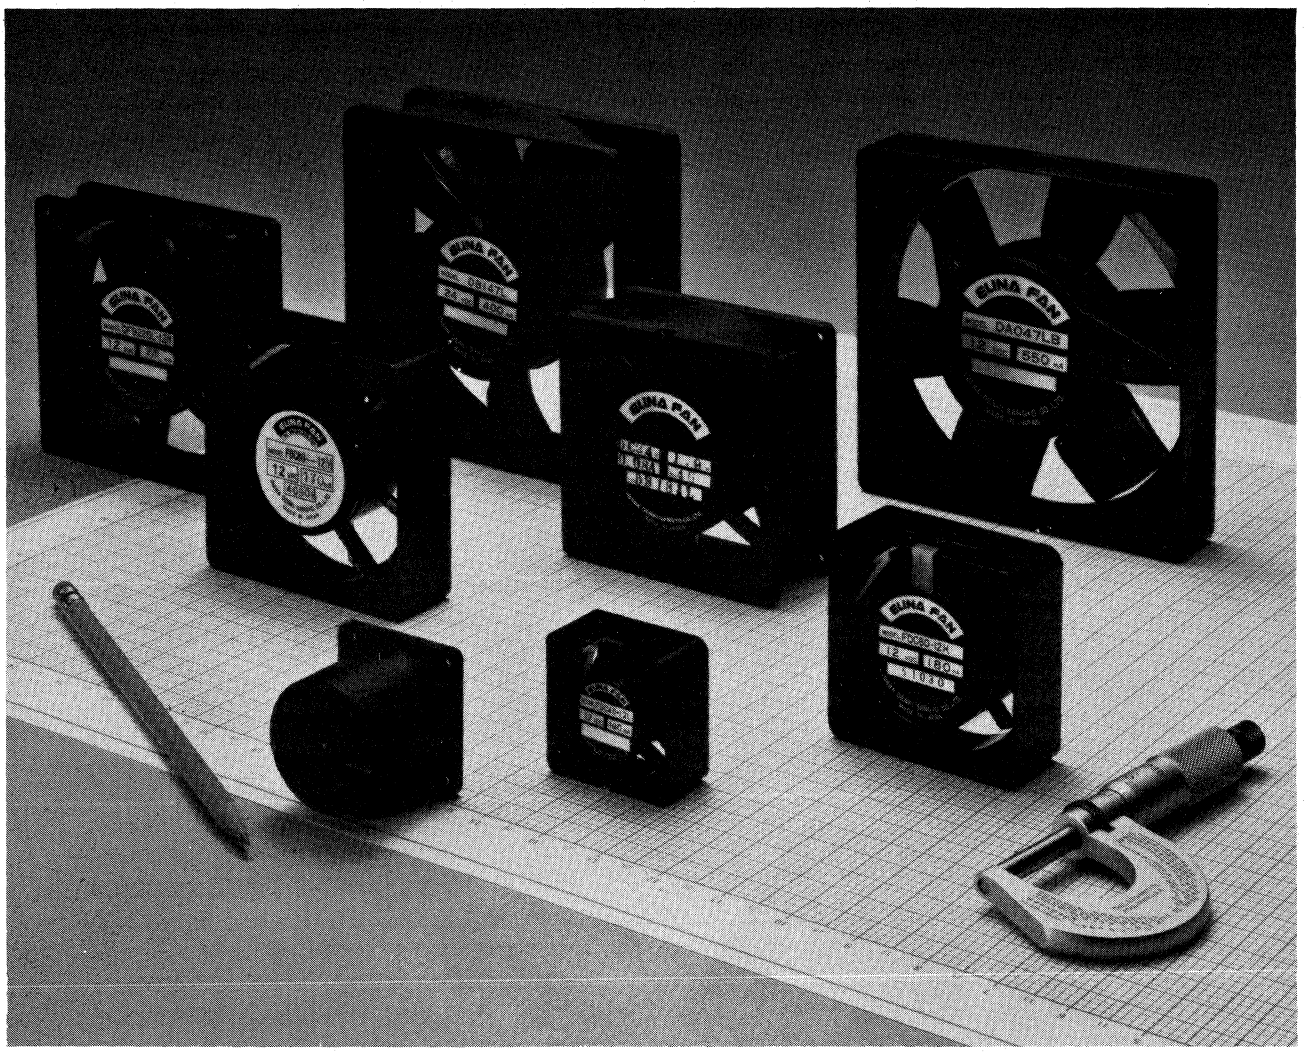
ELINA DC BRUSHLESS MOTOR FANS

Join Our Fan Club!



YOUR SILENT PARTNERS

Elina has a full line of both AC and DC self contained solid state fans for you to choose from. *Complete custom* fans or *customizing* of any of our existing product line of fans is available upon request.

Our DC fans feature superior performance characteristics and power efficiency. Square sizes of 30 mm, 40 mm, 60 mm, 80 mm, 92 mm and 120 mm are standard. Your choice of ball bearing or sintered iron sleeve bearings provide for outstanding reliability and long life expectancy. Elina fans work extremely well at all rated voltages, and are extremely quiet. By altering the voltage within certain voltage ranges the performance and noise level can be adjusted. Locked rotor and polarity protection is standard on all Elina fans.

Elina's popular sized AC fans utilize rugged die cast housings for strength and durability. Glass filled thermoplastic umpellers are heat stable and resistant to breakage. Rotors are lightweight and precision balanced for vibration-free operation. Bearings (either sleeve or ball) are lifetime lubricated. All Elina fans operate efficiently at 50 Hz or 60 Hz and most are available at either 115 VAC or 22 VAC. Every model is UL recognized and CSA certified. For more information please call us at 408-432-1199.

Elina Products Manufactured Exclusively for INDEK

INDEK

ELINA AC/DC FANS

AC FANS

EP SERIES

- ☐ Durable die cast aluminum venturi
- ☐ PBT plastic impeller of 94V-O material
- ☐ Choice of 115V AC or 230V AC
- ☐ Shaded pole motor, with sleeve bearings
- ☐ Impedance protected
- ☐ Choice of three speeds to satisfy various applications
- ☐ UL recognized/CSA certified
- ☐ Life expectancy 100,000 hrs. at 25°C (Shaft horizontal use)
- ☐ Operating temperature = −10°~ + 70°C

AU SERIES

- ☐ Durable die cast aluminum venturi
- ☐ Polybutylene telephthalate (UL94V-O) or polycarbonate (UL94V-O) impeller
- ☐ Choice of 115V AC or 230V AC
- ☐ Shaded pole motor, with ball bearing
- ☐ Locked rotor and impedance protected
- ☐ Choice of three speeds to satisfy various applications
- ☐ Choice of terminal or lead wire type
- ☐ UL recognized/CSA pending
- ☐ Life expectancy 100,000 hrs. at 25°C
- ☐ Operation temperature = −10°C~ + 70°C
- ☐ Weight 18.0 oz (530g)

DC FANS

FDC SERIES

- ☐ Housing = Aluminum
- ☐ Polybutylene telephthalate (UL94V-O) or polycarbonate (UL94V-O) impeller
- ☐ Locked rotor and polarity protected DC motor with ball bearing (sleeve bearing type is available upon request)
- ☐ Operating temperature = −10°C~ + 70°C
- ☐ Choice of 5V, 12V or 24V DC
- ☐ Choice of three speeds to satisfy various applications
- ☐ Life expectancy 60,000 hrs. at 25°C
- ☐ 13″ UL1007, CSA TR64, AWG24 lead wires (340mm)

ELINA AC/DC FANS

DC FANS

HDF SERIES

- ☐ Durable PET 94-O venturi
- ☐ PBT 94V-O plastic impeller
- ☐ Locked rotor and polarity protected DC motor with ball bearings
- ☐ Operating temperature at −10°C~+60°C
- ☐ Choice of 12V DC or 24V DC
- ☐ Choice of two speeds to satisfy various applications
- ☐ Life expectancy 60,000 hrs. at 25°C
- ☐ 11.8 in. UL1007, CSA TR64, AWG24 lead wires
- ☐ Weight 4.5 oz (140g)

DA/DB SERIES

- ☐ Durable die cast aluminum venturi
- ☐ PBT plastic impeller of 94V-O material
- ☐ Brushless, electronically commulated DC motor with sleeve bearings
- ☐ Choice of 12V DC or 24V DC
- ☐ Choice of three speeds to satisfy various applications
- ☐ Life expectancy 60,000 hrs. at 25°C (Shaft horizontal use)
- ☐ Operating temperature = −10°C~+65°C
- ☐ Weight 10.9 oz (338g)

DAP/DBP SERIES

- ☐ Plastic Venturi & impeller of 94HB material
- ☐ UL NO. E49895C1
- ☐ Brushless, electronically commulated DC motor with sleeve bearings
- ☐ Choice of 12V DC or 24V DC
- ☐ Choice of three speeds to satisfy various applications
- ☐ Life expectancy 60,000 hrs. at 25°C (Shaft horizontal use)
- ☐ Operating temperature = −10°C~+65°C
- ☐ Weight 3.4 oz (105g)

SPECIFICATIONS

- Fan Size: Fits any standard 3-1/8", 3-5/8"and 4-1/2" tube axial fans.
- Finish: Irridite (Gold)
- Frame Material: Aluminum
- Screen Material: 30 x 30 aluminum mesh convoluted approx. 1/8" deep with approx. 3/16" pitch
- Tolerance: xx = ± .03 xxx = ± .015

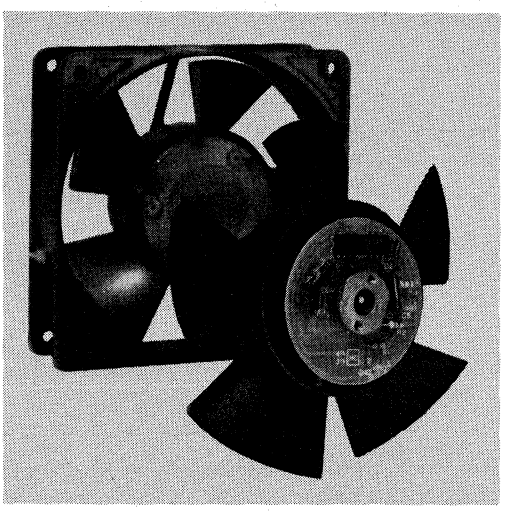
DC Fans and Blowers

770 AIRPORT BLVD., BURLINGAME, CA 94010 • TEL (415) 347-1203 • FAX (415) 340-1670 • MCI/TLX 677-1439 (PURDY UW)

DC Fans and Blowers

INTERFAN OFFERS YOU A FULL FAMILY OF SOLID STATE, BRUSHLESS DC FANS IN POPULAR FRAME SIZES AND VOLTAGES, AND AT POPULAR PRICES. ALL DC FANS AND BLOWERS FEATURE HIGH PRECISION BALL BEARING SYSTEMS.



INTERFAN has a full line of self-contained, solid state, brushless DC fans for you to choose from. These fans have been engineered to tackle those specialized applications which require highly reliable DC performance.

These fans are efficient and will outperform similar sized fans at normal operating back pressure. Typically, they offer greater air volume (cfm), reduced noise levels and reduced power drain. These fans are low in magnetic radiation and RF noise, thereby assuring the pure signals necessary for critical airborne or shipboard use.

They work well at all rated voltages, are are extremely quiet. They can be adjusted for performance and noise level by altering the voltage within the voltage range for your particular application. They feature a brushless motor with electronics mounted on a PC card within the motor frame.

The brushless DC motor is polarity protected to avoid accidental damage and costly down time. In addition, all DC fans and blowers have locked rotor protection.

These fans do not require an external voltage inverter. This means that you save valuable mounting space and weight because the only consideration in mounting is the fan itself. This concept has eliminated many of the inherent reliability and RF noise problems generally associated with using AC motors in a DC environment.

WORLDWIDE USAGE

By operating a brushless DC fan on the internal DC power supply, no provision need be made to change the fan's electrical connections when the unit is switched from 115 VAC to 230 VAC. Also, no change in fan performance will occur if the unit is operated at various frequencies (50 Hz, 60 Hz, 400 Hz, etc.). Since one DC fan model can perform in so many different electrical environments, a very limited number of fan models can satisfy the cooling requirements of a broad product line. All fans conform to UL, CSA, IEC and VDE safety standards.

TYPICAL APPLICATIONS

INTERFAN DC fans are exceptionally well-suited for use in:

- Mobile Radio Equipment
- Medical Electronics
- EDP Equipment and Peripherals
- Shipboard Computers
- Airborne Applications
- Communications Systems
- Automotive Applications
- Marine Use
- Telecommunications

whenever DC voltage is normally available. They also find wide acceptance for use in power stand-by modes as a safety feature.

PART NUMBER SYSTEM

Consisting of ten digits, each part number describes the materials used for the impeller and housing, airflow, voltage, size and bearing system. Examples: PM106-12D-4B = plastic impeller, metal housing, 106 CFM, 12 volts DC, 4" size with ball bearings; MM036-24D-3B = metal impeller, metal housing, 36 CFM, 24 volts DC, 3" size with ball bearings.

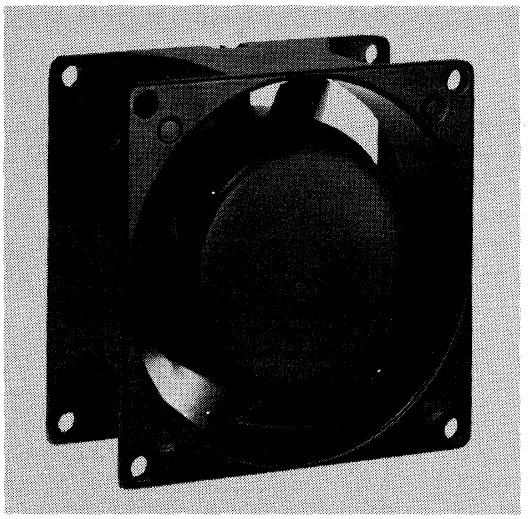
AC Fans and Blowers

AC Fans and Blowers

QUALITY PRODUCTS
YOU CAN RELY UPON
FOR ALL OF YOUR COOLING
REQUIREMENTS. ALL AC FANS
AND BLOWERS FEATURE HIGH
PRECISION BALL BEARING SYSTEMS.



INTERFAN offers a wide variety of AC fans for your selection. Each model combines the features of extended life with high airflow delivery at low noise levels.

Materials used in the fabrication of the fans are the finest available, from their die-cast housings and space age plastics, to their precision ball bearing systems. These fans are built to give you many years of maintenance-free service. All are impedance protected and conform to UL, CSA, IEC and VDE safety standards.

INTERFAN products cover all standard frame sizes and voltages. In addition, we have a series of cooling devices for the less than usual application. The one, for example, which requires a thinner frame due to space limitation, or perhaps you need a model with sensor option. We have them all – and we are here to serve you.

Housing and venturies of all INTERFAN fans are aerodynamically designed for maximum airflow with minimum air turbulence, resulting in more efficient airstream characteristics and reduced noise levels.

Acoustical noise is measured in accordance with J1S B 8330.

PART NUMBER SYSTEM

Consisting of ten digits, each part number describes the materials used for the impeller and housing, airflow, voltage, size and bearing system. Examples: MM106-115-4B = metal impeller, metal housing, 106 CFM, 115 volts AC, 4" size with ball bearings; PM032-230-3B = plastic impeller, metal housing, 32 CFM, 230 volts AC, 3" size with ball bearings.

DIELECTRIC STRENGTH

AC (50 Hz) 2000 volts applied for one minute.

TYPICAL APPLICATIONS

INTERFAN AC fans are ideal for:

- EDP Systems and Peripheral Equipment
- Electronic Test Equipment
- Medical Equipment
- Broadcast Equipment
- High-Power Lamps
- Color Processing Equipment
- Emergency Generators
- Color TV/Hi-Fi Amplifiers
- Electrical Controls
- Telephone Equipment
- Vending Machines
- Airborne Equipment
- Communications Systems

EXTENDED WARRANTY

INTERFAN also offers a super premium grade fan; the PENTAFLOW™ series (5 year warranty). PENTAFLOW model numbers are Model MM032-115-3B-5 and Model MM106-115-4B-5.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
AC alternating current
ABS acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C
CAD computer aided design
CAM computer aided manufacture
CAMAC computer automated measurement and control
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3
KSR keyboard send /receive

L
LC inductance capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIB microcomputer interface board
MIC microwave IC
MIPS million instructions per second
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

DESIGN GUIDE

Electronic equipment often generates a great deal of heat during operation. Frequently located in hostile environments, the equipment may also encounter the additional problem of not having safe, clean air available to dissipate unwanted heat. Such adverse conditions affect the performance and the life expectancy of electronic system components.

KOOLTRONIC cooling devices are precisely designed to solve the problems of internal heat buildup, excessive ambient temperatures, moisture- and contaminant-laden atmospheres and corrosive environments, which can affect sensitive electronic equipment. Before determining which KOOLTRONIC product is most appropriate, a careful study must be made to determine the most adverse operating conditions anticipated, and the requirements of the system itself. Then you can choose the KOOLTRONIC product best suited to creating the proper environment for your specific needs.

CABINET COOLING TIPS

THINK ABOUT COOLING . . . EARLY! Nearly all systems require some degree of forced cooling. Early estimates of the location of components, the heat to be dissipated, and the amount of space for the cooling device will save time, trouble and expense.

AMBIENT AIR VS. CLOSED-LOOP COOLING. Keep it simple. If ambient air is cool and clean enough, use it. It's free. If the ambient is too hot, dirty or corrosive, a closed-loop system is need. A heat exchanger is usually a lower-cost choice than an air conditioner. Don't over-cool or oversize the cooling equipment.

PRESSURIZE, DON'T VACUUMIZE! Pressurization of the cabinet is better than drawing the air out. Pump filtered air INTO the cabinet, to use cracks or other small openings as part of the exhaust area, rather than as sources for the intake of dust and dirt.

If pressurization is impossible and a fan or blower must be used to exhaust the enclosure, a filter at the air inlet is recommended.

FAN OR BLOWER? Propeller fans are designed to move large volumes of air at low static pressure. Blowers are used in higher static pressure applications.

KEEP IT CLEAN Nothing is more important than CLEAN filters. Clogged filters restrict airflow and cause motors, compressors, etc. to work harder and fail prematurely. Timely filter servicing is vital to your system.

FORCED CONVECTION AIR COOLING If the installation will be in a clean, non-hazardous environment with an acceptable ambient temperature range, a simple forced-air cooling system utilizing ambient air is usually adequate. Combined with a low-cost air filter, such devices generally meet the heat removal needs of typical electronic equipment. Examples are fans, centrifugal blowers, and packaged fans and blowers of various types.

Fans, Packaged Fans and Centrifugal Blowers can be used to pressurize or exhaust cabinet air. The ambient air should be filtered before it enters the cabinet.

Packaged Blowers mount to the internal cabinet mounting rails. They are used to pressurize the cabinet and provide filtered ambient air.

CLOSED-LOOP COOLING. See Page **C**•1659.

KEEP INLET AND EXHAUST AIR FAR APART Be sure that all of the exhaust area is located as far as possible from the air inlet and beyond all heat-producing components. A properly planned air path will avoid all "short circuits" to achieve maximum cooling efficiency through use of all input air.

LET NATURE HELP Cooling air should enter the enclosure from as low as possible and leave the enclosure from above the highest hot component. Thus, the forced air flows upward through the heat-producing components and adds to the natural buoyancy of the heated air.

ENTERING AIR MUST HAVE EXIT ROOM The cross-section area of the airstream throughout the flow path in the cabinet should be at least equal to the effective area of the air intake, on the basis of the typical grille material being 65% open. If this ratio is less, "choking" of the air may result.

USE DUCTS FOR EVEN COOLING If the maintenance of an even temperature from top to bottom of the electronics cabinet is important, ducts along the sides of the cabinet offer an ideal solution. Multiple duct outlets allow precise control of location and quantity of air delivered.

BAFFLES SOMETIMES WORK WONDERS At times, an excessively hot component or an isolated area in the cabinet presents a problem in an otherwise well-cooled system. A baffle to channel air across the location is often the best solution.

GENERAL SPECIFICATIONS FOR ALL FANS AND BLOWERS

CONSTRUCTION: Rugged heavy-gauge steel construction.

BAKED EPOXY FINISH: Durable, baked-on gray epoxy finish is standard. Other finishes are available.

PRECISION BALL-BEARING MOTORS: All motors are UL/CSA recognized, include automatic-reset thermal overload protection and are cooled by the blowers' intake air, for maximum motor life. All motors meet Federal Specification CC-M-1807A, and include double-sealed or double-shielded precision ball bearings which meet Federal Specification FF-B-171A. Special permanent lubricants perform over a broad temperature range: −20F (−129C) to 250F (121C).

POWER: 115 VAC or 230 VAC, 50/60 Hz is standard. For multiphase power, other voltages and frequencies or brushless DC applications, consult KOOLTRONIC.

PACKAGED UNITS

GRILLE: All units include attractive 19-inch-wide stainless steel grilles with knurled captive fasteners for easy removal. Grille area is 65% open. (Exception: KPC2 Series, units without EIA flanges.)

PERMANENT FILTERS: Designed to last the life of the unit, the filters consist of a multi-layer grid of adhesive-coated corrugated aluminum in a one-piece aluminum frame.

POWER CORD: High performance and S and B fans have 12" grounded leads. All other 115 VAC, 50/60 Hz units are supplied with a minimum of 36-inch type SJ three-wire cord with molded plug included, internally grounded and securely locked to case by strain relief brushing. 230 VAC, 50/60 Hz units are supplied without plug.

EXHAUST GUARDS: Included on all packaged units.

ACCESSORIES AND OPTIONS

1. Airflow Switch
2. Low Airflow Detector
3. Other voltages and frequenices
4. Special external paint finishes
5. Special line cord or connectors
6. Variable Speed Control
7. Adapters
8. EMI Shielding
9. Filters for replacement
10. Filter Recoating Adhesive
11. Grille Assemblies for replacement
12. Space Age Grilles
13. Recessed front

HIGH PERFORMANCE AND THIN FANS

DESCRIPTION—HIGH PERFORMANCE FANS

For applications where space limitations and/or higher static pressures prevent the use of conventional fans.
The durability of their shock-mounted all-metal design and their excellence in pressurizing or exhausting an enclosure make these fans an ideal choice in their size range.

TECHNICAL DATA

Model	CFM @ 0-inches	RPM Nominal	Amps		Watts

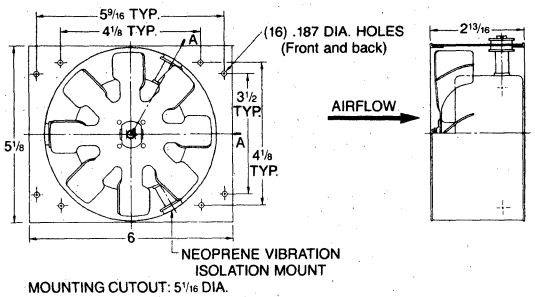
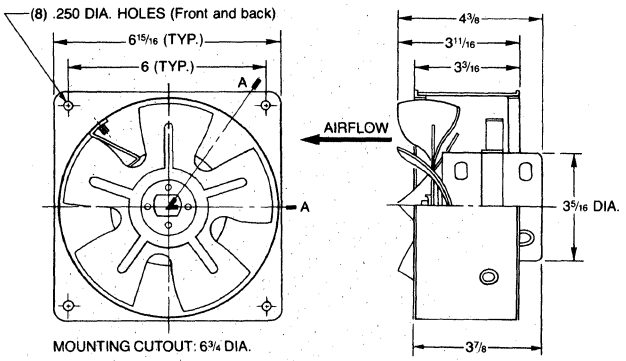
DIMENSIONS—HIGH PERFORMANCE FANS

KJ200



KB653 & KB654



Dimensions (inches) are for reference only and subject to change.

DESCRIPTION—THIN FANS

These compact, powerful fans deliver from 210 to 840 CFM, to provide a large volume of air for low static pressure cooling applications.
KOOLTRONIC Thin Fans can be mounted in virtually any position, internally or externally. With or without accessories, these fans usually can be mounted directly to a panel, the door or in the base or top of the enclosure.
Each fan can be used to either pressurize or exhaust the enclosure by simply reversing its orientation.

PACKAGED AND FILTER BOX FANS

DESCRIPTION

TWIN AND TRIPLE FANS. These fans provide high airflow in a very thin low-vibration package. An exclusive KOOLTRONIC design provides exceptionally quiet operation in both intake and exhaust applications. EIA flanges extend 17″ width to 19″.
FILTER BOX FANS. High airflow with low noise makes this versatile, minimal depth, packaged fan, very popular.
Reversible mounting brackets allow push or pull air flow. These fans can be installed internally or externally, vertically or horizontally, with or without a filter on either side. The KOOLTRONIC isolation motor-mount provides virtually vibration-free operation. Front and rear grilles adjust to accommodate or omit filter. Filter slides in and out easily for cleaning and replacement.

FEATURES

- Twin, triple and filter box models
- Exceptionally quiet
- Capacities from 250 to 1310 CFM
- Versatile mounting and adaptability
- Heavy-gauge steel construction
- UL/CSA ball-bearing motors
- Attractive stainless steel grilles
- All models can pressurize or exhaust
- Accessories and options

SINGLE CENTRIFUGAL BLOWERS

DESCRIPTION

Kooltronic Centrifugal Blowers, the workhorses of electronics cooling, are designed for performance against low to moderate static pressures. These low cost popular blowers are easily installed in any orientation for maximum cooling efficiency.

FEATURES

- Capacities: 60 to 425 CFM
- Full performance in any mounting position
- Rugged construction with baked epoxy finish
- UL/CSA ball-bearing motors
- 12-inch power and ground leads
- Accessories and options 1-6, page C•1649

HOW TO ORDER

Specify model number. For 230 VAC operation, add a 2 after the K. Example: K2BB43.

HIGH PRESSURE CENTRIFUGAL BLOWERS

DESCRIPTION

High Pressure Centrifugal Blowers were specifically engineered to fill the performance range between Single Centrifugal and High Pressure Radial Blowers. They are for applications needing higher airflow against lower static pressures than radial blowers. A variety of sizes and capacities satisfy many requirements.

FEATURES

- Capacities: 160 to 390 CFM
- Designed for mid-range static pressures
- Full performance in any mounting position
- Rugged construction with baked epoxy finish
- UL/CSA ball-bearing motors
- 12-inch (minimum) power and ground leads
- Accessories and options 1-6, page C•1649

HOW TO ORDER

Specify model number. For 230 VAC operation, add a 2 after the K. Example: K2BB51.

HIGH PRESSURE RADIAL BLOWERS

DESCRIPTION

Specifically designed for maximum efficiency in moving moderate air volume against substantial static pressures, the performance of Kooltronic High Pressure Radial Blowers ranges from 40 to 240 CFM at 1″ static pressure and up to 150 CFM at 5″ static pressure.

FEATURES

- Capacities: 55 to 265 CFM
- Designed for substantial static pressures
- Full performance in any mounting position
- Rugged construction with baked epoxy finish
- UL/CSA ball-bearing motors
- 12-inch (minimum) power and ground leads

QUADRUPLEX CENTRIFUGAL BLOWERS

DESCRIPTION

These blowers move more air with less noise and greater efficiency than double blowers. The specially designed housings and optimum impeller width-to-diameter ratio assure even, wide-band air distribution. The unique design isolates moving components from the blower structure for virtually vibration-free operation.

FEATURES

- Capacities: 320 to 920 CFM
- Extremely quiet, efficient operation
- Full performance in any mounting position
- Rugged construction with baked epoxy finish
- UL/CSA ball-bearing motors
- 12-inch (minimum) power and ground leads
- Accessories and options 1-6, page **C**•1649

DOUBLE CENTRIFUGAL BLOWERS

DESCRIPTION

KOOLTRONIC Double Centrifugal Blowers are designed to provide greater airflow than the related single blower series, in the same types of low to moderate static pressure applications. Similarly, they are easily installed and operate with equal effectiveness in any mounting orientation.

Eleven mdoels comprise the series, offering a choice of sizes and capacities to satisfy a wide variety of cooling requirements. Together, single and double centrifugal blowers are the backbone of forced convection air cooling.

These Double Blowers and the Quadruplex Centrifugal Blowers are the exclusive air movement components in virtually all KOOLTRONIC Packaged Blowers, Heat Exchangers and Air Conditioners.

FEATURES

- Capacities: 155 to 1200 CFM
- Full performance in any mounting position
- Rugged construction with baked epoxy finish
- UL/CSA ball-bearing motors
- 12-inch (minimum) power and ground leads
- Accessories and options 1-6, page **C**•1649

HOW TO ORDER

Specify model number. For 230 VAC operation, add a 2 after the K. Example: K2BB64-64.

TANGENTIAL BLOWERS

DESCRIPTION

For low static pressure applications requiring a broad band of air. Suitable for small areas or corners, they feature all-ball-bearing support and rubber isolation systems and can be mounted in any position for horizontal or vertical air delivery in any direction.

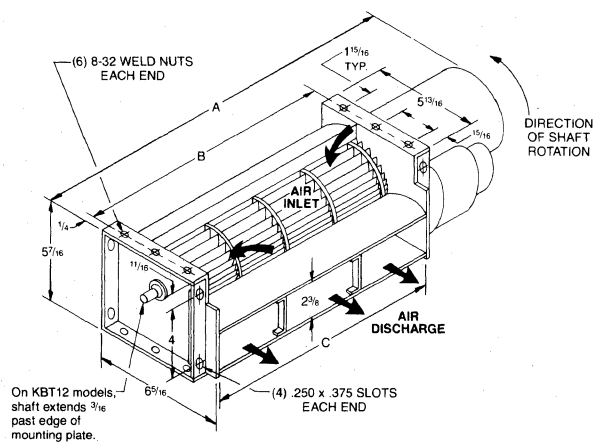
FEATURES

- Capacities: 490 to 950 CFM
- Quiet, end-to-end airflow
- Full performance in any mounting position
- Rugged construction with baked epoxy finish
- UL/CSA ball-bearing motors
- 12-inch (minimum) power and ground leads
- Accessories and options 1-6, page **C**•1649

HOW TO ORDER

Specify model number, adding motor position suffix RM or LM. Example: KBT24RM. For 230 VAC operation, add a 2 after the K. Example: K2BT24RM.

DIMENSIONS (inches)



KBT12RM is shown. Motor on opposite end is KBT12LM; direction of shaft rotation remains constant. KBT24 models employ two wheels with a center bearing support.

Dimensions (inches) are for reference only and subject to change.

PACKAGED TWIN BLOWERS

DESCRIPTION

These blowers achieve exceptional performance by using the largest possible blower housings and wheels. Each quadruplex centrifugal blower, powered by a precision ball-bearing motor, delivers air from over 50% of the 17″ width. Internal isolation mounts reduce transmission of vibration and AC hum. Dual inlet quadruplex design uses intake air to cool the motor.

FEATURES

- Capacities: 130 to 800 CFM
- Steel cases with EIA-notched flanges
- 19-inch stainless steel grilles
- UL/CSA ball-bearing motors
- Dual inlet design for maximum airflow
- Inlet air cools motor for longer life
- Permanent filters
- Exhaust guards included
- Three foot SJ 3-wire power cord
- Accessories and options 1-13, page **C**•1649

HOW TO ORDER

Specify model number, adding discharge suffix A, B, C, or D. Example: KP701A. For 230 VAC operation, add a 2 after the K. Example: K2P701A.

RECESSED PACKAGED BLOWERS

DESCRIPTION

The Recessed Packaged Blowers utilize the same powerful blowers featured in Packaged Twin Blowers. They save critical panel space by extending into the space in the cabinet base and save a full 1¾ inches of panel height. There is no loss of airflow because the size of the open grille design still provides sufficient area to meet air delivery requirements.

FEATURES

- Capacities: 130 to 800 CFM
- Full air delivery, minimum panel height
- Steel cases with EIA-notched flanges
- 19-inch stainless steel grilles
- UL/CSA ball-bearing motors
- Dual inlet design for maximum airflow
- Inlet air cools motor for longer life
- Permanent filters
- Exhaust guards included
- Three foot SJ 3-wire power cord
- Accessories and options 1-13, page **C**•1649

HOW TO ORDER

Specify model number, adding dsicharge suffix A, B, C or D. Example: KPL529B. For 230 VAC operation, add a 2 after the K. Example: K2PL529B.

EMI-SHIELDED PACKAGED BLOWERS

DESCRIPTION

The KOOLTRONIC EMI shield conforms to the latest technology in attenuation of electromagnetic interference. The KPR Series combines this shield with Packaged Twin Blowers. This same shielded front end can also be used as an enclosure accessory, or incorporated into the entire line of KOOLTRONIC Packaged Blowers, as an option, with a few dimensional changes.

FEATURES

- Capacities: 130 to 800 CFM
- Shielding conforms to latest technology
- Steel cases with EIA-notched flanges
- 19-inch stainless steel grilles
- UL/CSA ball-bearing motors
- Dual inlet design for maximum airflow
- Inlet air cools motor for longer life
- Permanent filters
- Exhaust guards included

BROAD DISCHARGE PACKAGED BLOWERS

DESCRIPTION

KOOLTRONIC Broad Discharge Blowers combine a dual centrifugal blower with an internal plenum chamber to provide an even distribution of air, delivered across the entire width of the cabinet. This permits installation directly beneath the electronics for overall cooling of rows of printed circuit cards or similar electronic components, without need for a space-consuming external plenum chamber.

FEATURES

- Capacities: 270 to 800 CFM
- Internal plenum distributes airflow
- Steel cases with EIA-notched flanges
- 19-inch stainless steel grilles
- UL/CSA ball-bearing motors
- Dual inlet design for maximum airflow
- Inlet air cools motor for longer life
- Permanent filters
- Exhaust guards included
- Three foot SJ 3-wire power cord
- Accessories and options 1-13, page **C**•1649

HOW TO ORDER

Specify model number, adding discharge suffix C or D. Example: KPC729D. For 230 VAC operation, add a 2 after the K. Example K2PC729D.

HIGH CAPACITY BROAD DISCHARGE PACKAGED BLOWERS

DESCRIPTION

The KOOLTRONIC High Capacity Broad Discharge Packaged Blowers offer a unique design that ensures a uniform, broad discharge for more efficient heat removal across a larger area than previously attainable. A single unit delivers nearly double the airflow of Broad Discharge Packaged Blowers. These powerful blowers are available in sizes ranging from 17″ x 18″ to 17″ x 29¼″.

Designed for internal or external installation, either horizontally or vertically, including inverted top-mounted. Mountings include EIA-notched flanges, and side or end rails, all of which are bolted on for flexibility and ease of installation. Filtered air intake is through either the bottom or ends.

State-of-the-art technology makes this series of blowers ideal in applications where other approaches may not succeed. They are engineered and built for applications which require a large volume column of air in a wall-to-wall configuration.

FEATURES

- Capacities: 300 to 1250 CFM
- Wall-to-wall air distribution
- Versatile mounting configurations
- Heavy-gauge steel enclosures
- EC configuration includes EIA-notched flanges and 19-inch stainless steel grille at each end
- UL/CSA ball-bearing motors
- Dual inlet design for maximum airflow
- Inlet air cools motor for longer life
- Permanent filters
- Exhaust guards included
- Three foot SJ 3-wire power cord
- Accessories and options 1-12, page **C•1649**

HOW TO ORDER

Specify model number, adding configuration suffix. Example: KPC2729EC. For 230 VAC operation, add a 2 after the K. Example: K2PC2729EC.

CALL EXTENSION 44

CONFIGURATIONS

Filter Positions (Ambient Air Inlet)	Mounting Hardware: EIA-Notched Corner Flanges (C)	Side Rails (S)	End Rails (E)
Both Ends (E)	EC	ES	—
Bottom (L) End filter removal	LC	LS	LE
Bottom (M) Side filter removal	MC	MS	ME

The above chart, used in conjunction with the diagram below, will help you determine which filter location and method of mounting best suits your needs. These units can be mounted in virtually any orientation, internally or externally.

The configuration of your choice is determined by combining the filter position (E, L, M) and the mounting hardware (C, S, E) designations. The diagrams below show the location of the mounting hardware and the location of the filter, as well as the direction in which bottom filters are removed for cleaning.

EC model includes standard grille at each end. All dimensions are typical, except as noted.

DUCT SUPPLY PACKAGED BLOWERS

DESCRIPTION

KOOLTRONIC Duct Supply Blowers generate large volumes of cooling air in limited spaces. They deliver filtered air from either one or two side discharge ports to cool every component in an electronics system by means of a single centrifugal blower wheel. The large, narrow wheel, driven at a quiet, life extending low speed, delivers cooling air to side ducts at higher pressure than conventional blowers often used to supply duct systems.

FEATURES

- Capacities: 435 to 840 CFM
- Single or dual discharge ports
- Supplies air directly to cabinet duct
- Steel cases with EIA-notched flanges
- 19-inch stainless steel grilles
- UL/CSA ball-bearing motors
- Permanent filters
- Exhaust guards included
- Three foot SJ 3-wire power cord
- Accessories and options 1-13, page **C**•1649

HOW TO ORDER

Specify model number. For 230 VAC operation, add a 2 after the K. Example: K2DP875.

TANGENTIAL PACKAGED BLOWERS

DESCRIPTION

For panel-mounted applications requiring a quiet, filtered air supply, evenly distributed over the full outlet width. Easy to install, these blowers feature all-ball-bearing support and rubber isolation systems and are ideal where a moderate volume of air is required and static pressure is low.

FEATURES

- Capacities: 160 to 195 CFM
- Broad, quiet air supply
- Compact, easy to install
- Steel cases with EIA-notched flanges
- 19-inch stainless steel grilles
- UL/CSA ball-bearing motors
- Permanent filters
- Exhaust guards included
- Three foot SJ 3-wire power cord
- Accessories and options 1-13, page **C**•1649

CLOSED-LOOP COOLING

Many applications using sophisticated electronics require a closed-loop cooling system to dissipate heat buildup without introducing outside contaminated air. Closed-loop systems are required when electronic systems operate in hostile environments containing dirt, humidity or corrosives, which adversely affect the performance or ultimate survival of the electronics. Moreover, the presence of airborne particulate matter compounds the difficulty of controlling the temperature of electronic equipment.

Closed-loop cooling seals the electronics enclosure from hostile elements in the environment. Two separate circulation systems are employed. The internal system cools (and, in air conditioners, dehumidifies) the air inside the cabinet, totally isolating the sensitive electronics from the ambient. The external system uses circulating ambient air or water to discharge the heat removed from the electronics. Examples of closed-loop cooling equipment employed with electronics and process controls are air-cooled and water-cooled heat exchangers and air conditioners.

HEAT EXCHANGERS For installations that can operate at above-ambient temperatures, heat exchangers provide moderate-cost closed loop cooling. Air-to-air and water-to-air models cover a broad range of cabinet sizes and performance capacities, so that near-ambient to moderately-above-ambient temperatures can be achieved.

Advanced air-to-air heat exchangers include two heat transfer methods. One design uses a heat pipe core containing a liquid refrigerant, mounted between the ambient air path and the enclosure to be cooled. Another design employs a high-efficiency heat transfer element consisting of convoluted lightweight aluminum, fabricated into two totally separate air paths. With either method, the heated air leaving the electronics is directed through one side of the exchanger, where the heat passes through the exchanger element into the ambient-side airstream and is dissipated.

Water-to-air heat exchangers work by transferring heat of internal air to circulating cold water, resulting in chilled air which is recirculated throughout the electronics cabinet.

AIR CONDITIONERS are required where the equipment operating temperature must be kept lower than the ambient room temperature, and the cabinet must be sealed from dust, fumes and other contaminants. Hermetic air conditioners for electronics are available in air-cooled and water-cooled models.

AIR-COOLED AIR CONDITIONERS Heat removed from the electronics cabinet is discharged by circulating ambient air through the condenser coil and returning the heated air to the ambient. There are vertical and horizontal types for exterior mounting to side panels or the top of the enclosures, and for various internal positions.

WATER-COOLED AIR CONDITIONERS Intended primarily for extreme operating conditions of high-ambient temperatures or severe contaminants, these units utilize water as the medium for heat dissipation. The heat is absorbed by cool water circulating through a coaxial condenser coil, following which the heat-laden water is discharged or recirculated after cooling.

GENERAL SPECIFICATIONS FOR HEAT EXCHANGERS AND AIR CONDITIONERS

RUGGED CONSTRUCTION: heavy-gauge steel construction.

BAKED EPOXY FINISH: Durable, baked-on gray epoxy finish is standard. Other finishes are available.

PRECISION BALL-BEARING MOTORS: All blower motors are UL/CSA recognized, include automatic-reset thermal overload protection and are also cooled by the blowers' intake air, for maximum motor life. All motors meet Federal Specification CC-M-01807A, and include double-sealed or double-shielded precision ball bearings, which meet Federal Specification FF-B-171A. Special permanent lubricants perform over a broad temperature range: −20F (−29C) to 250F (121C).

PERMANENT FILTERS: Designed to last the life of the unit, the filters consist of a multi-layer grid of sturdy, adhesive coated corrugated aluminum in a one-piece aluminum frame. Filters are not required on water-cooled models.

POWER: Available in 115 or 230 VAC, 50 or 60 Hz. For other voltages and frequencies or other special requirements, consult KOOLTRONIC.

POWER CORD: All models are supplied with type SJ three-wire cord, for direct wiring to power source. Special lengths and/or plugs available.

CONDENSATE DISPOSAL (A/C): Condensate drain fitting and hose are included.

ACCESSORIES AND OPTIONS

- Adapter Plate for Rack Mounting
- Air Deflectors
- Airflow Switch
- Automatic Water Regulating Valve
- Condenser Access Panel
- Cooling Effect Detector
- Deep Drain Pan Kit
- Excess Heat Detector Package
- Excess Pressure Detector
- Filter Recoating Adhesive
- Filters for replacement
- Height Extension
- High Water Level Detector
- Internal corrosion resistant coatings
- Lifting Eyes
- Low Airflow Detector
- Low Ambient Kit
- Low Temperature Control
- Mounting Hinge
- Parallel Water Connections
- Rear Condenser Air Inlet Panel
- Refrigerant Charging Kit
- Short Cycle Protector
- Special external paint finish
- Special line cord or connectors
- Variable Speed Control
- Water Hookup—Opposite Side
- Weather Protection Kit

Not all Accessories and Options are applicable or available for all heat exchangers and air conditioners. For details and full descriptions, contact Kooltronic or see complete Design Guide/ Catalog, available on request. **CALL EXTENSION 44**

KXHE AIR-TO-AIR HEAT EXCHANGERS

DESCRIPTION

One of the newest additions to the KOOLTRONIC heat exchanger line, the KXHE Series of air-to-air heat exchangers combines a state of the art, high-efficiency convoluted aluminum heat transfer element with powerful blowers. (The narrow KXHE 120 and KXHE 122 use high performance fans.) This combination utilizes counterflowing air streams, the best method for achieving maximum heat transfer efficiency, while retaining the closed-loop system to provide cooling within sealed electronics cabinets. This exclusive KOOLTRONIC design is highly effective under a broad range of heat loads.

The KXHE Series is an ideal choice for applications in dusty, dirty or oil-laden environments. Under such conditions, despite filtration, particulate matter accumulates on heat transfer surfaces and reduces initial performance efficiency. **The KOOLTRONIC exclusive design assures good-as-new cooling performance because the sealed heat transfer element is quickly and easily removed for cleaning.**

These unique heat exchangers operate effectively when mounted vertically or horizontally, internally or externally, and are available in numerous sizes and capacities. The versatility of the KXHE Series heat exchangers makes them suitable in a wide range of design applications.

KXHE air-to-air heat exchangers are an excellent choice for all applications requiring a closed-loop system which can tolerate cabinet temperatures slightly above ambient. Where internal temperatures must be kept below ambient, the KPHE Series water-to-air heat exchangers (page **C**•1662) or one of our air conditioners (pages **C**•1663-1668) should be considered.

For operation outdoors, weather protection and external protective coatings are required.

FEATURES

- Lightweight design
- Closed-loop near-ambient cooling
- Unique heat transfer element; easily removed for cleaning
- Heavy-duty steel construction with baked epoxy finish
- UL/CSA ball-bearing motors
- Five foot (minimum) SJ 3-wire power cord
- Complete line of accessories

HOW TO ORDER

Specify model number, adding A for external or B for internal. Example: KXHE360A. For 230 VAC operation, add a 2 after the K. Example: K2XHE360A.

KTHE AIR-TO-AIR HEAT EXCHANGERS

DESCRIPTION

The KTHE Series of air-to-air heat exchangers use refrigerants to provide closed-loop cooling in applications where slightly above ambient temperatures are acceptable. Where internal temperatures must be kept below ambient, the KPHE Series water-to-air heat exchangers (page **C**•1662) or one of our many air conditioners (pages **C**•1663-1668) should be considered.

These units operate efficiently in a variety of mounting orientations (vertical, horizontal, external, internal) and are available in a range of sizes and capacities.

KTHE heat exchangers utilize a refrigerant-charged coil, in a system that includes two sets of powerful double blowers. They remove substantial heat loads from sealed cabinets, while maintaining low temperature differential above ambient. For example, model KTHE500 will remove 1,000 watts with only a 20F temperature rise, or 1,400 watts with only a 25F temperature rise. (See performance graphs on page **C**•1659 for details.)

For operation outdoors, weather protection and external protective coatings are required.

FEATURES

- Closed-loop near-ambient cooling
- Refrigerant-charged heat pipe core
- Heavy-duty steel construction with baked epoxy finish
- UL/CSA ball-bearing motors
- Three foot SJ 3-wire power cord
- Complete line of accessories

HOW TO ORDER

Specify model number. For 230 VAC operation, add a 2 after the K. Example: K2THE500.

WATER-TO-AIR HEAT EXCHANGERS

DESCRIPTION

KOOLTRONIC water-to-air heat exchangers provide uniform cooling in a closed-loop system where a reliable source of clean, cool water is available. The KPHE Series is designed primarily for use in harsh environments with cooling requirements in excess of the capabilities of air-to-air heat exchangers. They are particularly useful in highly contaminated environments that would require very frequent cleaning or changing of ambient air filters, or require frequent cleaning of the heat exchanger core. KOOLTRONIC water-to-air heat exchangers can furnish greater cooling capacities than air-to-air models, depending on water temperature and rate of flow. Ambient air is sealed out; heat-transfer surfaces remain clean. The higher cooling ability of the KPHE Series depends on the temperature of the cooling water. Thus, if the water is cold enough, the temperature of the air delivered to the electronics cabinet can actually be lower than that provided by air conditioners, at less cost.

KPHE Series heat exchangers are available in two sizes and capacities. Model KPHE40 includes the Excess Heat Detector and High Water Level Detector Packages and the Automatic Water Flow Regulating Valve as standard features. A complete range of accessories and options are available for both units, adding to their versatility.

For operation outdoors or in corrosive atmospheres, weather protection and/or special internal and external protective coatings are required.

FEATURES

- Ideal for extremely hot, harsh environments
- Closed-loop cooling
- Capable of below-ambient cooling
- Heavy-duty steel construction with baked epoxy finish
- UL/CSA ball-bearing motors
- Three foot SJ 3-wire power cord
- Complete line of accessories

HOW TO ORDER

Specify model number. For 230 VAC operation, add a 2 after the K. Example: K2PHE39.

MINI PANEL-MOUNTED AIR CONDITIONERS

DESCRIPTION

KOOLTRONIC Mini Air Conditioners are ideal for low-capacity applications with space limitations. Mounted on any vertical panel of electronic equipment enclosures, they occupy minimal floor space and no cabinet space. Hostile ambient air is sealed out by the closed-loop design and gasketed mountings.

Micro-Mini air conditioners are suitable for applications that have low static pressures, where fans can provide adequate airflow.

The Super-Mini models are recommended where densely packed components cause higher static pressures that are beyond the capability of a fan-driven air system. Superior performance is obtained through use of a centrifugal blower recirculating the clean, cool dehumidified air throughout the cabinet at high flow rates.

Where rack mounting is required, special adapter plates are available.

For operation outdoors or in corrosive atmospheres, weather protection and/or special internal and external protective coatings are required.

For assistance in model selection, call KOOLTRONIC or request the KOOLTRONIC Air Conditioner Selection Guide.

- **Popular models in stock, ready to ship**

AIR-COOLED PANEL-MOUNTED AIR CONDITIONERS

DESCRIPTION

These series offer the greatest choice, with fourteen cooling capacities ranging from 1,000 to 16,000 BTU/Hr.
There are six heights ranging from 24 to 59 inches, for maximum flexibility to obtain optimal cooling efficiency.
THE KOOLTRONIC design forces the cooling air through all the heat-producing components by allowing the warm-air return to be as far as possible from the cool air outlets.
Extremely compact, these units require about one square foot of floor space and no cabinet space. They can be installed either fixed or hinged, directly to any vertical cabinet panel or door. Gasketed mountings and the closed-loop design seal out moisture and contaminant-laden ambient air. Powerful centrifugal blowers circulate clean, cool air through the electronics. Unique side-panel condenser air inlets on the P47, P52 and P59 Series models allow positioning close to obstructions, without impeding condenser airflow. An optional rear condenser air inlet is available.
For operation outdoors or in corrosive atmospheres, weather protection and/or special internal and external protective coatings are required.

AIR-COOLED PANEL-MOUNTED AIR CONDITIONERS

FEATURES

- Capacities from 1,000 to 16,000 BTU/Hr.
- Six heights available
- Compact design requires only 1 square foot of floor space
- Versatile mounting locations
- Heavy-duty steel enclosures with baked epoxy finish
- UL/CSA ball-bearing motors
- Ten foot SJ 3-wire power cord
- Complete line of accessories

For assistance in model selection, call KOOLTRONIC or request the KOOLTRONIC Air Conditioner Selection Guide.

RACK-MOUNTED AIR CONDITIONERS

DESCRIPTION

Available in both horizontal and vertical configurations, KOOLTRONIC Rack-Mounted Air Conditioners are particularly suited for applications where internal or cabinet-top mounting is preferred over external panel mounting.
Horizontal models are mounted externally on top of the cabinet, or internally at either the top or bottom of the cabinet. Vertical models are designed for interior or exterior mounting to any vertical cabinet surface.
For operation outdoors or in corrosive atmospheres, weather protection and/or special internal and external protective coatings are required.
Higher capacity versions of the externally top-mounted units in this series (H5 and H6), are the Horizontal Top-Mounted Air

Rack-mounted units with flanges include attractive 19-inch wide stainless steel grilles with knurled captive fasteners for easy removal. Grille area is 65% open.

For assistance in model selection, call KOOLTRONIC or request the KOOLTRONIC Air Conditioner Selection Guide.

FEATURES

- Capacities from 1,500 to 6,000 BTU/Hr.
- Horizontal and vertical mountings
- Ideal for internal or cabinet-top mounting
- Heavy-duty steel enclosures with baked epoxy finish
- Models available with EIA-notched flanges and stainless steel grilles
- UL/CSA ball-bearing motors
- Three foot SJ 3-wire power cord
- Complete line of accessories

APPROXIMATE WEIGHT

95 lbs.

ACCESSORIES/OPTIONS

- Airflow Deflectors
- Airflow Switch
- Cooling Effect Detector
- Excess Pressure Detector
- Filter Recoating Adhesive
- Filters for replacement
- Internal corrosion resistant coatings
- Lifting Eyes
- Low Airflow Detector
- Low Temperature Control
- Refrigerant Charging Kit
- Short Cycle Protector
- Special external paint finish
- Weather Protection Kit
- Special line cord or connectors

HORIZONTAL TOP-MOUNTED AIR CONDITIONERS

DESCRIPTION

KOOLTRONIC Horizontal Top-Mounted Air Conditioners provide compact, low-silhouette, medium- to high-capacity cooling where space or other limitations prevent panel or internal rack mounting.

This versatile line of top-mounted air conditioners offers a broad range of capacities in two sizes. They feature specially designed, heavy-duty centrifugal blowers to force the cooling air throughout the electronics cabinet.

For operation outdoors or in corrosive atmospheres, weather protection and/or special internal and external protective coatings are required.

For lower-capacity versions, see Rack-Mounted Air Conditioners (H5 and H6) on page **C•1666**.

For assistance in model selection, call KOOLTRONIC or request the KOOLTRONIC Air Conditioner Selection Guide.

FEATURES

- Capacities from 7,000 to 16,000 BTU/Hr.
- Heavy-duty steel enclosures with baked epoxy finish
- UL/CSA ball-bearing motors
- Five foot SJ 3-wire power cord
- Complete line of accessories

WATER-COOLED PANEL MOUNTED AIR CONDITIONERS

DESCRIPTION

For extreme ambient temperatures and/or severely contaminated environments, KOOLTRONIC Water-Cooled Air Conditioners are recommended. Cool circulating water has greater heat-removal capacity than hot ambient air. Since ambient air is sealed out, there are no filters to clean and no contaminant can reach the heat exchange element.

These units contain an automatic regulating valve, high pressure shut-off control and other safeguards.

Sized similarly to the Air-Cooled Panel-Mounted Series, these units occupy minimal floor space and no cabinet space. Installed either fixed or hinged to any vertical cabinet panel or door, they retain the closed-loop design and gasketed mounting features, to seal out contaminants and protect the electronics.

For assistance in model selection, call KOOLTRONIC or request the KOOLTRONIC Air Conditioner Selection Guide.

APPROXIMATE WEIGHT

WP28 & WP36 Series	100 lbs.	WP52 Series	130-135 lbs.
WP47 Series	125 lbs.	WP59 Series	135-140 lbs.

FEATURES

- Capacities from 4,000 to 12,000 BTU/Hr.
- Suitable for extreme environments
- Protective water flow controls
- Versatile mounting locations
- Heavy-duty steel enclosures with baked epoxy finish
- UL/CSA ball-bearing motors
- Ten foot SJ 3-wire power cord
- Complete line of accessories

HOW TO ORDER

Specify model number by adding height after the P. Example: KAC8WP/59.

- **Popular models in stock, ready to ship**
- **Call for Complete Design Guide/Catalog**
- **We invite inquiries about custom-designed units for unique applications**

TECHNICAL DATA

1. MOTOR DEVICES

The building block for tubeaxial fans is the shade-pole external rotor motor with class B insulation system. This kind of external rotor rotates around the internal stator. The steel impellers are attached directly to the external rotor which allows the excellent heat dissipation and the low life-cycle cost. These elements result in a compact design with the high air performance.

2. CONSTRUCTION

All-metal construction provides the excellent heat dissipation, long life, and structural stability. The fan itself functions as a heat sink by effectively transferring heat from the motor to the air stream via the steel impeller blades, which are welded directly to the rotor hub. The housing is die-cast aluminum. The surfaces of fans are finished with an electrostatically black varnish to protect against severe environmental conditions.

3. BEARING SYSTEM

a. Sleeve Bearing: A sintered bronze bearing impregnated with high-quality oil. Hydri-dynamic pumping and pressure at the front end of an air-tight system causes oil to move along the shaft to provide a constant film of lubricant.
The recommended temperature range for the sleeve bearing unit is −10°C to +60°C without any worries.

b. Ball Bearing: Ball bearing is double-shielded electric motor quality bearing, pressed fitting into the rotor bor.
The recommended temperature range for the ball bearing unit is −30°C to +75°C without any worries.

4. MOUNTING METHOD

80 x 80 x 38MM: Tubeaxial fans can be mounted from either face using four 0.169″ (4.3MM) holes with #8 screws and nuts.

119 x 119 x 38MM: Tubeaxial fans can be mounted from either face using four 0.177″ (4.5MM) holes with #8 screws and nuts. Ground connections are located on the housing.

5. NOISE LEVEL

The sound pressure level heard depends upon the sound power of the source and listening conditions. The average sound pressure shown is at distance of one meter and with the fan next to one reflecting surface.
The low noise levels of tubeaxial fans are achieved by the computer-assisted-design of impeller blades and by precision manufacturing and balancing at both sides of planes.

6. SAFETY CODES

Because of the use of high-quality insulating material, low winding temperature, high output torque and highest-grade bearings, tubeaxial fans increase safety to meet UL requirements fully; besides, our motors are impedance protection, so the wiring will not burn out even if the rotating parts are restricted.
It is the responsibility of the users to be sure that tubeaxial fans are installed and operated in accordance with all safety codes. Be aware that the connecting screws for ground leads do not extend into the housing opening and impede operation of the impeller blades.

7. LIFE EXPECTANCY

The actual life of tubeaxial fans will depend upon operating conditions, such as ambient temperature, duty cycle, vibration, mounting position, and environmental conditions.
A typical operation life for 40°C ambient conditions would be between 20,000 to 40,000 hours.

MARLOW INDUSTRIES

SOLID STATE RELIABILITY

THERMOELECTRIC COOLERS are solid-state, vibration-free, noise-free heat pumps. They are modular devices, so are simple to install and operate. Since they consist primarily of thermoelectric material sandwiched between ceramic plates and have no moving parts, they are inherently reliable.

The standard coolers listed below are grouped according to the number of stages indicated by the first digit following the "MI". Within each group they are sorted according to "Qmax", the net heat load to completely suppress ΔT at the maximum applied power (Imax @ Vmax). For example, the MI3026T is a 3-stage cooler which produces 109° C ΔT in a vacuum at 1.4 amps @ 3.6 volts. It will take 0.72 watts to completely suppress that ΔT to zero. This suppression is linear so that, 10% of Qmax (0.072 watts) applied to the cold plate would suppress ΔT 10% thereby producing 98.1°C ΔT for that heat load condition.

Performance below Imax and Vmax is obtainable using the adjacent performance chart. It can be used to define any achievable condition for each cooler by simply substituting the chosen cooler's "max" values listed in the table. It can also be used, starting with the desired cooling requirement, to select or evaluate the best cooler from the table for your requirement.

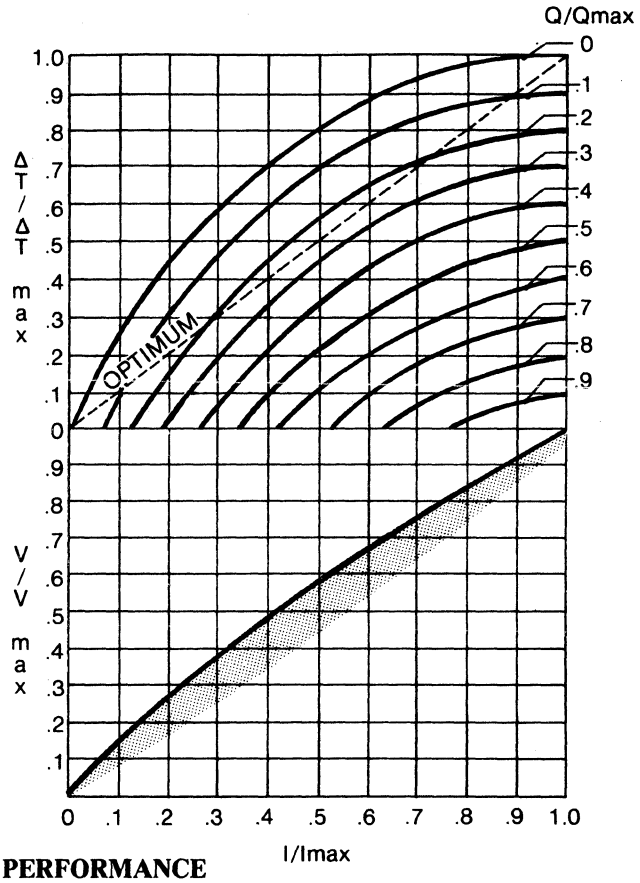
NOTE: The above chart is based on a hot side temperature of 27 °C. It can be used as-is for hot side temperatures of T_h = 15 °C to 40 °C with less than 10% errors. To improve accuracy, convert the respective maximum values per the following formulas:

$\Delta Tmax @ T_h = \Delta Tmax * [1 + .0056 * (T_h - 27\ °C)]$ $\quad$ $Vmax @ T_h = Vmax * [1 + .0047 * (T_h - 27\ °C)]$

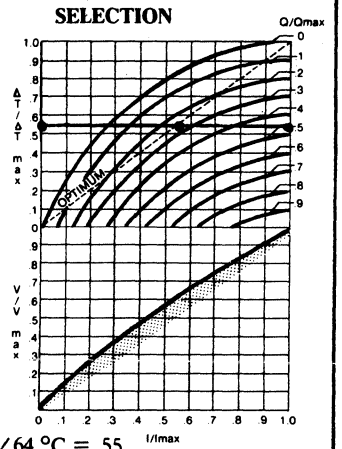
$Qmax @ T_h = Qmax * [1 + .0042 * (T_h - 27\ °C)]$ $\quad$ $Imax @ T_h = Imax\ Constant$

HIGH PERFORMANCE COOLERS

HOW TO USE CHART



EXAMPLE Select a cooler to pump 9 watts at a cold side temperature of -8°C from a hot side of 27 °C. Ambient is dry nitrogen.

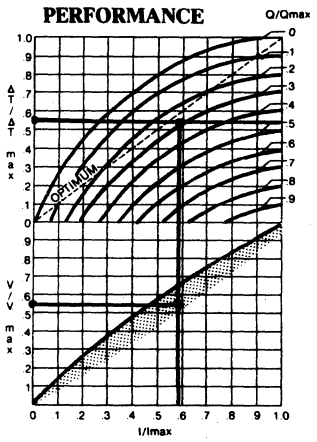


SELECTION

1. **Select number of stages and calculate ΔT/ ΔTmax.** The example ΔT is 35 °C and, by observing the table, can be achieved with a single stage cooler:
   ΔT/ΔTmax = 35 °C / 64 °C = .55
2. **Draw the corresponding horizontal line on the upper graph.**
3. **Read Q/Qmax for the optimum and maximum cooling cases.**
   Optimum Q/Qmax = .25
   Maximum Q/Qmax = .45
4. **Calculate Qmax:**
   Optimum Qmax = 9 watts / .25 = 36 watts
   Maximum Qmax = 9 watts / .45 = 20 watts
5. **Select a cooler from the table** whose Qmax is greater than 20 watts but less than 36 watts, favoring the optimum Qmax for maximum efficiency or maximum Qmax for potentially lower cost:
   Select MI 1063 with Qmax = 31 watts

PERFORMANCE

1. **Record the maximum values for the selected cooler:** MI 1063
   Qmax = 31 watts
   Imax = 6.0 Amps
   Vmax = 8.5 Volts
2. **Calculate Q/Qmax and plot corresponding vertical line** from the intersection of this Q/Qmax and the original horizontal line:
   Q/Qmax = 9 watts / 31 watts = .29
3. **Read I/Imax and calculate I:**
   I/Imax = .59
   I = 6 amps * .59 = 3.5 amps
4. **Plot horizontal line** in the lower graph from the intersection of the vertical line and the curve. Note: Use the solid curve for Q/Qmax = 0 and shaded area for higher values of Q/Qmax
5. **Read V/Vmax and calculate V:**
   V/Vmax = .56
   V = 8.5 volts * .56 = 4.8 volts



SUMMARY

The **MI 1063** was selected and can produce the thermal performance given in the example with an applied power of **3.5 amps @ 4.8 volts.**

The chart presented above is good for 1 and 2-stage coolers. It should only be considered as a rough guide for multi-stage coolers. Consult factory for engineering assistance if precision is required.

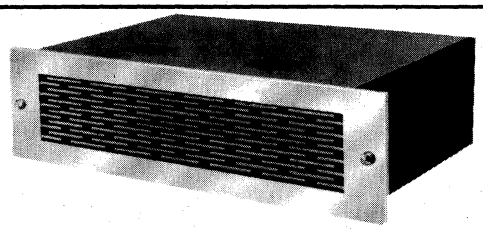
In addition to our line of standard coolers, Marlow Industries sells a complete line of special coolers temperature controller/power supplies, heat sinks, thermal compounds and other accessories plus complete cooling assemblies. See back page.

Please call or write today for further information or technical assistance.

McLEAN PACKAGED COOLING EQUIPMENT

RACK—MOUNTED BLOWERS

Over 100 models available in any panel width. Heights from 3½" to 12¼". Airflows to 1000 CFM. Pressurize systems with cool, filtered air. Prevent dust from entering systems. Standard EIA notching. Quick, easy mounting. No cutting. No filing. Also Packaged Fans for pressurizing or evacuating. Four sizes. Airflows from 275 to 1200 CFM. All units available to Commercial, Military or EMI Shielded Specifications.



MODEL	CAT. PAGE	CFM	PANEL* HEIGHTS	MOTOR** RPM	MOTOR** AMPS OR WATTS	REMARKS
2EB300	10	130	3½ & 5¼	2900	80W	FOR LIMITED SPACE

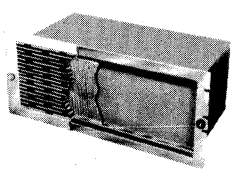
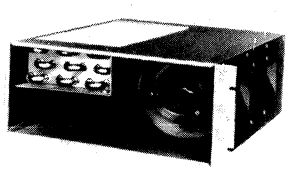
* ALL MODELS ARE 19" WIDTH EXCEPT IDB300 (HALF PANEL) ** ALL MOTORS ARE 115V 50/60 HZ
UL RECOGNIZED AND CSA CERTIFIED † MODELS AVAILABLE IN 24-48VDC
UNITS ALSO AVAILABLE TO OTHER RACK WIDTHS AND FOR RECESSED INSTALLATION



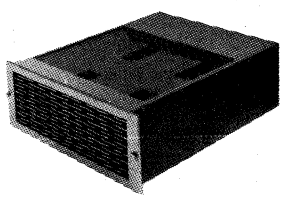
EMI—SHIELDED UNITS

All packaged blowers available with an EMI shield and wave guide media built into the airstream. Cuts signal leakage inward or outward.



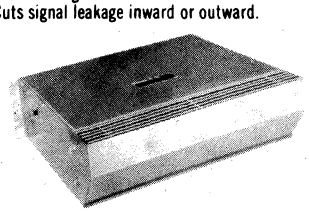
HEAT EXCHANGERS

Maintain cabinet temperature at 80°F maximum with 1 KW heat dissipation. Air recirculates in rack and is cooled by exchanger in blower case.



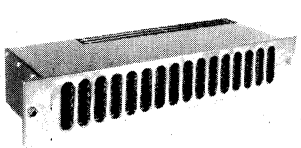
CARD COOLER

Replaces bulky fan trays. High volume, high pressure filtered air. Low noise, compact, wide cooling discharge. Requires little panel space.



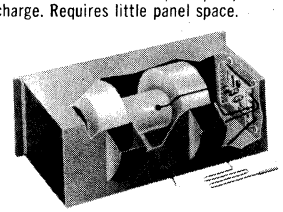
SIDEWINDER BLOWERS

More air. More pressure. Less space. Delivers 180, 350 or 550CFM in a 17" wide airstream.



SLOT BLOWERS

Ideal for jam-packed circuitry. Delivers 150 CFM from a 3½" panel. Quiet.



SOLID STATE TEMPERATURE CONTROLLERS

Cuts noise level. Modulates blower speed. Keeps operating between 80-90°F. Costs less than air conditioning.

Also a broad line of accessory equipment including grilles, controls, etc.

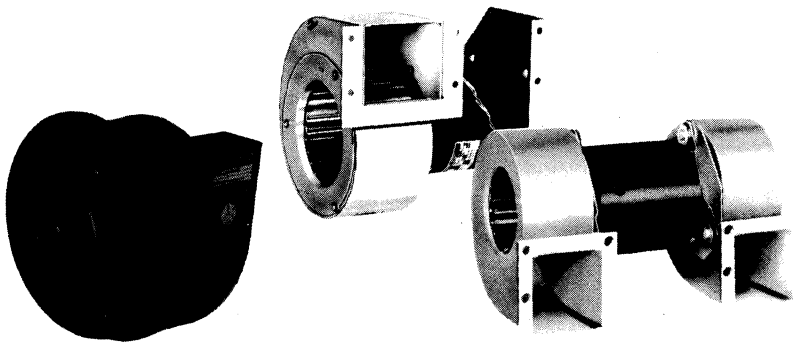
McLEAN SINGLE & DUAL CENTRIFUGAL BLOWERS

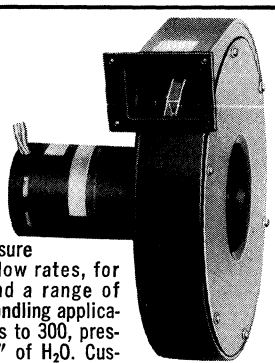
Fans—Orifice, Panel, Reversible, Filter Grille Panels

SINGLE & DUAL CENTRIFUGALS

Wide choice of static pressures — 0" to 3.0". Outputs range up to 2000 CFM. Wheel diameters range from 3" to 12". Motors supplied to any AC frequency or power, single or three-phase. Bearings properly loaded, double-shielded, permanently lubricated. Motors and wheels precision balanced for vibration-free performance. Motors, UL recognized and CSA certified. Units are also available in 24-48VDC.

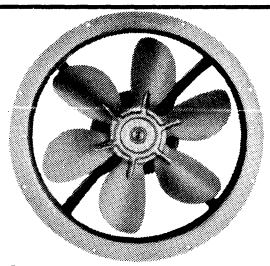


RADIAL WHEEL BLOWERS



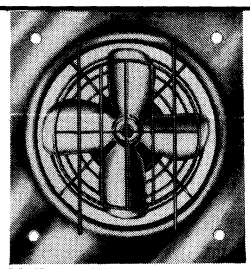
Higher pressure at lower flow rates, for cooling and a range of other air-handling applications. CFM's to 300, pressures to 8" of H_2O. Custom design capability for specific requirements.

ORIFICE MOUNTED FANS



Push or pull airflow. CFMs 275, 300 or 395. Dim. 4" x 8½" or 4¾" x 10¼". Quiet, vibrationless 115V/50/60 Hz, 1600 RPM, or 3000 RPM.

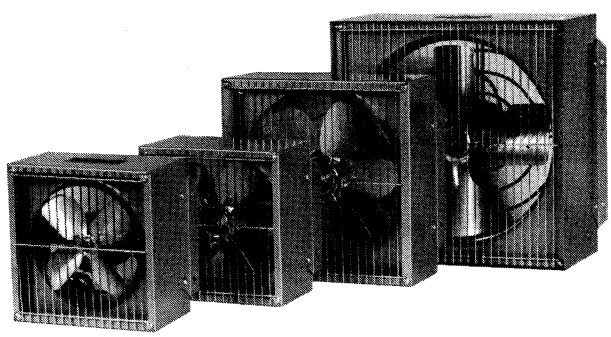
PANEL MOUNTED FANS

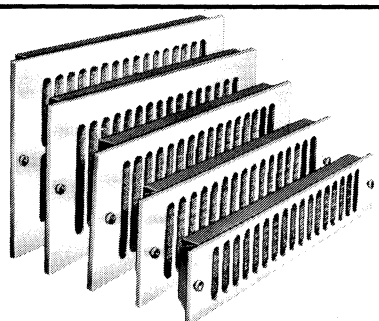


Low cost, long life, ready to mount, shaft in any position. 265 CFM, 3100 RPM, 115V/50/60 Hz. Dim. 9" square panel on 7" centers, 4 23/32" deep.

REVERSIBLE FILTER BOX PROPELLER FANS

MODEL 1RB65 delivers 275 cfm, 3100 rpm 4½" deep x 8⅞" square. MODEL 1RB80 delivers 450 cfm, 1650 rpm 4½" deep x 8⅞" square. MODEL 1RB100 delivers 725 cfm, 1600 rpm 4½" deep x 12⅛" square. MODEL 1RB120 delivers 1200 cfm, 1450 rpm 7⅜" deep x 15⅛" square. MODEL LA120 Back Draft Damper is used in conjunction with Model 1RB120. Louvers automatically open when power is applied and close when power is off. May be used in horizontal or vertical positions.





FILTER GRILLE ASSEMBLIES

For use in cabinets where louvered area is needed for ventilation. Supplied complete with dust filters and in panel heights of 3½" to 10½" and widths 9½", 19", 24" and 30".

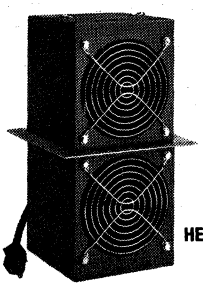
McLEAN MIDWEST

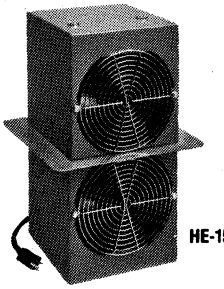
Air-to-Air Heat Exchangers

These high performance heat exchangers remove heat load from uninsulated sealed enclosures with a minimal temperature rise above the ambient. Fans and blowers are limited to a maximum air temperature of 155 F.

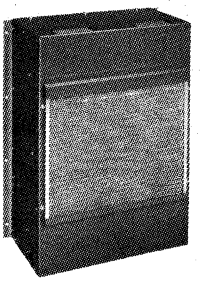
All the models feature the McLean closed-loop design. Only clean enclosure air is used to cool the electronic components. Hostile ambient air is sealed out. All units are available in 115V and 230V versions, and most are also available for DC power.



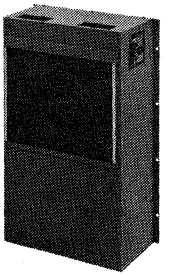
HE-11



HE-15



HE-24



HE-28

HE-11
High CFM ball-bearing fans. Mounts on any surface of enclosure, including top. Low power consumption.

Package is 11 5/16" high (protrudes 5⅝" outside enclosure), 5¼" deep, 5⅛" wide. Mounting flange is 6¾" square. Net wt. 9½ lbs.

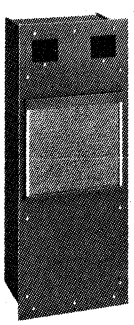
HE-15
High CFM ball-bearing fans. Mounts on any surface of enclosure, including top. Low power consumption.

Package is 15" high (protrudes 7½" outside enclosure), 7⅞" deep, 7⅛" wide. Mounting flange is 10" square. Net wt. 20 lbs.

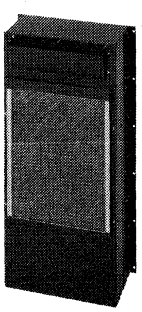
HE-24 SERIES
Powerful centrifugal blowers provide high CFM against high static pressure. Mounts on door, side, back, top or rack of enclosure.

Dimensions: 24" high, 9⅛" deep, 19" wide.

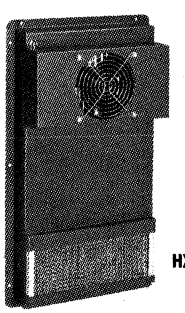
HE-28 SERIES
Centrifugal blowers provide high CFM against high static pressure. Mounts on door, side, back, top or rack of enclosure.
Dimensions: 28½" high, 8 1/16" deep, 19" wide.



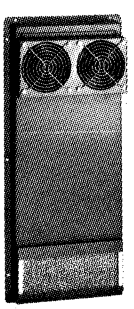
Narrow HE-33



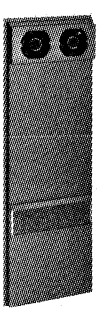
HE-36



HX-20



HX-26



HX-60

NARROW HE-33 SERIES
Centrifugal blowers provide high CFM against high static pressure. Mounts fully recessed on door, side, back or top of enclosure and also available for external mounting.

Dimensions: 34¼" high, 9" deep, 13¾" wide.

HE-36 SERIES
Centrifugal blowers provide high CFM against high static pressure. Mounts on door, side, back, top or rack of enclosure.

Dimensions: 36 1/16" high, 8 1/16" deep, 19" wide.

HX-20
Convoluted aluminum core with counter-flow air cooling design. High CFM ball-bearing fans. Mounts on any surface, including top, outside or inside the enclosure. Mounts horizontally or vertically. Low power consumption.

Package is 20 3/16" high, 2" deep, 11 3/16" wide (fan housings extend out an additional 2⅛"). Net wt. 13 lbs.

HX-26
Convoluted aluminum core with counter-flow air cooling design. High CFM ball-bearing fans. Mounts on any surface, including top, outside or inside the enclosure. Mounts horizontally or vertically. Low power consumption.

Package is 26 3/16" high, 2" deep, 11 3/16" wide (fan housings extend out an additional 1¾"). Net wt. 21 lbs.

HX-60
Convoluted aluminum core with counter-flow air cooling design. High CFM ball-bearing fans. Mounts on any surface, including top, outside or inside the enclosure. Mounts horizontally or vertically. Low power consumption.

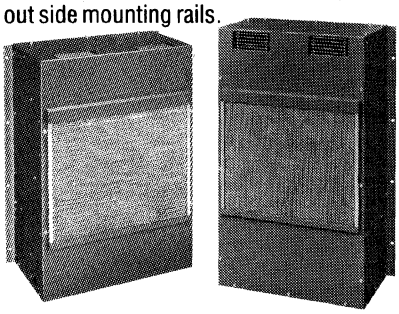
Package is 59⅞" high, 2" deep, 19⅞" wide (fan housings extend out an additional 1 9/16"). Net wt. 58 lbs.

Contact us for our new complete Catalog/Cooling Guide. It's a "must" for anyone concerned with providing climate control for electronic enclosures.

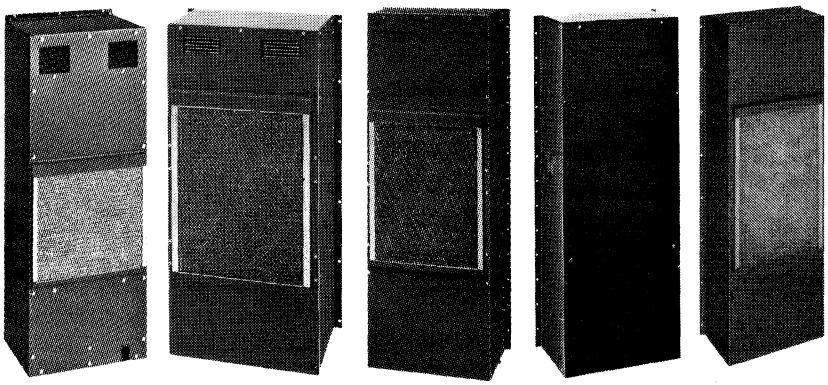
Air Conditioners

SLIMBOY® SERIES

For mounting on door, side or rack of cabinet. Most Slimboy models available in narrow versions, without side mounting rails.



SLIMBOY 24 SLIMBOY 28



NARROW SLIMBOY 33 STANDARD SLIMBOY 36 STANDARD SLIMBOY 47 WATER-COOLED SLIMBOY 47 SLIMBOY 52

SLIMBOY 24 SERIES
Capacity: 1400-2000-3000 BTU/HR @ 125°F.
Dimensions: 24" high, 9⅛" deep, 19" wide.

SLIMBOY 28 SERIES
Capacity: 2000-3000-4000 BTU/HR @ 125°F.
Dimensions: 28½" high, 9⅛" deep, 19" wide.

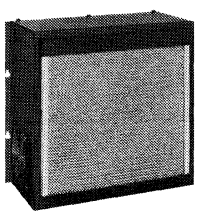
NARROW SLIMBOY 33 SERIES
High capacity cooling in a very narrow package, only 12⅜" wide.
Capacity: 2000-4000 BTU/HR @ 125°F.
Dimensions: 34⅛" high, 8 13/16" deep, 12⅜" wide; top and bottom mounting flanges only.
Note: Slimboy 33 also available for fully recessed mounting.

STANDARD SLIMBOY 36 SERIES and **NARROW SLIMBOY 36 SERIES** (only 15" wide)
Capacity: Standard 36—4000-5000-6000-8000 BTU/HR @ 125°F.
Narrow 36—4000-5000-6000 BTU/HR @ 125°F.
Dimensions: Standard 36—36 1/16" high, 10" deep, 19" wide.
Narrow 36—38 1/16" high, 10" deep, 15" wide; top and bottom mounting flanges only.

STANDARD SLIMBOY 47 SERIES and **NARROW SLIMBOY 47 SERIES** (only 15" wide).
Extremely versatile unit. Narrow model offers big capacity up to 10,000 BTU/HR.
Capacity: Standard 47—4000-5000-6000 BTU/HR @ 125°F.
Narrow 47—4000-5000-6000-10,000 BTU/HR @ 125°F.
Dimensions: Standard 47—47¼" high, 10" deep, 19" wide.
Narrow 47—49⅛" high, 10" deep, 15" wide; top and botton mounting flanges only.

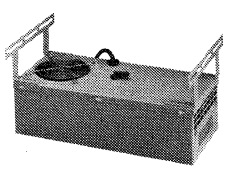
WATER-COOLED SLIMBOY 47 SERIES
Ideal for extremely hostile environments. Big cooling capacity. Interchangeable with Standard 47 Series air conditioner.
Capacity: Models ranging from 4000 to 12,000 BTU/HR @ 125°F.
Dimensions: 47¼" high, 10" deep, 19" wide.

SLIMBOY 52 SERIES
Capacity: Models ranging from 5000 to 12,000 BTU/HR @ 125°F.
Dimensions: 52⅝" high, 9½" deep, 19" wide.



MICRO-MINI SLIMBOY

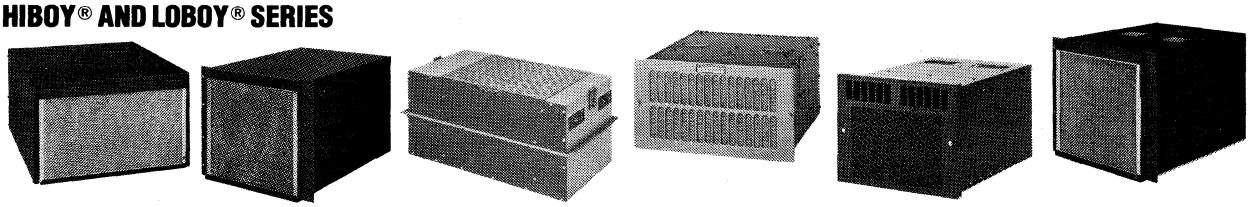
Standard 13 Series and High-capacity 13 Series
Capacity: Standard 13—1200 BTU/HR @ 110°F.
High-capacity 13—1400 BTU/HR @ 125°F.
Dimensions: Ultra-small at 12⅞" high, 6¼" deep, 14⅛" wide.



CONDENSATE EVAPORATOR

Evaporates the condensate from air conditioners vertically mounted to sealed enclosures, where a conventional drain system is not feasible. Models available for all McLean Slimboy and Micro-Mini Slimboy units.

HIBOY® AND LOBOY® SERIES



HIBOY 11 HIBOY 16 HIBOY 30 LOBOY 11 LOBOY 14 LOBOY 16

HIBOY 11 SERIES
Mounted on the top surface of the enclosure.
Built-in condensate evaporation.
Capacity: 2000-3000-4000 BTU/HR @ 125°F.
Dimensions: 10¼" high, 20" deep, 17" wide.
Note: Hiboy 11 model also available for rack mounting inside enclosure.

HIBOY 16 SERIES
Rack mounted inside enclosure at the top, or outside on top surface.
Capacity: 5000-6000-7000 BTU/HR @ 125°F.
Dimensions: 15¾" high, 24" deep, 19" wide.

HIBOY 30 SERIES
Capacity: 4000-5000-6000 BTU/HR @ 125°F.
Dimensions: 14" high, 31⅜" long, 16⅜" wide.
Note: Standard model mounts partially recessed on top; special model available to mount on top surface of enclosure.

LOBOY 11 SERIES
Rack mounted inside the enclosure near the bottom.
Capacity: 2000-3000-4000 BTU/HR @ 125°F.
Dimensions: 10 15/32" high, 19⅝" deep, 19" wide.

LOBOY 14 SERIES
Requires no rear ducting; air intake and exhaust both on face of unit. Rack mounts at bottom or near bottom of enclosure.
Capacity: 4000-5000-6000-7000 BTU/HR @ 125°F.
Dimensions: 14¾" high, 24 11/16" deep, 19" wide.

LOBOY 16 SERIES
Rack mounts inside the enclosure near the bottom. Built-in condensate evaporation.
Capacity: 5000-6000-7000-10,000 BTU/HR @ 125°F.
Dimensions: 15¾" high, 24" deep, 19" wide.

MECHATRONICS
FOR AXIAL COOLING FANS

MECHATRONICS

Mechatronics is staffed with highly trained and motivated sales and technical personnel. As a national distributor with well established offices in Los Angeles, San Francisco, Chicago, New England, Atlanta, Dallas and Seattle, customers can be serviced quickly and efficiently. Quotations and evaluation samples can be handled, in most cases, on an overnight basis.

We sincerely believe the benefits of Mechatronics' "Right Buy" program assure our customers of making the right buy for air cooling fan requirements. Please give us strong consideration and let Mechatronics prove how the "Right Buy" can solve your present and future air cooling fan requirements.

Mechatronics is a rapidly expanding company specializing in the marketing and distribution of air cooling fans throughout the U.S.A. Mechatronics offers several features not readily available from any other air cooling fan source: • Highest Quality • Proven Performance • Volume Production • Competive Pricing • Fast Delivery.

SOLID STATE COOLING WITH THERMOELECTRICS

Thermoelectric (Peltier) Heat Pump Module Specifications

Thermocouples constructed of N & P elements of highest grade bismuth telluride in form of oriented polycrystalline ingots. Ingot ends soldered to copper bus bars interfaced with ceramic plates, affording good mechanical integrity, high dielectric strength and thermal conduction. Temperature range, −150°C to +80°C. Solid state construction. Both hot and cold faces lapped flat, TYPE L. Both faces metallized and tinned, TYPE TT. Hybrid, hot face tinned, cold face lapped, TYPE TL.

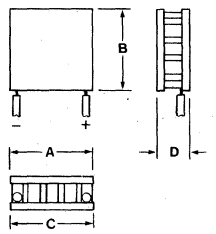
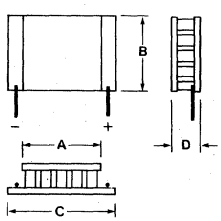
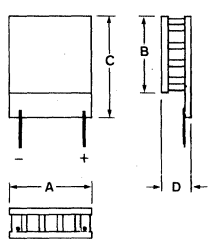
DIMENSIONS



CP Series
FC Series — Option One (2) (4)



FC Series — Standard



FC Series — Option Two (3)

Notes:

(1) Shown in largest size. Also available in all smaller sizes listed in group that follows.

(2) Option 1: Disregard Dim.C from table. Use Dim.C = Dim.A

(3) Option 2: Dim.C = Dim.B + 1.7 mm (FC 0.45); + 2.1 mm (FC 0.6); + 2.3 mm (FC 0.7)

(4) Option 1: Each size listed contains one less thermocouple, "N." Decrease N, GXN, Q and V accordingly.

(5) Thickness (D,mm) for Type L only.

SOLID STATE COOLING WITH THERMOELECTRICS

How To Use Universal Performance Graphs:

APPROACH #1: Convert universal scale values to those of specific module selected:

1. Convert Q_c/GxN (scale values) to Q_c (watts heat pumped): Multiply Q_c/GxN values by module GxN (from table in module specifications chart).

2. Convert V/N values to V (volts input): Multiply V/N values by module N from table.

3. Convert 50 G, 40 G, etc. to I (amps input) values: Multiply 50 by module G, etc.

APPROACH #2: From application, knowing required Q_c, T_c and T_h, select appropriate module:

1. Calculate $\triangle T = T_h - T_c$; select operating current I (I max = 50 G).

2. From universals, obtain Q_c/GxN. Calculate GxN.

3. Select appropriate module from GxN table in module specifications chart.

EXAMPLE: Required Q_c = 31 Watts, T_c = +5°C, T_h = +35°C

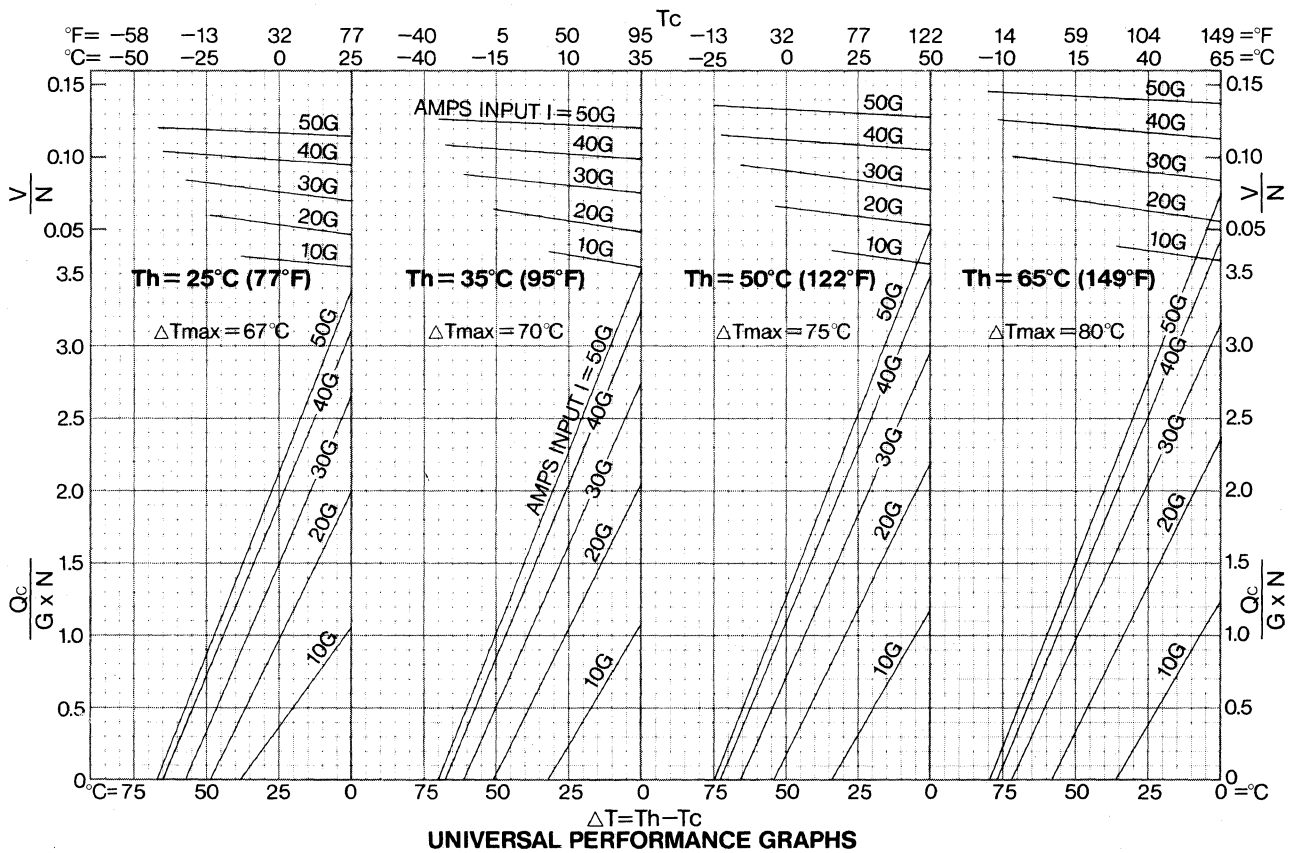
1. $\triangle T$ = 35° − 5° = 30°C. Choose operating current (typically from 30 G to 40 G) at 35 G (equals 35/50 = 70% of I max.)

2. From T_h = 35°C graph ($\triangle T$ = 30°, I = 35 G), obtain Q_c/GxN = 1.65; Then GxN = Q_c/1.65 = 31/1.65 = 18.8.

3. Choose module with GxN ≥ 18.8; choose CP1.4-127-045 (GxN = 21.6) or CP2-71-06 (GxN = 19.9).

If desired, approach #1 may now be followed for module selected.

Model CP1.4 – 127 – 06L
CP Series, Type L
1.4 x 1.4mm Thermoelement Cross Section
127 Thermocouples
.06″ Thermoelement Height



UNIVERSAL PERFORMANCE GRAPHS

Tc = Cold Face Temperature; Th = Hot Face Temperature; I = Module Current, Amps; V = Module Voltage, Volts; Qc = Watts Heat Pumped; N = Number of Thermocouples; G = Thermoelement Geometry Factor

Special Heat Pump Assemblies

Special assemblies are available in O.E.M. quantities, designed to customer requirements using heat exchangers furnished by customer or by Melcor. Multistage cascades also available in standard and custom configuration, with temperatures to −95°C (6 stage). Ceramic construction with solder interfacing between stages.

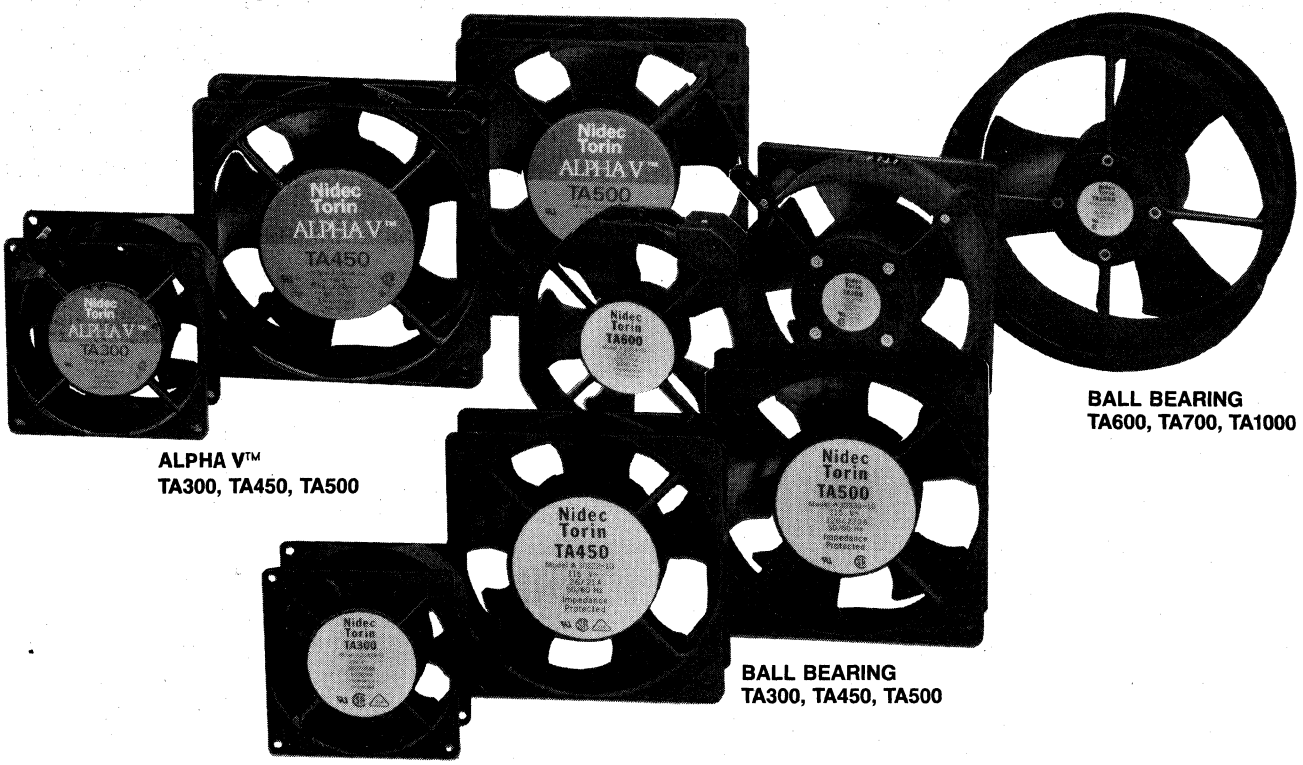
AC TUBE AXIAL FANS

Nidec-Torin Corporation 100 Franklin Drive • Torrington, Connecticut 06790 • (203) 482-4422 • Telex 643963



ALPHA V™
TA300, TA450, TA500

BALL BEARING
TA600, TA700, TA1000

BALL BEARING
TA300, TA450, TA500

Nidec-Torin proudly introduces ALPHA V™ tube axial fans with performance reliability so unprecedented they are available with a 5-year guarantee.† The ALPHA V fans have an HRSB (High Reliability Sleeve Bearing) System* that incorporates a larger oil reservoir; assures hydrodynamic lubrication; prevents oil leakage; aids oil recirculation and reabsorption; and minimizes oil oxidation due to heat.

Proper fan selection is mainly dependent upon the amount of heat to be dissipated, acceptable noise level, size, weight, and any applicable safety agency requirements.

TA300:
3.14″ (79.8mm) square by 1.51″ (38.3mm) deep.

TA450:
4.69″ (119.1mm) square by 1.50″ (38.1mm) deep.

TA500:
5″ (127mm) square by 1.50″ (38.1mm) deep.

Options:
Available with HRSB (sleeve bearing) system or ball bearings. Optional "S" series for quiet, lower RPM operation.

Housings:
One-piece, zinc die casting for strength. Acts as heat sink to dissipate motor heat.

Impellers:
Patented, computer designed, one-piece, molded 94V-O (UL) rated thermoplastic.

Motors:
High-efficiency, impedance protected, shaded pole type. Insulation options include U.L. Class A or B, CSA Class B, and VDE Class E or B. TA500 also available with permanent split capacitor motor.

Terminals:
Two 110″ (2.79mm) spade terminals on 5/16″ (7.9mm) centers standard; 12″ (30.5mm) flying lead wires also available.

Ball Bearing Design
In addition to our ALPHA V HRSB (sleeve bearing) design, Nidec-Torin tube axial fans are available with Ball Bearings. This design incorporates double-shielded electric motor quality bearings precision fitted into the rotor bore for time-proven performance.

TA600:
Highest performace rating for its size. Has zinc die cast housing, permanent split capacitor motor with thermal protection, UL94V-O thermoplastic polyester impeller, and spade pins or flying lead terminals. 6.75″(172mm) high, 5.91″ (150mm) wide, 1.50″ (38mm) deep.

TA700:
Two sizes available in frame thickness. Housing and impeller made of UL94V-O polycarbonate. Shaded pole motor thermally protected. Spade pins or flying lead terminals. Models A30335 and A30340 have 3.16″ thick frames. 6.91″ (176mm) square by 4″ (102mm) deep.

TA1000:
Extremely low power usage for high air volume. Impeller made of UL94V-O polycarbonate. Shaded pole motor thermally protected. Aluminum die cast housing. Spade pins or flying lead terminals. 10″ (254mm) diameter by 3.50″ (88.9mm) deep.

†5-year guarantee applies only to ALPHA V fans with HRSB (sleeve bearing) System.
*Patent pending.

AC TUBE AXIAL FANS

Nidec-Torin Corporation 100 Franklin Drive • Torrington, Connecticut 06790 • (203) 482-4422 • Telex 643963

Performance: Fans can be operated within a temperature range of −40°C to +60°C. Typical performance is at rated voltage and 60Hz. Models available (S) for mid-speed and low-speed use.

Approvals: Most Nidec-Torin fans are UL recognized components (File No. E45427 or E76527), and CSA certified (File No. LR27767, LR43354, LR45041, LR49202). Many models have VDE "Mark Approval" (File No. 10452318, 10452319, 104521610).

NOTE: 318 Contact factory for specific models with VDE Mark Approval.

The total sound output is designated by the Noise Power Emission Level (NPEL)[2]

The Preferred Octave Speech Interference Level (PSIL) heard depends upon the sound power of the source and listening conditions, such as distance from source. The average PSIL shown is at a distance of one meter and with the fan next to one reflecting surface[3]. PSIL stated with no reflecting surface present is 3dB lower, but such data is unrealistic since the fan requires at least one mounting surface.

[1]Watts, CFM, NPEL and PSIL at nominal voltage. 60 Hz. wide open.
[2]In accordance with American National Standard S1 23-1976.
[3]Conditions as specified in American National Standard S3 17-1975.
[4]Other lead versions available—20 (12" leads)
(A) ALPHA V HRSB System

BRUSHLESS DC TUBE AXIAL FANS

Nidec-Torin's advanced series of BETA SL® (Slimline) Brushless DC tube axial fans are thinner, smaller, lighter, and quiet, while delivering the same performance as similar one inch thick AC fans.

BETA SL® fans are ideal for cooling small computers, terminals, peripherals, copiers, communications systems, portable instruments, medical electronics, and other electronic products and systems where limited space is a factor.

BETA II™, Nidec-Torin's latest series of Brushless DC slimline fans feature a lightweight, one-piece injection molded UL94V-0 thermoplastic housing, providing a significant reduction in unit weight.

Designed for electronics cooling applications where limited space is a factor, BETA II™ fans include permanently lubricated ball bearings as standard, as well as the option of a Hall effect signal to monitor performance.

Nidec-Torin Brushless DC fans can be adapted to most computer or electronic business machines where DC power is available, including computer peripherals, communication systems, portable instruments, and other electronic devices.

Delivering the same performance as similar AC fans, our brushless DC fan reduces the need for agency approvals, consumes considerably less power, and reduces EMI and RFI emissions found in AC products.

CONSTRUCTION:

- One-piece, die cast aluminum housing, which acts as a heat sink to dissipate heat from the motor.†
- One-piece, injection molded UL94V-0 thermoplastic housing.††*
- One-piece, die cast metal housing for larger models.*
- Injection molded, black thermoplastic impeller.
- Permanently lubricated ball bearings.
- Dependable, solid-state brushless DC motor with permanent magnet rotor.
- Electronically commutated stator with Hall effect sensors to adjust performance to varying thermal needs.
- Available with color-coded 12″ (305mm) leads or spade-pin terminals.

FEATURES:

- Power-saving, 12 and 24 volt models available, with air flow ranging from 8.2 to 78 CFM.†
- Power-saving, 12 and 24 volt models available, with air flow ranging from 11 to 43 CFM.††
- Cost-effective, lightweight construction available with smaller models.††*
- Fans can be operated within a temperature range of −10°C to +70°C.† ††
- Available in 12, 24, and 48 volt models, with air flow ranging from 22.5 to 225 CFM.*
- Polarity protected.
- Adjustable air delivery by varying input voltage.
- Minimizes EMI and RFI emissions.

NOTE: †For BETA SL Models ††For BETA II Models *For Brushless DC Models

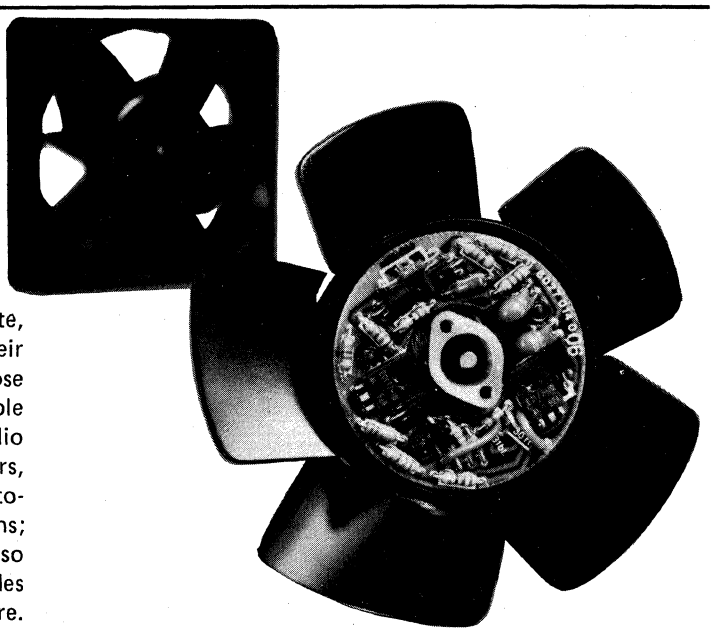
PAMOTOR SOLID STATE BRUSHLESS DC FANS

THE ONLY COMPANY OFFERING YOU A FULL FAMILY OF SOLID STATE, BRUSHLESS DC FANS IN POPULAR FRAME SIZES & VOLTAGES, & AT POPULAR PRICES.



PAMOTOR has a full line of self-contained, solid state, brushless DC fans for you to choose from. Through their design, these fans have been engineered to tackle those specialized applications which require highly reliable DC performance. Common uses include mobile radio equipment, medical electronics, shipboard computers, airborne applications, communications systems, automotive applications, marine use and telecommunications; wherever DC voltage is normally available. They are also finding wide acceptance for use in power stand-by modes to prevent memory loss in the event of AC power failure.

These fans are especially efficient and will outperform similar sized fans at normal operating back pressure. Typically, they offer greater air volume (cfm), reduced noise levels and reduced power drain. For example, the power drain at maximum back pressure is approximately 25% of that required in conventional AC units. These fans also achieve a new low in magnetic radiation and RF noise, thereby assuring the pure signals necessary for critical airborne or shipboard use.

These fans work well at all rated voltages, and are extremely quiet. They can be adjusted for performance and noise level by altering the voltage within the voltage range for your particular application. They feature a brushless motor with all electronics mounted on a PC card within the motor frame. Drive amplifiers for the motor are controlled by a patented Hall-effect generator circuit which is coupled by small pole pieces to the motor's field magnet (Patent No. 3-873-897). Available voltages include 5 VDC nominal, 12 VDC nominal, 24 VDC nominal and 48 VDC nominal.

The brushless DC motor is polarity protected* to avoid accidental damage and costly down time. If the input polarity is accidentally reversed, integral diodes block all circuits and the motor simply stops. Even in a locked rotor condition,* the motor goes into a neutral state to avoid damage. Precision bearings and lubricants help to achieve a life expectancy of 35,000 hours (sleeve bearing) and 60,000 hours (ball bearing) at maximum permissible ambient temperature. Note: If the ambient temperature in which the fan operates is at 20° C below the above levels the life expectancy increases by 10,000 hours.

*Except for 5 Volt models.

These fans do not require an external voltage inverter. This means that you save valuable mounting space and weight because the only consideration in mounting is the fan itself. This new concept has eliminated many of the inherent reliability and RF noise problems generally associated with using AC motors in a DC environment.

DC Fans Quick Selection Guide

PAMOTOR

PAPST MECHATRONIC CORPORATION

PAPST MECHATRONIC CORPORATION, Aquidneck Industrial Park, Newport, Rhode Island 02840 • Tel. (401) 849-8810 • Telefax 401/849-4640 • Telex 95 20 92

PAMOTOR AC FANS

Field proven, quality products you can rely upon for all of your cooling requirements.

PAMOTOR offers a wide variety of fans for your selection. Each model combines the features of extended life with high airflow delivery at low noise levels.

Lightweight all-metal construction is typical of PAMOTOR AC fans. This all-metal construction eliminates breakage and warping often found in conventional plastic fans. This all-metal feature also permits the entire fan to function as a natural heat sink, assuring cooler operation by effectively transferring heat from the rotor into the air stream via the impeller blades. Potential injurious heat is also transferred from the stator to the die-cast venturi by way of the metal struts. Life expectancy: (1) AC fans with sleeve bearings - 20,000 hours at maximum permissible ambient temperatures. (2) AC fans with ball bearings - 20,000 hours at 72° C or at the maximum permissible temperature if this is less than 72° C. Note: If the ambient temperature in which the fan operates is at 20° C below the above levels the life expectancy increases by 10,000 hours.

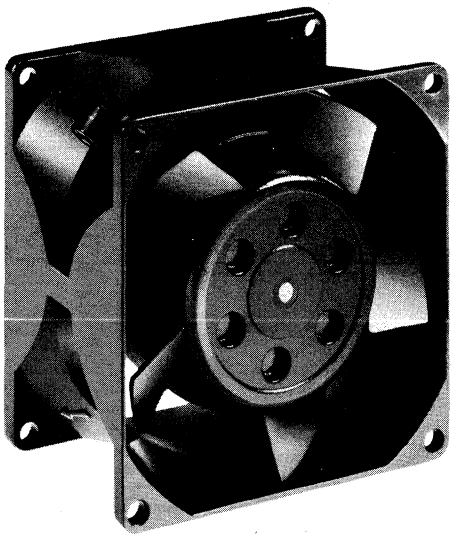
The PAMOTOR exclusive bearing lubrication system incorporates hand-fitted broached sintered iron sleeve bearings on most fans, with precision high-temperature ball bearing versions also available. The dual sleeve bearings are separated by a large oil felt reservoir, which provides continuous fault free circulation of a special lubricant to the shaft and bearing surface.

An efficient, powerful inside-out motor, housed entirely within the impeller hub to conserve axial depth, has higher torque capabilities and a lower internal heat rise than the contemporary fixed shaft designs.

The impeller blades are computer designed and impulse welded to the precision hub and dynamically balanced to within .0001 inches in each end plane to minimize acoustical and mechanical vibrations.

PAMOTOR also offers a super premium grade fan; (5 year warranty).

Perhaps the two most important fields of application for premium grade fans are: (1) in limited-production deluxe equipment, in professional-grade instrumentation, in few-of-a-kind, custom-designed and permanently-installed systems requiring optimum performance and absolute dependability for many years; and (2) as field replacements for retrofit units for original-equipment fans that have proven to be unreliable, are too noisy, or do not produce sufficient cooling airflow.



PAMOTOR fans are Underwriters' Laboratories, Inc. recognized and have their Yellow Card Component Recognition Number E41168. Many are CSA certified and VDE approved.

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

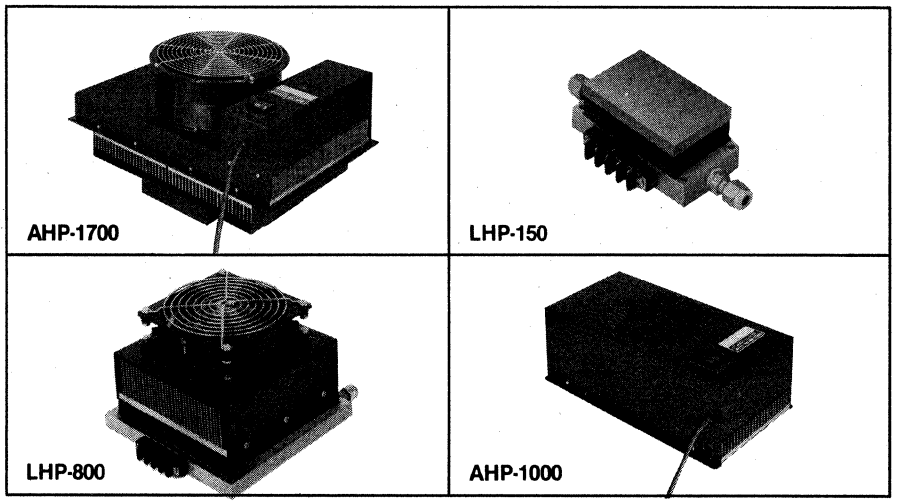
645 stewart ave., garden city, ny 11530

AIR CONDITIONERS

Temperature Control...

Solid State Cooling & Heating From One Product.

Thermoelectric Air Conditioners are a solid state method of refrigeration, which eliminates the need for a compressor, refrigerant fluids or piping. The only moving parts are highly reliable fans used to dissipate output heat to the ambient air. These air conditioners can be applied in computers, machine tool controls, instrumentation & electronics for hostile environment protection. They offer design flexibility in a wide range of industrial and consumer applications where compactness and reliability are key.



Features:

- *No load cooling to −5°F (−20°C) at room temperature*
- *Lightweight, compact designs*
- *No compressor, no fluids, no coils*
- *Closed system protection from dust, chips, & moisture*
- *No moving parts except fans, means high reliability*
- *Low vibration, noise & maintenance*
- *Metal finishes resist corrosion*
- *Operates in any orientation - horizontal, vertical, etc.*
- *All models available from stock*

Other Products:

- Liquid cooled air conditioners rated to 1500 BTU/HR
- Thermoelectric cooling modules
- Temperature controllers
- Standard DC power supplies

AHP-300FF, with Cold Side Fin and Fan
Rating: 240 BTU/hr.
Overall Dimensions: 6.9W x 10.0L x 7.5T

AHP-800CP, with Cold Plate
Rating: 500 BTU/hr.
Overall Dimensions: 8.86W x 15.0L x 5.1T

AHP-800FF, with Cold Side Fin and Fan
Rating: 500 BTU/hr.
Overall Dimensions: 8.86W x 15.0L x 8.1T

AHP-1000CP, with Cold Plate
Rating: 560 BTU/hr.
Overall Dimensions: 8.45W x 15.0L x 6.2T

AHP-1000FF, with Cold Side Fin and Fan
Rating: 560 BTU/hr.
Overall Dimensions: 8.45W x 15.0L x 9.1T

AHP-1700FF, with Cold Side Fin and Fan
Rating: 1100 BTU/hr.
Overall Dimensions: 12.25W x 19.0L x 10.4T

AIR CONDITIONERS (LIQUID COOLED)

LHP-150CP, with Cold Plate
Rating: 135 BTU/hr.
Overall Dimensions: 2.56W x 5.74L x 1.65T

LHP-300CP, with Cold Plate
Rating: 305 BTU/hr.
Overall Dimensions: 4.0W x 5.43L x 1.65T

AIR CONDITIONERS (LIQUID COOLED) *(Continued)*

LHP-300FF, with Cold Sink and Fan
Rating: 305 BTU/hr.
Overall Dimensions: 4.0W x 5.43L x 4.5T

LHP-800CP, with Cold Plate
Rating: 740 BTU/hr.
Overall Dimensions: 6.62W x 8.06L x 1.75T

LHP-800FF, with Cold Sink and Fan
Rating: 740 BTU/hr.
Overall Dimensions: 6.62W x 8.06L x 5.5T

LHP-1700FF, with Cold Side Fin and Fan
Rating: 1500 BTU/hr.
Overall Dimensions: 8.75W x 19.0L x 8.19T

LHP-1700CP, with Cold Plate
Rating: 1500 BTU/hr.
Overall Dimensions: 8.75W x 19.0L x 4.8T

TEMPERATURE CONTROLLERS

TC-2A Cooling only; One set point. Adjustable range 25°F to 125°F ±5°F control. Factory installed, with remote I.C. sensor.

TC-3A Cooling & Heating; Two set points. Adjustable range 25°F to 125°F ±5°F control. Factory installed, with remote I.C. sensor.

TC-4500 Cooling and/or Heating; Two set points. Adjustable range 0°F to 150°F ±2°F control. With digital display, programmable, with remote thermocouple sensor.
Overall Dimensions: 7.0W x 9.0L x 3.50T

AS EASY AS 1,2,3...

AIR CONDITIONERS

Specified To Your Applications

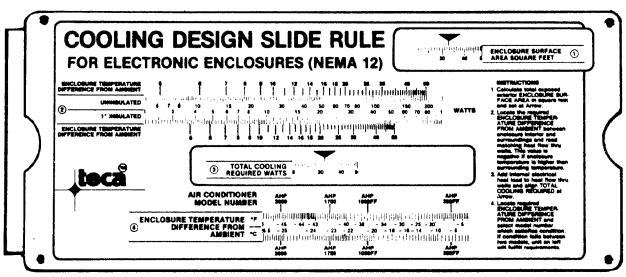
It's as easy as 1,2,3. Just a telephone call, and you're in direct contact with one of our application engineers who can answer and solve your enclosure cooling requirements.

1

Just provide the necessary information below, and we will determine the correct air conditioner.

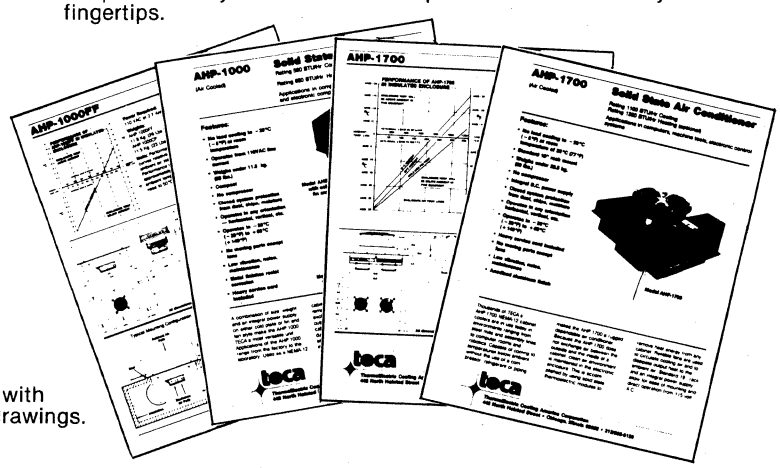
- **Total exposed exterior enclosure surface area of cabinet.**
- **Electrical heat load inside the cabinet.**
- **The outside ambient temperature and desired inside temperature (maximum and minimum).**

2



An additional aid that TECA provides to assist in choosing the correct air conditioner is their Cooling Design Slide Rule. A unique and easy to slide chart that places the answers at your fingertips.

3



Specification sheets with charts and detailed drawings.

No matter what the enclosure conditions are, our application engineers will match your specifications to the TECA air conditioners that will satisfy the cooling requirements.

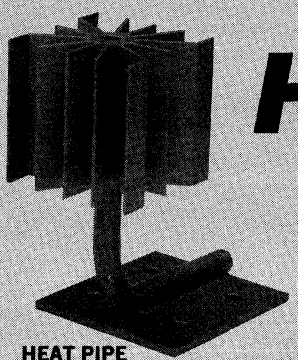
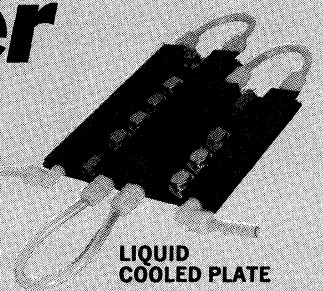
HEAT EXCHANGER

ELECTRONIC CABINET COOLERS

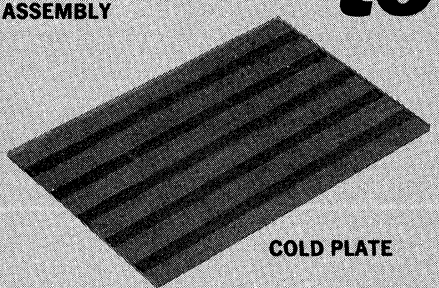
Put the Heat Transfer Specialists to work for you.



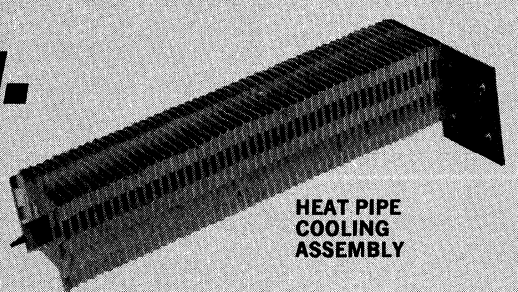
HEAT PIPE ASSEMBLY



LIQUID COOLED PLATE



COLD PLATE



HEAT PIPE COOLING ASSEMBLY

HEAT EXCHANGERS

Thermacore's standard liquid to air heat exchangers have heat rejection capabilities from 1.5 to 15 kilowatts. All six standard models are available for immediate delivery. Custom exchangers for special requirements are available at competitive prices.

LIQUID COOLED PLATES

Available in lengths up to 6 ft., the 6" plate has a thermal resistance of 0.08°c/watts and a pressure drop of less than 0.5 psi. Water passages are an integral part of the plate's extrusion, thereby eliminating the interface resistance that decreases heat transfer. Tongue and grooved sides permit easy assembly of several plates.

ELECTRONIC CABINET COOLERS

These air coolers provide indirect cooling of high voltage or dirt-sensitive electronic circuitry using air-to-air heat exchangers. Available with cooling capacities of 100 to 1,000 watts, all models can be mounted in any position.

COLD PLATES

Thermacore's high performance heat pipe Cold Plates are recommended for use with high power electronic packages requiring minimum component temperature rise. Standard sizes are available in power levels up to 200 watts. With a thickness of 0.125", the HA-4 is designed for cooling single sided printed circuit cards. It can operate in any orientation with respect to gravity.

HEAT PIPES

Thermacore's Heat Pipes have been proven effective whether used for heat dissipation or temperature uniformity. They are available in lengths up to 50' and in diameters of ⅛" and larger. They can be ordered round, flat or in a bent configuration and in a variety of materials, thermal power and operating temperatures.

CUSTOM DESIGNING

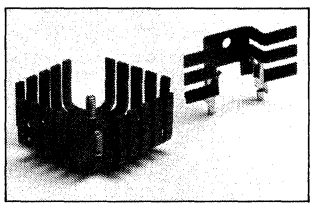
Designing heat pipes since 1963, Thermacore's Engineers are recognized experts in the Heat Transfer Industry. Their expertise, coupled with Thermacore's specialized manufacturing equipment, assures that the custom designing of prototypes or OEM production runs will be provided both on time and at a competitive cost. Phone Thermacore to put the Heat Transfer Specialists to work on your project.

THERMACORE, INC.

780 Eden Rd. Lancaster, PA 17601
PH: 717-569-6551

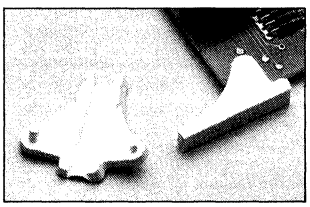
Thermalloy Inc.

The Innovator in semiconductor accessories.



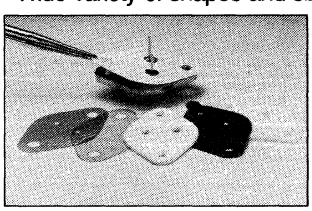
Heat Sinks

- Labor saving.
- Wave solderable using solderable studs, solderable nuts or solderable mounting tabs.
- Vertical and horizontal mount.
- Wide variety of shapes and sizes.



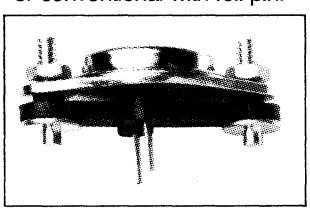
Card Guides, Ejectors and Pullers

- Variety of sizes and shapes.
- A choice of labor saving press-fit card guides or hardware mounted for secure mounting.
- Ejectors and pullers available in one piece snap-on or conventional with roll pin.



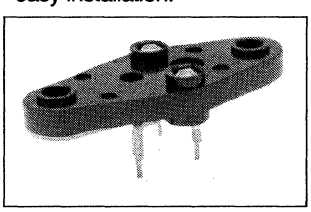
Insulators

- Mica
- Thermalfilm™ (polyimide plastic film)
- Thermalsil™ (silicone rubber)
- Hard Anodized Aluminum
- Aluminum Oxide
- Beryllium Oxide
- Insul-Cote™ — packaged, pre-coated insulators for easy installation.



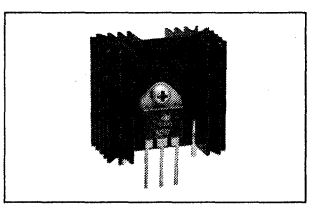
Solderable Transistor Mounts

- Cuts assembly steps by 50%.
- Eliminates hand soldering.
- Tin plated posts offer excellent solderability for mechanical and electrical integrity.
- All work is done from one side of board.
- Reduces hardware requirements.
- Elevates device for cleaning.



Power Sockets

- Tin plated.
- For TO-3 case styles.
- Inexpensive laminated power sockets also available.
- Metric and English mounting plate threads.
- Available with complete mounting kits.



Extruded Heat Sinks

- Over 250 standard, tooled shapes immediately available.
- Custom design — call on our engineers for your custom design needs.

Offering the widest variety of semiconductor accessories in the industry. For a free catalog, contact your nearest Thermalloy representative or distributor.

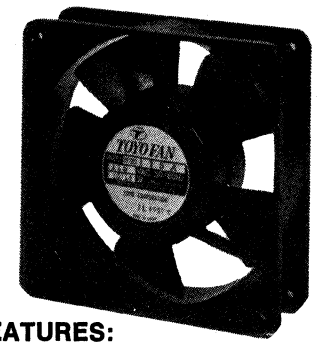
TWX (910) 589-1540

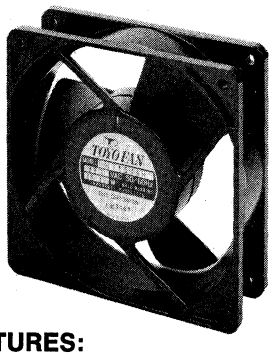
TF120 Series



FEATURES:

- 4.70″ sq. x 1.50″ deep (119.5mm x 38mm)
- 109 to 76 CFM free air delivery
- Choice of three speeds for various applications
- Noise rating as low as 38 dB(A) at 1.5m
- Precision ball bearings for long life — sleeve bearings for economy
- Rugged die cast aluminum frame
- Choice of 115VAC or 230VAC
- Choice of terminals or wire leads
- Impedance protected
- U.L. recognized — File No. E75082
- CSA certified — File No. LR48371
- Also available in dual voltage fan Model TF120345 Series

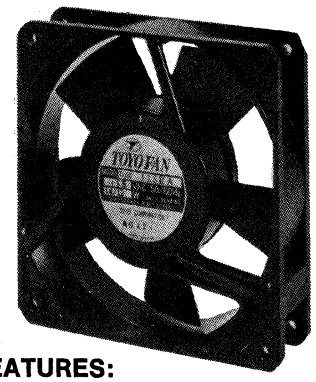
QUIET FAN
TF120U Series



FEATURES:

- Designed for low noise level applications
- Precision ball bearings for long life — sleeve bearings for economy
- Durable die cast aluminum frame
- Choice of 115VAC or 230VAC
- Impedance protected
- U.L. recognized — File No. E75082
- CSA certified — File No. LR48371

THE THIN FAN
TF120R Series

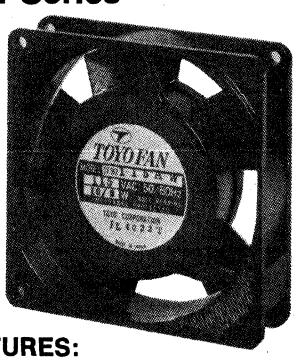


FEATURES:

- Less than 1 inch deep
- 4.70″ x .98″ deep (119.5mm x 25mm)
- 92 to 76 CFM free air delivery
- Choice of two speeds for various applications
- Noise rating as low as 34 dB(A) at 1.5m
- Precision ball bearings provide long service life
- Rugged die cast aluminum frame.
- Choice of 115VAC or 230VAC
- Impedance protected
- U.L. recognized — File No. E75082
- CSA certified — File No. LR48371

***NEW* DC BRUSHLESS TFDD120RA Series**

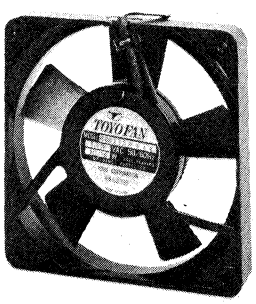
TF92 Series



FEATURES:

- Less than 1 inch deep
- 3.62″ sq. x .98″ deep (92mm x 25mm)
- 34 to 27 CFM free air delivery
- Choice of three speeds for various applications
- Noise rating as low as 32 dB(A) at 1.5m
- Precision ball bearings for long life — sleeve bearings for economy
- Rugged die cast aluminum frame
- Choice of 115VAC or 230VAC
- Choice of terminals or wire leads
- Impedance protected
- U.L. recognized — File No. E75082
- CSA certified — File No. LR48371
- Also available in dual voltage fan Model TF92345 Series

ULTRA THIN FAN
TF120RX Series



FEATURES:

- The thinnest axial fan available — .787″ (20mm) thick
- High performance
- Low noise level
- Precision ball bearings provide long service life
- Durable die cast aluminum frame
- Choice of 115VAC or 230VAC
- Impedance protected
- U.L. recognized — File No. E75082
- CSA certified — File No. LR48371

ULTRA THIN FAN
TF92RX Series

FEATURES:

- The thinnest axial fan available — .787″ (20mm) thick
- High performance
- Low noise level
- Precision ball bearings provide long service life
- Durable die cast aluminum frame
- Impedance protected
- U.L. recognized — File No. E75082
- CSA certified — File No. LR48371

TF80 Series

FEATURES:

- Low profile design — 3.15″ sq. x 1.50″ (80mm x 38mm)
- High performance airflow
- Low noise level
- Precision ball bearings for long life — sleeve bearings for economy
- Rugged die cast aluminum frame
- Choice of 115VAC or 230VAC
- Choice of terminals or lead wires
- Impedance protected
- U.L. recognized — File No. E75082
- CSA certified — File No. LR48371
- Also available in dual voltage fan Model TF80345 Series

***NEW* DC BRUSHLESS TFDD80BA Series 1.26″ thick**

SMALL-THIN FAN
TF80R Series

FEATURES:

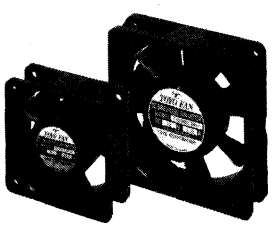
- Low profile design — 3 1/8″ square
- Less than 1 inch thick — .984″ (25mm)
- Precision ball bearings for long life — sleeve bearings for economy
- Durable die cast aluminum frame
- Choice of 115VAC or 230VAC
- Impedance protected
- U.L. recognized — File No. E75082
- CSA certified — File No. LR48371

SMALL-ULTRA THIN FAN
TF80RX Series

FEATURES:

- The thinnest axial fan available — .787″ (20mm thick)
- Low profile design — 3 1/8″ square
- High performance
- Low noise level
- Precision ball bearings provide long service life
- Durable die cast aluminum frame
- Choice of 115VAC or 230VAC
- Impedance protected
- U.L. recognized — File No. E75082
- CSA certified — File No. LR48371

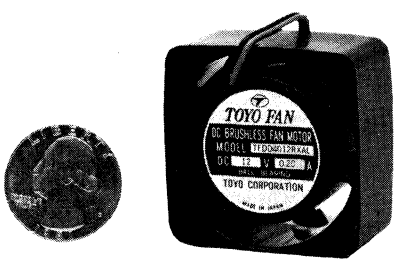
DC BRUSHLESS
TFDD60RX TFDD80RX & TFDD92RX Series



FEATURES:

- Minimum EMI/RFI emission
- High efficiency solid state design
- High performance airflow
- Precision ball bearings provide long service life
- 2.36″ square x .90″ thick—TFDD60RX
- 3.15″ square x .90″ thick—TFDD80RX
- 3.62″ square x .90″ thick—TFDD92RX
- Low acoustical noise
- Available in 12 and 24 Volts
- Polarity protected
- Impedance protected

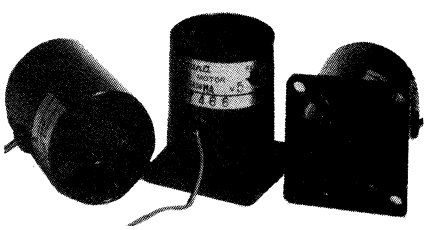
DC BRUSHLESS
TFDD40RX Series



FEATURES:

- Provides cooling in extremely confined areas
- Compact miniature size — 1.57″ square x .79″ thick
- Minimum EMI/RFI emission
- High efficiency solid state design
- Precision ball bearings provide long service life
- Low acoustical noise
- Available in 12 and 24 Volts
- Polarity protected
- Impedance protected

DC MICRO FAN
SMF1836 Series



FEATURES:

- Provides cooling in extremely confined areas
- Compact-miniature size — 1.42″ diameter x 1.77″ long
- High performance
- Choice of 5, 10, 12, and 24VDC
- Choice of optional mounting flanges

WARRANTY — All U.S. Toyo fans are warranted to be free of defects in materials and workmanship for a period of one year from date of delivery.

AIRFLOW PERFORMANCE DATA — Performance data obtained with test chamber and methods in accordance with AMCA Standard 210-74.

ACOUSTICAL NOISE DATA — Acoustical measurements made at distances of 1.0 and 1.5 meters from fan intake. All measurements made on dB (A) scale. Fans operating at 60Hz line frequency.

OPERATING TEMPERATURE — Recommended ambient operating temperature is −30°C to +70°C.

IMPEDANCE PROTECTION — All fans are designed and manufactured to prevent "burn-out" failure caused by restriction of rotating parts.

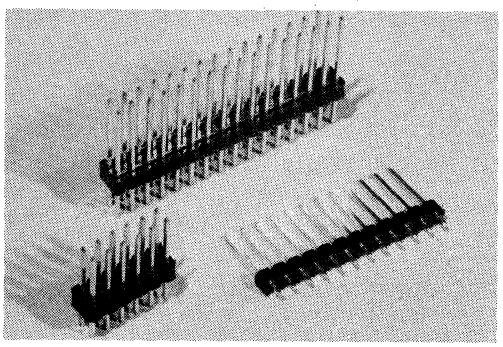
LIFE EXPECTANCY — Life test data available on request.

SAFETY — All fans are designed and manufactured to meet UL and CSA standards. Approved fans are listed as follows: UL File No. E75082 and CSA File No. 48371M2.

Bead Electronics

100 Mountain Grove St. • P.O. Box K • Bridgeport, CT 06605 • Tel. (203) 334-4124

STANDARD STRIP HEADERS

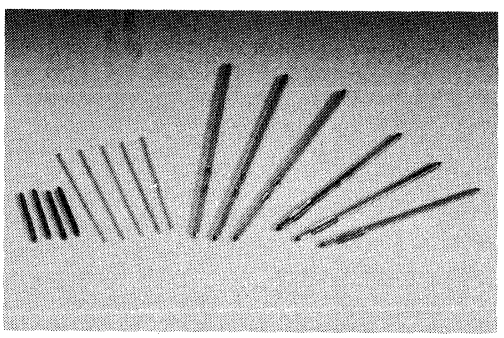


Low cost straight thru standard headers are available in single and double-row configurations. These quality headers feature Bead's unique convex, conical tip to reduce insertion force and wear to preplated PCB holes. Pins are available in a variety of sizes and lengths and are burr-free.

FEATURES

- High reliability
- Low cost
- Low mating forces
- Variety of pin lengths
- Burr-free
- Variety of plating options

MICROMINIATURE PINS

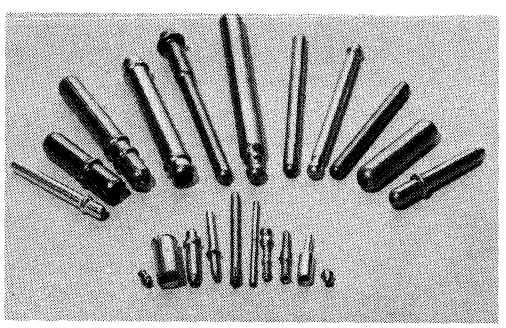


Bead introduces a new line of round and square wire contact pins for use on high density headers and interconnect systems. The .016″, .018″ and .020″ round wire contacts are ideal for application having center spacing less than 0.100″. The 0.012″ square wire contact pins have been approved for use with wire wrapping equipment using 34 gauge wire. All pins feature parabolically revolved ends produced by Bead's swaging process resulting in lower pin insertion forces, reduced intra contact abrasion and wear providing the ultimate in product reliability.

FEATURES

- Low Cost
- Burr-Free
- Conical Ends
- Low Insertion Force
- High interconnect reliability
- Variable Pin Length
- .050 pin spacing

TUBULAR PINS



Bead's multi-swaged pins are widely used as electrical and electronic contacts and as hinge pins, fasteners and spacers. The method allows both round and non-round cross-sections of varying sizes to be incorporated into the same part, and is used to manufacture both hollow and solid pins. The process is fast, accurate and produces parts of high finish quality.

FEATURES

- Low cost
- High accuracy
- Shape flexibility
- High quality finish
- Variety of materials
- Mating parts
- Spherical or tapered ends

HHSmith Electronic Hardware.

1. Spacers
Material: Brass, Aluminum, Phenolic, Ceramic, Stainless Steel, Nylon.
#2 to #10 Clearance Hole.
Lengths: 1/8" to 4" Standard.
OD: 1/8" to 3/8"
Available in Straight or Bent Style.

2. Solder Lugs
Material: Brass
Available in Brass or Bent Style.

3. Cable Ties/Clamps
Material: 6/6 Nylon, PVC, Propinate, Polypropylene, Steel.
Tie Lengths: 3" to 15"
Clamp Diameter: 1/8" to 1"

4. Knobs
Commercial or Military Style.
Round, Concentric, Skirted, Pointer, Bar Configurations.
Material: Phenolic, ABS, and Polycarbonate.
Inserts: Aluminum

5. Screws
Round, Binding Head, Captive, Flat, Oval.
Material: Steel, Brass, Nylon.

6. Standoff
Material: Brass, Aluminum, Phenolic, Ceramic, Stainless Steel, Nylon.
#2 to #10 Thread Sizes
Length: 1/8" to 4" Standard.
OD: 1/8" to 3/8"
Male/Female, Male/Male, Swivel Styles are Std.

7. Turret Terminals
Commercial or Military.
Swage Style
Board Thickness: 1/64" to 1/4"
Material: Brass/Electro-Solder Plate

8. Bumpers
Colors: Grey, Black, Brown, Clear.
Mechanical or Adhesive Style.
Material: Rubber or Vinyl.

9. Shaft Accessories
Couplers, Extenders, Locks.
Material: Brass or Phenolic.

10. Washers
Flat, Countersunk, Ext. Tooth, Int. Tooth, Shoulder, Flanged
Material: Nylon, Fiber, Steel, Brass.

11. Terminal Strips
Material: XXXP Phenolic
Flame retardant.
Positions: 2 to 13
Solder or Screw Type Available.

12. Crimp Terminals
Ring, Fork, Slide-on, Butt Style Available.
Wire Range: #10 to #26.
Insulated or Non-Insulated.

13. Grommets
Material: Rubber—60 Durometer and Vinyl—PVC.
Chassis Thickness: 1/16" to 9/64".
Color: Black or Grey.

14. Handles
Options: Internal or Threaded Stud.
Folding or Adjustable.
Round and Oval Style.
Material: Brass or Aluminum.
Plating: Black Zinc, Chrome, Satin Finish.

15. Hole Plugs
Material: Steel and Nylon—
Fits Hole Diameter 1/4" to 1½".

PERMA POWER® Sockets Plus T.M. MULTIPLE OUTLET STRIPS

Safe and convenient power distribution for

auxiliary work stations
assembly line
maintenance and repair
machine shop
test station
drafting bench
quality control center
exhibit booths

Convenient. Perma Power Sockets-Plus™ multiple outlet strips are the quickest, most convenient way to provide electric power when and where it's needed, with convenient control and complete safety. Conventional cube taps and extension cords can result in overloaded circuits and chaotic stacking of plugs into existing wall outlets. Sockets-Plus multiple outlet strips provide orderly power distribution, as well as control and safety.

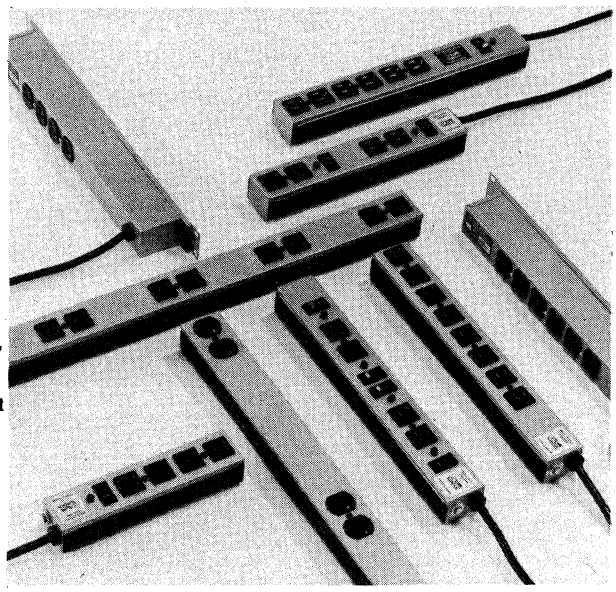
A wide choice of models. Perma Power makes it easy to find the exact strip that's needed. Variables include the number of receptacles, the number of switches and indicator lights, and the length of the cords.

Extra features. On-off switches and indicator lights are extra features that put the user in complete control of his local power use! See at a glance what's on, what's off. Save steps; easily control power to any machine, computer, or lamp with handy on-off switch options.

Safe. All Sockets-Plus multiple outlet strips come with 3-wire U-ground outlets, and are housed in electrically-grounded steel cases. Because they have built-in circuit breakers, there's no danger of overloading one of the main circuits. If the power drain is too great, they shut off the power *here*, not in a fuse box somewhere down the line. The line is guarded, so users can relax!

Custom designs. Perma Power will provide custom designs, with your choice of colors, finishes, configurations and available features. Just tell us what you need and we'll get back to you promptly with a quote, minimums and delivery schedule.

MULTIPLE OUTLET STRIPS FOR INDUSTRIAL/LABORATORY



GENERAL SPECIFICATIONS
Rugged steel construction, tough silver and black industrial finish—Top is electrostatically painted silver enamel over a zinc phosphate undercoating, resulting in a hard, corrosion-resistant surface. Sides of conventional-length strip models (K case) are zinc chromated and then covered with thick (14 mil) black vinyl panels, providing added protection, plus handsome appearance! Sides of "J" unit long strips are painted black. Rack-mount strips have black or silver front, and silver back.

Easy mounting—All strips are provided with two screws and cross-slots on the bottom for rapid mounting.

Rated 1875 watts at 15 amperes, 125 Volts, 60 Hz continuous duty.

UL LISTED

HIGH ABUSE OUTLET STRIPS WITH HOSPITAL GRADE COMPONENTS

These outlet strips are designed for applications with special safety requirements, or where equipment is exposed to fumes from corrosive chemicals or liquids. Their plugs and receptacles are "Hospital Grade"—verified by Underwriters Laboratories to have passed a series of tortuous tests assuring the user of continuous, safe operation, even in the face of human negligence and corrosive environments.

Plugs and receptacles meet or exceed these "Hospital Grade" UL tests:

Abrupt removal of plug
Ground pin retention
Terminal strength
Assembly security
Face impact
Ground contact
Temperature
Ground contact resistance
Fault current test
Mold stress relief

SPECIFICATIONS FOR PLUGS AND RECEPTACLES
Designated by a green dot—your assurance the components are U.L. Hospital Grade
UL Hospital Grade Standards #498 and #544
Federal Specification WC 596E (8200, 8210, 8300, 8310)
NEMA Standard WD1
NEMA 5-15R and 5-20R
CSA Certified (8200-8210 series only)
Corrosion-resistant per ASTM B-117-73
UL LISTED

SURGE SUPPRESSOR OUTLET STRIPS

Protect your data and equipment from errors and damage caused by power line voltage surges. These surge protected outlet strips guard against both *normal mode* surges (line to neutral) and *common mode* surges (line to ground and neutral to ground). Each comes with a master on-off switch, indicator light, 15 amp circuit breaker, and 6 ft. power cord.

These Perma Power Surge Suppressors feature a unique failsafe Automatic Shutdown mechanism* to insure that your valuable electronic equipment is always protected. All power is stopped if the surge suppression circuitry wears or burns out. A visual indication of shutdown is provided by the pilot lamp.

There are two model groups: The single-stage models feature filtering provided by three metal oxide varistors. These models provide protection on all three conductors in a typical 120VAC circuit. The Extended Life group features four-element two-stage filtering, provided by a uniquely-engineered combination of metal oxide varistors and silicon avalanche diodes. These models assure you of protection against both powerful surges and repeated surges, and provide lower let-through voltage and longer operating life.

*(Patent No. 4,578,579)

RACK MOUNT OUTLET STRIPS

SPECIFICATIONS FOR RACK MOUNT UNITS

All models have 6 outlets; all on front, or all on back, or 2 front and 4 back.

Mount in standard 19″ cabinet racks. Available in standard width (3½″), and compact width for tight spaces (1¾″).

All units have master switch, indicator light, and 15 amp circuit breaker.

Heavy duty, 22 gauge metal construction. Black or silver painted front, silver back. U-ground outlets with electrically-wired ground; phosphor bronze, dual wiping contacts.

Recognized under the component program of Underwriters Laboratories.

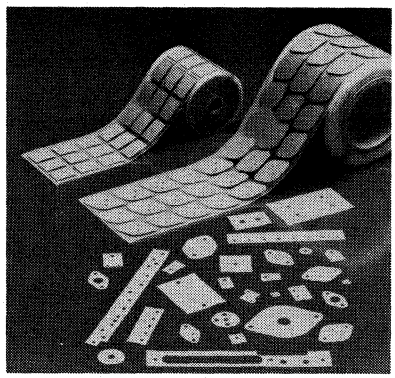
Sil-Pad Thermally Conductive Insulators



WHAT ARE SIL-PAD INSULATORS?

Sil-Pad brand thermally conductive insulators are greaseless, silicone-based insulators typically mounted between a transistor and a heat sink. Sil-Pads offer low resistance to heat transfer while providing electrical isolation between the parts of an assembly.

Sil-Pads are constructed of soft silicone rubber compounded with compatible, thermally conductive fillers which provide thermal transfer capabilities. These compounds are combined with woven fiber or film substrates to provide a tough insulator able to withstand the mechanical rigors of assembly. Sil-Pads are thermally stable and compounded to eliminate flammability.

WHY USE SIL-PADS?

Bergquist is the leader in the development of thermally conductive insulating products. Sil-Pads eliminate the use of messy grease and brittle mica or ceramics in the assembly area. They save significant labor expense compared to grease and mica while providing excellent thermal resistance. Sil-Pads are also more dependable than brittle ceramics and mica which can crack or fracture. Another advantage of Sil-Pads is the variety of shapes they can be produced in from standard punched parts to sheets or specially designed shapes. Regardless of your thermal or dielectric requirements there is a Sil-Pad to fit your application.

SIL-PAD 400

Sil-Pad 400 is a composite of alumina oxide loaded silicone rubber and fiberglass. It is an ideal replacement for mica and grease. Sil-Pad 400 can range in thickness from .007 inches to .045 inches. The dielectric strength is 550 volts per mil. Thermal resistance for a TO-3 transistor is .5°C/watt for .009 inch material and .4°C/watt for .007 inch material.

SIL-PAD 1000

Sil-Pad 1000 is made of boron nitride filled silicone rubber and fiberglass. It is ideal for applications requiring higher levels of heat transfer than Sil-Pad 400. It has lower thermal resistance and is used in applications where surface irregularities require a thicker pad with higher levels of heat transfer. Thickness of Sil-Pad 1000 is .009 inches. The dielectric strength is 550 volts per mil. Thermal resistance for a TO-3 style transistor is .3°C/watt.

SIL-PAD K-4

Sil-Pad K-4 is one of the new thermally conductive Kapton® XT based Sil-Pads designed to provide more physical strength and better thermal performance. Kapton polyimide film is a high dielectric, thin, durable material which is less susceptible to burr cut-through or crushing. K-4 is also an ideal replacement for mica and grease, with the added advantages of Kapton. K-4 has enhanced dielectric properties over the Sil-Pad 400. Dielectric strength is 5000 volts. Thermal resistance for a TO-3 style transistor is .4° C/watt. Thickness is .006 ± .001 inches.

SIL-PAD K-10

Sil-Pad K-10 is the new high performance insulator developed in conjunction with DuPont for critical heat applications. K-10 is made of boron nitride filled silicone rubber and Kapton XT polyimide film. K-10 is the ideal replacement for expensive ceramic materials such as beryllium oxide and alumina. Sil-Pad K-10 has the lowest thermal resistance of any insulation material available on the market.

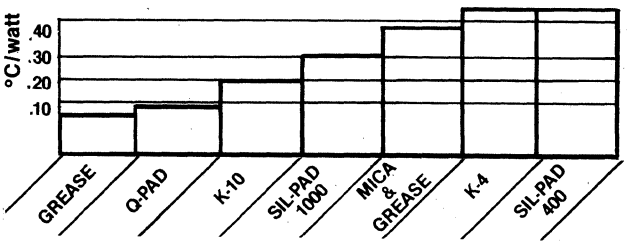
K-10 has a thickness of .006 ± .001 inches. The dielectric strength is 5000 volts. Thermal resistance for a TO-3 style transistor is .2° C/watt.

Q-PAD

Q-Pad is constructed of thin aluminum foil coated both sides with thermally conductive Sil-Pad rubber. It is designed for those applications where maximum heat transfer is needed and electrical insulation is *not* required. Q-Pad is the ideal thermal interface material to replace messy thermal grease compounds. Thickness is .006 inches. Thermal resistance for a TO-3 style insulator is .08-.1°C/watt.

THERMAL RESISTANCE (TO-3 Configuration)

cost/thousand



SIL-PAD SHIELD

Bergquist Sil-Pad shield is a bonded laminate of thermally conductive, electrically isolating Sil-Pad 400 or Sil-Pad 1000 pads with a copper shield between the layers. Sil-Pad shield is typically used under switching power transistors. It is designed to reduce heat sink "noise" and to lower capacitance and EMI, RFI problems at the component level. Special configurations can also be produced. Total thickness is .019 ± .002 inches. Approximate thermal resistance for a TO-3 style is .85 to 1.0°C/W. Shielding effectiveness, 50db or higher.

SPECIAL SHAPES: We produce thousands of specials. Tooling charges are about $100 to $150 for simple parts. Increased complexity or tighter tolerances increase tooling charges.

ADHESIVE: Most materials are available with adhesive on one or both sides.

TOLERANCES: .015 inches are held on width, length and hole location. Contact the factory if tighter tolerances are required.

CUSTOM MATERIALS: Other special materials such as laminates, coatings, etc. are also available.

SHEETS: 6" x 6", 6" x 12", 8" x 8", 10" x 10", or 12" x 12" sheets are available from stock, with or without adhesive.

ROLLS: All Sil-Pad materials are available in roll form, with or without adhesive. Contact the factory.

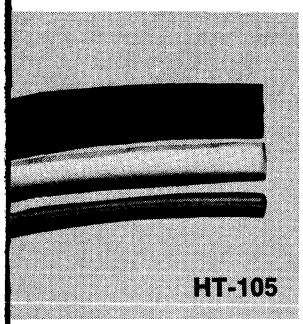
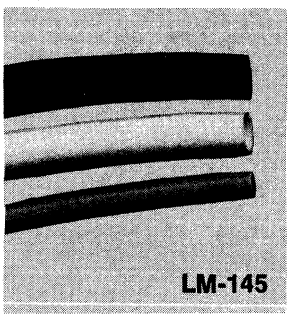
Markel CORPORATION

FLEXITE SHRINKDOWN



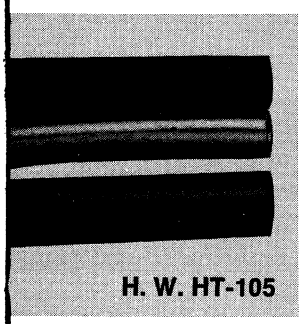
FLEXIBLE PVC SHRINK TUBING

- Outstanding dielectric and mechanical properties.
- Oil and chemical resistant.
- Shrink temperature 150°C.
- Covering and insulating cables, components and terminals.
- Standard colors—black, white and clear.



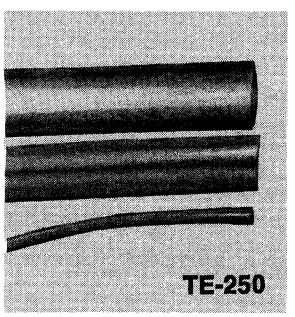
VERY FLEXIBLE POLYOLEFIN SHRINK TUBING

- Maximum flexibility and high dielectric strength.
- Shrink temperature 150°C.
- Available in both flame retardant and non flame retardant classes.
- Standard colors—black, white and clear.



HEAVY WALL PVC SHRINK TUBING

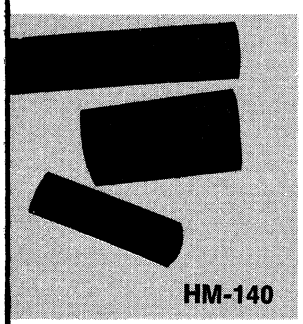
- Maximum abrasion resistance and high dielectric strength.
- Shrink temperature 150°C.
- Standard colors—black, and clear.



TEFLON™* (POLYTETRA-FLUOROETHYLENE) SHRINK TUBING

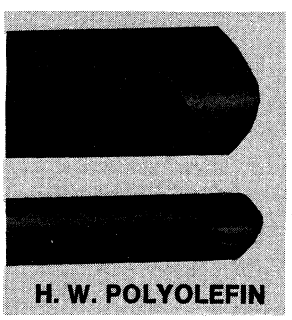
- Used in extreme electrical, thermal and chemical environments.
- Shrink temperature 350°C.
- Available in thin, standard and extra thin walls.
- Standard color natural.

*** DUPONT REG. TRADEMARK**



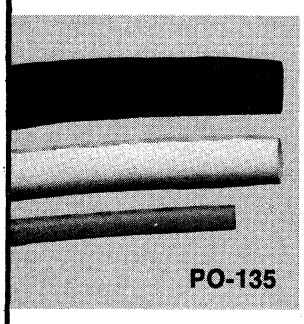
SEMI-RIGID POLYOLEFIN SHRINK TUBING

- Excellent mechanical strength/abrasion resistance.
- Shrink temperature 200°C.
- Resistant to flexing, acids, alkalis and hydraulic fluids.
- Available on spools or cut pieces for use on automatic termination machines.
- Standard colors—black, and clear.



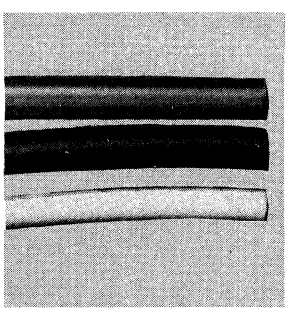
HEAVY WALL POLY-OLEFIN SHRINK TUBING WITH AN ADHESIVE LINER

- Insulates and encapsulates to form a weather-proof seal.
- Shrink temperature 200°C.
- Used on connections exposed to the elements.
- Standard color—black.



FLEXIBLE POLYOLEFIN SHRINK TUBING

- Tough, smooth, oil and chemical resistant.
- Available in a variety of flame retardant grades.
- Shrink temperature 200°C.
- Excellent for use over irregular shapes.
- Standard colors—black, white and clear.



Markel also manufactures a variety of other flexible and semi-rigid heat shrink tubings to be used in various abrasion resistant and strain relief applications. These and all of our shrink tubings can be made in various shrink ratios and colors. Contact us the next time you have a special requirement or difficult application.

ZEUS
TUBING OF TEFLON*

TFE • FEP • PFA • TEFZEL*

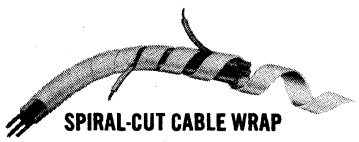
SOLVES TRICKY HIGH PERFORMANCE PROBLEMS

ELECTRONICS • AUTOMOTIVE • MEDICAL • SURGICAL
WATER & AIR SAMPLING • CHROMATOGRAPHY • LAB

SPECIALTY WIRES • CABLES • COAXIAL CORES • ETCHING
UNIQUE WIRE INSULATIONS

Write for data sheets on any of the items.

Withstands heat extremes to 500°F. Absolutely uniform. Superior lubricity. Zero water absorption. Inert to virtually all corrosives. High dielectric strength. Flexing unlimited. Shock, high pressure, and abrasion resistant. Non-toxic. Non-contaminating. Easily sterilized. Compatible with human tissues and fluids.



SPIRAL-CUT CABLE WRAP

SPLINES

SUB-LITE-WALL™ — World's smallest tubing! Walls as thin as 0.0015" in I.D.s of 0.022" + . Also walls of 0.007" with I.D.s less than 0.002". (Note: The average human hair is 0.003".)

HEAT-SHRINK — Provided in expanded state with shrink ratios up to 4 to 1. A brief application of heat produces a skin tight jacket that overpowers hell, high water, and the acid test.

DUAL-SHRINK — Outer tubing of TFE and an inner tubing of FEP. Outer tubing shrinks for tight fit when heat is applied. FEP melts and flows to form a fit so tight it can withstand severe stresses and resists moisture, acids, etc.

HEAVY CONSTRUCTION — For extra strength and durability. Ideal for automotive, chemical, electrical, and mechanical applications.

SPAGHETTI — Unmatched concentricity and tolerances. Wide range of AWG sizes, fractional inch and industrial grades.

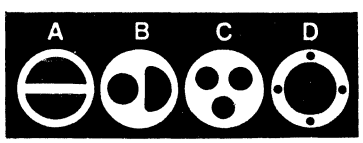
SNAPTUBE® — For the restoration and reutilization of conductors with damaged cables. Snaps into place quickly. Available in long lengths and sizes to accommodate wire bundles.

FEP TUBING — Chemically inert, excellent dielectric properties. Continuous use at 400°F. Non-aging, anti-stick. Great tensile strength.

PFA TUBING — Tough, flexible. Continuous use near 500°F. Features clarity, chemical inertness, excellent flexlife, and chemical flow. Exceptional stress/crack resistance and great dielectric properties.

"C" SHAPE GUIDE RAIL COVERS — Slick surface increases conveyor-line speed. Doubles system life for beer, soda and food packagers and manufacturers of cans and containers.

MULTI-LUMEN SUBMINIATURE TUBING — Features two or more constant diameter continuous length passages. Total uniformity.



ROLL COVERS — Reduces roller buildup, roller picking, mark-off, offset cleanup time

A PANEL OF EXPERTS

EMC PANEL OF EXPERTS:
High-quality boards meet
military and UL specifications.

EMC STAMPED AND FORMED 4-FINGER CONTACTS

- **Avoid Damage to IC Leads** with our special design featuring
  — burr-free internal edges
  — flexibility for consistent insertion & withdrawal force

EMC NURL-LOC® TERMINALS

- **Avoid Panel Damage:** Nurl-loc® ribs allow material displacement without tearing the board.
- **Avoid Panel Warp:** Nurl-loc® ribs have up to 500% more bearing surface to distribute pressure evenly.
- **Avoid Pin Straightening:** Nurl-loc® guiding action during insertion into panel promotes accurate positioning.
- **Avoid Terminal Twisting:** Nurl-loc® ribs prevent terminals from spinning during wire-wrapping.

INTERMAS® from AEG... the design system for VME and Multibus II*

AEG provides a flexible and complete design system for VME and Multibus II applications called INTERMAS. The hardware system includes enclosures, card cages, subracks, VME and Multibus II backplanes, power supplies, connectors and other accessories.

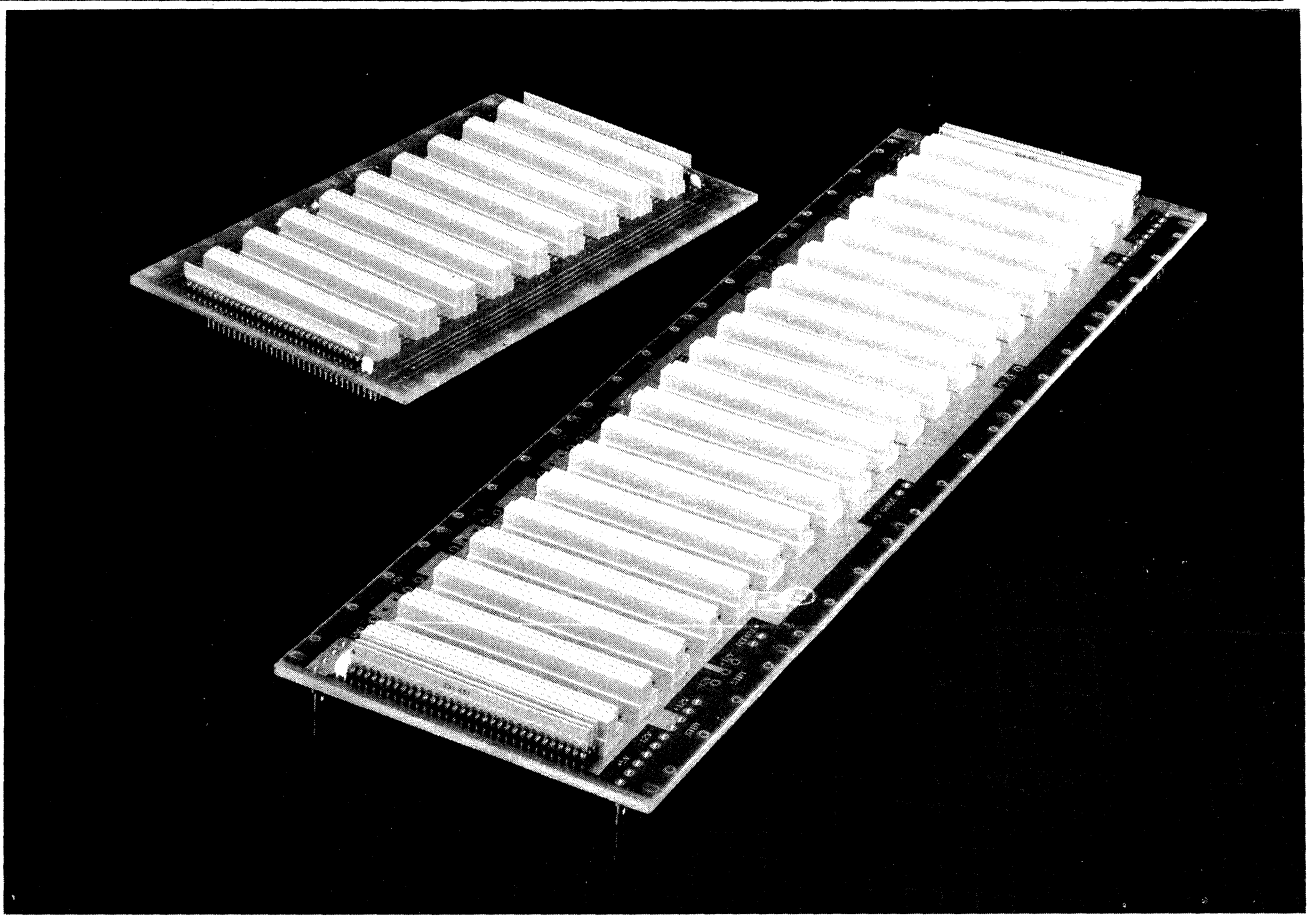
INTERMAS accessory products customize your card cage designs — Call our application engineers for immediate solutions to your VME and Multibus II card cage and backplane problems. Telefax your design sketches for an even faster response.

AEG is a worldwide source of technological innovation; a position we've maintained for over 100 years. We supply high technology products which include not only electronic packaging but liquid crystal displays, solar power, technical tubes, robotics and optical character recognition systems, to name a few. For more information contact:

AEG Corporation
Route 22-Orr Drive
PO Box 3800
Somerville, NJ 08876-1269
or call: (201) 722-9800.
Telefax: (201) 722-4905.

AEG

*Multibus II is a registered trademark of Intel Corp.



Intermas VMEbus Backplanes... AEG can supply all your electronic packaging needs.

Our VME compatible backpanels can provide multiple connections for even power distribution and low resistance losses with off-the-shelf items.

A Series
on board terminators, with up to 20 slot capacity

C Series
off board terminators, with up to 21 slot capacity

All our backplanes feature high current capacity and both low noise characteristics and crosstalk levels.

For more information contact:

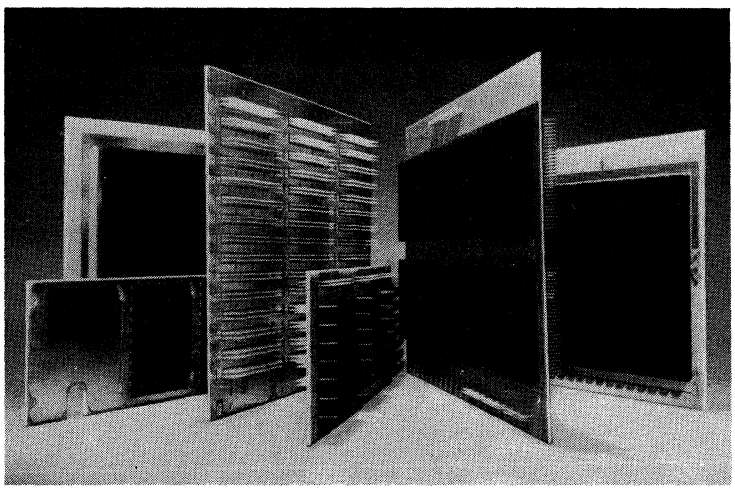
Route 22-Orr Drive
PO Box 3800
Somerville, NJ 08876-1269
(201) 722-9800.

AEG

AMP Packaging Systems is the total system solution.

APS is a full service backplane business, with high technology capabilities and focus. We are ready to address your needs for high speed, high performance, controlled-impedance signal transmission and power distribution systems.

Design, engineering, hardware and complete systems, all from a single qualified source.



Interactive Design

Early involvement of our extensive technology base can assist you in development of a cost-effective design solution to meet your cost, performance and scheduling objectives. Interaction between your design staff and our technologists assures application of the most appropriate strategies to meeting your project needs.

High Tech Design and Engineering

Your needs for more than a panel assembly house will bring you to APS. Our high technology focus yields controlled-impedance multi-layer backplanes to meet today's high speed and power management requirements. Computer modeling helps our experts determine such criteria as signal/ground relationships, power budgets, selection of hardware, etc.

New connector development

Providing the most appropriate hardware to complete the interconnection of a new system demands a knowledge of the state of the art. No one is more knowledgeable in the interconnect field than AMP. APS can direct your attention to suitable products. In addition, APS can create a design team to develop new products when necessary, to fulfill such needs as:

short signal paths;
hybrid connectors—mixing signal, power, coax, fiber optic within one housing;
connectors with contacts on 100, 75, 50 or 25 mil spacing; surface—mount devices;
shielding, etc.

Prototyping through Production

Carrying design ideas through to functional models, then into full high-volume production requires a company with the facilities, capabilities and energy to make it happen. APS has the expertise to produce early prototypes and to work with you to provide systems integration to the highest level required.

Testing

Complete testing is at the heart of modern production that meets today's quality requirements. APS provides capabilities for testing at bare board, to assembled panel and through to any level of systems integration required. The latest test methods and equipment provide the degree of sophistication demanded.

Responsiveness

While APS brings unmatched expertise, technology, hardware and production capabilities to the backpanel market, it is our ability to work in close partnership with our customers that makes APS special. Working with you, from earliest stages of design, modeling, engineering, etc., gives you the greatest benefit of our expertise. We offer fast turnaround on quotations and prototyping; production supported by program management tracking, including all stages of system integration; and follow-up provided by readily accessible field service specialists.

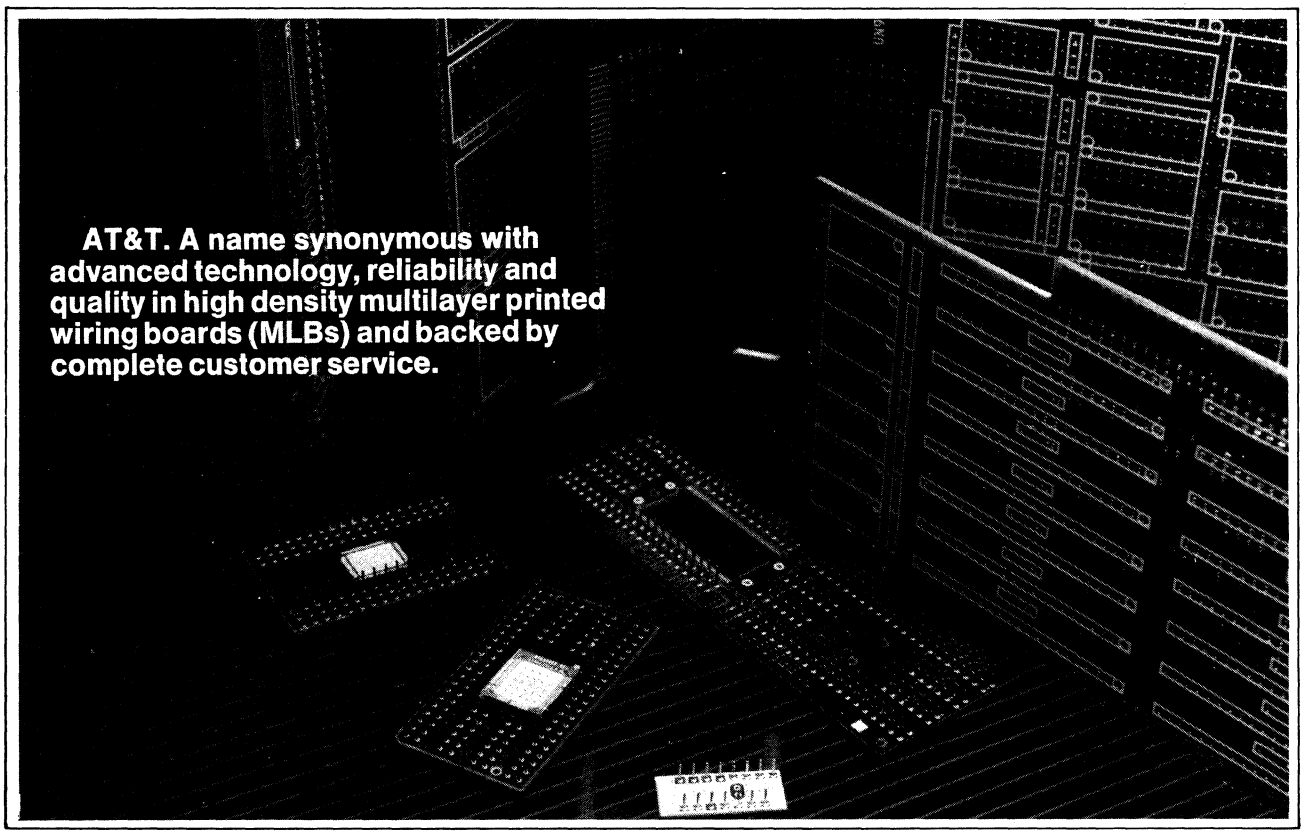
AT&T

MULTILAYER PRINTED WIRING BOARDS



MULTILAYER BOARDS

The foundation of AT&T's customer support for your MLBs is our team of applications engineers. Working closely with you from prototype through manufacture, they ensure a trouble-free introduction of your product into our automated facility. Extra effort and attention to every detail is our norm.

If you have special application requirements, AT&T supplies the resources to accommodate these needs. A separate prototype facility is available, offering fast turn-around of an MLB design by using leading-edge equipment and manufacturing techniques.

In whatever form your design information comes to us; be it digital data received over our computer network Gerber formatted magnetic tape, or single image artwork; we can produce an MLB to fit your requirements.

Our extensive computer-integrated manufacturing system allows quick response to your requests for information on pricing, delivery, or job status. Owing to our highly automated production capabilities, we can also provide customized manufacturing intervals tailored to meet your turnaround requirements.

This same computer system schedules customer orders, tracks them through manufacture and ships your product as promised. We strive to ensure efficient delivery and reorder so that you receive your MLB on time to meet your marketing requirements.

For additional information, contact your AT&T Account Manager, or call:
☐ AT&T, 555 Union Boulevard, Dept. 51AL603140, Allentown, PA 18103 • 1-800-372-2447

AT&T reserves the right to make changes to the product(s) or circuit(s) described herein to improve reliability. function or design. No liability is assumed as a result of their use or application. No rights under any patent accompany the sale of any such product or

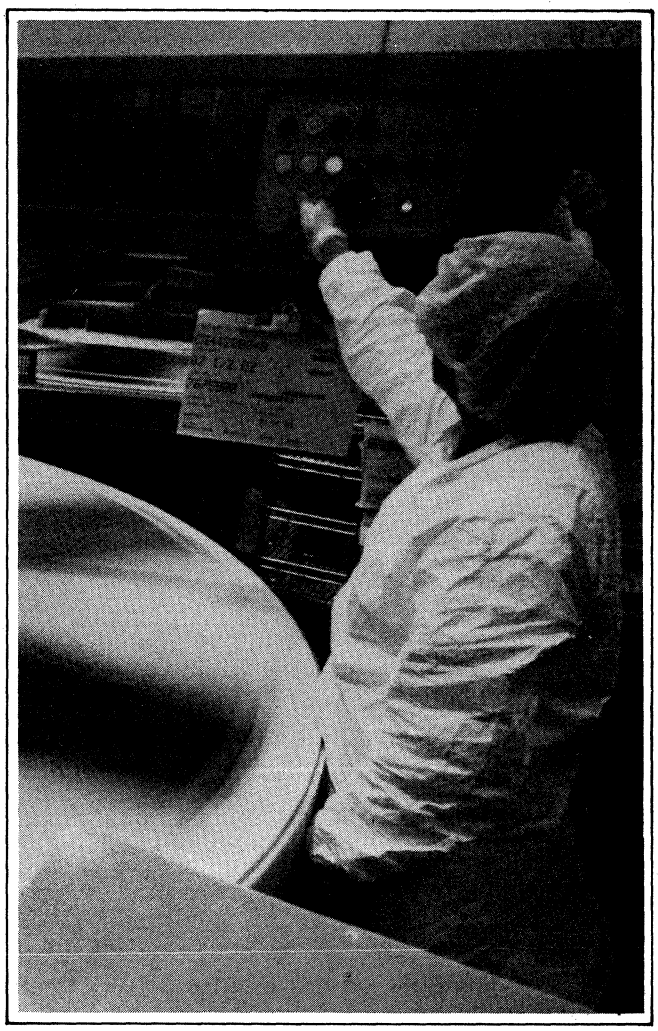
AT&T

MULTILAYER PRINTED WIRING BOARDS



TECHNOLOGY

. . . to produce high density multilayer boards. AT&T can accommodate your requirements with the following capabilities even on board sizes to 16½″ x 23″.

- Line widths and spaces to 6 mils on surface and innerlayers
- Plated-through hole sizes drilled to 13 mils
- Buried microvias drilled to 8 mils
- High aspect ratio drilling/plating (7:1)

If your design requirements are more complex, merely consult our applications engineers with your specifications.

AT&T's multilayer boards are UL approved. Available substrate materials include:

- FR4 (MIL-P-55110D)
- BT (Bismaleimide Triazine)
- Polyimide
- CIC (Copper Invar Copper)

Various surface finishes are also available:

- Reflowed Solder
- SMOBC (Solder Mask Over Bare Copper) with Hot Air Solder Leveling
- Bare Copper (with solderability protection)
- Gold
- Gold Over Nickel

Contact edge finishes include:

- Gold Plating
- Gold Plating Over Nickel
- Gold Flashed-Palladium Plating Over Nickel

For additional information, contact your AT&T Account Manager, or call:
☐ AT&T, 555 Union Boulevard, Dept. 51AL603140, Allentown, PA 18103 • 1-800-372-2447

AT&T

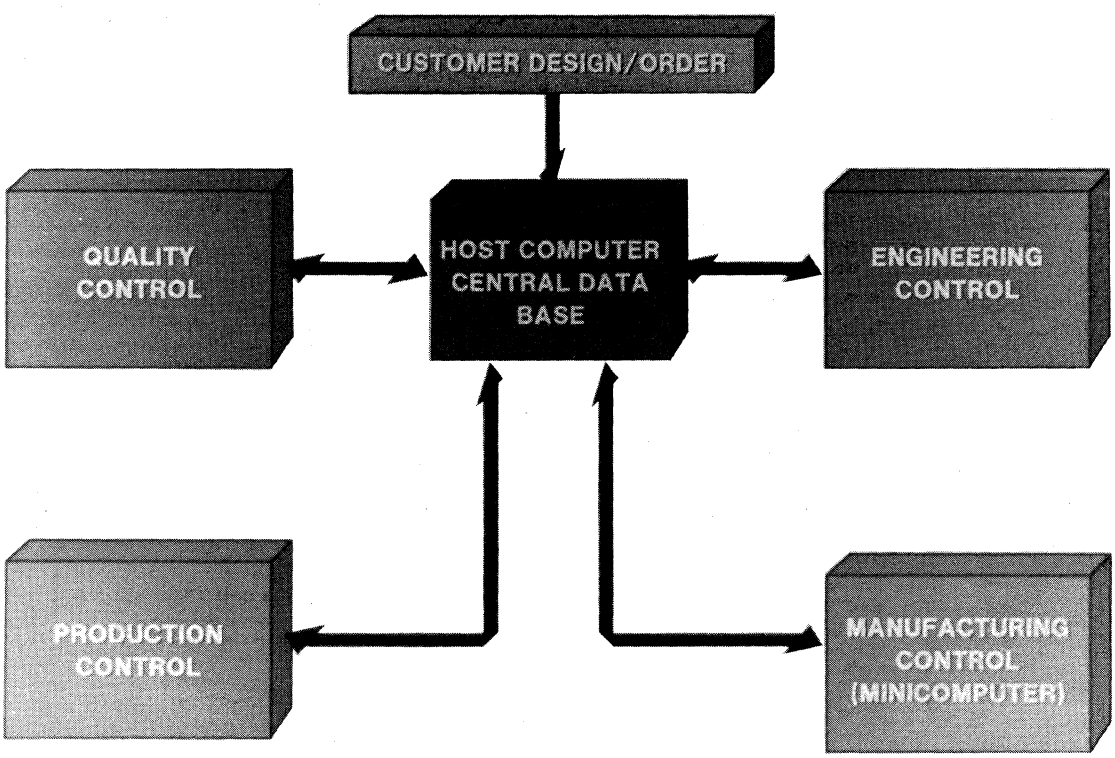
MULTILAYER PRINTED WIRING BOARDS

LEADERSHIP

. . . through automation. AT&T's Richmond plant offers high volume manufacturing capabilities that have been recognized industry-wide. Our efficient use of CAD/CAM allows downloading of computer files directly to manufacturing. This allows us to quickly update any MLB design while continuing high volume manufacture. For example, we can convert new design data directly to accurate laser generated artwork. This process is remarkably fast, yet still creates highly precise artwork for production.

The benefit to you of our highly automated, computer-controlled design and manufacturing processes is a higher quality MLB—one more way of providing total customer support.

COMPUTER INTEGRATED MANUFACTURE



For additional information, contact your AT&T Account Manager, or call:
☐ AT&T, 555 Union Boulevard, Dept. 51AL603140, Allentown, PA 18103 • 1-800-372-2447

ATLEE BUS BARS

Atlee is a full line manufacturer of bus bars, serving the computer industry, avionics, military contractors and various high tech manufacturers. We have available design and engineering services as well as prototype department. In addition, Atlee has sales representatives nationwide to service our customers. Please contact Atlee to service your bus bar requirements.

TO SPECIFY AN ATLEE BUS BAR

Please contact the factory for a bus bar catalog and any questions you may have.

TO SPECIFY A CUSTOM BUS BAR

If your requirements do not permit the use of an Atlee Standard Bus Bar, send a drawing print or even a rough sketch of the Bus Bar that would meet your specifications and let Atlee's Engineering & Sales Department work out the details and give you a quotation. Atlee will manufacture any type bus bar to your specifications. In general the information required includes:

1. Application
2. Space available
3. Current paths required
4. Type of terminations
5. Number and location of terminations
6. Current requirements
7. Voltage drop requirements
8. Tab to tab spacing on each conductor
9. Type of mounting
10. Dielectric strength
11. Environmental requirements
12. Type finish on conductors
13. Marking

DESIGNER'S NOTES

Atlee laminated bus bars consist of flat conductor layers stacked on one another and separated by appropriate dielectrics. Typically such an assembly is laminated and edge-sealed or encapsulated so that the final product becomes a rigid unit with high reliability and stable electrical and mechanical properties. These properties provide uniform capacity, low impedance, and high-speed transmissions of signal and current. Atlee bus bars are an economical alternative to multi-layer printed circuit boards and wire harnesses. They offer:

- **Lowered production costs,** because assembly is simple and fast.
- **Reduced volume** which permits higher density packaging than possible with wire harnesses.
- **Reduced noise** with ideally distributed capacitance and isolation of conductors.
- **High current-carrying capacity.**
- **Low impedance and inductance.**

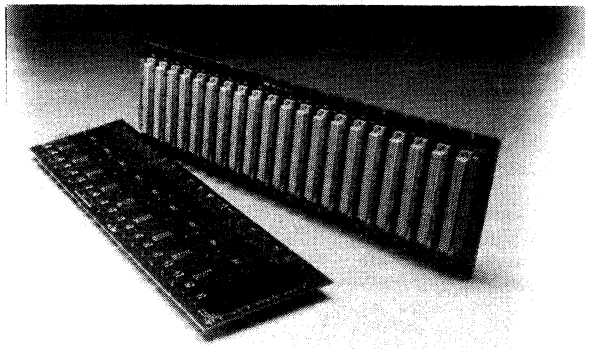
AUGAT® INTERCONNECTION SYSTEMS
Quality and Innovation

J1 VME Backplanes

J1/H Series - For high speed performance
A 4-layer multilayer construction controls impedance and minimizes crosstalk. All J1 backplanes fully conform to the VMEbus specification.

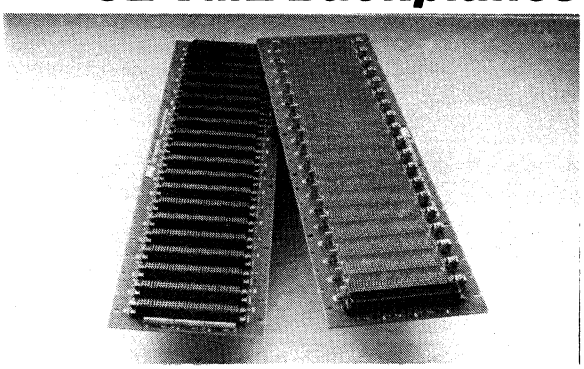
J1/VH Series - For very high speed performance
A 6-layer multilayer construction provides better isolation of signal lines to further reduce crosstalk.



J1	VH Series Part Number	H Series Part Number
20 slot	8160-VME120VH	8160-VME120H
12 slot	8160-VME112VH	8160-VME112H
9 slot	8160-VME109VH	8160-VME109H
5 slot	8160-VME105VH	8160-VME105H

J2 VME Backplanes

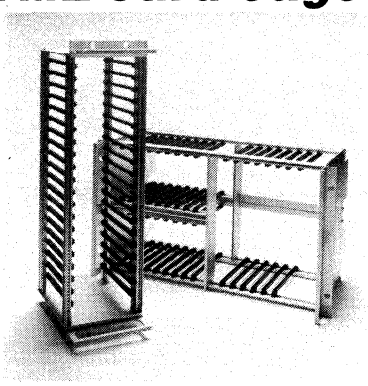
All J2 backplanes fully conform to the VMEbus specification, with Row B of each connector bused and terminated to enable 32-bit expansion. A 4-layer multilayer construction controls impedance and provides 5 auxiliary power buses.



J2	Part Number
20 slot	8160-VME220
12 slot	8160-VME212
9 slot	8160-VME209
5 slot	8160-VME205

VME Card Cages

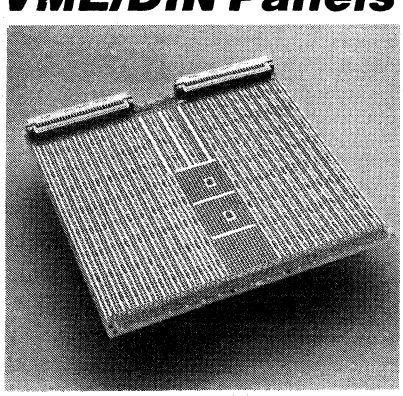
VME/DIN card cages are available in 18 different sizes. For each model listed below, there exists a full size (20 slots) and half size (9 slots).



Model Number	Height	Depth	Opt. Backplane Slots/Case	Number Of Backplanes
8170-VME316	3U	160mm	20, 12, 9, 5	1
8170-VME322	3U	220mm	20, 12, 9, 5	1
8170-VME328	3U	280mm	20, 12, 9, 5	1
8170-VME616	6U	160mm	20, 12, 9, 5	2
8170-VME622	6U	220mm	20, 12, 9, 5	2
8170-VME628	6U	280mm	20, 12, 9, 5	2
8170-VME916	9U	160mm	20, 12, 9, 5	3
8170-VME922	9U	220mm	20, 12, 9, 5	3
8170-VME928	9U	280mm	20, 12, 9, 5	3

VME/DIN Panels

VME/DIN Wire-Wrap panels are available in 8 geometries. Each geometry has Hi-Pak®, FASTPAK®, FASTPAK with PGA patterns, and extender panels. The characteristics of the FASTPAK geometries are summarized below:



Model Number	Dimensions	# of IC's	I/O

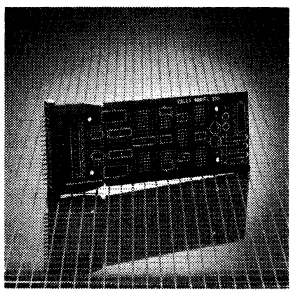
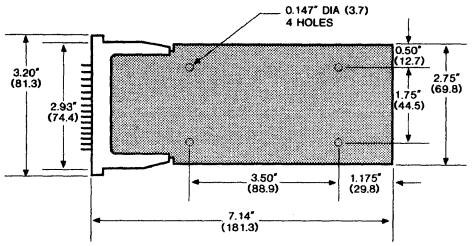
PACKAGING & PROTOTYPE HARDWARE

CALEX manufactures a line of hardware for the building of small instrumentation systems and prototyping of analog and digital circuits. A complete 64 page catalog of CALEX instrumentation modules and packaging hardware can be obtained from the factory. Call 415-932-3911 for your copy. Also call for quantity prices.

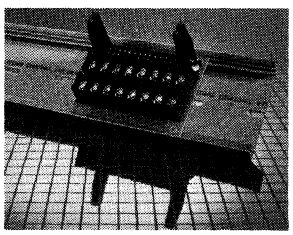


MODEL 100 PROTOCARD

The **MODEL 100 PROTOTYPE P.C. CARD** includes hole patterns for 16 and 8 pin DIPs, potentiometers, resistors, caps., transistors, and barrier strips. 72 components in all. It comes complete with a 15 pin edge connector. Can be used with Model 2005 Interface. Price $29.50

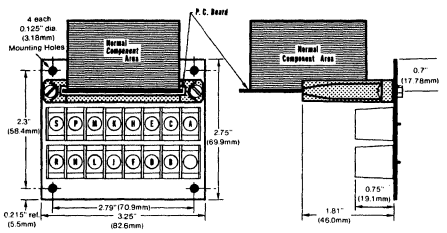


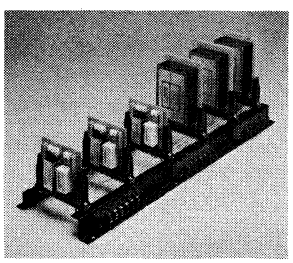
MODEL 100 DIMENSIONS
(mm)



MODEL 2005 INTERFACE

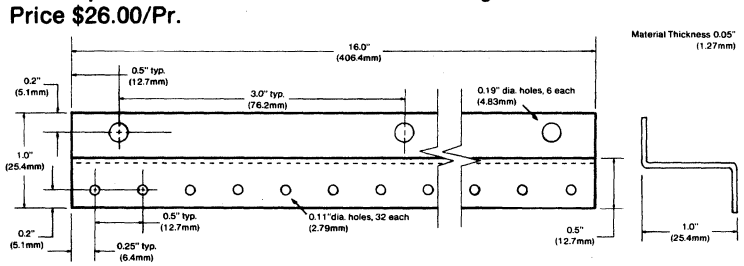
The **MODEL 2005 INTERFACE MOUNTING KIT** provides a convenient interface between 1/16" P.C. cards with 15 pin edge connections and barrier strips allowing wiring of systems using a screw driver. Price $30.00

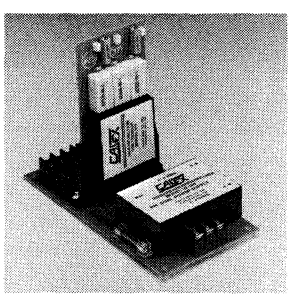




MODEL 8100 MOUNTING RAILS

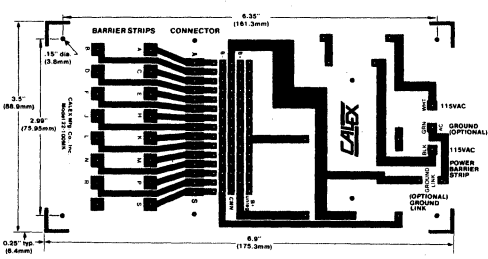
The **MODEL 8100 MOUNTING RAILS** shown with a small system mounted consists of a pair of 16" long aluminum rails with connector mounting holes on 1/2" centers. Rails provide 1" clearance from mounting surface and can be cut to length. Price $26.00/Pr.





MODEL 22-100MK

The **MODEL 22-100MK POWER SUPPLY** shown with an amplifier board installed consists of a fused line powered +/-15 VDC@+/-100 mA modular power supply and a vertically mounted 15 pin connector with built-in card guides. Single card Model 100 prototypes or systems can be wired using a screw driver. Price $143.00

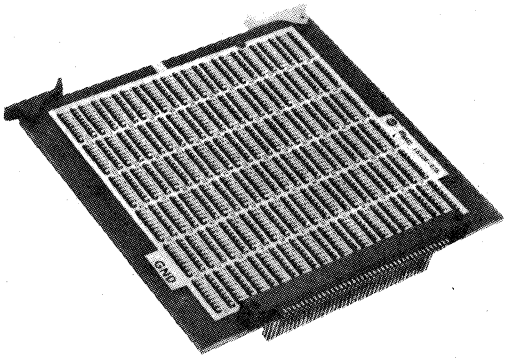


TOP VIEW MODEL 22-100MK

For your small system or prototype AC/DC or DC/DC power source needs see the CALEX listing in EEM section 4000. For instrumentation amplifiers, strain gage signal conditioning, or AC line voltage monitors see our listing in EEM section 1100. A complete 64 page Power Conversion Design Guide & Catalog is available from the factory. Call 415-932-3911.

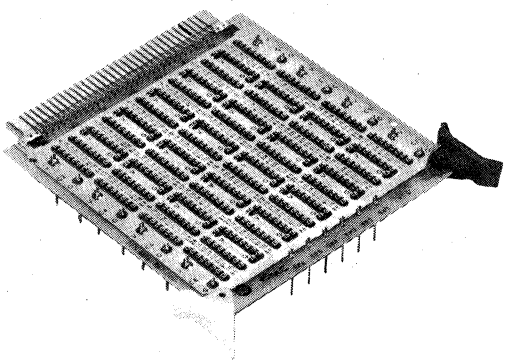
EMC®
Interconnection Specialists

INTERCONNECTION SPECIALIST



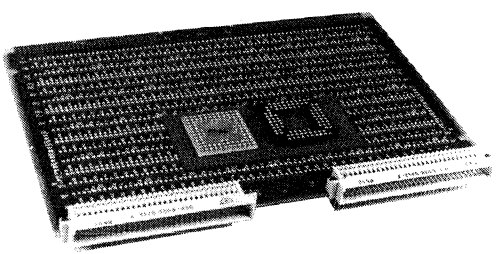
120 Contact Right-Angle Connector Panel

EMC'S "W" Series 120 Contact Right-Angle Connector panels feature 14-pin, 16-pin and universal pattern boards. Each pattern style is supplied with a 120-pin male right-angle connector.



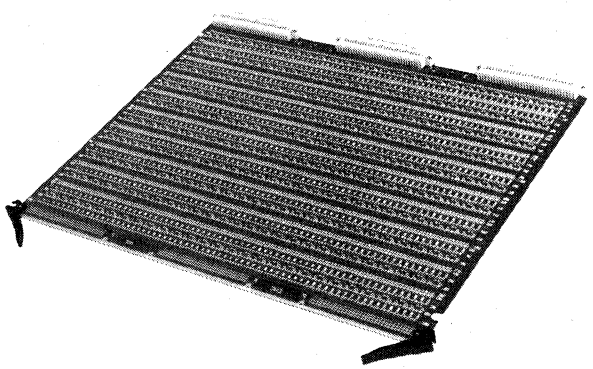
Mini-Socket Panel With 72-Contact Edge-Connector

EMC'S "M" Series Mini-Socket Panels with a 72-Contact Edge Connector feature wire-wrap® socket pins in 14-pin, 16-pin and universal patterns.



3U And 6U With PGA Pattern

EMC'S VME Series Panels with a universal pin grid array pattern with surface mounted decoupling capacitors are designed to accommodate any size pin grid array device up to an 18 x 18 grid on .100 (2,54mm) spacings. This PGA pattern incorporates solder pads on the wire-wrap® side allowing for the easy installation of EMC, PGA, wire-wrap® sockets. Costly pin grid array adaptors won't be needed, thereby saving both money and time. This savings is especially helpful in early prototype stages!



9U Triple Size

EMC'S VME30 Series Panels incorporate 2 dedicated I/O connectors to standard VME specification and one completely uncommitted DIN 41612 connector. The 280mm deep card can accommodate up to 270, 16-pin IC devices which yields great design flexibility. Many accessory style choices are available to enable the user to optimize his design decisions.

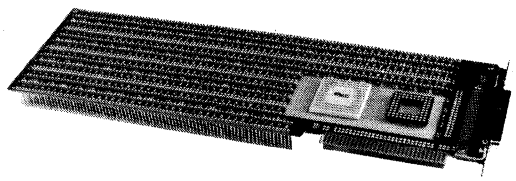
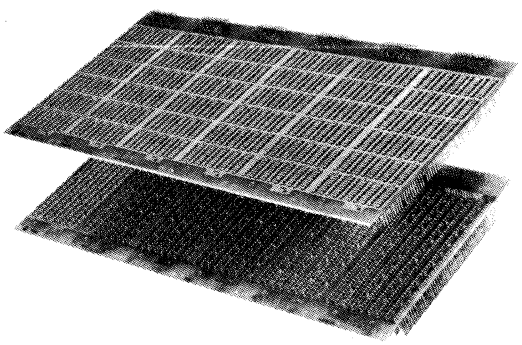
Interconnection Specialists

SCHOTTKY, MULTIBUS, RACK & BACKPANELS, IBM PANELS AND MORE



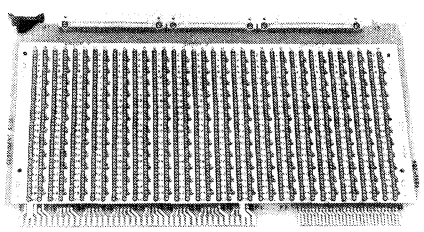
IBM PC XT/AT Panels

EMC'S IBM PC XT/AT compatible series bus panels feature hi-density universal patterns with or without PGA patterns with surface mounted decoupling capacitors. These panels are designed for hi-reliability prototyping for the IBM PC XT/AT series computers. These panels utilize committed I/O sections, and overall dimension to PC XT/AT specifications to ensure compatibility within the PC XT/AT system.



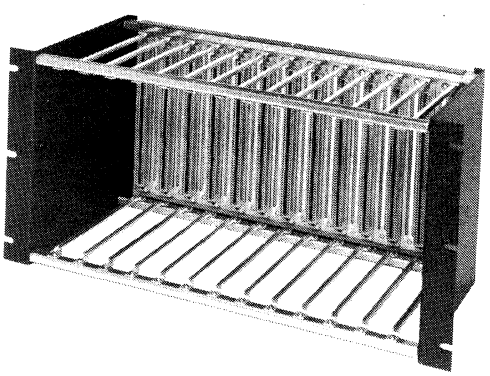
Sectional Schottky Panels

EMC'S "SL" Series Sectional Schottky Panels feature a three-layer multilayer panel with two GND planes which effectively increases board capacitance. True multilayer design allows for low impedance GND distribution and the reduction of high frequency noise.



Multibus 1 System

EMC'S "MB1" Series Panels are designed for use with Intel's Multibus System. Standard universal, high-density universal and Schottky high-density universal versions are available. Up to 150, 16-pin IC's can be packaged on the high-density version. Ground webbing between pins on the wire-wrap® side helps to decrease noise.



Racks And Backpanels

EMC's racks and backpanel systems are available to compliment EMC's R Series, W Series, M Series, and all VME Series wire-wrap® cards. Separate connectors, extender cards, and blank cards are also available to fulfill your total system requirements.

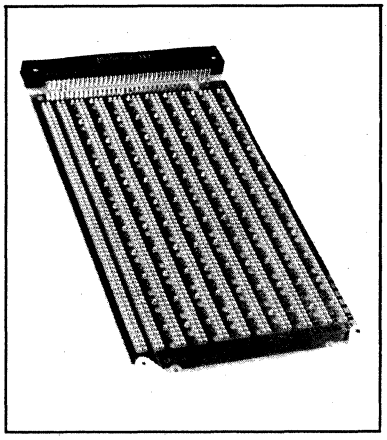
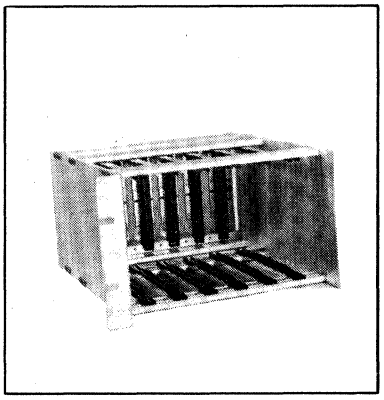
EMC®

108-PIN CONNECTOR PACKAGING SYSTEM



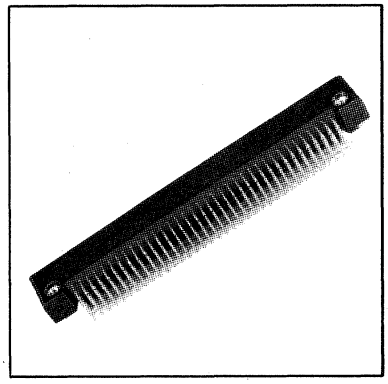
HIGH-DENSITY UNIVERSAL WIRE-WRAP® PANELS

- MULTIPLE VOLTAGE PLANES
  - V1, V2, and GND panels and backplanes
- WIRE-WRAP® TO WIRE-WRAP® TWO PIECE CONNECTOR PIN AND SOCKET CONTACTS ENSURE HIGH-RELIABILITY
  - solder joints on input-output signals eliminated
  - positive interfacing alignment
- MAXIMUM INPUT-OUTPUT CAPABILITY
  - up to 108 I/O terminals per connector — 540 terminals per panel
  - high ratio of I/O terminals to IC locations
- DOUBLE SIDED AND MULTI-LAYER VERSIONS
  - available with 1, 2, and 3 connector versions with two height sizes



RACKS AND BACKPANELS

- 1.2 INCH SPACING FOR 13 POSITION AND 6
- 0.6 INCH SPACING FOR 26 POSITION AND 11
- END PLATES FLUSH OR RETMA
- CONNECTOR BACKPLANES REMOVABLE FOR MACHINE WIRE-WRAPPING
- BACKPLANE OPTIONS
  - uncommitted V1-V2 and GND
  - uncommitted V1 and GND
  - committed V1-V2 and GND



108 WIRE-WRAP® CONNECTORS

- CONTACT SPACING ON .100 GRID
- POSITIVE INTERFACING ALIGNMENT
- HI-RELIABILITY PIN/SOCKET TYPE I/O CONNECTOR
- NEED FOR SOLDER JOINTS ON WIRE-WRAP® FEED-THROUGH PINS ELIMINATED
- COLD SOLDER JOINTS, BRIDGED PINS, AND LIFTED COPPER PADS ELIMINATED
- HIGH-DENSITY I/O-LOW INSERTION FORCES

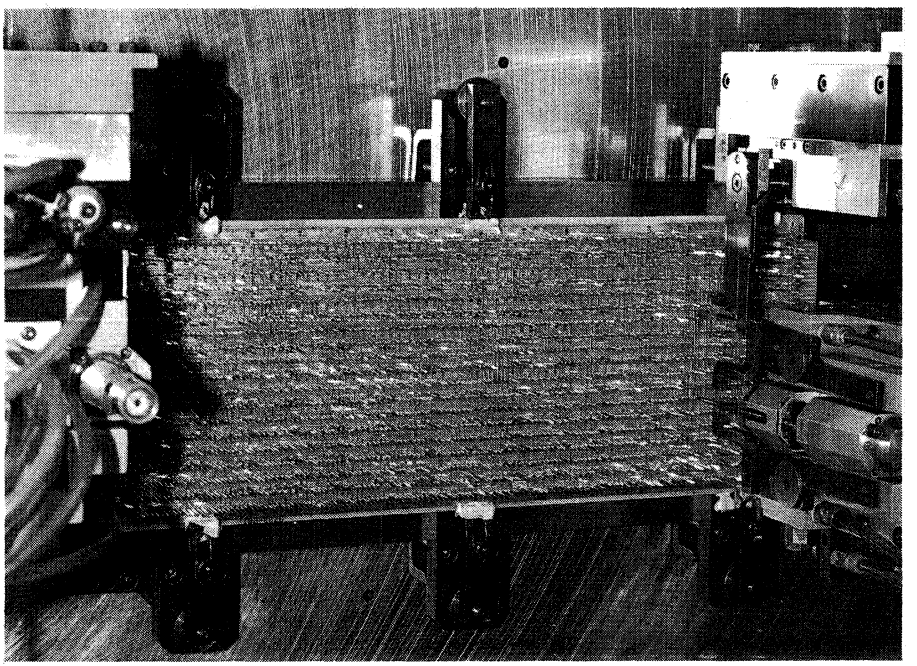
SPECIALIST IN WIRE-WRAPPING



Wrapex Corporation is a full-service wire-wrap® facility offering complete and prompt delivery on prototype, production, and pre-production orders. Wrapex maintains a stock of standard industry off-the-shelf boards completely tested on our Trace Instruments #948 electrical tester. Wrapex will also wrap your custom panels and backpanels and those supplied by other manufacturers.

- Gardner-Denver automatic and semi-automatic wire-wrap® machines
- Trace Instruments #948 Electrical Tester
- Assembly capabilities
- Quality Assurance capabilities
- Programming capabilities

CAMAC computer automated measurement and control
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3
KSR keyboard send /receive

L
LC inductance capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIB microcomputer interface board
MIC microwave IC
MIPS million instructions per second
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

Total project control off-the-shelf with

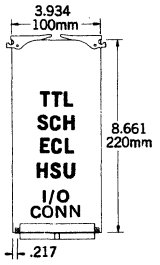
THE METRIC SERIES®

World Class Packaging System

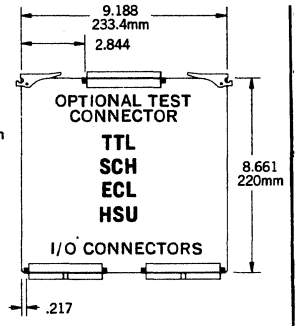
High-Speed Circuit Performance in DIN/Eurocard standard format.

24 Socket Pin PC Boards

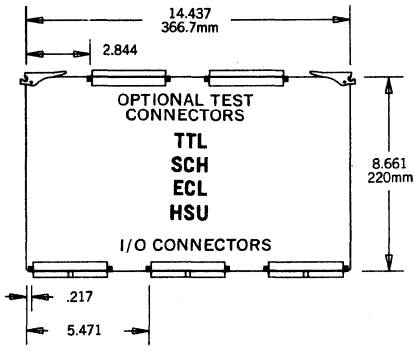
Model 11



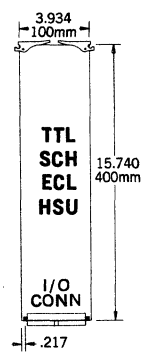
Model 21



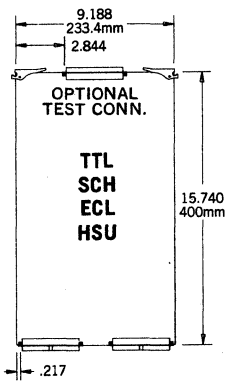
Model 31



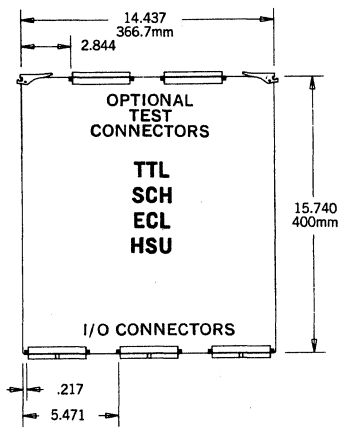
Model 12



Model 22



Model 32



All Metric Series boards contain high density 96 pin inverse DIN connectors.

24 Extender Cards

Ruggedly framed and supported extender card with 96 pin Reverse DIN connectors, 5-layers, 96 patched test points for each board size and logic option.

12 Backplanes

For .800" or 1.200" card centers, 96 pin Reverse DIN connectors, press-fit V&G wrap-pins. Massive power and ground planes. Wire wrap interconnections. TTL, Schottky, ECL and High-Speed Universal.

16 Card Racks

6 free standing and 6 Retma mount vertical racks for each size board .800" and 1.200" card spacing. 2 horizontal (free standing or Retma mount) racks for Model 32 boards, and mixer racks for different board sizes.

Three Pin Technologies

Stitch-Wire

MIL-approved wiring technique providing optimum performance for ECL and fast Schottky devices. Fast, easy and low cost changeability with the highest reliability of difussion bonding.

Wire-Wrap

Tin or gold plated 1 to 3 level wrap pins. Suitable for TTL and some Schottky applications.

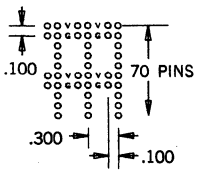
Insulation Displacement. Fast, convenient breadboarding for a test circuit. Available only in TTL boards in the Metric Series. Easy conversion to Stitch-Wire.

Design, Wiring Services and Equipment.

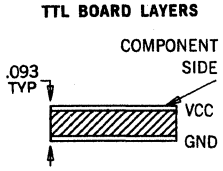
Logic conversion, Stitch-wiring, Insulation Displacement wiring. Numerically controlled and manually operated Stitch-Wire machine. Custom Board Design.

All EMS Metric Series Boards are available in four configurations:

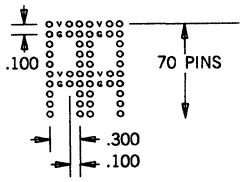
TTL 2-Layer Board
Typical TTL Pin Pattern



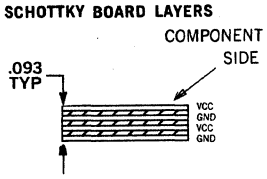
TTL BOARD LAYERS



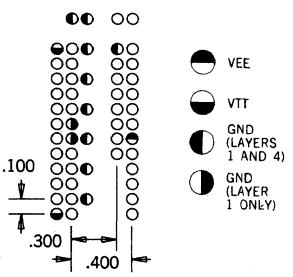
Schottky 4-Layer Board
Typical Schottky Pin Pattern



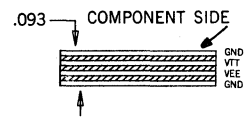
SCHOTTKY BOARD LAYERS



ECL 4-Layer Board
Typical ECL Pin Pattern

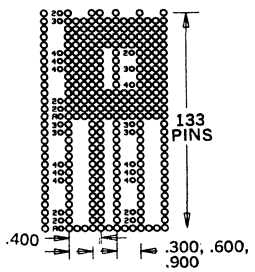


ECL BOARD LAYERS

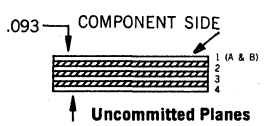


High-Speed Universal
HSU 4-Layer Board

TYPICAL HSU PIN PATTERN



HSU BOARD LAYERS



Uncommitted Planes

Allows mixing of TTL & ECL

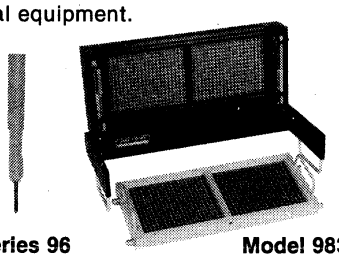
Dual Fixture Kit

SERIES 96 DOUBLE DENSITY SYSTEM
Introduced in 1983, offers twice the contacts per total space required when compared with SERIES 157 & 140 Removable Plugboard SYSTEMS. A choice of Modular Plug or wrap termination for connecting to external equipment.



Series 96 Plugwire Tip

Model 983 (2400 Positions)

APPLICATIONS OF REMOVABLE PLUGBOARD SYSTEMS

MAC PANEL Plugboard Programming Systems are used whenever there is a need for frequent or fast changes in the functions performed by electrical equipment and circuits or in the interconnection of two or more machines and/or circuits. Removable Plugboards are prewired with plugwire assemblies to provide a given pattern of interconnection. Changes can be made either by changing the program wired in the removable Plugboard or by simply replacing the Plugboard in the Receiver with another pre-programmed Plugboard in a matter of seconds. **MAC PANEL** Plugboard Programming Systems are used as large connectors with up to 7200 contact positions on standard models. Thousands of **MAC PANEL** systems have been installed in the United States and in over forty foreign countries since 1958.

GENERAL PRODUCT DESCRIPTION

Each system consists of a Receiver and one or more removable Plugboards. The Receiver is the frame and the engaging mechanism that accepts the removable Plugboard. Depending on the system there are from one to six molded black phenolic or blue diallyl phthalate panels in the Receiver and Plugboard frames. A molded panel will contain up to 1280 holes or contact positions. These panels are silk screened with a grid pattern that provides a unique alphanumeric address for each contact position in the system. Special customized printing in any number of colors can be provided on either the Plugboard or Receiver.

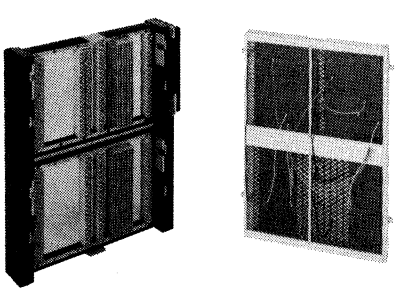
A contact spring is factory installed in each Receiver contact position. The front portion of these nickel or gold plated contact springs mates with nickel or gold plated plugwire tips inserted in the appropriate contact position of the Plugboard when the Plugboard is inserted in the Receiver. All Receivers are equipped with a mechanical interlock that assures proper mating of contact springs and plugwire tips. Each contact position can also be directly connected to the equipment from the rear of the Receiver by soldering, insertion of taper pins, or wire-wrapping. The desired method of connection must be determined prior to ordering so that the appropriate type of contact springs will be provided in the Receiver.

SERIES 96
The more sophisticated mechanism of the SERIES 96 allows for precise alignment of a more dense array of mating contacts. The system consists of up to 6 precisely drilled sections. The removable plugboard has alphanumeric silk screening of each of the nylatron sections. Systems are in multiples of 1200 contact points ranging from 1200 to 7200 points. The receiver sections made of G-10, hold 1200 female sockets with gold plated BE-CU contacts. Termination for wiring to external equipment can be done through wire-wrap, ribbon cable or using single conductor wire. Each cable assembly may contain up to 60 conductors for mass termination through a 2 x 30 modular connector.

The SERIES 96 is also designed for hybrid applications incorporating Signal, Power and Coax capabilities in one compact mechanism.

MAC PANEL maintains shelf stock on over 500 types of plugwire assemblies. These include single conductor and multi-conductor unshielded and shielded plugwires as well as crimpable and wire-wrappable plugwire tips.

MAC PANEL customer service personnel and design engineers invite your inquiries. We can promptly and economically design, build, and install a special custom system or plugwire if our standard product will not meet your requirements.



MODULAR AUTOMATIC TEST EQUIPMENT (MATE) INTERFACE SYSTEMS: Please see our ad in Volume D Section 3475.

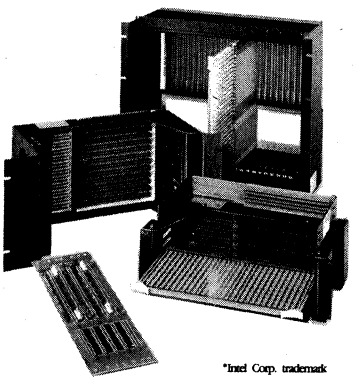
MUPAC®
IC PACKAGING SYSTEMS

Build The System You Need

Make Mupac Your Choice for Multibus* and VME Packaging Hardware...

Multibus I



*Intel Corp. trademark

Yes! Mupac has everything you need for Multibus compatible packaging!

This flexible, compact and reliable packaging system can handle from 2 to 26 boards in easy-to-use modular increments. The strong, black anodized aluminum rack is U.L. recognized and features guides on .60 and .75 inch centers, an open rack design for ease of access to installed boards and hold-down bars to facilitate shipping.

Mupac's GND/SIG-GND/GND backplane is designed to eliminate or drastically reduce crosstalk and noise. Features include shielded signal lines, power connectors and terminated bus lines. Provisions for parallel priority, -5 volt regulator and reset switch printed circuitry are designed into the backplane as well.

Mupac's 2-sided and 4-layer patented Schottky wire wrap boards are ideal for prototype and preproduction. The Schottky boards are designed to handle the fast rise and fall times associated with today's high speed devices. The board construction and layout minimizes the effects of system noise, crosstalk, ringing and propagational delay. The high density pin layout maximizes packaging density and keeps signal lines short.

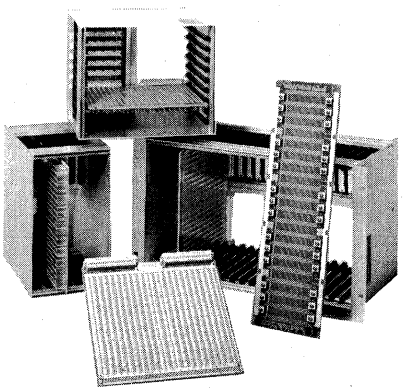
Make The Right Choice...Choose Mupac

Multibus II



Mupac...First with Multibus II packaging hardware.

See for yourself why Intel chose Mupac to design and manufacture the FIRST approved packaging system for Multibus II.

This flexible, compact and reliable packaging system can handle from 5 to 20 positions in easy-to-use modular increments. Standard built-in features like .090 thick aluminum side plates and extra wide support extrusions work together for strength and durability.

The iPSB™ and iLBX-II™ backplanes are of a 6-layer design and feature press-fit 96-pin DIN connectors, built-in power blocks for easy installation of power cables, terminated bus lines, controlled characteristic impedance for noise immunity and multiple voltage and ground planes.

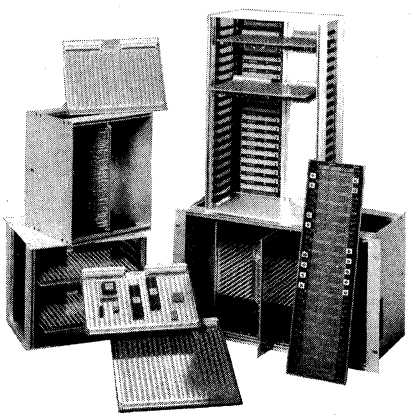
Mupac extender board allows maximum distribution of current from the connector through the extender.

Mupac's 4-layer Schottky wire wrap boards are ideal for prototype or preproduction.

Call or write today!

Make The Right Choice...Choose Mupac

VME packaging hardware



When only the BEST performance is needed, turn to Mupac for VME packaging hardware.

Mupac's VME series sub-rack and backplane assemblies are designed as part of a flexible, compact and reliable packaging system that offers the BEST solution to VME compatible packaging.

Mupac's VME packaging system can handle from 5 to 21 positions in easy-to-use modular increments. Standard built-in features like .090 thick aluminum side plates and extra wide support extrusions work together for strength and durability.

The J-1 backplane is a 6-layer design for high power capacity and maximum conductivity. The J-2 backplane is a 2-layer design. 96-pin press-fit DIN connectors are featured on both backplanes along with terminated bus lines to minimize ringing and power blocks for easy installation of power cables.

Mupac's extender boards allow maximum distribution of current from the connector through the extender.

Mupac's 4-layer Schottky wire wrap boards are ideal for prototype or preproduction.

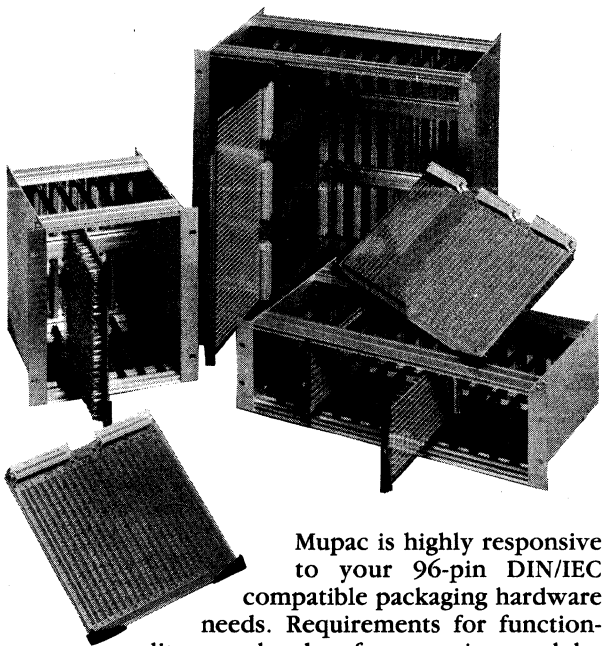
Just the Way You Want It!

MUPAC®
IC PACKAGING SYSTEMS

BUILD IT YOUR WAY WITH MUPAC'S 96-PIN DIN/IEC COMPATIBLE PACKAGING SYSTEM!

The most advanced 96-Pin Standard packaging hardware on the market, today!



Mupac is highly responsive to your 96-pin DIN/IEC compatible packaging hardware needs. Requirements for functionality, speed and performance in a modular packaging system are combined with Mupac's advanced manufacturing procedures to produce Mupac Metric; the 96-pin DIN/IEC compatible standard packaging hardware that works together as one integrated solution to your IC packaging requirements.

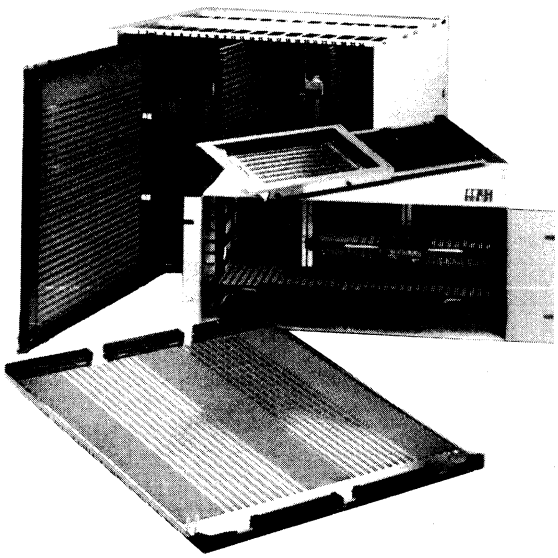
Mupac's comprehensive family of standard packaging hardware includes sub-racks and power backplanes that can handle up to 26 boards in depths that go from 160mm to 400mm and range in height from 3U to 12U in easy-to-use modular increments.

And...only Mupac offers you the ideal combination of high density packaging, high speed operaton and flexible power distribution, plus the convenience of wire wrap interconnections.

Our Metric wire wrap boards feature Mupac's patented 4-layer Schottky construction. This design maximizes the conductivity and capacitance characteristics of the board, which are the power source and ground reference of the high speed ICs, while minimizing the effects of system noise, ringing and propagational delay.

Call or write today!

MUPAC SOLVES YOUR HIGH SPEED WIRE WRAP NEEDS WITH STANDARD 108-PIN PACKAGING HARDWARE!



Mupac offers a versatile range of standard packaging building blocks that enable you to translate your designs into full prototypes and complete systems faster and with fewer restrictions than any other product on the market today. It's Mupac's system approach to packaging your system and it's complete down to the smallest detail.

Mupac's comprehensive family of high speed packaging hardware includes horizontal and vertical racks, 4-layer Schottky wire wrap boards, power backplanes, mounting hardware, cable assemblies, connectors and other accessories.

Our system allows you to package as little as one, single 108-pin connector size Schottky wire wrap board that measures 4.5″ X 8.125″, to as many as thirteen, 347 series, high density wire wrap boards that measure 14.9″ X 16.125″ and hold as many as 480 IC's each, based on 16-pin devices.

Mupac's Patented Schottky compatible boards are designed to maximize the conductivity and capacitance characteristics of the board, minimize system noise, ringing and propagational delay and enhance the rise and fall times of the signal.

And...only Mupac offers you the ideal combination of high density packaging, high speed operation and flexible power distribution, plus the convenience of wire wrap interconnection.

24 PAGE PRODUCT INDEX BOOK LISTS 3,800 ITEMS

62 CROSS REFERENCE CARDS

300 FILE FOLDER LABELS

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

"SERVICE IS OUR SPECIALTY"

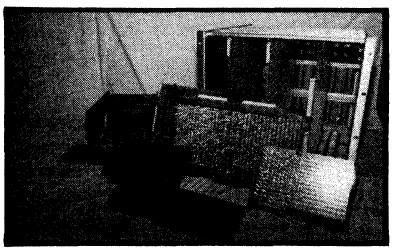
Product Technology supplies the highest quality products consistent with our customers' workmanship standards and cost requirements.

DISCRETE WIRING SERVICES

Automatic and semiautomatic wire wrapping and stitch-wiring — point-to-point, XY and special routing.

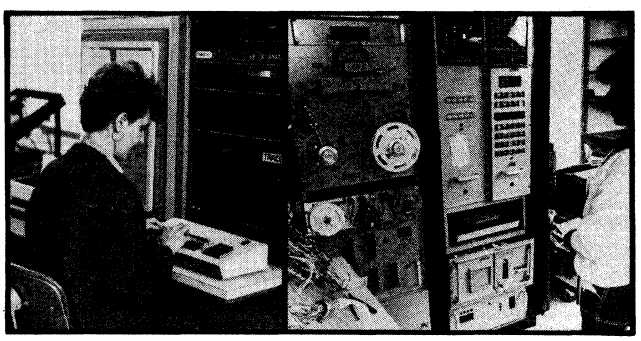
ELECTRONIC PACKAGING PRODUCTS

Logic cards, backplanes, extender cards, racks — DIN/EUROCARD, VME, multibus, IBM PC-XT and AT, S-100 and standard bus; custom PC boards, hardware and wire (cut and stripped).



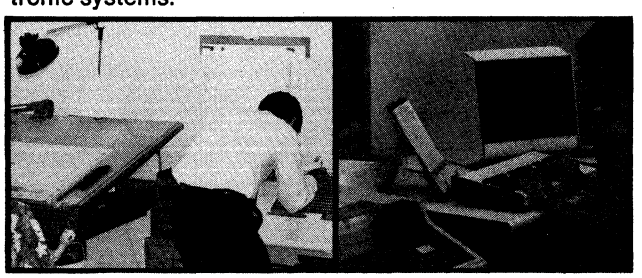
TESTING SERVICES

Bare board and in-circuit and fixtures.



ENGINEERING SERVICES

PC board design (CAD), digitizing, photoplotting, data conversion, design analysis and documentation packages. PC boards, cables, harnesses and complete electronic systems.



ASSEMBLY SERVICES

- TRIEBER AQUEOUS "IN LINE" CLEANING SYSTEM
- AUTOMATIC LEAD CUTTERS 12″ AND 18″
- MARK V AUTOMATIC LEAD PREPPERS
- MARK II WIRE CUTTERS

VECTORBORD plus™ High Speed Circuit Development System

VECTOR ELECTRONIC COMPANY

HIGH SPEED CONSTRUCTION
- Designed for high speed devices such as ECL, ALS and FAST™ (Fairchild), and CMOS
- High density grid allows minimum wire lengths for maximum speed performance
- Massive inter-pin copper planes provide minimum length current return path and reduce ringing and crosstalk.

SURFACE MOUNTED DECOUPLING CAPACITORS
- Superior for noise reduction
- Increases packaging density.
- Eliminates wiring tool interference
- Alternating values prevent resonance

HIGH DENSITY PGA MOUNTING
- Large area accepts any size PGA or PLCC socket
- Selectively loaded for easy DIP installation
- Optional low insertion force socket pins
- Full or partial pin loading

TWO TYPES OF MULTILAYER CONSTRUCTION (4 layers)
- Schottky (SCH) version with redundant power and ground layers
- High speed universal (HSU) with four independant layers for multiple power planes
- SCH & HSU versions available for each board size
- Boards are .125" thick with .062" milled edges

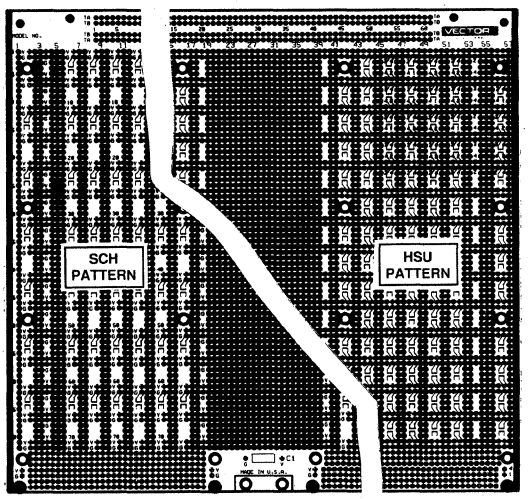
HIGH DENSITY SOCKET PIN PATTERN
- Accepts DIP devices with .300", .400", .500", .600", .900" and 1.2" lead spacing without using adapters
- On-grid pinfield for easy wiring geometry definition and test fixturing

96 PIN HIGH DENSITY CONNECTORS
- Compatible with DIN and IEC international standards
- Reliable pin and socket configuration
- Optional connector commitment available for VMEbus, MultibusII®, Futurebus®, or Nubus®

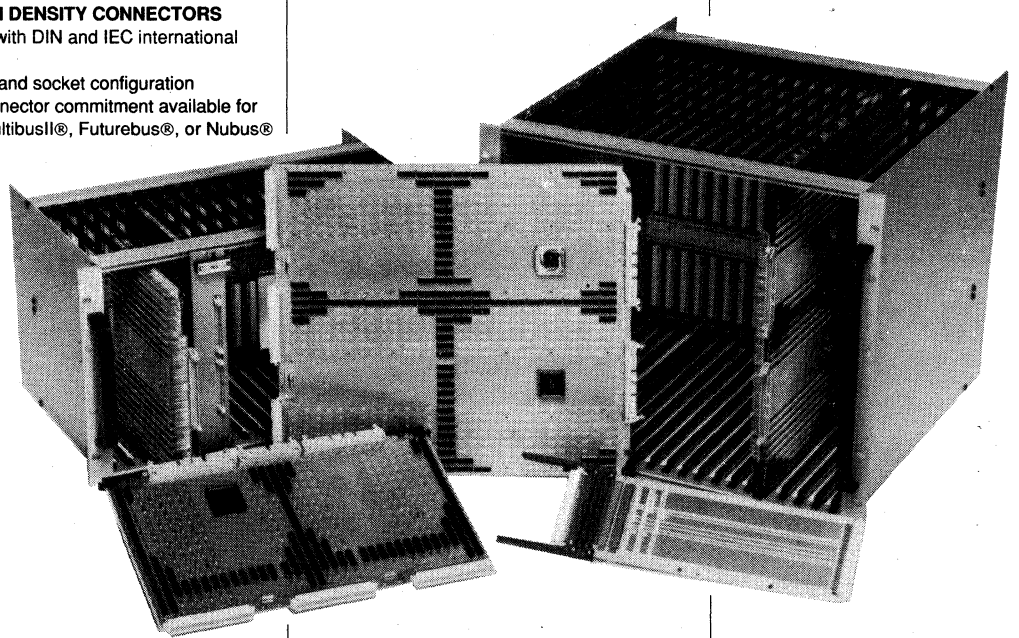
UNCOMMITTED BACKPLANES ALLOW USER DEFINED BUS ASSIGNMENTS

Vector's high performance uncommitted backplanes are 0.125" thick FR4 epoxy glass with 4 heavy two-ounce copper planes for most effective power, ground, and signal distribution. Installed 96-pin DIN connectors with wire wrap tails and spaced on 0.8" or 1.2" centers. Power pickup pins are installed for +5V and auxiliary. Available in 3U, 6U, and 9U configurations with or without power connectors, and with 13, 21, or other numbers of connectors installed in P1, P2, or P3 position. **Send for complete data.**

EUROPACKAGING PRODUCT LINE SUPPORT
- Flexible and rugged aluminum subracks
- Test extenders for high speed circuits
- Systems enclosures for rack or table top mounting



Note: Vector Apple Macintosh II™, SE™, and IBM Cards Available in Vectorbord plus™ Design



VECTOR ELECTRONIC COMPANY, 12460 Gladstone Ave., PO Box 4336, Sylmar, CA 91342-9988 Phone 818-365-9661, FAX: 818-365-5718

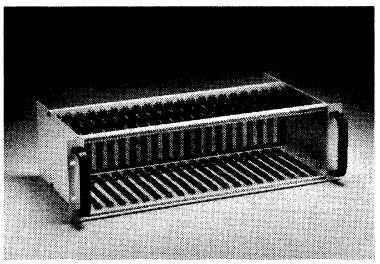
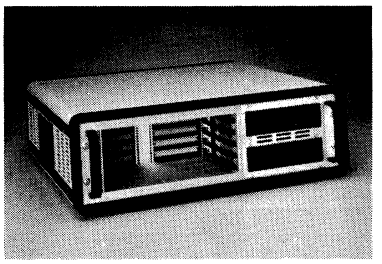
VME Backplanes, Extenders, Assembled Subracks with Installed Backplanes, and System Enclosures

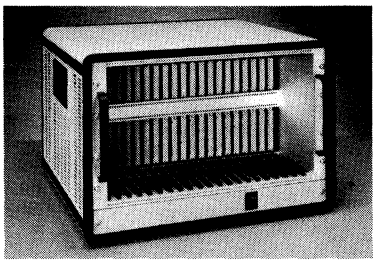
VECTOR ELECTRONIC COMPANY



21 Slot 34 VME Subrack C316 BAA42



5 Slot 6U VME System SE2322A-01



21 Slot 6U VME System SE2772A-01

ASSEMBLED SUBRACKS WITH VME BACKPLANES FOR 19-INCH RACK MOUNTING

A Vector assembled subrack with backplane is ready to plug in cards when you receive it. No more wasted time in trying to figure out what hardware you need to order to assemble your rack mounted system. Vector's subracks and backplanes meet or exceed all of the mechanical and electrical requirements of the VME specification. A multilayer shielding technique assures low noise performance. Power distribution to the backplane is accomplished with multiple polarized connectors.

C316 BAA42 Includes fully assembled rack with 21 pairs of plastic card guides, 21-slot J1 backplane. Measures 19"w x 5.21" h x 9.44" deep. Accepts 21 cards 100 x 160mm.
C316 EAA28 Includes fully assembled rack with 14 pairs of plastic card guides, 12-slot J1 backplane. Measures 19"w x 5.21"h x 9.44" deep. Accepts 12 cards 100 x 160mm.
C616 PAA42 Includes fully assembled rack with 21 pairs of plastic card guides, 21 slot monolithic backplane (combined J1 and J2 on one panel) measures 19" wide by 10.46" h x 9.44" deep. Accepts 21 cards 233.4 x 160mm.
C616 EAA28 Includes fully assembled rack with 14 pairs of card guides, 12-slot J1 backplane. Measures 19" wide by 10.46" h x 9.44" deep. Accepts 12 cards 233.4 x 160mm.
C616 EEA28 Includes fully assembled rack with 14 pairs of card guides, 12 slot J1 and 12 slot J2 backplane. Measures 19" wide by 10.46"h. x 9.44" deep. Accepts 12 cards 233.4 x 160mm.
C916 PAA42 Includes fully assembled rack with 21 pairs of guides, 21 slot monolithic backplane (combined J1 and J2 on one panel). Measures 19" wide by 15 3/4"h. x 8.9" deep. Accepts 21 cards 366.7 x 160mm.
Dress panels and handles ordered separately.

VME BACKPLANES

High speed, low noise, six layer construction, and controlled impedance design are a few of the features of Vector's VMEbus backplanes. Our "off board termination" allows the addition of another backplane slot, and the connection of one or more backplanes with our 2 slot interconnect board.
Over 20 models available.

VME MONOLITHIC BACKPLANES

Vector's monolithic backplanes are designed for high performance systems. Utilizing 8-layer construction with massive power and ground layers, they facilitate fast data transfer (up to 40 Mbytes per second) with extremely low crosstalk, minimal delay and overshoot, as required in 32-bit based systems. Connectors are DIN 41612 Class II press-fit mounted at 0.8" spacing on the 0.125" thick substrate. Power is delivered at multiple points on the backplane utilizing polarized Mate-N-Lock connectors. As an option, laminated bus bars with "power-bug" barrier terminals may be ordered. Power ratings per board slot are: +5 volts 9.0 amps; +12 volts 1.5 amps; -12 volts 1.5 amps: +5 volts standby 1.5 amps. Boards have full on board termination

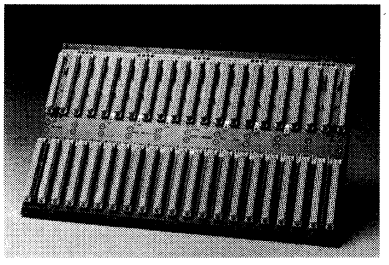
EXTENDERS

Monolithic Extender VMEE-M utilizes the same 8-layer construction design as in the monolithic backplanes described above.

Part Number	Description	Height	Lengh
VMEBP21-M	combined 21-slot, 21-slot,J1 and J2 on one substrate	10.37"	16.74"
VMEBP10-M	combined 10-slot, J1 and J2 on one substrate	10.37"	7.94"
VMEBP7-M	combined 7-slot, J1& J2 on one substrate	10.37"	6.34"

Additional models available. Contact factory

Monolithic Backplane



SYSTEMS ENCLOSURES

Vector's system enclosures are supplied fully assembled with installed backplane(s), power supply, subrack and fans, ready to plug in boards. At the heart of the systems are Vector's low-noise, high-performance design backplanes. Select from our 8-layer monolithic design with on-board termination which combines J1 and J2 one circuit board, or our 6-layer J1 and 4-layer J2 models with off-board termination. Ruggedly handsome and sturdily built, Vector system enclosures are equally appropriate in an engineering, office, or production environment. Custom modifications by the factory are welcome, and include alternate power supplies, special holes, cutouts, marking, and painting.

Design features:

Subrack and backplane are removable from enclosure for serviceability. Peripheral equipment mounts readily in space provided from front of rack. Thermally efficient design provides good air flow and cooling with filtered air for mounted components. Power supplies matched to system size. All aluminum construction with painted grey/grey or burgundy/grey finish.

VME SYSTEMS ENCLOSURES

Note: All units are 19.1" deep

Part Number	Description	Height	Length
SE2322A-01 (burgundy/grey)	5 slot 6U enclosure with 5 slot J1 and 5 slot J2 backplanes Holds 5-6U x 160mm cards horizontally mounted 175 watt switching Power supply	6.4"	20.2"
SE2323B-01 (grey/grey)	Same as above	6.4"	20.2"
SE2772A-01 (Burgundy/grey)	21 slot 6U enclosure with 21 slot monolithic combined J1 and J2 backplane. Holds 21-6U x160mm cards vertically mounted 450 watt switching power supply	13.4"	20.2"
SE2722B-01 (grey/grey)	Same as above	13.4"	20.2"

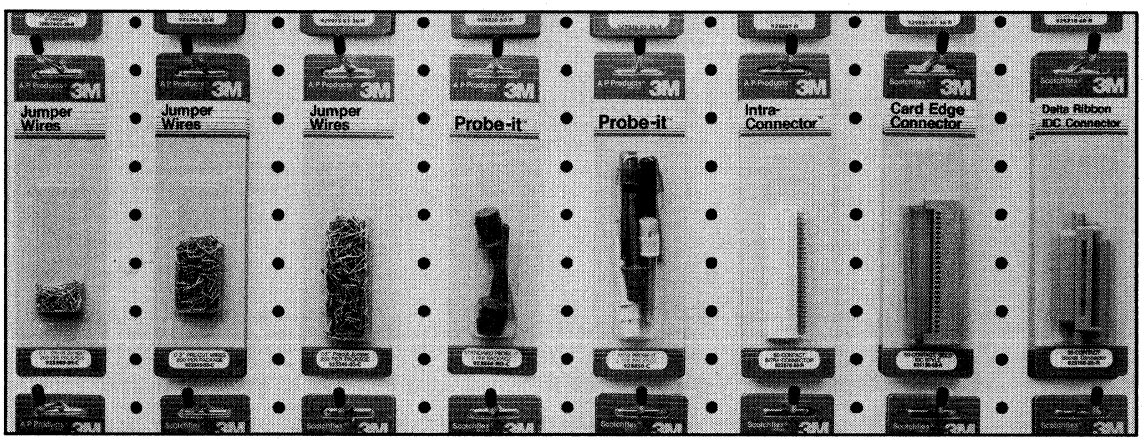
We've Packaged Our Solutions.



3M's broad line of bulk and rack packaged products makes a wide array of solutions available to you when you need them, and in the quantity you need.

3M's broader line of packaged products now includes many of the products that have been providing you with solutions for years. Choose from test clips and breadboards, connectors and cables, electrical and telecommunications products, static control devices, IC sockets and much more. Your partners at 3M heard you when you said, "Somebody ought to package those solutions."

3M packaged solutions make it easy to find the products you need, in the quantity you need, when you need them. See our complete line and pick up a package of solutions today from your local authorized Electronic Specialty Products distributor.

A P Products®brand DIP IC Test Clips, PLCC Test Clips, SOIC Test Clips, Solderless Breadboards and accessories.

Scotchflex® IDC Connectors, Headers, Wire and Cable.

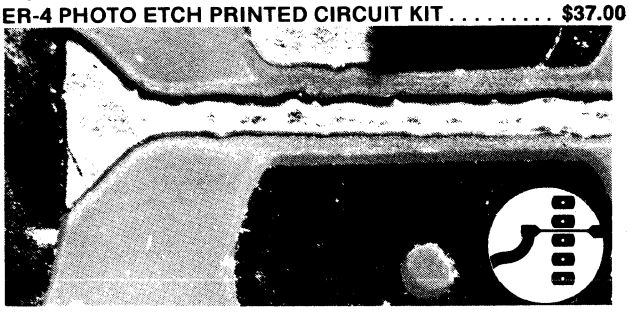
DATAK-PRINTED CIRCUIT KITS

THE DATAK CORPORATION 3117M Paterson Plank Road, North Bergen, NJ 07047 (201) 863-7667

PHOTO ETCH™ Printed Circuit Kit

Photograph original 1:1 master art or PC patterns directly from a magazine page using remarkable POS-NEG™ system (patented). No darkroom or camera needed. Set has all materials to make original artwork masters, film negatives and positives. Use the 5"x6" print frame, copper clad boards, negative photoresist and chemicals to sensitize, expose, develop and etch printed circuit boards. 12 page instruction book covers the theory and practical instructions. Photoflood bulb must be purchased separately at any camera store.

ER-4 PHOTO ETCH PRINTED CIRCUIT KIT $37.00



Dry Transfer DIRECT ETCH™ Resist in Action

OTHER PRINTED CIRCUIT PRODUCTS

TINNIT™ Electroless Bright Tin Plate

TINNIT is supplied as a dry powder. Dissolved in a pint of water, it will plate about 700 sq. ins. of clean copper with a bright tin plating. No electricity is needed. Use to enhance solderability and conductivity on edge card connector patterns.

ER-18 TINNIT™ BRIGHT TIN PLATE $4.60

Etch Resist Pen

Felt pen has lacquer ink that is impervious to PC etchants.

ER-15 ETCH RESIST PEN $1.80

Dry Concentrated Etchant

¼ pound anhydrous ferric chloride in vapor tight pack makes 1 pint etchant, enough for 200 sq. in. of copper board. Cost less than liquids.

ER-3 DRY CONCENTRATED ETCHANT $2.95

Power Etch Pump Kit

Circulates etchant with air to speed etch rate. Kit has pump, coupling hose, perforated distributor tube.

ER-12 POWER ETCH PUMP $7.50

POS-NEG™ Photocopy Film and Accessories

Makes negatives or positives from opaque or translucent original art in one step without a camera. No darkroom needed but use subdued light. Use with yellow filter (ER—17) and EAL photoflood lamp. Read ER-16 Photo Etch Manual before opening this film.

ER-5 SIX SHEETS 5" x 6" POS—NEG FILM $7.00
ER-9 TWO SHEETS 8" x 11" POS-NEG FILM 7.00
ER-16 PHOTO ETCH MANUAL 1.50
ER-17 8½" x 11½" YELLOW FILTER 3.00

Contact Printing Frame

A solidly made plated steel and glass exposure frame. Spring back adjusts for film or circuit board exposure. Kit includes ER-17 yellow filter and ER-16 Photo Etch Manual. 9"x 12" size.

ER-10 CONTACT PRINTING FRAME, 9" x 12" $13.95

Film Process Chemicals

Three packets make 1 pint lithographic film developer and 1 pint acid fixer. Handles 15 sheets 5" x 6" Pos-Neg film.

ER-6 FILM PROCESS CHEMICALS $3.75

Negative Photo Resist Liquid and Developer

Spray on PC board and expose through negative. Unexposed areas are dissolved by developer. Exposed areas harden and are etch resistant. Four ounce bottle with pump spray coats over 1700 sq. in. Develop ONLY with ER-8 or Kodak KPR developer.

ER-71 PHOTO RESIST LIQUID, 4 ounce $7.25
ER-8 NEGATIVE RESIST DEVELOPER, 16 ounce 4.50

DIRECT ETCH™ Printed Circuit Kit

This one step kit uses a unique dry transfer resist that makes razor-sharp patterns on copper clad boards. Lay out circuits right on the copper with these etch resistant dry transfers. Connect with dry transfer lines or the special tape, then etch in ferric chloride or in any commercial PC etchant. Results are equal to or better than commercial boards. Kit includes PC boards, dry transfer resist patterns, resist tapes, ferric chloride etchant, etch tray and instructions.

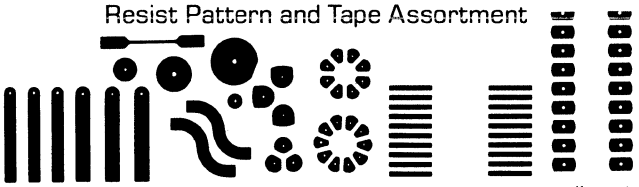
ER-1 DIRECT ETCH PRINTED CIRCUIT KIT $10.50

DRY TRANSFER ETCH RESIST PATTERNS

DATAK prints a broad range of dry transfer resist patterns with an ink that is impervious to all commercial etchants. This ink is identical to that used in printing the JotDraft and Microseries range of donuts and connector patterns. See our full line catalog for additional etch resist patterns.

17.6X BLOWUP shows .015" line between .100" spaced DIP pads. Resist pattern is from DATAK ER-2 set. Circuit board is 2 ounce copper etched in a still bath of ferric chloride for 30 minutes at 125°F. Measured undercut is less than .0015".

Resist Pattern and Tape Assortment



Our best selling set includes 8 sheets of donuts, .125" and .156" connector fingers, transistors, round IC's, DIPs of any size, dry transfer traces and 2 rolls of resist tape. This set is in the ER-1 and ER-4 kits.

ER-2 DRY TRANSFER ETCH RESIST ASSORTMENT .. $6.40

Resist Donut Pad Assortment

Set contains 4 sheets of donuts 1/16" through ¼" dia. with .025" center holes.

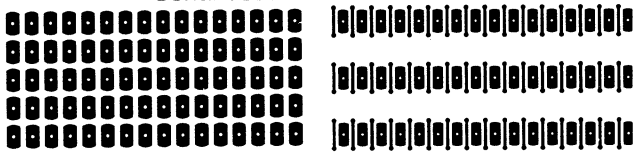
ER-13 DONUT PAD ASSORTMENT $3.50

Resist DIP Pattern Assortment

Set has 4 sheets of continuous .100" x .300" DIP patterns and .050" spaced flatpack fingers. Rub down the length you need. See also JD-171, JD-174.

ER-14 DIP PATTERN ASSORTMENT $3.50

Continuous Resist DIP Pads



From JD-171 **From JD-174**

JD-171 set contains 24 sheets of continuous .125"D x .070" cut pads spaced on .100" x .150" centers. Transfer pads on any multiple of .150" or .100". Do any size DIP pattern accurately and fast.

JD-171 RESIST DIP PADS $12.50

JD-174 has 24 sheets of continuous .125"D x .053" cut pads spaced on .100" x .150" centers with a trace between adjacent pads. Pads transfer alone or with traces on any multiple of .100" or .150". Do a large ROM or a ½ DIP with equal ease.

JD-174 RESIST DIP PADS WITH TRACES $12.50

Edge Card Connector Fingers

.156 Spacing **.125 Spacing** **.100 Spacing**

Sets contain 24 strips of spaced connector fingers. Each strip of fingers is 8" long. Butt strips for any connector length.

YOUR MAGNETIC SHIELDING PROBLEMS END HERE!

Request AD-VANCE Magnetics' new 84-Page Procurement Catalog/Engineering Manual; offers magnetic shielding users the major technical guideline data needed to design or choose the optimum magnetic shielding solution for a given application.

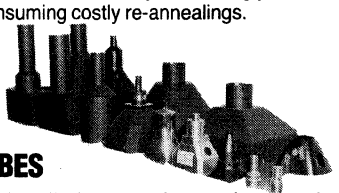
CUSTOM FABRICATED SHIELDS FOR COMPONENTS AND SYSTEMS

Any Specified Configuration or Shielding Requirement

From the simplest component to the most complex system, Ad-Vance Magnetics can design and fabricate an AD-MU shield incorporating your magnetic shielding performance requirements.

These include magnetic isolation chambers, shields for low field research, magnetic shielding components required in systems (such as CRT's), transformers, motors, tachometers, reed relays and computers, dewars for cryogenic research, various test chambers, video cameras, scan converter tubes, photomultiplier tubes, storage tubes, aircraft weather radar display tubes, etc.

Lasting shielding protection is provided because AD-MU alloys do not saturate when properly used, will not suffer excessive permeability loss from shock, and display minimum retentivity. Accordingly, there is no need for repeated time consuming costly re-annealings.



AD-MU CUSTOM FABRICATED SHIELDS FOR CATHODE RAY TUBES

Enhance CRT performance by eliminating effects of external magnetic fields on the electron beam.

Ad-Vance already owns tooling for many types of magnetic shields used during the past quarter century, making tooling savings possible. Or, our Engineering Dept. will gladly help design and produce the optimum shield for your application.

AD-MU TAPE DATA PROTECTORS ASSURE FIDELITY OF VALUABLE TAPES

1 Assure fidelity of vital recorded information by keeping data on magnetic tapes free from distortions caused by unforeseen external magnetic fields.
2 Minimize erasure accidents during safekeeping or transport.
3 Discourage and deter the covert saboteur or vandal.
4 Excellent insurance against possible expensive, or irreplaceable losses.

Made of AD-MU-00 .050" thick. Finished in durable textured enamel.

INEXPENSIVE INSURANCE IN THESE UNCERTAIN TIMES

Proven AD-MU Tape Data Protectors and Cassette Tape Data Protectors provide inexpensive insurance against such hidden hazards.

Satisfied customers include all branches of the armed forces, NASA, and numerous private firms as well as other governmental organizations.

There is not a single reported instance in which tapes enjoying such secure protection have ever been affected by stray magnetic fields. The investments in such tapes have remained uniformly safe from harm.

"WHY TAKE MY MAGNETIC SHIELDING PROBLEMS TO AD-VANCE MAGNETICS?"

Over 90% past and present magnetic shield designs have been created and fabricated by engineers and production personnel with Ad-Vance. With such a record of experience, it seems likely that Ad-Vance people are the logical ones to solve your particular problem.

"What facilities does Ad-Vance have?"

Two modern, fully equipped plants in Rochester, Indiana, are across the street from each other. They contain up-to-date equipment for:

All types of metal forming
heliarc and spot welding
complete in-house tool room
deep drawing
CNC equipment
processing control of heat
treating and finishing
in-house quality control

"What's Ad-Vance's industry and market position?"

Ad-Vance is the industry's largest, oldest and most experienced firm exclusively manufacturing magnetic shielding. Products from its factory are used off-planet in spacecraft and satellites as well as world-wide in exacting industrial, military, laboratory and consumer applications.

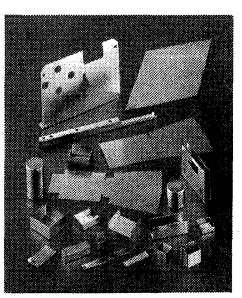
AD-MU SHEET STOCK — DELIVERY FROM STOCK

- For your in-house designing and manufacturing convenience.
- Easy to work, bend, stamp, draw, finish, etc. on ordinary sheet metal working equipment. SHIELDS MUST BE HEAT TREATED before end use or further finishing by plating, painting, etc.

JUST CUT AD-MU FOILS TO THE EXACT SHAPE YOU NEED

These Time-Saving High and Low Permeability Foils offer convenient, economical magnetic shielding. In many applications, their use can eliminate the costs of designing and manufacturing pre-fabricated shields. Foil shielding is also useful in hard-to-get-at-places. In addition, it permits more compact assemblies, accomplished by placing magnetically reacting components closer together with no performance degradation.

The foils exhibit useful ductility, so are readily hand trimmed to your desired outline on an ordinary cutting board, or with shears. They are then easily hand formed around the structure or component to be shielded. Simple adhesive tape can be used to hold them in place. They have already been properly heat treated so are ready for immediate use.



AD-VANCE MAGNETICS, INC.

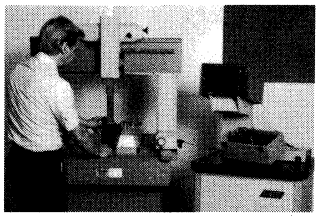
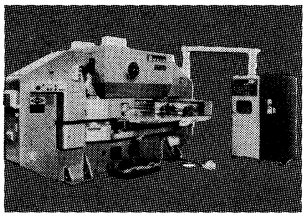
The Problem Solving Magnetic Shielding Specialists—4 Decades of Magnetic Shielding Leadership

amuneal

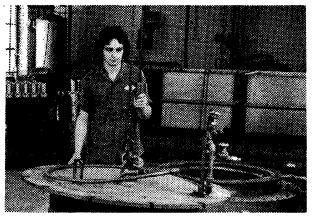
the ONLY magnetic shielding manufacturer with all this IN-HOUSE capability!



STATISTICAL QUALITY CONTROL... fully documented system. Conforms to MIL-45208A and ASTM 698-74. Computerized XYZ CMM checks the dimensional accuracy.



CNC CONTROL CAPABILITY... superior precision and cost efficiency for multiple hole punching. Up to ±.005" accuracy and ±.001" repeatability.



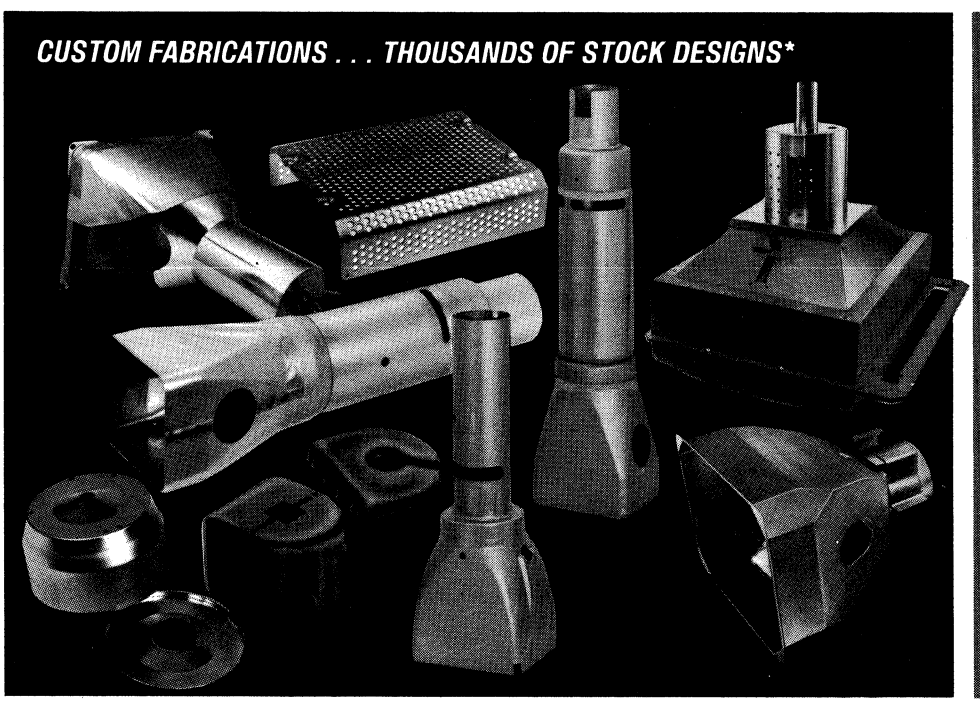
HYDROGEN ANNEALING... each shield is annealed after fabrication in one of our six cam-controlled furnaces with strip-chart readout.

HYDROFORMING... the truest, deep-drawing technique available for highly accurate contouring of shields.
and... a complete TOOL & DIE Department.

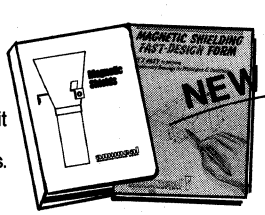
no other shielding manufacturer can match our ability to deliver ON TIME... ON SPEC... ON BUDGET!

That's because no other manufacturer can match our in-house capability or design experience. Give us a drawing of the device you want shielded, and we'll select the proper alloy and suggest the most cost-effective way to design, fabricate, anneal, and test your shields.

Try us with one shield—or a production run of a million—and you'll see why we've become the largest magnetic shielding manufacturer in America.



Ask for our FREE 64-page catalog and NEW FAST-DESIGN FORM that makes it easy to prepare drawings for prototypes or quotations.



Immediate Delivery from Stock on Foil and Sheet.
Amumetal (80% nickel): Amunickel (49% nickel).
Foil Thicknesses: .002", .004", .006", .010".
Sheet Thicknesses: .014", .020", .025", .030", .040", .050", .060".

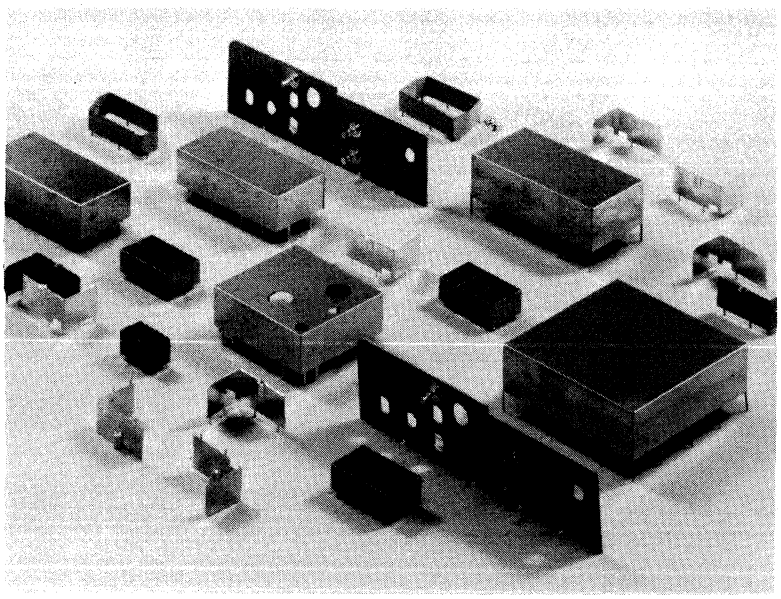
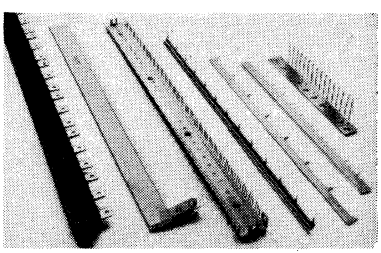
RFI / EMI SHIELDING

Atlee manufactures custom RFI / EMI shielding made from beryllium copper, brass or nickel silver. These shields are used to isolate the source of RFI on the circuit board.



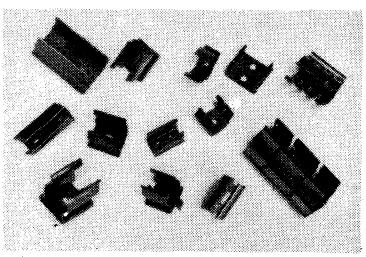
Bus Bars



Atlee is a full line manufacturer of bus bars serving the computer industry, avionics and military contractors. We have available design and engineering services as well as a prototype department. Atlee will manufacture any style bus bar to your specifications. Contact us for a catalog.

For detailed information see page C. 1716, section 3200.

Component (Spring) Clips

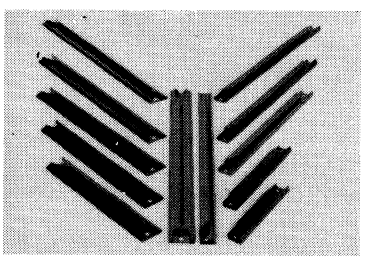


Commercial and MIL STD Clips for Immediate Delivery

M24066	M17160	MS28136
MS28137	NAS1465	MF21316

For detailed information see page B. 1236, section 4300.

Card Guides



- Made of beryllium copper and stainless steel.
- Positive retention of circuit board under severe shock and vibration
- Quick and simple board insertion and withdrawal
- Military and commercial use

For detailed information see page C. 1017, section 1400.

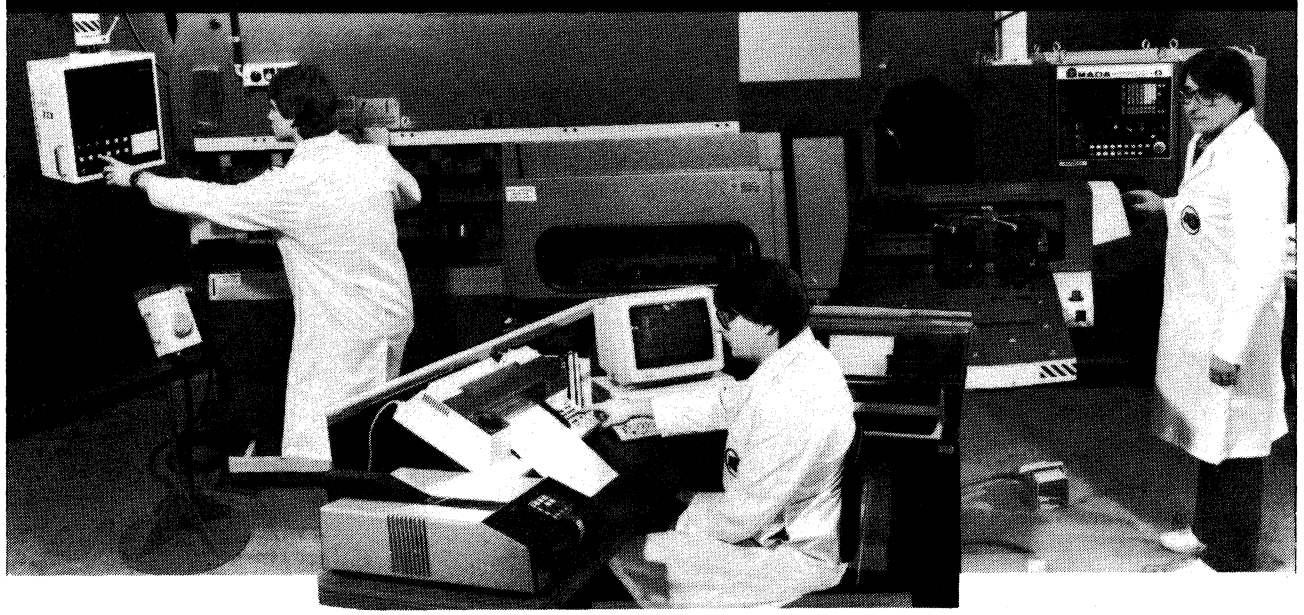
Magnetic Shield Manufacturing



REPRODUCIBLE QUALITY — ON COMMAND!

COMPETITIVE EDGE

Eagle Magnetic's willingness to invest in expandable state-of-the-art automated manufacturing and control equipment reflects our desire to continue our competitive edge, serving our customers, well into the future.

CAD/CAE to CAM

Productivity begins with our sophisticated Computer process control center. Here advanced high-level programming, link design/engineering specifications to optimum machine operation. Precise monitoring compounds value added by increased machine uptime, reduced waste, and repeatable accuracy in reproducing your exact design specifications —now—or a year from now.

MORE THAN AUTOMATION

CNC/DNC and NC machines provide the precision and long term repeatability required to produce the consistent, high quality—value added products you deserve.

In addition to automated equipment, our up-rated semi-automatic and operator directed machines provide important alternatives for selecting the most cost-effective process methods.

CRAFTSMENSHIP

Talented craftsmen combine knowledge and experience, with proven CAM and up-to-the-minute fabrication techniques.

Pride of workmanship and a creative environment, result in quick, practical solutions to production problems.

You will benefit from our improved process consistency and greater productivity.

BENCHMARK QUALITY

Eagle Magnetic Benchmark Quality is our manufacturing standard. We believe value added quality is a **design-in** feature not an inspect-in incident. Skillful management of committed individuals operating state-of-the-art CAD/CAE/CAM equipment increase **design-in** value added quality with each process.

Quality begins when design specifications are CAD/CAE enhanced and continue through master programming, down-loading, and station process control.

Careful handling and shipping insures that you receive a high quality value added product.

RESPONSIVE

If you expect high quality, value added shield products, manufactured to your exacting specifications, by the latest automated technology, then you should contact Eagle Magnetic Co.—the technology leader in the material selection and production of shields to solve EMI problems.

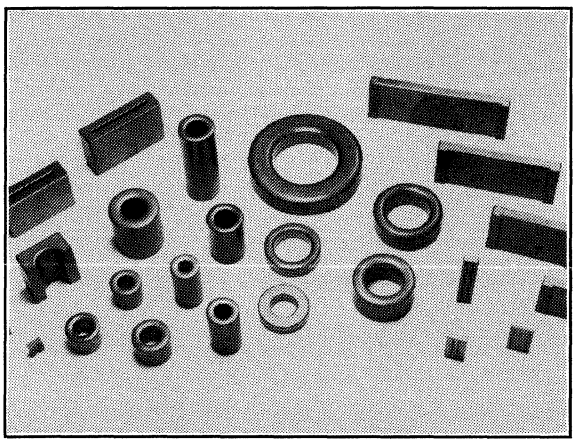
More Black Magic...

From Fair-Rite with the New EXPANDED Cable & Connector EMI Suppressor Kit.



Ferrite—that black, crystalline oxide ceramic, offers the almost magical property of suppressing EMI—by itself—no grounds needed. That is why those concerned with EMC increasingly rely on our Engineering Evaluation Kits to determine the proper ferrite suppressor which will help solve their EMI problems.

The original Cable and Connector EMI Suppressor Kit has proven to be an extremely helpful tool in the hands of the design or EMC engineer. Since its introduction, many new shapes and sizes of ferrite suppressors have been developed.

It is the purpose of the EXPANDED kit to bring to the engineer all those parts that were in the original kit plus 17 parts that have either found wide acceptance since then, or have been recently developed at the suggestion of those responsible for creating an environment of Electro-Magnetic Compatibility.

The **NEW EXPANDED CABLE AND CONNECTOR EMI SUPPRESSOR KIT** (part no. 0199000005) provides 2 samples or pairs of samples of 29 different toroids and large beads, one-piece or split, along with multihole shielding plates for use with IC/DIPS and multipin rectangular and D connectors. Clips are included for assembly of split ribbon shield sleeves. The new kit is $50.

Two earlier Fair-Rite Kits are also available:

The BEAD-ON-LEAD KIT (part no. 0199000003): 10 different beads-on-leads, plus two wound 6-hole beads, providing impedances from 68 to 680 ohms typical, measured at 100MHz. Values from 68 to 200 ohms are available taped and reeled for automatic insertion. This kit is $25.

The **BEAD, BALUN AND BROADBAND KIT** (part no. 0199000001): A selection of 34 different cores in 7 different materials offering the designer many options for high frequency circuits. This kit is $25.

Each kit comes with its own Engineering Bulletin describing the contents and guiding the designer in the use of Fair-Rite components to solve EMI problems.

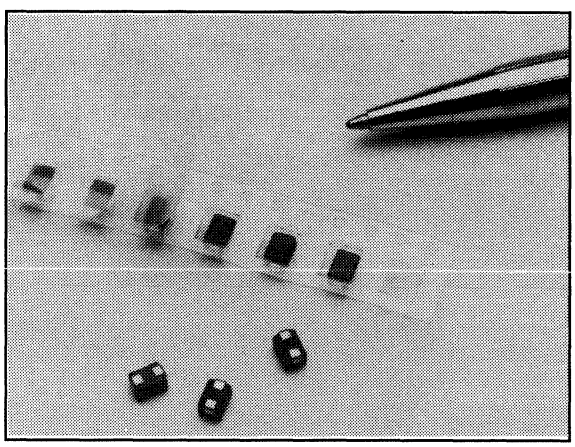
Prices are postpaid if payment accompanies order; plus shipping if ordered on your PO or letterhead. Please consult Fair-Rite for prices outside the USA and Canada. Contact us for further information on our kits.

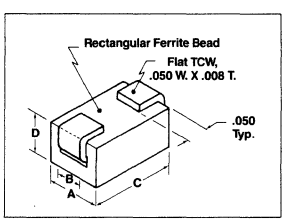
For transformer and inductor designs: Fair-Rite manufactures a broad line of ferrite bobbins, U, E and I cores; pot, ETD, and PQ cores; toroids, slugs and rods. Send for our full line catalog.

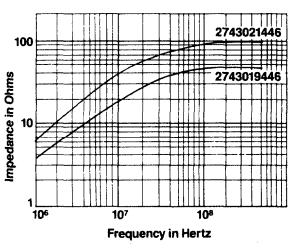
Introducing SM Beads™

(Surface Mount Beads)

Ferrite EMI suppressors expressly for use with Surface Mount Technology







Fair-Rite Part No.	A Dim	B Dim	C Dim	D Dim	Z @ 25 MHz*	Z @ 100 MHz*	DC Resistance Ohms
2743019446	.115 .125	.055 .060	.150 .170	.095 .105	30	45	<.6 Milliohms
2743021446	.115 .125	.055 .060	.325 .345	.095 .105	60	90	<.9 Milliohms

Surface Mount Technology is fast becoming the preferred method of PC Board assembly. Recognizing the need for surface mount EMI suppressors, Fair-Rite Products is introducing a line of Surface Mount Shield Beads (Patent applied for) to supplement our current array of EMI/RFI Suppressor elements. The two parts available at present offer equivalent impedances to our most popular "beads-on-leads" and can be used in place of the older technology.

The construction of these SM Beads™ is such that they offer maximum current carrying capacity, through solid flat copper conductors rather than metal plating, limited only by the saturation characteristics of the ferrite core material, and thus are highly resistant to mechanical or magnetic failure. These parts are available taped and reeled on carriers, per EIA Standard EIA-481A, at a price that makes them a most attractive method of designing EMI protection into circuitry from its inception.

NOW! In one manual— all you need to know about EMC design and products— and it's FREE!

If you're involved in designing for EMC—if you're involved in testing and measuring electromagnetic interference—you *need* this manual. For the first time, in one place, you'll find all the data, all the formulas, and all the products you need to meet your interference control problems!

Included are charts, tables, graphs, dimensional drawings, and technical data ranging from a discussion of theoretical design requirements to how to select a specific shielding material.

For your free copy, write us directly at Dept. E EM-9.

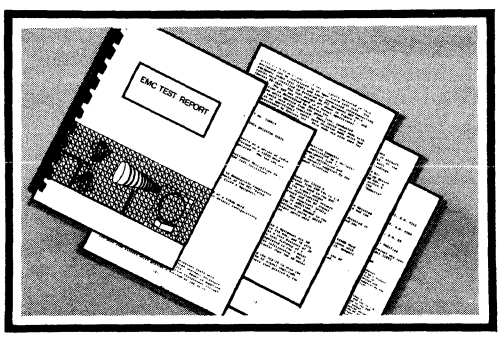
INSTRUMENT SPECIALTIES COMPANY, INC.
Delaware Water Gap, PA. 18327
Phone: 717-424-8510 • TWX: 510-671-4526
Specialists in beryllium copper since 1938

How sure are you of your Interference Control?

Instrument Specialties can

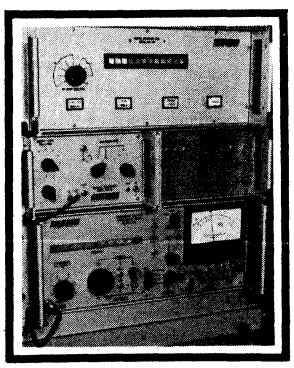
- **provide you with Certified Testing℠...**
- **document with computer print-outs...**
- **recommend corrections if necessary!**

What is Certified Testing℠?

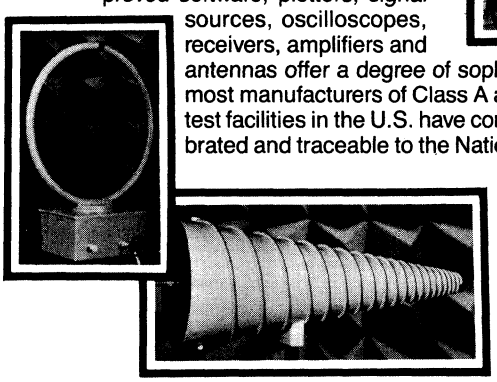


Certified Testing is our name for our automated test program that evaluates the interference control built into the equipment being tested. Available only from Instrument Specialties, it includes state-of-the-art emissions and susceptibility measurements from 20 Hz to 20 GHz up to 20 V/m... RF gasket evaluation... FCC/VDE/CISPR and MIL-STD-461A/B tests... TEMPEST facility measurements per NACSIM 5203 and 5204 requirements ...depending on your needs.

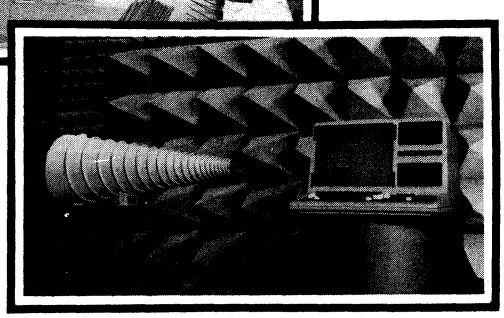
How do we test?



Computer-controlled tests provide customized, precise results, repeatability, and documentation. Shielding can be tested to MIL-STD-285, IEEE 188, NSA, etc. RF gaskets are tested using the SAE ARP-1705 transfer impedence method, to 140 dB. Our computers and proved software, plotters, signal sources, oscilloscopes, receivers, amplifiers and antennas offer a degree of sophistication not available to most manufacturers of Class A and B devices. Few, if any, test facilities in the U.S. have comparable equipment, calibrated and traceable to the National Bureau of Standards!

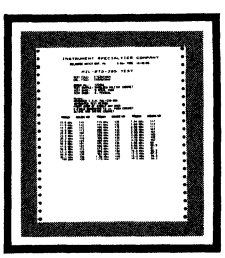


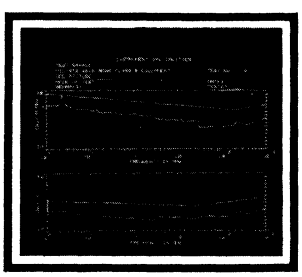
Where do we test?



Portable equipment is tested in our new shielded enclosures, including semi-anechoic (non-echoing). Commercial tests are confirmed in an open field test site, itself tested in accordance with FCC standards. These superb facilities are available on a daily basis, as is engineering help, if requested. If on-site testing is required, we'll bring our portable laboratory instruments to you.

What do you get?





We're told our Test Reports are the best in the industry. More detailed, and clearer, with a continuous sweep of frequency spectrum—not just hand-plotted points. Computer print-outs and documented data meet both FCC and military audit requirements. If desired, we can supply engineering consultation leading to specific recommendations and verification. Of course, all reports are strictly confidential.

For more information on rates and schedule availability, or to discuss your specific needs, phone and ask for EMC Customer Service. Or, write us at Dept. EEM-30.

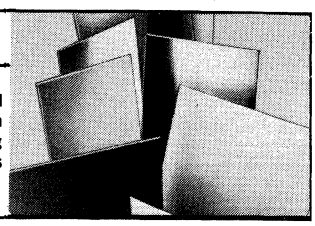
CO-NETIC & NETIC magnetic shielding material

MAGNETIC SHIELD CORP.
Perfection Mica Company
750 North Thomas Drive
Bensenville, Illinois 60106 U.S.A.
(312) 766-7800 TWX (910) 256-4815

A complete stock of CO-NETIC (high permeability) and NETIC (high saturation) shielding alloys is available in foil and sheet form. Our engineering department will gladly assist you in the development of shield designs to meet your prototype or production requirements. Request catalog MG-5, material and fabrication guide.

sheet stock: (standard—30″ x 120″) Shipped immediately from stock.

STD. THK. (Inch)	NETIC S3-6 ALLOY SHEET	CO-NETIC AA STRESS ANNEALED	CO-NETIC AA PERFECTION ANNEALED
.014			
.020	High saturation capability.	High permeability characteristics. Stress annealed for ease of fabrication. Must be final annealed for maximum attenuation characteristics. Also stocked in .100″.	High permeability characteristics. Perfection Annealed material has been fully hydrogen annealed for optimum magnetic shielding properties. No further annealing after fabrication is necessary if severe forming is avoided.
.025			
.030			
.040	.040 NETIC not stocked.		
.050			
.062	Also stocked in .095″		



foil stock: (standard coils—50 and 100 linear ft.)

STD. THK. (Inch)	NETIC PERFECTION ANNEALED WIDTH (Inch)	CO-NETIC PERFECTION ANNEALED WIDTH (Inch)

.006	—	4
.006	—	15
.010	—	4
.010	—	15

Standard foils shipped immediately from stock. All sizes available with double-faced pressure sensitive tape and release coated liner. Foils can be slit to a minimum width of ¼″, with or without backing. Width tolerance ±.010. Backed and slit foils shipped one week after receipt of order. All foil is Perfection Annealed for maximum attenuation.

magnetic shields for photomultiplier tubes

Magnetic shields shipped from stock for 90% of photomultiplier tubes.

MAGNETIC SHIELD CORP.

Perfection Mica Company
750 North Thomas Drive
Bensenville, Illinois 60106 U.S.A.
(312) 766-7800 TWX (910) 256-4815

CO-NETIC magnetic shields improve the amplification characteristics of photomultiplier tubes by providing significant attenuation of magnetic fields. Effective shielding is ensured over a wide range of field intensities. When grounded, the shields provide protection against electrostatic interference.

CO-NETIC shields are highly resistant to shock and vibration. The shields have minimal retentivity and do not require periodic re-annealing.

Request catalog PM-4, which lists recommended shields for over 650 photomultiplier tubes.

NOTES:
Unless otherwise noted:
Dimensions — All ID
Material — .040" Thick Co-Netic AA
Finish — Black baked enamel; texture outside, flat inside.
a — Upper end closed.
b — Dimensions D & E are measured from the outside of the outer shell. Dimension G is the maximum OD. Material — Three layers, separable; outer .049 Netic S3-6, two inner .031 Co-Netic AA Finish — Netic S3-6, black oxide; Co-Netic AA, none.
c — Has three tabs, spaced 120° apart, to grip the metal collar of the PM tube.
d — Material — .031" Co-Netic AA.

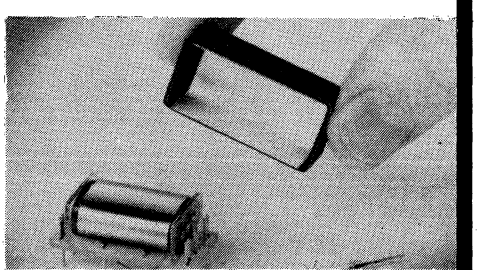
LAB KITS & PROBES

Lab Kit contains assorted CO-NETIC and NETIC shielding materials, double-faced pressure sensitive tape for shield construction and 20 millivolts/gauss A.C. magnetic pickup probe ..... all for $99.50
Probe only, 20 mV/gauss, axial $49.50
Probe only, 60 mV/gauss, axial (shown) or transverse $79.50
Request Lab Kit catalog LK-2, Probe catalog EP-3.



COMPONENT SHIELDS

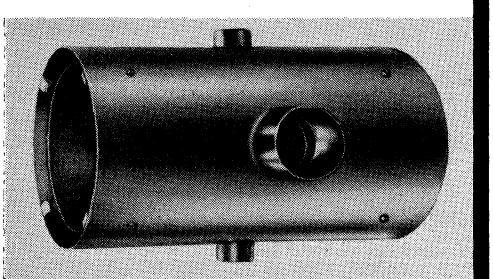
Full time engineering staff available for consultation on shielding problems. Magnetic Shield Division is also the preferred source for custom shields to your specifications. Extensive standard and special tooling provide fast shipment. Call for design assistance or send print for prompt quotation.

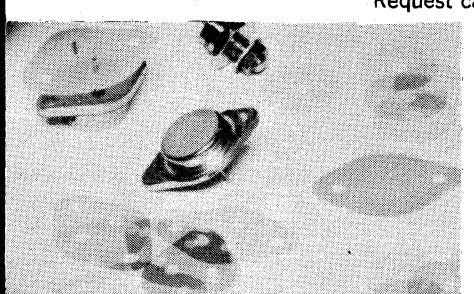
INTER-8 WEAVE CABLE

Our patented, woven configuration of four signal leads provides superior attenuation over a twisted pair. Attenuation improvement of unshielded INTER-8 WEAVE cable is −20 db for radiation and −12 db for pickup. An additional −20 db is obtained with our braided CO-NETIC jacket. Available in #24 AWG, unshielded or shielded. Request catalog WC-1

ZERO GAUSS CHAMBERS

Zero gauss chambers provide the ultimate in magnetic shielding. Magnetic Shield Division's general-purpose zero gauss chamber offers a significant reduction in both static and time varying fields found in laboratory and research environments. Degaussing coils can be furnished, and a Helmholtz coil system can be incorporated to generate known fields. Three concentrically spaced CO-NETIC chambers with closed ends and removable covers are provided. Placement of openings is optional. Attenuation in excess of −60 db is typical. Request catalog ZG-2





MICA INSULATORS

Available in sheet, wafer, flakes and ground form. Clear, natural and built-up sheet stock thicknesses from .002" to .062". Save tooling expense on a wide variety of fabricated parts, including semi-conductor insulators in .002" to .003" thickness with .002" hole tolerances. Excellent heat resistance and high dielectric strength provide improved breakdown protection and increased efficiency of electronic components. Request catalog K-14.

Do you need magnetic shielding as good as MμShield®?

Only if you need optimum attenuation.
Unless your design calls for magnetic shielding that meets the most stringent specs, you may not need to consider Bomco's MμShield materials.

But, if you need custom shielding with maximum attenuation or tubing with totally uniform permeability, you do need MμShield. And you can get MμShield materials only from Bomco, a company with more than 35 years of experience.

Bomco's MμShield Division can satisfy the most demanding applications — aerospace, nuclear and electronic — with a wide variety of custom shields, materials, and services.

MμShield cathode ray tube shields.
Assure high resolution. For use in special military applications. Also suitable for commercial, industrial, and laboratory applications.

MμShield photomultiplier tube shields.
Ideal for electro-optical devices of all kinds, CAT- and PET-scan machines, and TV cameras.

MμShield custom electronic components shields.
For use in computer-related technology such as disk drives, printed circuits, and PC terminals.

MμShield special application shields.
Nuclear Magnetic Resonance Imaging. Electron microscopes. X-ray spectography. Wide area shielding in laboratories and sensitive areas.

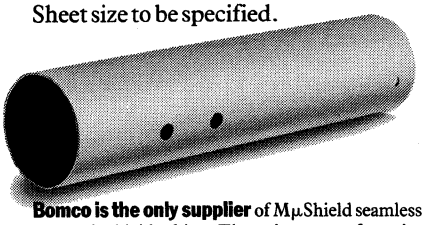
Coils, sheets and tubing in stock

- High saturation shielding. Permeability ranges from 200 to 50,000. Saturation point between 18,000 and 20,000 gauss.
- Medium permeability shielding. Permeability from 12,500 to 150,000. Saturation point approximately 15,000 gauss.
- High permeability shielding. Permeability from 80,000 (at B-40) to 350,000. Saturation point approximately 7,500 gauss.
- Dimensions:

Coils — .004", .006", .010" thickness; 8" and 15" widths. Minimum order $100.

Sheets — Cold rolled annealed, .015" to .060" thickness. Full sheet 30" × 10'. Minimum order 30" × 36".

Hot rolled, .090" to .265" thickness. Sheet size to be specified.



Bomco is the only supplier of MμShield seamless magnetic shield tubing. The unique manufacturing process eliminates the non-uniformity of permeability inherent in welded tubing.

Tubing — .10" to 2.00 ID. Wall thicknesses .010" to .060". Lengths to 20'.

Heat treating service.
Gives magnetic materials optimum permeability with low shock-sensitivity. Permeability and uniformity of MμShield-fabricated parts are guaranteed.

Special consultation services.
We'll do more than just give you a quote. We'll do everything from on-site input meetings to prototyping, testing, and manufacturing. When your designs require optimum shielding, send us your specs and we'll be happy to review your application.

Now when you need magnetic shielding as good as MμShield, you don't need to worry.

Call or write Bomco, Inc., MμShield Products Division, PO Box W, Dept E, 103 Madison Street, Malden, MA 02148. 617/321-4410. Fax 617/324-9563.

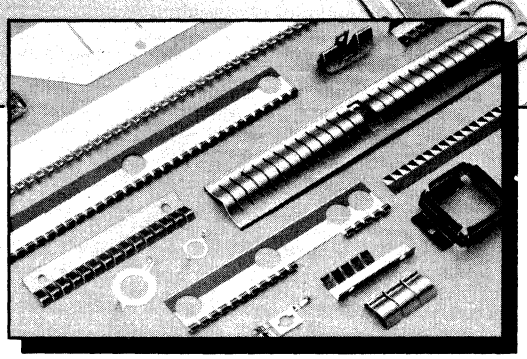
Excellence in Metal Forming

EMC Shielding Products

- Clip-on strip gaskets
- Knitted wire mesh – all shapes
- Shielded windows
- Conductive elastomers
- Mesh over elastomer cores
- Beryllium copper finger stock
- Shielded honeycomb panels
- Connector and waveguide gaskets
- Twinseal: RFI and environmental shielding



Beryllium copper shielding components custom designed for special applications which require compliance with the new FCC interference regulations or TEMPEST specifications.

From high volume requirements using progressive dies to prototype and low quantities utilizing photo-etch fabrication, Tech-Etch can be your source.

Announcing new response capabilities...and products...from Tech-Etch!

Tech-Etch manufactures the most complete line of shielding products in the industry to serve today's requirements in both the commercial and military markets. As a leading designer of shielding products for over 35 years, Tech-Etch is in a position to provide not only a broad range of stocked catalog items, but to offer a source for your custom-designed specialty products.

Call or write today for a free copy of our Design Guide and the name of our shielding specialist serving your area.

Make Sure It's Shielded by TECKNIT®

For over twenty-five years, TECKNIT has been assisting the design community in solving EMI Shielding problems. That capability is even more important today as demands for effective shielding become critical design considerations.

With one of the most complete EMI Shielding product lines in the industry, TECKNIT "know how" provides assistance in meeting today's vexing design problems. Whether those requirements demand conductive coatings, wire mesh and conductive elastomer gaskets, vent panels or high performance shielding windows, TECKNIT products and the engineering skills to apply them are available from TECKNIT plants in Cranford, New Jersey and Santa Barbara, California.

It's little wonder TECKNIT has been described as "the EMI experts you always wanted on your staff."

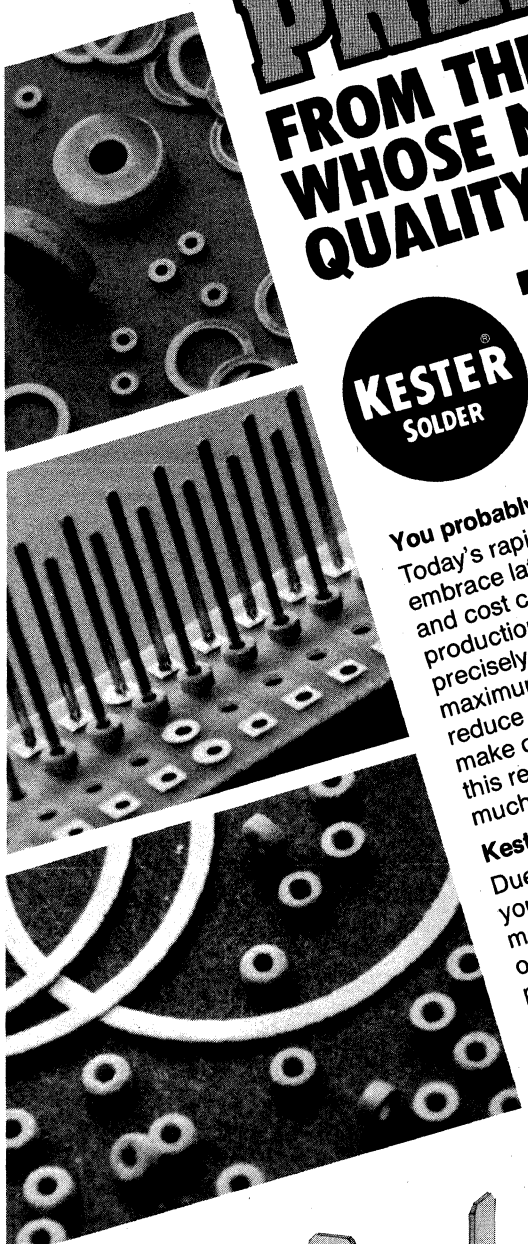
PRECISE SOLDER PREFORMS FROM THE COMPANY WHOSE NAME MEANS QUALITY.....



KESTER® SOLDER

THE SOLDER CONNECTION®

You probably have an application for Kester Solderforms®.

Today's rapidly changing marketplace demands that your products embrace latest technology, and at the same time be more reliable and cost competitive. Kester Solderforms® guarantee consistent production with less touch-up work since they always deliver precisely the same amount of solder and flux. You can make maximum use of cost saving automated assembly techniques, and reduce time consuming inspections and manual operations. Even make close proximity joints without worry of bridges or shorts. All this results in fewer field related failures since there's never too much flux or too little solder. Assembly is correct every time.

Kester Solder. Quality since 1899.

Due to the custom nature of any solder preform, the company you do business with will become part of your design team. It makes sense to get involved with a company you can really rely on. Kester Solder is a proven leader who supplies solder preforms with precise dimensional tolerances and strict alloy purity, and who has mastered the making of reliable mechanical and electrical connections. Customer service is a critical element as well, and this is where the Kester Engineered Products Laboratory and the sales engineers help you apply Solderforms® technology to your application.

We'd like you to have more information.

If you have regular production runs of products requiring solder, you should consider Kester Solderforms®. Kester's 12 page Solderforms® Design and Specifications Handbook describes the design considerations and the pros and cons of this technology. Call or write today for your copy.

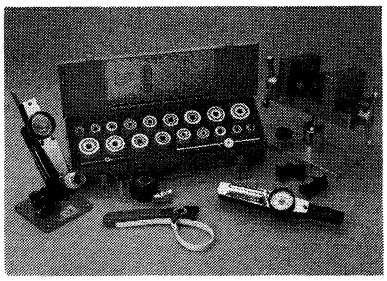
CONNECTOR ASSEMBLY AND SERVICE TOOLS

DMC DANIELS MANUFACTURING CORPORATION



BACKSHELL ACCESSORY TOOLS (BETA™ LINE)

For holding and assembly/disassembly of circular connector accessories (backshell, strain relief, or EMI/RFI shielding hardware). The BETA™ LINE includes the following:

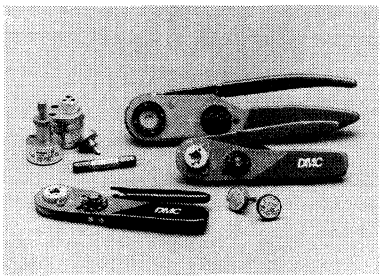
- Connector holding adaptors
- Strap wrench
- Soft jaw vise for circular parts
- Soft jaw pliers
- Torque meters and wrenches
- Tool sets and custom application kits to cover most connector series.

CONNECTOR SYSTEM SERVICE KITS

The DMC Wiring System Service Kits are a complete tooling and information system which includes all the necessary tools, application instruction diagrams, and tool selection charts to support a complete wiring system. All this is organized and packaged in a durable case or cabinet. Service kits are presently available for many military and commercial systems including all types of aircraft, weapon systems, ground vehicles, and marine equipment.

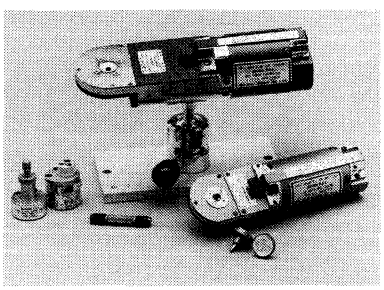
FIELD SUPPORT OFFICES

Eastern Region — (714) 996-5881
Western Region — (203) 799-2343



INDENT CRIMPING TOOLS

For crimping machined electrical contacts.
Electrical Contacts
AF8 (M22520/1-01)
AFM8 (M22520/2-01)
MH860 (M22520/7-01)
Plus many commercial tools and accessories

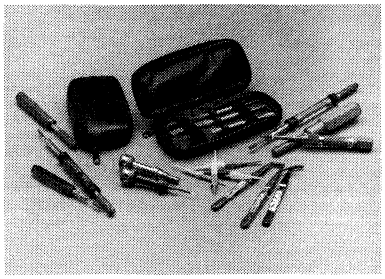


PNEUMATIC CRIMPING TOOLS

Power actuated tools for most crimping applications. Heads, dies and other accessories are interchangeable with DMC hand tools.

VIDEO TAPE TRAINING SERIES

For connector and wiring system assembly. Connector identification and the use of assembly tools are explained and visually reinforced.

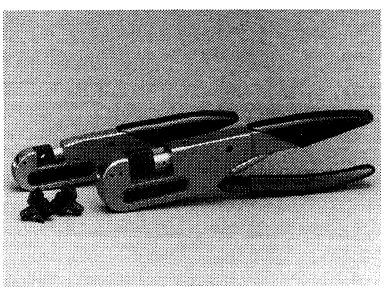


INSTALLING AND REMOVAL TOOLS (MIL-I-81969)

For assembly or disassembly of a broad line of circular, rectangular and "D" connectors in both military and commercial versions. Below is a partial listing:

MS 3159	MS 17805	MS 27534
MS 3160	MS 17806	M 83723
MS 3447	MS 24256	MS 90455
MS 3448-001	MS 27495	MS 90456

Plus many commercial tools.



OPEN FRAME CRIMPING TOOLS

For crimping coaxial and shielded connectors, terminals, splices, and other formed terminating devices.
HX3 (M22520/10-01)
HX4 (M22520/5-01)
Plus many interchangeable dies and accessories.

FREE CONNECTOR TOOLING GUIDE

With cross reference charts and extensive application data. All featured in full color (42 pages). Available upon request.

BUT IT CAN DESTROY YOUR BEST DESIGN

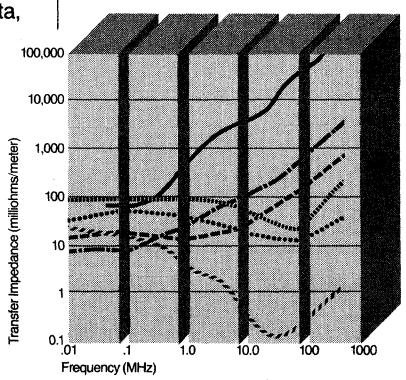
The next time your performance is measured by the success of your system's design, take a closer look at the critical link: will the shielded cable you select maintain signal integrity? At Belden, we're working to protect this critical link.

Shield Effectiveness
With the convergence of data, audio and video transmissions, one of the greatest challenges is to preserve the integrity of each signal. This evolution of technology, coupled with the need to comply with FCC regulations has created a growing demand for sophisticated cable shielding.

Belden responds to these demands with innovative shielding designed to meet the highest performance standards in the industry—including military TEMPEST requirements.

Belden helps you control interference and protect signal integrity with innovative shielded cable

Transfer Impedance Test Results



The lower the value of transfer impedance, the more effective the shielding.

Test Methods Protect Your System
To help you define interference problems, Belden's Technical Research Center evaluates the development, implementation and refinement of shields and shield effectiveness testing. Our Transfer Impedance Test is but one of many rigorous tests employed by Belden engineers. The procedures we use help you select the proper shielded cable that results in cost-effective system performance.

Effective Assistance
Belden has recently published a *Cable Shield Performance and Selection Guide.* It's free, and it helps you define your interference problem, acquaints you with current FCC regulations, and familiarizes you with the trade-offs associated with different shield designs and Belden's various test procedures for measuring shielding effectiveness. Shield performance results are detailed from each test to properly guide your cable selection.

Contact Belden today for your free personal copy. Belden Wire and Cable, P.O. Box 1980, Richmond, IN 47375. Phone: 317-983-5200.

There is no equal.™

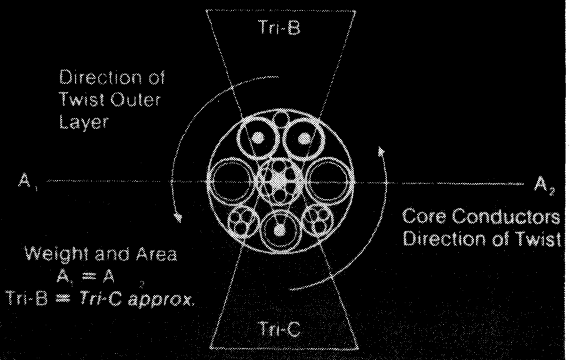
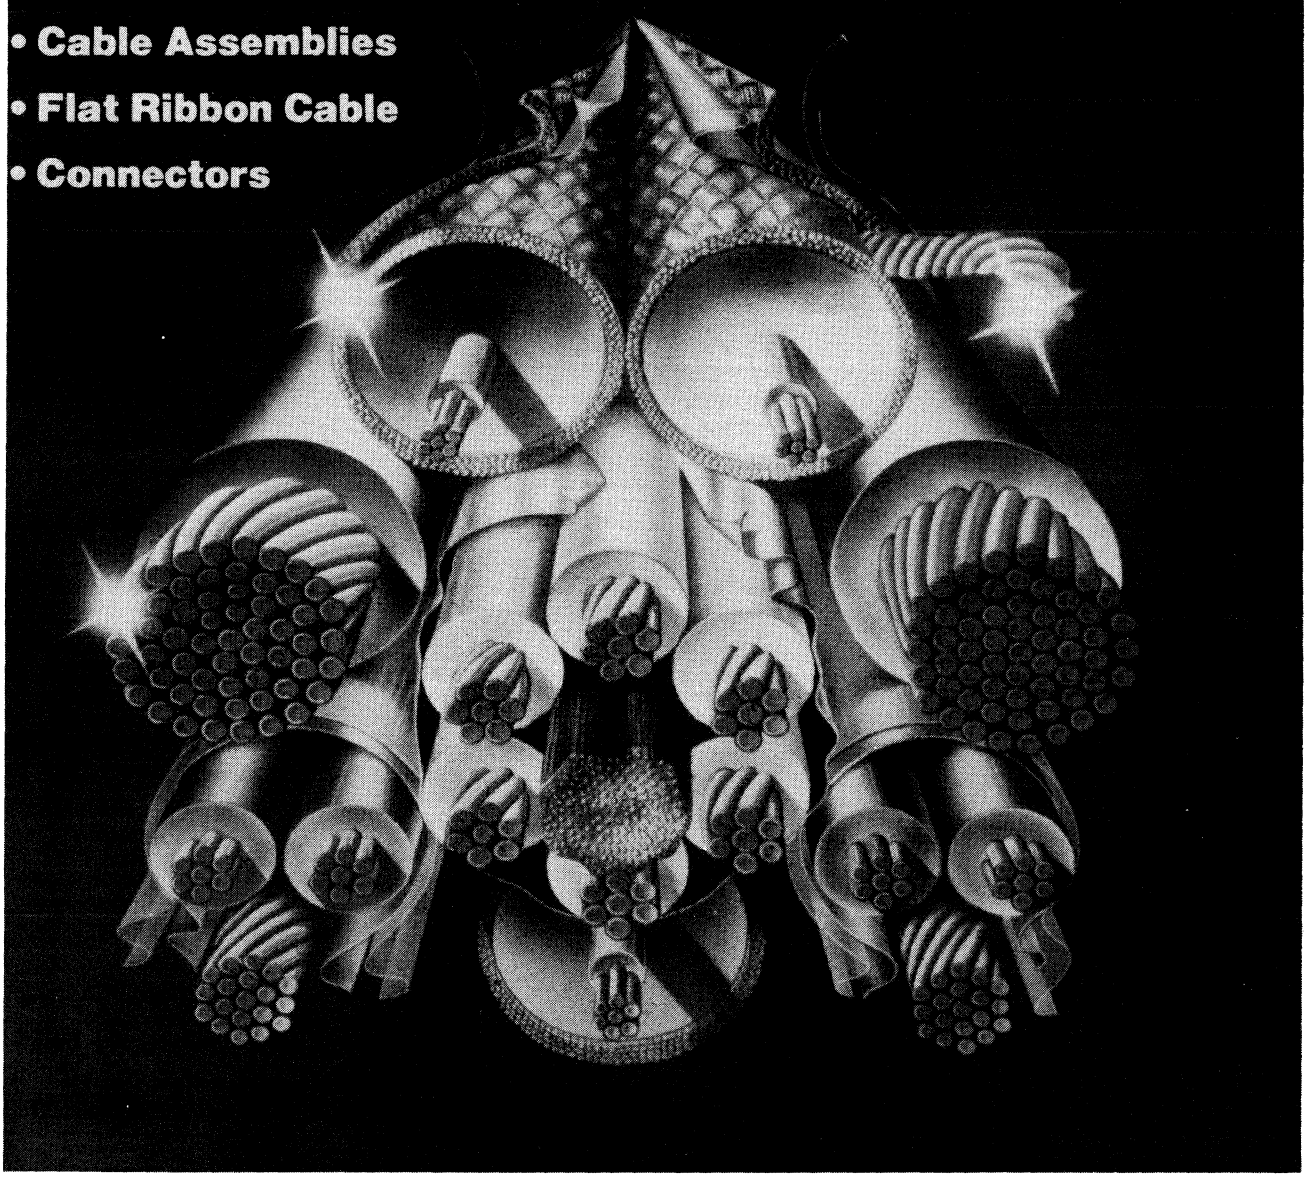
ABLE RATED™

- Multi-Spec Cable
- Multi-Spec Wire
- Power Supply Cords
- Shrink-ABLE Tubing
- Flex-ABLE Tubing
- Ty-ABLE Cable Ties
- Cable Assemblies
- Flat Ribbon Cable
- Connectors



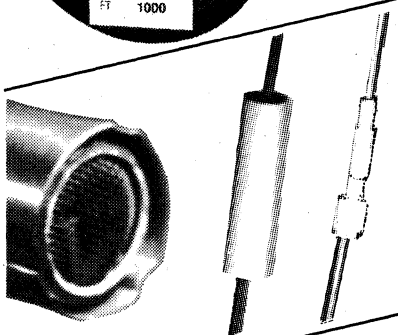


ABLE products of quality and value

ABLE RATED™ THE MULTI-SPEC WIRE

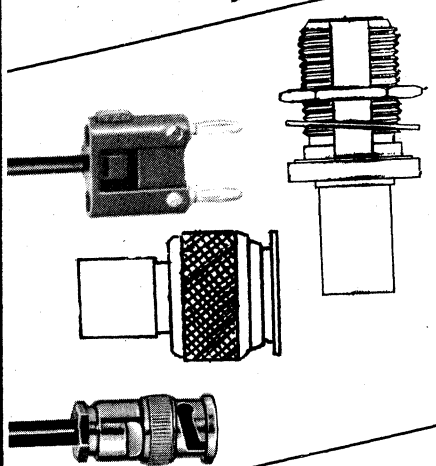
Highest quality, top of the line ABLE RATED wire meets the electrical characteristics of UL, CSA and military specs. You pay less and get more with ABLE RATED, THE MULTI-SPEC WIRE.

SHRINK-ABLE AND OTHER TUBINGS



ABLE shrinkable and non-shrinkable tubing and sleeving meet all UL, CSA, MIL, AMS and ASTM specifications. They are available in Teflon, PVC, Nylon, Fiberglass and other materials, in colors, cut to lengths with custom printed legend.

RF patch cords and connectors



A complete line of RF patch cords, connectors, adapters, terminations, attenuators and test accessories. Standard items from stock or made to your specifications.

capabilities and value added services

- Color coding
- Color striping
- Harnessing
- Cutting & stripping
- Twisting
- Shielding
- Marking
- Terminating
- Cabling
- Connectorizing
- Custom manufacturing
- Prototyping

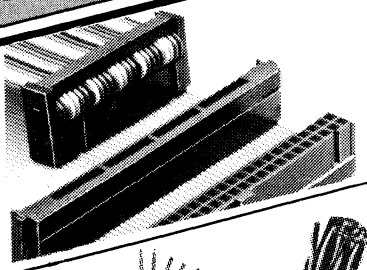
Never sacrifice quality for price ...specify ABLE

For more information call 800-431-2103, in NY State 914-962-ABLE or FAX 914-962-2296

ABL ELECTRONIC SUPPLIES 1736 Front St., Yorktown Heights, N.Y. 10598

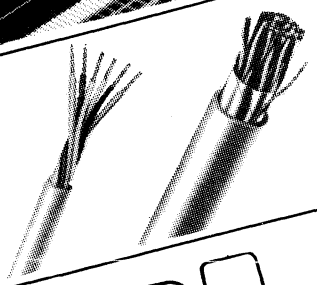
A dependABLE source is a valuABLE source

male and female IDC connectors and headers



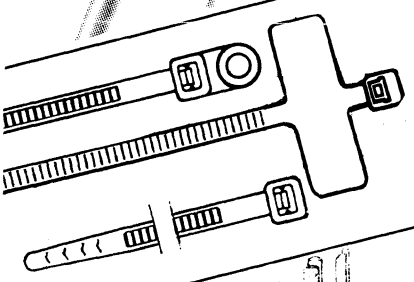
A complete line of IDC cable assemblies made to industry standard dimensions or your custom specifications for less than your cost of the unassembled components... and 100% tested.

ABLE CABLE



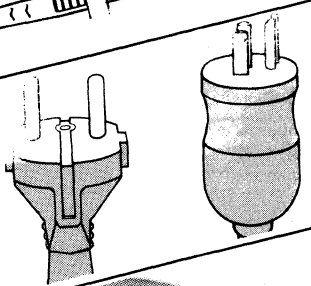
ABLE cables' quality is equal to or exceeds Alpha and Belden equivalents...with substantially lower prices.

Ty-ABLE CABLE TIES AND ACCESSORIES



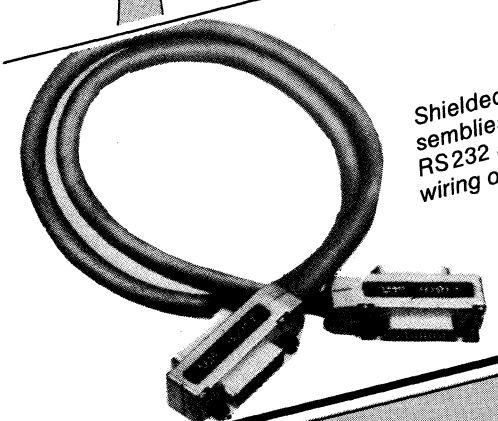
Ty-ABLE cable ties are available in a wide range of sizes and types. Also, a complete line of mounting and installation accessories, delivered from stock, at discounted prices.

CORD SETS



ABLE UL & CSA shielded and non-shielded cord sets are manufactured with North American and International color codes. Styles include detachable and extension cords, hospital and low leakage grades and power supply cords.

CABLE ASSEMBLIES



Shielded and unshielded cable assemblies to comply with IEEE-488, RS232 and RS449. Point to point wiring or wired to your specifications.

ABLE ...the source

Environmental Sealing Products

XTRA•SEAL™

Silicone Sealant Strips

XTRA•SEAL™ strips can be used almost anywhere when moisture and corrosion protection is required. It is a ready-to-use, cold-applied protection system which seals on a microscopic level. XTRA•SEAL™ represents the latest innovation in sealing technology and is re-enterable with ease. Its unique coating and self-heating ability makes it superior to conventional cold-applied sealing methods. XTRA•SEAL™ will perform in temperatures as high as +125°C and as low as −55°C.

FEATURES

- Inhibits corrosion
- Cold-applied
- Re-enterable
- No toxic fumes
- No special tools or cure-time required

APPLICATIONS

- Sealing electrical connections
- Pipe corrosion protection
- Masking electronic components
- Sealing high temperature equipment

FIT® Crimp Splices

Alpha's heat shrinkable, pre-insulated crimp splices completely seal electrical connections from exposure to water, salts or other contaminants. Unlike conventional butt splices, these butt connectors are covered with a heat shrinkable nylon insulator lined with an adhesive layer. Once crimped and sealed, they won't pull apart and are water-resistant. UL Listed, FIT Crimps have an operating temperature that ranges from −55°C to +125°C.

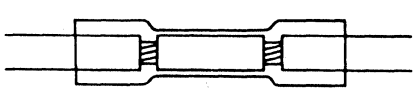
FEATURES

- All-in-one crimp and seal device
- Easy to install
- Water-resistant
- High tensile strength
- Abrasion resistant

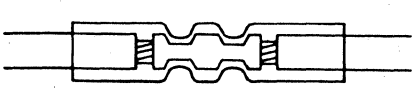
APPLICATIONS

- Marine Electronics/Electrical
- Process Control/Instrumentation
- Commercial/Industrial Wiring
- Petroleum and Chemical industries
- Automotive manufacturing and mass transit

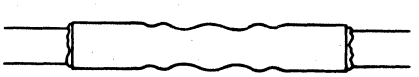
FAST, EASY INSTALLATION



Select appropriate splice. Strip wire back 0.3" (8mm). Insert wire into crimp barrel.



Crimp splice with Alpha's AT-300 crimp tool for pre-insulated crimps.



Heat splice with heat gun until tubing recovers and adhesive flows.

PRODUCT DATA

Alpha No.	Color	AWG Range of Barrel	
		Min.	Max.
FIT CRIMP 1	Red	22	18
FIT CRIMP 2	Blue	16	14
FIT CRIMP 3	Yellow	12	10

Operating Temperature: −55°C to +125°C
Shrinkage Ratio: Approximately 2:1 at 180°C

Typical wire pull out after crimping and recovery: Red—25 lbs; Blue—50 lbs; Yellow—60 lbs

for Todays Markets

New Polymer Technology LSOH

Low Smoke/Zero Halogen

Where Toxicity and Smoke are a Prime Concern

Introducing Alpha's new polymer technology for low smoke zero halogen (LSOH) military and commercial applications. LSOH wire and cable, tubing and molded parts can be used in mass transit systems, industrial factories and office buildings or any other area where smoke generation and toxic fume generation are a hazard.

LSOH FEATURES

- 24-14 AWG sizes
- Multi conductor/multipair
- 300V or 600V
- Insulation and jacket compound ideal for military and commercial LSOH applications

In applications for MIL-C-24643 and MIL-C-24640, please consult Alpha Wire Corporation for product availability.

XTRA•GUARD®
Communication And Control Cables Designed

XTRA•GUARD 1

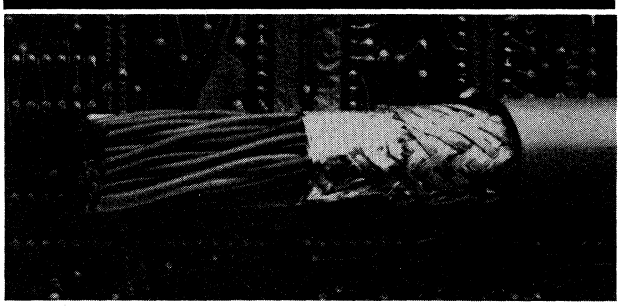
XTRA•GUARD 1 is a versatile electronic cable for internal or external wiring of OEM equipment. Available in three colors, XTRA•GUARD 1 features fully color-coded, tinned copper conductors and premium grade PVC insulation and jacket.

Available in two UL and CSA constructions, XTRA•GUARD 1 carries a UL VW-1 flammability rating. Applications range from sophisticated computer systems to medium x-ray equipment.

Multi-pairs	Multi-conductors	Jacket Material	Conductor Insulations	Voltage Rating
1-102	2-100	PVC 80°C UL Style 2464, 2343, 2344 PVC 105°C UL Style 2501	PVC 80°C CSA SR-PVC PVC 80°C CSA AWM PVC PVC 105°C CSA AWM PVC PVC 80°C UL Style 1007, 1061 PVC 105°C UL Style 1015	300V 600V

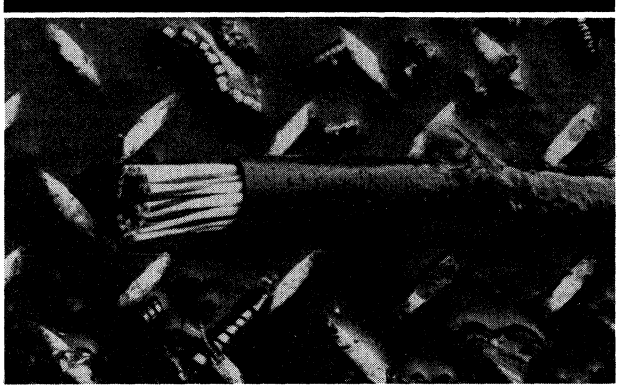
AWG Size Range: 24-14

COMPUTER, COMMUNICATIONS, INSTRUMENTATION AND CONTROL EQUIPMENT.



XTRA•GUARD 1

PETROCHEMICAL PLANTS, MACHINE TOOL, AND ROBOTICS.



XTRA•GUARD 2

XTRA•GUARD 2

For heavy duty applications in plants and factories, the specially formulated jacketing resists oils, solvents, chemicals, fuels and mechanical abuse. XTRA•GUARD 2 has up to three times more tensile tear and elongation strengths than similar cables jacketed in PVC and about twice the strengths of rubber or neoprene.

XTRA•GUARD 2 cables are available in nine jacket colors and meet MIL specs for water and for gas resistance. They have been field performance proven in robotics, printing presses, CNC and NC operations and military ground support.

Multi-pairs	Multi-conductors	Jacket Material	Conductor Insulations	Voltage Rating
1-102	2-100	Heavy duty polyurethane 80°C UL Style 20233, 20235, 20236 Heavy duty polyurethane 80°C UL Style 20234	PVC 80°C CSA SR-PVC PVC 80°C CSA AWM PVC PVC 105°C CSA AWM PVC PVC 80°C UL Style 1007, 1061 PVC 105°C UL Style 1015	300V 600V

AWG Size Range: 24-14

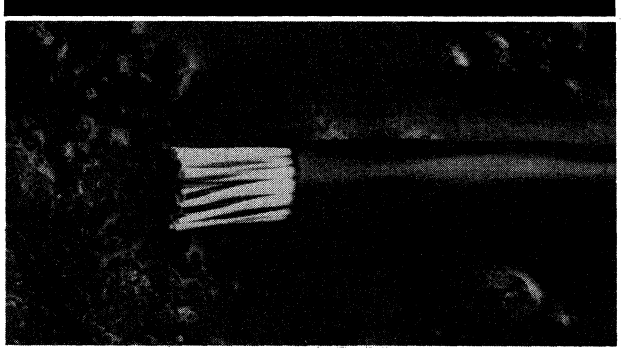
XTRA•GUARD 3

For direct burial without costly conduit, these cables have PVC-insulated conductors and a heavy duty black polyethylene jacket that withstand direct burial in wet earth or any outdoor installation. XTRA•GUARD 3 has been designed to give years of reliable service resisting the effects of weathering, moisture and mechanical abuse. Fully color-coded, tinned-copper conductors make identification fast, easy and safe. Can be used outdoors in petroleum pipelines, satellite communications and irrigation systems.

Multi-pairs	Multi-conductors	Jacket Material	Conductor Insulations	Voltage Rating
1-102	2-100	Polyethylene 80°C	PVC 80°C CSA SR-PVC PVC 80°C CSA AWM PVC PVC 105°C CSA AWM PVC PVC 80°C UL Style 1007, 1061 PVC 105°C UL Style 1015	300V 600V

AWG Size Range: 24-14

INTER-BUILDING COMMUNICATIONS, CONSTRUCTION SITES AND WATER TREATMENT PLANTS.



XTRA•GUARD 3

Margin of Protection

XTRA•GUARD®
To Withstand The Most Hostile Environments

PAPER PROCESSING PLANTS, AND INDUSTRIAL CABLE TRAY APPLICATIONS.

XTRA•GUARD 4

XTRA•GUARD 4

A general purpose outdoor cable with Thermoplastic Elastomer insulation and jacketing to insure flexibility at −60°C and performance at temperatures up to +125°C. XTRA•GUARD 4 has a low halogen content will not give off toxic or corrosive gases or fumes when exposed to flame. A UV-stabilized jacket resists most oils, chemicals, fuels, solvents and mechanical abuse and abrasion.

XTRA•GUARD 4 is available in nine colors and meets IEEE 383 flame tests.

Multi-pairs	Multi-conductors	Jacket Material	Conductor Insulations	Voltage Rating
1-102	2-100	TPR thermoplastic rubber −60°C to +125°C UL Style 20237, 20238, 20239, 20240 UL type PLCC, PLTC, Subject 13 UL type TC Subject 1277	TRP thermoplastic rubber −60°C to +125°C UL Style 1722, 1888	300V 600V

AWG Size Range: 24-14

XTRA•GUARD 5

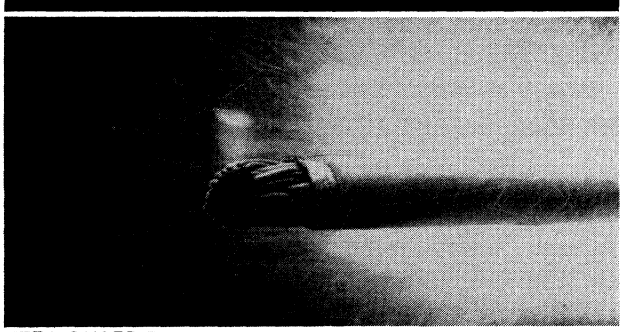
For cable protection in the most demanding OEM environments, XTRA•GUARD 5 resists any known chemical at room temperature and provides exceptionally high resistance at high temperatures. Its low friction coefficient makes installation easy for any application and these cables provide excellent abrasion and impact resistance. Meets IEEE 383 flame tests.

Where safety, chemical, electrical and physical integrity are a must, XTRA•GUARD 5 meets the challenge.

Multi-pairs	Multi-conductors	Jacket Material	Conductor Insulations	Voltage Rating
1-27	2-70	FEP-Teflon* −80°C to +150°C UL Style 20229, 20232 20230, 20231 NEC Article 725-(b), 760-4(d)	FEP-Teflon* −80°C to +150°C UL Style 1886, 1887	300V 600V

AWG Size Range: 24-16 *Teflon is a registered Trade Mark of E.I. DuPont

STEEL MILLS, HIGH TEMPERATURE, CORROSIVE INDUSTRIAL AND PLENUM APPLICATIONS.



XTRA•GUARD 5

XTRA•GUARD Cables are available in two shielded constructions and two types of cable armoring.

SHIELDING

Foil Shielding—a helically wrapped, polyester-supported aluminum foil provides 100% shield coverage. For use in low frequency data communication systems.

SUPRASHIELD™—a helically wrapped, triple laminate foil shield with drain wire and overall tinned copper braid which exceeds FCC Docket 20780. SUPRASHIELD meets the EMI/RFI shielding standard for CAD CAM and military applications including tempest and MIL STD 461 and 462B.

ARMORING

ALPHALOC™—for mechanical protection, ALPHALOC is made of flexible galvanized interlocked steel with a UV-stabilized PVC jacket to provide resistance against crush, corrosion and chemical attack.

ALPHABON™—for excellent protection against moisture, ALPHABON is an aluminum sheath, hermetically sealed to a polyethylene jacket to insure moisture protection. Ideal for direct burial in extremely wet environments.

alpha Ensures Reliable

Local Area Network/Communication Cables

CABLE DATA LINK FOR HIGH SPEED OFFICE COMMUNICATIONS—LAN IEEE 802

A local area network is a data communications system that allows similar or dissimilar digital devices to talk to each other over a common transmission medium. The devices may be of various types—for example, minicomputers, data terminals, telephone sets, distributed data processors, printers, copiers, facsimile devices, and word processors. As its name implies, a local network provides communications over a limited geographical area—a floor, a section of a building, an entire building, a cluster of buildings, or in a multi-story building or factory complex.

BENEFITS

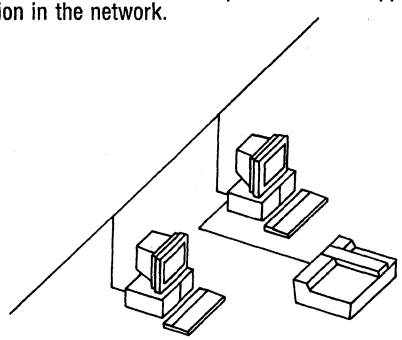
- Allows system flexibility
- Provides rapid transfer of information
- Links diverse types of equipment
- Complies with IEEE 802.3 Baseband Specifications
- Helps meet FCC Docket 20780 Shielding Requirements

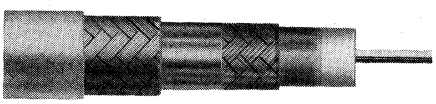
*IEEE 802 STANDARD

A dominant standard for LAN products has emerged in the IEEE 802 document with more than 100 equipment suppliers conforming to this standard.

STANDARD TRUNK/DROP CABLE TYPES

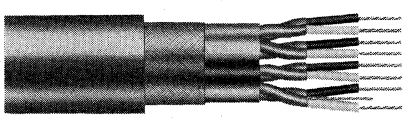
The common cabling system compatible with the requirements of IEEE 802 uses a coaxial cable for the trunk line, with twisted pair drop cables accessing the networked work stations. This configuration allows transmission speeds of 10Mb/sec over cable segments of 1640 feet maximum. The trunk cable is normally installed within ceilings and walls, and a twisted pair cable is dropped to connect each station in the network.





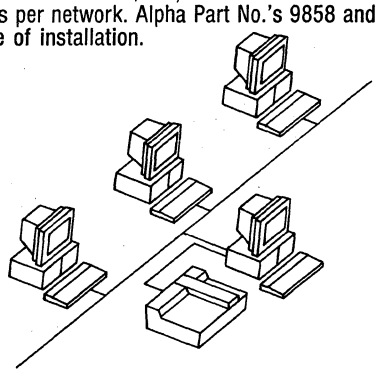
THE CABLES

The network cabling configuration is of key importance in supporting the high speed transfer of information. The LAN commonly uses twisted pair wiring and coaxial cable to transfer data at high speeds without the necessity of point-to-point wiring between each device.



10-BASE-2 "CHEAPER-NET" ALTERNATIVE

The IEEE 802.3 standard provides for a lower installation cost cabling structure known as 10-Base-2. A smaller coax is used to daisy chain stations by utilizing a BNC-T connecting device to link PC units. This configuration commonly referred to as "Cheaper-Net" can also operate at 10Mb/sec, but is limited to 600 foot segments and 30 PC's per network. Alpha Part No.'s 9858 and 9859 are used in this type of installation.



INDUSTRIAL AREA NETWORK

Alpha Part No. 9825 has been designed for use as a trunk coaxial cable with M.A.P. Systems (Manufacturing Automation Protocol), such as Allen-Bradley's Data Highway II, and other similar industrial area networking systems which bring intelligent automation to the manufacturing environment. These systems allow intelligent devices (computers, robots, graphic systems, etc.) and non-intelligent devices (printers, terminals) and other automated equipment to communicate with each other on the plant floor.

Application
- Industrial Area Network Cable for an Automated Plant Environment

Applicable Specification
- UL AWM Style 1478

Characteristic
- **Passes UL VW-1 flame test**

Electrical Characteristics
- Operating Temperature Range: 0-80°C (UL +60°C)
- UL Voltage Rating: 30 Volt

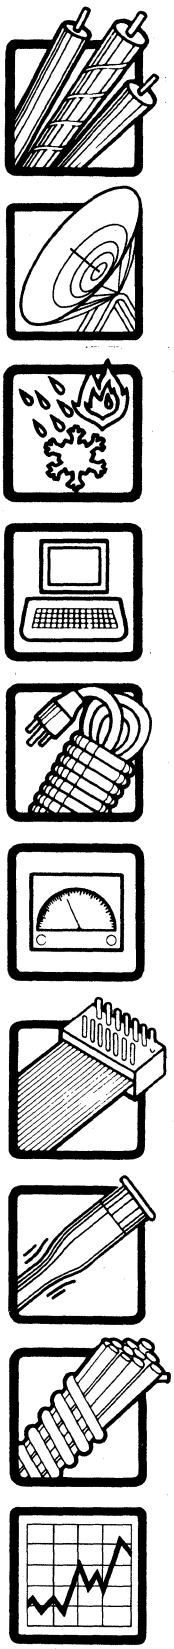
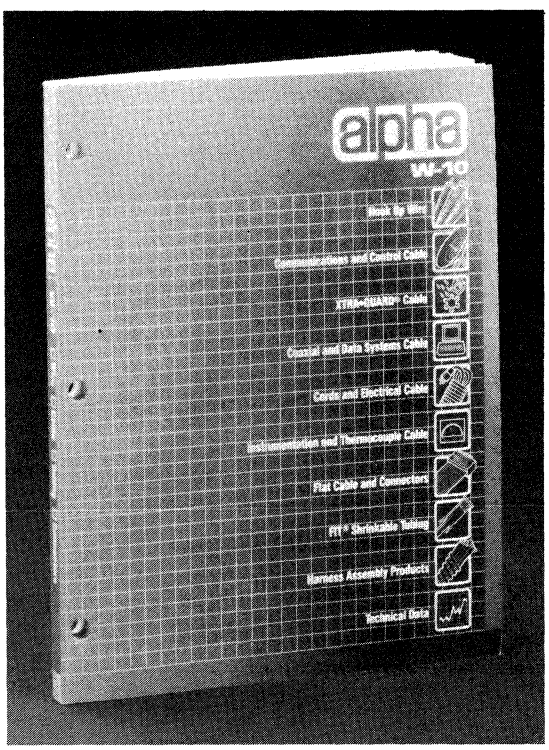
alpha Provides the Answer

Alpha Wire Corporation manufactures and distributes a full line of electronic wire, cable, tubing and connectors through a worldwide network of electronic and electrical distributors. Alpha's product line includes hook-up wire, instrumentation and thermocouple wire and cable, data cable and assemblies, flat cable and connectors, retractile cords and cord sets, high temperature wire and cable, shrinkable tubing and harness assembly products. All items are listed in the W-10, Alpha's new full-line catalog.



ALPHA'S FULL LINE CATALOG



FEATURES

- Lists over 7,000 part numbers for quick and easy reference
- Puts more than 30,000 items at your disposal
- Provides immediate access to the largest single source of wire, cable, tubing and connectors in the electronics industry

For your free catalog or answers to your technical, application or specialty needs, call your local Alpha distributor listed in the Yellow Pages, or contact:

Wire and Cable

BELDEN

Belden manufactures quality cables for a wide range of commercial,and industrial applications. The cables contained in this catalog represent only a small portion of Belden's standard product line. For a more complete listing, contact your local Belden distributor or call toll free 1-800-BELDEN-1. (317/983-5200 in Indiana.)

*Capacitance between conductors.
**Capacitance between 1 conductor and other conductors connected to shield.

Multi-Conductor
Overall Foil/Braid Shield

Datalene® insulation features are low dielectric constant and a dissipation factor for high-speed, low-distortion data handling. Physical properties include good crush resistance and light weight.

Product Description
Tinned copper, polypropylene insulated, twisted pairs, overall Beldfoil aluminum-polyester shield, 28 AWG stranded tinned copper drain wire, overall tinned copper braid shield (90% coverage), chrome PVC jacket. Color code chart No. 3, Technical Information Section.

*Capacitance between conductors.
**Capacitance between 1 conductor and other conductors connected to shield.
††6dbv length limit is the cable length at which 50% of the DC input volume appears across the load if the cable is terminated in its characteristic impedance.

Paired
Overall Foil/Braid Shield

Datalene® insulation features are low dielectric constant and a dissipation factor for high-speed, low-distortion data handling. Physical properties include good crush resistance and light weight.

Product Description
Tinned copper, Datalene insulated, twisted pairs, overall Beldfoil aluminum-polyester shield, 24 AWG stranded tinned copper drain wire, overall tinned copper braid shield (65% coverage), chrome PVC jacket. Color code chart No. 5, Technical Information Section.

†Passes the VW-1 Vertical Wire Flame Test.
*Capacitance between conductors.
**Capacitance between 1 conductor and other conductors connected to shield.
††6dbv length limit is the cable length at which 50% of the DC input volume appears across the load if the cable is terminated in its characteristic impedance.

Datalene® insulation features are low dielectric constant and a dissipation factor for high-speed, low-distortion data handling. Physical properties include good crush resistance and light weight.

Product Description
Tinned copper, polypropylene insulated, twisted pairs, each pair individually shielded with Beldfoil aluminum-polyester shield and 20 AWG stranded tinned copper drain wire, overall chrome PVC jacket. Color code chart No. 3, Technical Information Section.

Product Description
Tinned copper, Datalene insulated, twisted pairs, each pair individually shielded with Beldfoil® aluminum-polyester shield and 24 AWG stranded tinned copper drain wire, overall Beldfoil aluminum-polyester shield plus 65% tinned copper braid shield. Chrome PVC jacket. Color code chart No. 3, Technical Information Section.

†Passes the VW-1 Vertical Wire Flame Test.
*Capacitance between conductors.
**Capacitance between 1 conductor and other conductors connected to shield.
††6dbv length limit is the cable length at which 50% of the DC input volume appears across the load if the cable is terminated in its characteristic impedance.

BELDEN

Paired
Individually Shielded Pairs with Overall Foil/Braid Shield

Datalene® insulation features are low dielectric constant and a dissipation factor for high-speed, low-distortion data handling. Physical properties include good crush resistance and light weight.

Belden "UNREEL®" Dispensers

- **Easy to use.**
- **Light in weight.**
- **Faster than standard reels.**
- **Easy to store and transport.**
- **No snagging, twisting and kinking.**
- **Not liable to backlash.**
- **Continuous feed-out system.**
- **Efficient throw away packaging.**

Belden cables are available in unique "UNREEL" dispenser packs. "UNREEL" overcomes the problems associated with spools and reels. "UNREEL" is economical: so easy to use, it saves up to 30% of your time on every job, compared to conventional spool and non spool fed systems. To order, add the letter "U" before desired length. Example: Belden Part No. 8451 Length U-1000.

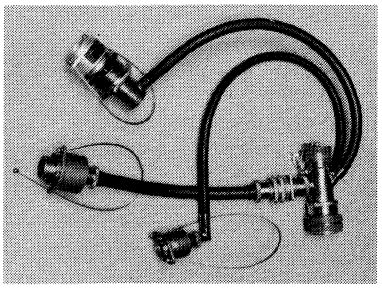
Bi-LINK™ Cable System

Custom designed cable systems for special applications



If you're looking for electronic interconnecting components of the highest quality and value; if you need conduit and cable assemblies that will provide trouble-free service in any environment and shield against electromagnetic interferences; if you have unique requirements that demand specially designed systems, components or connections; you really should look into the Breeze product lines and engineering capabilities.

Interconnection systems and assemblies custom designed for the system they serve and shielded against EMI, EMP, nuclear radiation, compromising emanations (TEMPEST), mechanical shock and hostile environments are our specialty. We also design and manufacture many items that are available "off-the-shelf". Our connector products conform to all military, NASA and government specifications.

We have produced the interconnection systems on military and commercial vehicles from spacecraft to submarines . . . Our products serve communications systems, data processing and information systems, control centers . . . virtually any situation that calls for the transfer of electronic signals through wires.

Breeze-Illinois provides fast service for our customers through a comprehensive network of sales representatives. These local reps are backed up by an experienced design engineering staff at Breeze that can assist in the design and development of the interconnection product that best fills your needs, whether it is a single, off-the-shelf connector or a complete cabling system.

Breeze-Illinois is now a part of the newly formed **Electronics Division** of **Trans-Technology Corporation,** contributing 60 years experience to this group of companies that design and manufacture a broad range of electronic interconnection components and devices.

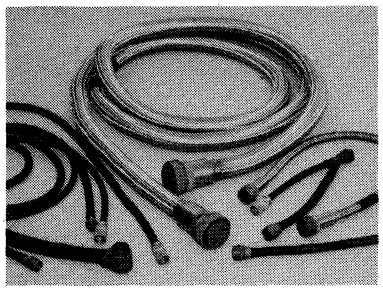
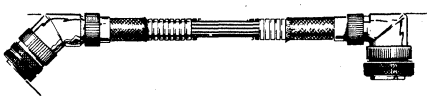
Bi-SHIELD™ Cable Assemblies

Custom Designed Interconnector Assemblies for Every Application

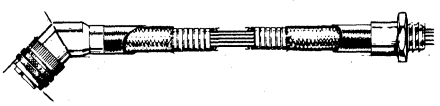


Bi-SHIELD 100 Series
For cost effective, light weight, service flexing applications.

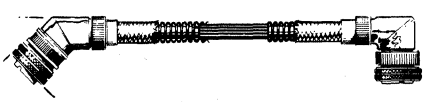
Bi-SHIELD 200 Series
Bi-SHIELD 200 series. Environmental protected cables through molded and blown on elastomer jackets or extruded jackets.



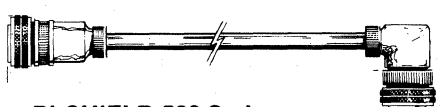
Bi-SHIELD 300 Series (301)
Repairable cables protected with Bi-PRO metallic convoluted conduit for high shielding levels.



Bi-SHIELD 300 Series (302)
Cables protected with Bi-PRO metallic convoluted conduit for high shielding levels and environmental protection.



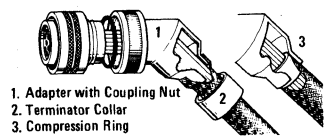
Bi-SHIELD 400 Series
Repairable cables protected with Bi-PRO non-metallic conduit for good environmental protection.



Bi-SHIELD 500 Series
Cables constructed from commercial bulk cable and state of the art backshell adapters.

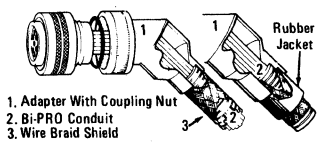
Bi-SHELL™ Cable Terminations

Superior Backshell Designs As Versatile as They are Varied



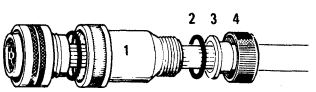
1. Adapter with Coupling Nut
2. Terminator Collar
3. Compression Ring

Bi-SHELL 10/11
Designed for flexible, hermetically sealed conduit innercores.



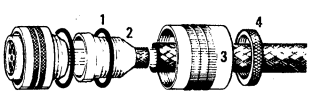
1. Adapter With Coupling Nut
2. Bi-PRO Conduit
3. Wire Braid Shield

Bi-SHELL 20/21
A 360 degree braid terminating method for metallic braided wire bundles of single or multiple layers.



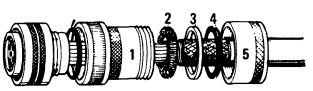
1. Adapter with Coupling nut
2. Environmental Seal*
3. Ferrule
4. Coupling Nut

Bi-SHELL 355/540
A threaded backshell/adaptor for modular conduit cable assemblies.



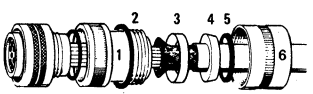
1. Environmental Seals*
2. Adapter Terminator
3. Adapter Barrel
4. Locking Ring

Bi-SHELL 50
Field installable and serviceable backshell designed for use in conjunction with shielded (braided) wire bundles.



1. Adapter
2. Compressible Contact Media
3. Collar
4. Environmental Seal*
5. Nut

Bi-SHELL 60
Field installable and serviceable backshell designed to be easily removed and reassembled.



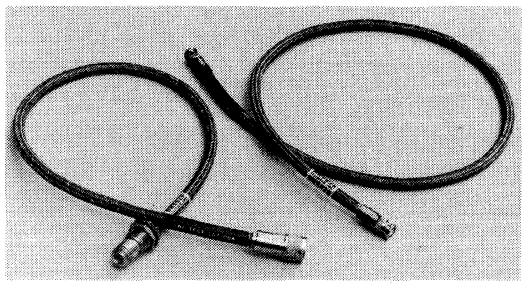
1. Adapter
2. Env Seal*
3. Collar
4. Grommet
5. Washer
6. Nut

Bi-SHELL 70 - 80
This protected adaptor interfaces commercial cable to connectors providing both EMI and environmental protection.

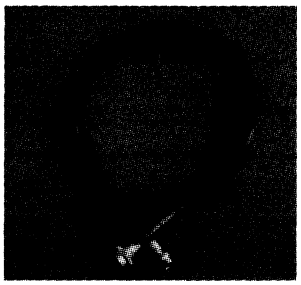
Bi-PRO™ Conduit

Flexible wire-ways constructed of metallic or non-metallic convoluted conduit with a wire or fabric overbraid

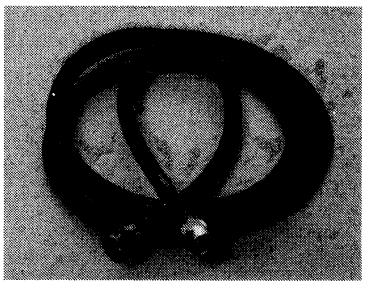
TransTechnology TE Electronics



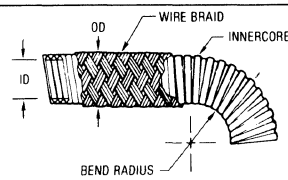
Bi-PRO 175 conduit with end Fittings



Bi-PRO 801 Cable



Elastomer Jacketed Bi-PRO cable



Bi-PRO 175

Bi-PRO 175 is a hermetically sealed, shielded, flexible wire-way consisting of a convoluted brass innercore covered by a bronze braid. The innercore is constructed of a brass strip, helically convoluted and soldered at every other convolute. It forms a flexible, hermetically sealed tube that is capable of withstanding pressures in excess of 1000 psi. Bi-PRO 175 complies with MIL-C-13909 and has withstood tests of over a half million flexing cycles without failure.

Bi-PRO 223

Bi-Pro 223 is a hermetically sealed, shielded flexible wire-way consisting of a nickle-iron alloy convoluted innercore covered with a 300 series stainless steel braid in accordance with AMS 5689. The innercore, provides optimum permeability, stability and saturation resistance, with construction and dimensions in accordance with MIL-C-13909.

Bi-PRO 237

Bi-PRO 237 is a hermetically sealed, shielded flexible wire-way consisting of an 80% nickel, 20% iron alloy convoluted innercore covered with a 300 series stainless steel braid in accordance with MIL SPEC AMS5689. The innercore is annealed in a controlled atmosphere to provide permeability and shielding effectiveness exceeding performance specified under NAVSHIP specification 0967-283-5010.

Bi-PRO 242

Bi-PRO 242 is a hermetically sealed, shielded flexible wire-way consisting of a convoluted stainless steel innercore covered by a stainless steel braid in accordance with AMS5689. It combines high strength and flexibility with excellent corrosive resistance and high shielding capability. Construction is in accordance with MIL-C-13909.

Bi-PRO 001/101

Bi-PRO 001 is an all aluminum, non corrosive, flexible, convoluted conduit covered with an aluminum alloy wire braid. It features light weight and flexibility with a high level of crush resistance plus electro-magnetic shielding capability against electric fields. Bi-PRO 001 is manufactured in accordance with MIL specs. AN-WW-C561, Type 1 and MIL-C-6136, Type 1.

Bi-PRO 198

Bi-PRO 198 is a flexible wire-way consisting of a helically convoluted and interlocked stainless steel innercore tube covered with a stainless steel braid. This extremely strong and durable interconnector protects against shock and impact, temperature up to 2000° F and has high corrosion resistance. It is manufactured dimensionally in accordance with Mil-C-6136.

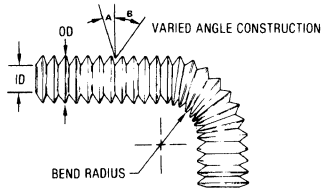
Bi-PRO 801 - Bi-PRO 811

Bi-PRO 801 is a high quality extruded flourcarbon TFE Teflon tube. It is completely seamless, hermetically sealed, and helically convoluted for extra strength and flexibility. The convolutes are slightly angled to provide a minimum bend radius.

Bi-PRO 811 is a high quality, helically convoluted and hermetically sealed flourocarbon tube of TFE Teflon covered with a stainless steel overbraid that provides protection and prevents elongation. Braid is stainless steel in accordance with mil spec AMS 5889.



Bi-PRO 807 - Bi-PRO 827

Bi-PRO 807 is an annularly corrugated and hermetically sealed flourocarbon tube of seamless FEP Teflon with no braid. It is extremely flexible and has excellent crush resistance due to its patented deep groove and varied angle corrugated configuration. The corrugations also give the tubing the ability to be compressed or extended to varying lengths thus providing well-fitting interconnections and easy installation in tight places.

Bi-PRO 827 encorporates the same annularly corrugated and seamless Teflon Tubing as 807 covered with a stainless steel overbraid for additional protection and strength. Braid is in accordance with MIL SPEC AMS5689.

BRIM ELECTRONICS, INC.
WIRE — CABLE — TUBING — HARDWARE
FAIR LAWN, N.J. 201-796-2886

BRIM CHV CORONA RESISTANT HIGH VOLTAGE TEFLON* CABLE

BRIM CHV eliminates the need for bulky, thick insulation, as used with silicone rubber high voltage cables, and provides high temperature resistance not available with polyethylene insulated high voltage cables, plus the added benefit of retarding and detering corona discharges. Even under severe stress, including mechanical strain, moisture, corona or chemical, or high temperature conditions, there is no cracking of the insulation. Cable construction meets and exceeds MIL-W-16878D.

OPERATING VOLTAGE: Voltage capabilities are based on the thickness of the jacket.

OPERATING TEMPERATURE: −90°C to +250°C

DESCRIPTION: Silver plated copper conductor, per QQ-W-343, special corona retarding insulation, TFE tape wrap insulation, & a color coded jacket overall.

STD. COLORS: Red, White, Black, Green, Blue, Yellow, Orange, Brown, Purple, Gray. Stripped colors are also available.

STD. P-U: 250′, 500′, 1000′. * DuPont

CONSTRUCTION VARIATIONS AVAILABLE TO ORDER.

BRIM HIGH TEMPERATURE LEAD WIRE

These small diameter high temperature lead wires allow unique constructions. The basic wire conforms to MIL-W-3861-stranded nickel plated copper; when shielded, nickel plated copper shielding is per MIL-N-46026A. Rated for 100 Volts RMS.*

Type 1: 800°F High Temperature Rating — Suitable for aircraft, or missile lead wire, heaters, furnaces, ovens and kilns for operations between 500°F to 800°F. Cond. insulation: Fiberglass braid, impregnated with a silicone varnish, over a stranded nickel plated conductor.

Type 2: 1500°F High Temperature Rating — Suitable as a radiation resistant aircraft, or missile lead wire, furnaces, ovens and kilns for operations between 800°F to 1500°F. Cond. insulation: Inorganic braid over a stranded nickel plated copper conductor.

Type 3: 2000°F High Temperature Rating — Suitable as a radiation resistant aircraft or missile lead wire for operations between 1500°F to 2000°F. Cond. Insulation: special formulated ceramic braid over a stranded nickel plated copper conductor, and a nickel plated braided shield overall.

* For dry locations.

BRIM WIRE — CABLE — TUBING — HARDWARE ELECTRONICS, INC. FAIR LAWN, N.J. 201-796-2886

TFE & FEP TEFLON SHIELDED CABLES • BRIMCROM • BRIMFLYX • STAINLESS STEEL TUBULAR BRAID TEFLON IMPREGNATED BRAID OVER SHIELD PER MIL-W-16878 • SHIELDED RETRACTILE CORD

DESCRIPTION: One to five twisted conductors of Type E extruded TFE* insulation (.010″ wall), over a stranded silver plated copper conductor. If shielded, braided silver plated shield with a min. coverage of 90% over the conductor(s). When jacketed, either a fused double reversed TFE tape wrap jacket, a Teflon* impregnated fiberglass braided jacket, or an extruded FEP jacket. Cables are fungus, solvent, flame, acid, alkali, and oil resistant. Rated for 600 Volts. Stranding: 26 AWG — 7 strands, 24 AWG to 16 AWG — 19 strands. Color code: 1-White, 2-Black, 3-Red, 4-Green, 5-Yellow. Jacket color: White. OPER. TEMP.: TFE −65°C to +250°C. FEP: −65°C to +200°C.

BRIMCROM™

MICROMINIATURE TEFLON* HOOK-UP WIRE

Conductors are silver plated copper dip coated with TFE Teflon* insulation. Rated for 300 Volts, −90°C to +260°C. BRIMCROM is highly flexible, chemically inert, weather resistant, nonflammable. Suitable wherever high temperatures and lack of space are absolutely critical, such as aircraft, missiles, medical, and microminiaturized electronic components, and system designs. STD. P-U: 1000′

BRIMFLYX™ ULTRA-FLEXIBLE WIRE

DESCRIPTION: Soft bare copper conductor, insulated with a special flexible PVC formulation to minimize kinking & allow for ultra-low bending torque.

Designed for use where wires encounter continuous flexing, such as in data processing equipment, mercury thermostats, magnetic drums, and rotating servo platforms.
OPER. TEMP.: −40°C to +80°C

RETRACTILE COMMUNICATION CORDS

UL APPROVED

RETRACTED LENGTHS: 2, 3, 4 ft.
EXTENDED LENGTHS: 11, 16, and 22 ft. OPER. TEMP.: −20C to +80°C

DESCRIPTION: Cords are composed of multicond. 23 AWG 21/36 tinned soft copper for a longer flex life. Cords are jacketed in either TPR, or special vinyl-"Byron"-formulation, for a long service life. These cords are suitable for communication equipment, such as ham operations, head sets, radio equipment, telephone car carriers, etc. 300V working. 1 AMP carrying capacity. Nom. cond. resistance .022 ohms per linear foot, .185 ohms per retracted foot.
† Stocked in Bryon only. STD. PKG.: 6

BRIM MINIFLYX™ SUBMINIATURE ULTRA-FLEXIBLE INSTRUMENTATION CABLES

DESCRIPTION: Ultra-flexible stranded bare copper conductors, .005″ wall of soft flexible PVC, braided shield, White .010″ soft flexible PVC jacket overall. Suitable as an instrumentation cable where Ultra-flexibility & subminiaturization are essential, in low voltage applications. For example: biomedical instruments, missiles, computer, miniature relays, disc drives, servo systems, recorders.
OPERATING TEMPERATURE: −40°C to +90°C.
OPERATING VOLTAGE: 200 Volts.

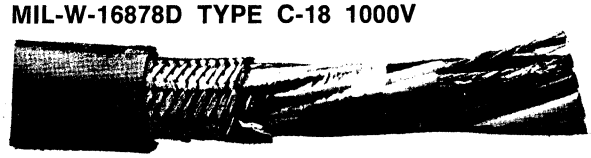
HEAVY DUTY SHIELDED CONTROL CABLES MIL-W-16878D TYPE C-18 1000V



DESCRIPTION: MIL-W-16878D Ty C-18, 19/30 TC conductors, twisted, mylar wrap braided tinned copper shield — 90% minimum coverage — chrome PVC jacket overall. Color coded. Cable resistant to acids, oils, moisture, solvents, alkalis, fungus. Cable meets UL VW-1 vertical flame test requirements. OPERATING VOLTAGE: 1000V. OPERATING TEMPERATURE: −55°C to +105°C. Suitable as an interconnecting cable for electronic equipment, instrumentation, control, telemetry data, and remote control of sensitive recording instruments.
STD. P-U: 500′, 1000′.

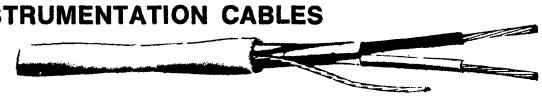
ALUMINUM MYLAR FOIL SHIELDED CABLES

ALUMINUM MYLAR FOIL SHIELDED CABLE — INSTRUMENTATION CABLES



DESCRIPTION: Stranded TC conductors, polyethylene insulation, conductors twisted, an aluminum mylar foil shield, foil out, TC drain wire, gray PVC jacket overall. Color coded. Suitable as a light weight shielded instrumentation cable. Shield provides 100% coverage, and drain wire provides quick and easy grounding. OPERATING VOLTAGE: 400V.
OPERATING TEMPERATURE: −20°C to +60°C.
COLOR CODE 1-Black, 2-Red, 3-White, 4-Green.

BRIM

CONTROLLED IMPEDANCE CABLE — ELECTRONIC LACING CORDS & TAPES

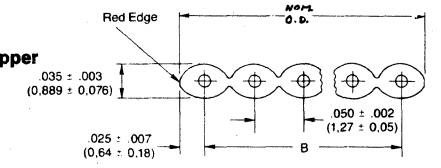
BRIM BRIBBON™ 100 OHM CONTROLLED IMPEDANCE CABLE — UL 2651

DESCRIPTION: Flexible .010" UL VW-1 PVC insulation over 28 AWG 7/36 TC conductors, laid parallel. All conductors are colored Gray, with one edge Red for polarity identification. MEETS UL 2651.

BRIBBON™ cables are designed for fast, mass termination to all standard .050" IDC connectors. Double contour allows reverse plane terminations. Easy conductor separation for circuit routing, and uniform breakouts for harness production.

BRIBBON™ cables replace bulky round twisted paired cables, providing easy routing & greater space utilization within confined chassis. Precise spacing for controlled electrical characteristics — controlled crosstalk thru precisely controlled impedance and capacitance.

CONDUCTORS:
28 AWG (7/36)
Stranded Tinned Copper



Dimensions and charactertiscs subject to change without notice.

NYLON FLAT BRAIDED LACING TAPE MIL-T-43435 TYPE I FINISH B

Nylon flat braid, treated with a microcrystalline fungicidal wax finish. Stays flat, flexible, and creates a wider contact to distribute stress. Won't slip when tied. Resistant to fungus, flame, abrasion, and acids.

BRIM No.	Color	Size	Nom. Width	Nom. Thick.	Tensile Strength	Std. P-U

BRIM

FLAT BRAIDED TINNED COPPER SHIELDING — TUBULAR BRAID PER QQ-B-575A

FLAT BRAIDED TINNED COPPER

TINNED COPPER FLAT shielded braid, woven then rolled flat. Conductors are annealed for flexibility. Used as grounding cable, bonding strap for aircrafts, marine equipment, vehicles, etc., to eliminate ignition interference. Easily slides over wire and cables. Also used as a high current conductor at low voltages.

TUBULAR BRAID PER QQ-B-575A

TINNED COPPER TUBULAR shielded braid mfg. round per MIL Spec. QQ-B-575A. Shielding coverage of 95% or more. Used in military or critical commercial applications where maximum shielding coverage is required against electrostatic interference. Also useful as grounding wire/cable, bonds, leads, flexible connectors, and protection against mechanical abrasion and stresses for wires/cables. Each wire is soft drawn tinned copper.

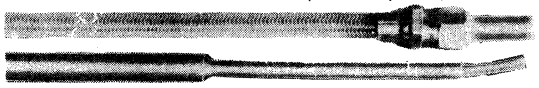
HEAT SHRINKABLE TUBINGS: BRIFLON™ TEFLON • TEFZEL – SILICONE RUBBER TUBING

SH200, SH250, SH254 & SHTF tubings have excellent resistance to weathering, chemicals (oils, fuels, solvents, acids, alkalis, fluids), & fungus, are non-corrosive, low water absorption (.01%), will not burn nor support combustion, have hi dielectric strength (850V/MIL dry), low dielectric constant, & a very low coefficient of friction. Hi mechanical strength yet flexible. (Low temp. flexibility −67°C). Their excellent electrical characteristics remain stable throughout their electrical range. Longitudinal change with full shrinkage: FEP −15%: TFE −20%. Color: Natural (FEP-transparent; TFE-translucent).



SH200 (FEP) MIL-I-23053/11

SH200: an extruded modified FEP (Fluorinated-Ethylene-Propylene) Teflon* tubing, with a continuous Oper. Temp. of +205°C (400°F). SH200 completely shrinks at 350°F (partial shrinkage possible at 200°F). Shrinkage ratio — 1.3:1. It melts at 525-563°F so it can be used to encapsulate. Now many sensitive components, parts, devices, etc. can be protected with Teflon*. Fills void between the hi temp. of TFE, and low temp. of PVC and polyolefin tubings.

OTHER SIZES IN TFE AND FEP, AND COLORS ARE AVAILABLE TO ORDER. ETCHING FOR BONDING IS AVAILABLE TO ORDER.

SH254 4:1 SHRINKABLE TFE

SH254 tubing can recover to approximately ¼ of its expanded size when heated to its "gel" point (621°F-625°F). Because of its exceptional shrinkage capability, its recommended that the outside diameter of the object to be shrunk down upon should not be more than 50% of the expanded I.D. of the size of the tubing used. Many constructions conform to AMS 3584 and MIL-I-23053/12 class 5. SH254 is non-flammable, non-corrosive, and offers all of the other outstanding electrical, chemical, and mechanical properties of Teflon*. * DuPont

SHTF SHRINKABLE TFE/FEP

SHTF is made with a combination of TFE and FEP Teflons*. The inner wall is made of FEP and the outer wall of TFE. When the tubing is heated, the TFE begins to shrink down tightly over the FEP. The FEP inner wall melts and flows-squeezes-into and around the item covered, creating a solid or near solid encapsulation. The fit is so tight that it is safe against most environmental hazards, involving pull or vibrations. It can be used as a strain relief, or moisture-proof covering for wires, connectors, terminals, splices, electronic devices, etc. SHTF is non-flamable, non-corrosive, and offers all of the other outstanding electrical, chemical, and mechanical properties of Teflon*. Color: Natural (Transparent). OPERATING TEMPERATURE: −85°F to +450°F.

BRIMFLEX BSR SILICONE RUBBER TUBING — MIL-R-5847 200°C

BRIMFLEX BSR Silicone Rubber tubing is an extremely elastic and stable high temperature and low temperature tubing. Besides being extremely flexible, it has excellent mechanical strength (tear resistance, tensile strength, elongation, and weather resistance), and outstanding dielectric strength, and corona resistance. BSR meets MIL-R-5847 and Fed. Spec. ZZ-R-765, Class 2b, STD. COLOR: WHITE. OPERATING VOLTAGE: 28 AWG-⅝″ — 300V, ¾″-1″ — 600V.

SHRINKABLE E-TFE TEFZEL* TUBING — MIL-I-23053/14

Designed for ruggedness. Excellent chemical resistance and high dielectric qualities which exist over a wide temperature range. Superior to Teflon* in its mechanical strength. Shrink Ratio-1.5:1. Shrinks quickly on application of only 300°F (150°C). Because of its quick shrinking ability at a relatively low temperature, many heat sensitive components and materials (solder joints, plastics, wood, metal) can now be easily protected. It is also heat sealable, chemically inert, self-extinguishing (non-flamable in air). Dielectric Strength: 400V/MIL. Uses: cable jacketing, wire markers, terminal covers, temperature probes, immersion tubing, heat exchanger coils, sight glasses, roll covers, chafe guards, component insulation. STD. COLOR: Translucent.

BRIMFLEX™ SHRINKABLE TUBINGS — SPIRAL WRAP TUBINGS

BRIFLEX™ SHRINKABLE PVC TUBINGS: MIL-I-23053/2B & HEAVY WALL PVC TUBING

SHRINKABLE IRRADIATED POLYOLEFIN: MIL-I-23053/5 — SPIRAL WRAP TUBING

BRIMFLEX™ POLYVINYLCHLORIDE SHRINKABLE TUBING — MIL-I-23053/2B & UL VW-1

SHRINK RATIO: 2:1 (50%) — OPERATING TEMPERATURE: −20°C to +105°C

BRIMFLEX™ SH105 is a flexible all purpose shrinkable PVC tubing that shrinks 50% of its expanded size when exposed to temperatures below 200°F (within one minute). SH105 meets MIL-I-23053/2B, Class 2, and conforms to MIL-I-631D, Grade C. Longitudinal shrinkage: approximately 20%. SH105 is self-extinguishing, resistant to fungus, most oils, and chemicals, sunlight, moisture, and is non-corrosive. SH105 is suitable for insulating wires, cables, and electronic components, that vary in shapes, and dimensions. Produces a smooth snug flexible fit, in most applications — even around sharp bends. Dielectric Strength: 700V/MIL min., ASTM-D922. Tensile Strength: 2000PSI min. Suggested Storage Temperature: under 70°F for up to 10 months. UL Approved SH105 is available to order.

STD. COLORS: Black, Clear, Red, White. Other colors available to order.

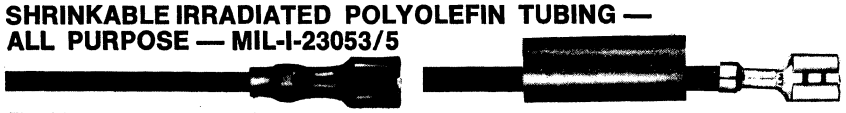
SHRINKABLE IRRADIATED POLYOLEFIN TUBING — ALL PURPOSE — MIL-I-23053/5



Flexible, yet greater electrical, chemical, and abrasion resistance, and greater mechanical strength than that of shrinkable PVC tubing. It not only insulates, it can also encapsulate, giving a watertight fit. Won't crack or peel. Its non-corrosive, has excellent resistance to soldering irons, oils, solvents, acids, alkalis, fuels, hydraulic fluids, fungus. Shrink Ratio-2:1 (50%). Shrinks when exposed to 250°F. Longitudinal shrinkage: 5%. Dielectric Strength: 1300V/MIL. Colored tubing is self-extinguishing; clear tubing is slow burning. Uses: Strain relief, jacketing material, component insulation. OPERATING TEMPERATURE: −55°C to +135°C. Meets MIL-I-23053/5, Class 1, 2. MIL-I-7444B, AMS 3636B, AMS 3637A, ASTM D876, ASTM D150, ASTM D257, ASTM D2671, ASTM D792.

SEMI-RIGID POLYOLEFIN SHRINKABLE TUBING IS AVAILABLE TO ORDER.
CUT AND PRINTED WIRE MARKERS ARE AVAILABLE TO ORDER.

SPIRAL WRAP TUBINGS FOR HARNESSING

Easily twists on and off. Can be repeatedly flexed without cracking or breaking. Expandable. Holds wire, and cable bundles securely, and allows leadoffs or additions at any point. Bends around sharp corners, and protection against sharp edges. Available in 4 types of insulations: Polyethylene, Rulan (a flame retardent type of polyethylene), Nylon, Teflon. All are resistant to organic solvents, alkalis, and acids (nylon satisfactory except for strong acids). OSHA and UL approved for harnessing cables.

LOW & HI TEMP. PVC TUBING PER MIL-I-631 & MIL-I-7444 STOCKED.

SHRINK RATIO: 2:1 (50%) — OPERATING TEMPERATURE: −20°C to +105°C

SH110 meets or exceeds the performance requirements of MIL-I-23053/2B, Class 2 but for its dimensions — its heavier wall. SH110 is a Heavy Wall Shrinkable PVC tubing, yet its flexible, and will shrink at temperatures below 200°F (within one minute). Provides outstanding dielectric and mechanical protection without damage to enclosed or adjacent components, even around sharp bends. Longitudinal shrinkage: approximately 20%. SH110 is self-extinguishing, resistant to fungus, moisture, sunlight, and most oils, and chemicals. Dielectric Strength: 600V/MIL min,. ASTM-D922. Suitable as a heavy duty all-purpose shrinkable tubing that is less expensive, almost as flexible, and has a higher temperature ability than that of Shrinkable Neoprene tubing. Suggested Storage Temperature: Under 70°F for up to 10 months.

BRIM ELECTRONICS, INC., DEPT. EM, P.O. BOX 336E, FAIR LAWN, NJ 07410 (201) 796-2886 WRITE FOR FREE CATALOG

NOMOGRAPH VOLTAGE DROP

NOMOGRAPH OF VOLTAGE DROP ACROSS LOAD SUPPLY LEADS (as a function of wire size and load current)

THIS NOMOGRAPH CAN BE USED TO FIND:

Maximum current carrying capacity recommended for any standard wire size.*

1) With a straight edge, connect from the wire size on Scale 2 to the point "A" on Scale 3.
2) Read I_{max} on Scale 1.

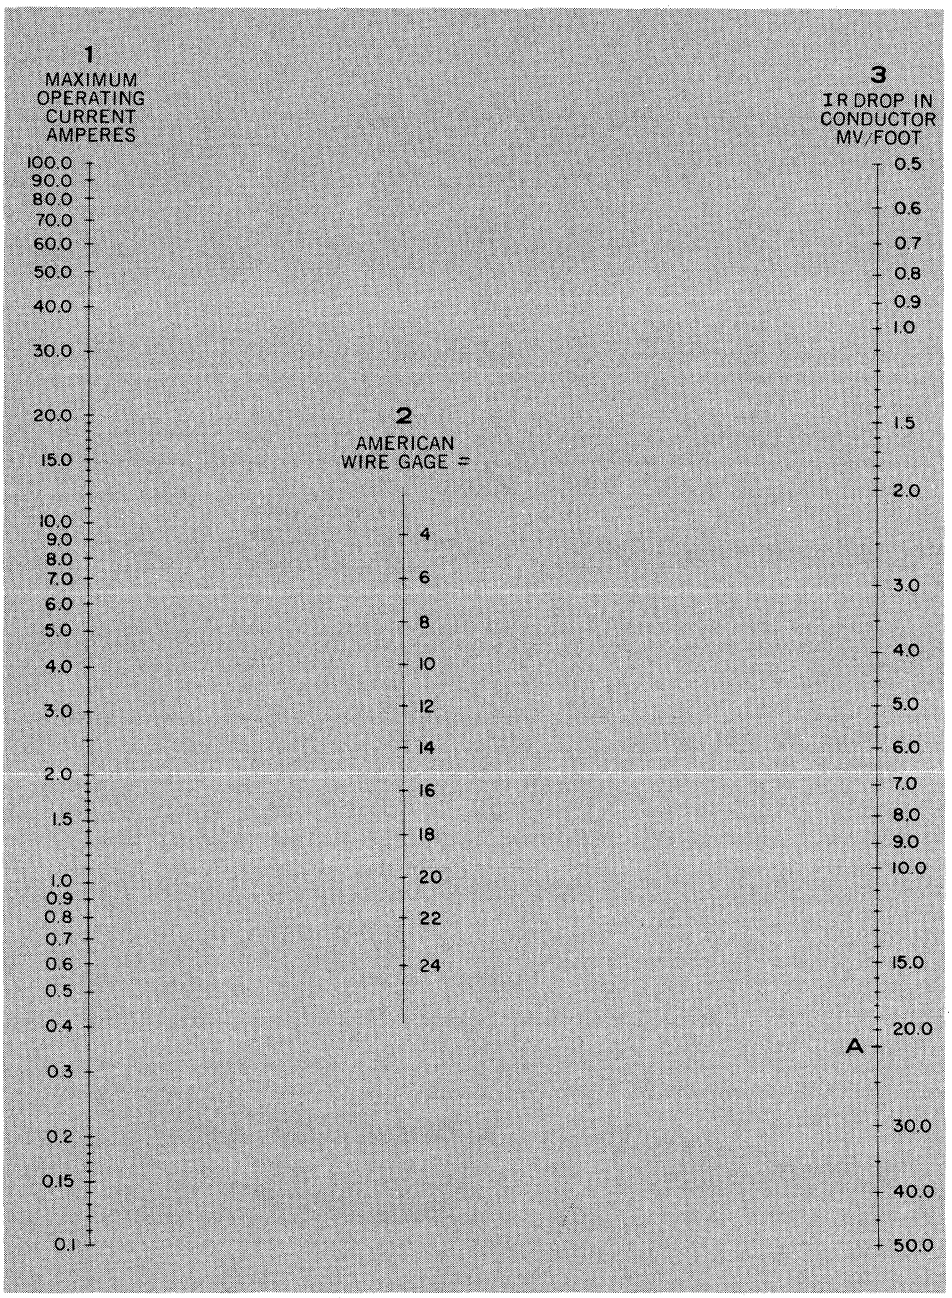
Voltage drop in millivolts per foot for known wire size and operating current.

1) With a straight edge, connect the known current on Scale 1 and the wire size on Scale 2.
2) Read voltage drop on Scale 3.

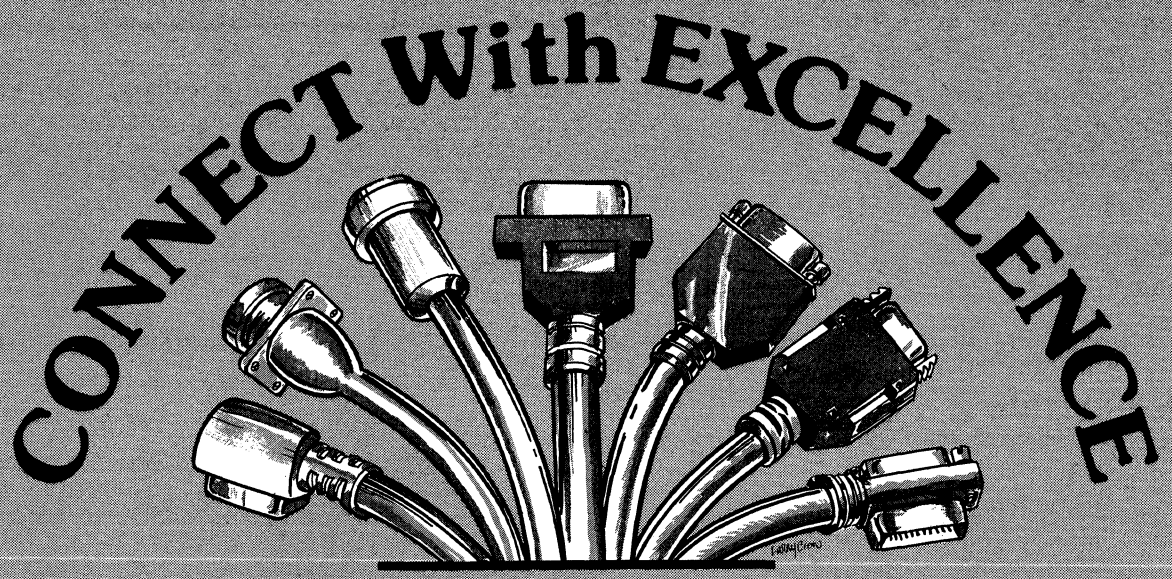
Wire size required for known operating current and known maximum tolerable voltage drop across supply leads.

1) Determine maximum tolerable drop in millivolts **per foot** of lead (sum of positive and negative leads).
2) Connect the value on Scale 3 (as determined in step 1) to the known current on Scale 1.
3) Read wire size on Scale 2.

* *Based on an arbitrary minimum 500 circular mils per ampere. High-temperature class insulation will safely allow higher currents.*



NOTE: A voltage stabilized Power Supply controls the voltage across its output terminals. Hence, the wire conductors used to connect the load must be considered as part of the load. At high load currents, the voltage drop across the supply leads may appreciably degrade stablization at the load. Kepco models equipped with the *remote error sensing* feature can automatically compensate for voltage drops of up to 500 mV across each load supply lead.



TOTAL INTERCONNECT SYSTEMS CAPABILITY FOR BOTH COMMERCIAL AND MILITARY APPLICATIONS FROM *CABLE SYSTEMS, INC.*

Cable Systems, Inc. offers "one-stop" shopping for low-cost 100% computer-tested custom cable assemblies and interconnects. ***Cable Systems*** has the highest ratio of engineers to manufacturing personnel of any cable assembly manufacturer. Its quality control department is a clean professional environment with the most modern equipment and tools, operated under the regulations of MIL-I-45208A and MIL-Q-9858A.

Interconnection products from ***Cable Systems*** are used by so many manufacturers of commercial and military products because they provide significant advantages:

DEFENSE CONNECTION

Cable Systems, Inc.'s products meet all MIL applications, including aero, space, and surface (fixed or mobile), naval, and undersea. ***Cable Systems's*** customer base includes both domestic and overseas OEMs and end users.

- Molded cable assemblies using thermoplastic and thermoset materials
- Molding techniques including transfer, compression, and injection
- EMI/RFI/EMP protection — MIL-STD 462
- Flexible and semi-rigid coaxial cable assemblies with testing
- Blown-on neoprene jackets over make cable
- Shielding and braiding for make cable applications

COMMERCIAL CONNECTION

You'll find ***Cable Systems, Inc.'s*** interconnection products in computers, data processing and peripheral equipment, office and business machines, telecommunications, process control, factory automation, medical electronics, and many other applications.

- EIA RS232C, RS449, molded circular DIN
- UL file #E79426(M); CSA LR 50395-1
- FCC docket #20780
- Built-in strain relief
- Custom color matching and logos
- Total molded protection

So, when you need cable and interconnect assemblies, contact ***Cable Systems, Inc.*** — it's the only connection you'll ever need to make. For further information, write, call, or TWX ***Cable Systems*** as listed below.

Datatrans® PLTC

300V 105°C INSTRUMENTATION CABLE

With 75 years of experience in the manufacture of electrical wire and cable for the North American marketplace, Canada Wire has pioneered many cable constructions for both power and signal circuitry. From this background of experience Canada Wire is pleased to introduce Datatrans® PLTC—a new line of fully UL listed instrumentation cables, designed to satisfy requirements in the petroleum, chemical processing, mining and other primary and secondary industries.

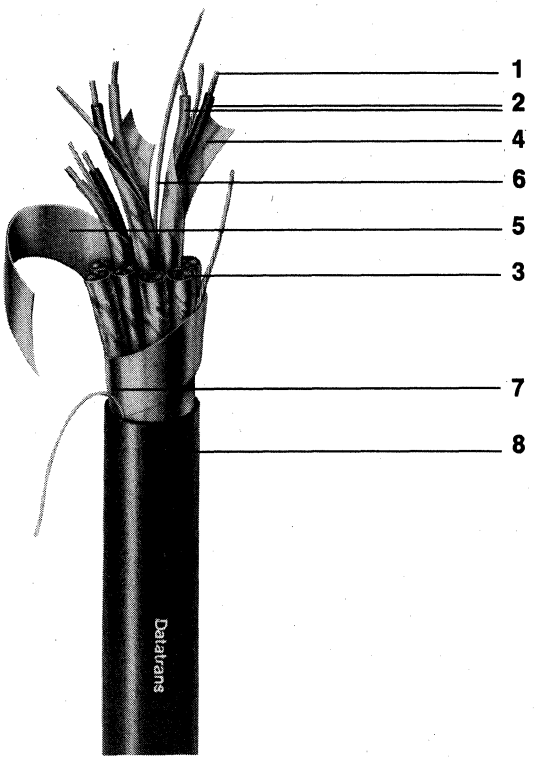
SPECIFICATIONS (UL)

UL listed to Subject 13 Appendix A and B (File E75731) and intended for use on:

- Class 2 and 3 Power Limited Ciicuits—NEC Article 725
- Class I, Div II Hazardous Locations—NEC Article 501

CONSTRUCTION

1. 22 to 12AWG 7W Copper Conductor
2. PVC Insulation—105°C
   Colour code:
   Pairs—Black, White and No. Code
   Triads—Black, White, Red and No. Code
3. **1 to 50 pairs or triads**
4. Individual aluminum/polyester shield with tinned copper drain wire (optional)
5. Overall aluminum/polyester shield with tinned copper drain wire
6. #22(7W) PVC insulation communication wire
7. Nylon Rip Cord
8. Overall PVC jacket +90°C −40°C Low Acid Gas (LAG) Low Flame Spread (LFS)



All cables are available unarmoured or with one of the following armour types to ensure peak performance in the harshest industrial environments.

1. interlocked aluminum armour
2. interlocked galvanized steel armour
3. Databon®—hermetically sealed aluminum tape
4. Impervious aluminum sheath

PRODUCT NUMBER SELECTION

How To Order Datatrans® PLTC

Datatrans® cables can be uniquely specified by product number. This designation gives meaningfull information regarding the construction and specification of the cable. The make-up of the product number is illustrated below.

Example: For 12 pr. 16 AWG 105°C 300V individually shielded, unarmoured cable.

Cable Type	PLTC	Pair/Triad Count	12	This Product No. is

Electronic Cables

"IN STEP WITH THE FUTURE"

Since its incorporation in 1911, Canada Wire has been an industry leader in providing state-of-the-art wire and cable products for the North American marketplace. With a strong engineering background, Canada Wire operates at the leading edge of technology, manufacturing quality products from its modern production facilities. As part of a family of high technology products Canada Wire is pleased to introduce a line of electronic cables, conforming to the needs of this rapidly growing industry. The introduction of Canada Wire DATASERIES™ electronic cables provides the electronics industry with the confidence and assurance that comes from dealing with North America's largest wire and cable manufacturer. Canada Wire stands committed to excellence in providing a timely, quality engineered product, conforming to individual customer requirements.

CONSTRUCTIONS

- Conductors — 26-16 AWG
- Insulation — PVC, SR-PVC, PE, PP, FPE
- Configuration — 1-100 Singles, Pairs, Triads
- Shielding — Alum/Polyester, Copper Braid
- Voltage Rating — 30-600 Volts
- Certifications — CSA/UL (as applicable)

Whether involved in an industrial project design or purchasing a computer interconnect, let the team of Canada Wire professionals assist you. When it "COMES DOWN TO THE WIRE" specify Canada Wire for all your electronic cable needs.

APPLICATIONS

Canada Wire DATASERIES™ Cables encompass a growing variety of applications.

- Computer/peripheral interconnects
- local area networks
- communication/intercom
- audio/video
- process monitoring and control
- instrumentation
- point of sale
- fire alarm and security
- satellite/TVRO cable
- hookup wire
- high temp
- coaxial cable

Consolidated electronic wire & cable

Computer Cable

"LOW-CAP" CABLE (A)

Stranded tinned copper conductors. Color coded foamed polypropylene aluminum foil shield and stranded tin copper drain, plus 65% coverage tin copper braid shield. Gray PVC outer jacket. **Temperature Range:** −20°C. to +80°C. Meets RS-422 requirements. Low distortion data handling. Low dielectric constant. **Applications:** computer; data; FCC Docket 20780 Class A and B.

"LOW-CAP" INSULATED OVERALL FOIL AND BRAID MULTI-PAIR CABLE

LOCAL AREA NETWORK TRUNK COAXIAL CABLES

Solid bare copper center conductor. Cellular polyethylene dielectric. Shield construction: Mylar aluminum foil shield, plus 92% tin copper braid (4880); Mylar aluminum foil shield plus 60% aluminum braid (4585). 4880 has yellow PVC outer jacket. 4585 has black PVC outer jacket. **Applications:** Local Area Networks (LAN): LAN trunk cable: computer; data; information handling.

INDIVIDUALLY SHIELDED PAIR CABLE (FIG. C)

Stranded, tinned copper conductors. Color-coded polypropylene insulation; color codes available on request. Conductors twisted into pairs. Each pair individually shielded with Mylar† polyester reinforced aluminum facing inward. Shields are electrically isolated from each other. Stranded, tinned copper drain wire, each pair. Gray PVC outer jacket. **Temperature Range:** −40°C to +105°C. **Applications:** Audio, data, broadcast sound, instrumentation.

COAXIAL COMPUTER CABLE (A)

Solid Copperweld™ (CW), stranded CW, or stranded copper conductors. Solid PE, foam PE, air foam "FEP" Teflon™. Overall bare copper braid shield. Non-contaminating black PVC or (4479) "FEP" Teflon outer jacket. **Temperature:** −20°C. to +80°C. Poly PVC. **Temperature:** −40°C. to +200°C. FEP Teflon. **Applications:** computer, data transmission. **Trademarks:** Teflon of DuPont and Copperweld of Copperweld Steel Co.

TWIN COAXIAL WANG STYLE WORD PROCESSING CABLE (B)

(4599) Solid bare CW conductors. Solid polyethylene insulation. Overall bare copper braid shield. Conductors laid parallel. Figure "eight" construction with black noncontaminating PVC jacket. **Temperature Range:** −20°C. to +80°C. **Applications:** computer; data; word processing cable.

(4799) Solid bare CW conductors. FEP Teflon™ insulation. Overall bare copper braid shield. Conductors laid parallel. Figure "eight" construction. FEP Teflon outer jacket. **Temperature Range:** −40°C. to +200°C. UL Listed-Subject 13. NEC Article 725-2(b). **Applications:** Computer; data; word processing cable.

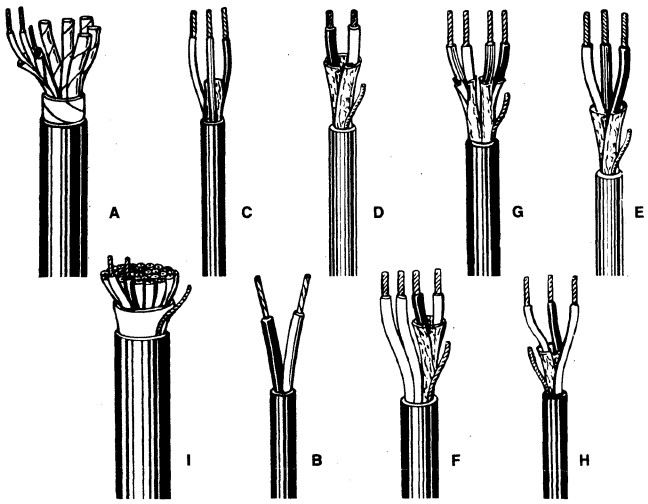
Consolidated
electronic wire & cable

Multiconductor Cables



PVC JACKETED 2-PAIR & 3-COND. CABLES

Stranded, tinned copper conductors. Color coded polyethylene (PE), polypropylene (polyp) or polyvinylchloride (PVC) insulation: color codes available upon request. Conductors shielded. Mylar† polyester reinforced aluminum foil shield overall. Tinned copper drain wire. Gray PVC jacket. **Temperature Range:** −20°C to +80°C (UL to +80°C). **Voltage Rating:** 300 V.

*Capacitance between conductors and shield. #Same as No. 5594, but with addition of an overall Mylar† polyester reinforced aluminum foil shield and 24 AWG stranded, tinned copper drain wire.

"LOW-CAP" INDIVIDUALLY SHIELDED PAIR COMPUTER CABLE (FIG. A)

(Meets EIA RS-422B Type Requirements)

Stranded, tinned copper conductors. Color-coded "Low-Cap" foamed polypropylene insulation. Conductors are cabled. Each pair shielded with Mylar† polyester reinforced aluminum foil and contains stranded, tinned copper drain wire. Overall Mylar† polyester reinforced aluminum foil shield with stranded, tinned copper drain wire. Black PVC jacket. **Temperature Range:** −20°C to +80°C. UL Listed, Style 2493. **Voltage Range:** 300 V.

UL SUBJECT 13 POWER LIMITED CIRCUIT CABLE

Stranded, tinned copper conductors. Color-coded PVC insulation; color codes available upon request. Overall Mylar† polyester reinforced aluminum foil shield. Stranded, tinner copper drain wire (shielded versions). Gray PVC jacket. **Temperature Range:** −30°C to +105°C. (UL Subject 13 to −105°C). **Voltage Rating:** 300 V. Article 725 NEC. Applicance Wiring Material Style 2464. Certified CSA-IR-64, UL 70,000 BTU Flame and Tray Cable Teat. UL listed as tray and cable. Class 2 and 3 circuits.

Consolidated electronic wire & cable

Tubing and Sleeving

CIT-221 AND CIT-221V SERIES HEAT SHRINKABLE FLEXIBLE CROSS-LINKED POLYOLEFIN TUBING

Thermally stable Class B (130°C) material. Excellent flame retardant properties. CIT-221 Series meets MIL-I-23053C 5. CLasses and II, UL VW-1. Available in standard colors: Black, white or clear: clear tubing available only in Class II. CIT-221V Series materials meet the requirements of UL Standard 224, issue of February 21, 1979 and CSA Electrical Bulletin No. 985 Ptd. January 9, 1975. Available in black or white. CIT-221V Series are surface printed.

CIT-105 SERIES HEAT SHRINKABLE FLEXIBLE PVC TUBING

Outstanding dieletric and mechanical properties. Oil and chemical resistant. Non-irradiated material. **Temperature Range:** −12°C to +105°C. Meets ASTM D 922, Grades C and CFR; MIL-I-631D. Grade C and MIL-I-23053C/MIL-I-23053/2. Class 2. **Longitudinal Change:** −25% maximum. Secant Modulus at 2% strain: 25,000 psi maximum. Heat Shock (4 hrs. at 180°C): no cracking, flowing or dripping. No cracking when bent 360° around a mandrel. **Tensile Strength:** 2,000 psi minimum. Ultimate Elongation: 200% minimum. **Standard colors:** black, white and clear. Special colors and dimensions are available, subject to minimum runs.

CFT-200 SERIES EXTRUDED TFE TEFLON™ TUBING

High performance electrical insulation grade. Available in thin wall (CFT-200) or standard wall (CFT-250). Temperature range: −70°C to +260°C. CFT-200 meets AMS 3655, ASTMD3295, UL Listed, 300 Volts, VW-1 rated. CFT-250 meets MIL-I-22129C, AMS-3653, SPIFD103 and ASTMD3295, UL Listed, 600 Volts, VW-1 rated. **Standard color:** natural. Additional colors available subject to minimum runs.

CVC-105 SERIES GENERAL PURPOSE PLASTIC TUBING (105°C)

Tough, flexible vinyl tubing is made with non-migrating plasticizers. Rated for a continuous operating temperature of 105°C. High degree of mechanical strength. Exceptional long-term resistance to deformation from cold flow. **Rated:** 300 volts. Meets MIL-I-631D, Type F, Form U, subforms Ua and Ub, Grade C, Class 1, Category 1, ASTM D922. **Standard colors:** clear and black.

eem MINIGLOSSARY CONNECTORS

Connector terminology is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

Shape—Circular, cylindrical, and rectangular.

Electrical application—High voltage, RF, microwave, input/output, etc.

Mechanical application—Printed circuit, rack & panel, cable, etc.

Conductor type—Coaxial, flat cable, ribbon cable, flex circuit, etc.

Termination method—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

Contact: The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination.* This is the point where the wires or PC board is attached to the connector.

Contact alignments: Often called *contact float.* Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

Male vs. female: In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

Closed entry: A female contact which prevents entry of a male contact larger than a specific size.

Open entry: A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

Hermaphrodite: Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

Hermetic seal: Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

Waterproof seal: May or may not be truly *waterproof.* May prevent easy entrance of casual water by means of a rubber or other boot.

Printed circuit connector: Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

Edgeboard. May be called *edge* or *card.* The printed circuit (PC) board edge enters the connector.

Two-piece: One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

Readout: Describes the arrangement at the terminating edge of a PC board. May be single or double. A double readout PC board has termination strips on each side not usually interconnected.

Ribbon connectors: A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

Ribbon contact connector: Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

Solderless terminal: Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement.*

Crimp termination: A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

Insulation displacement: Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

Service rating: The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage.* Can be confused with the term used to describe how many times a connector may be mated and separated.

Withstanding voltage: Also called *test voltage.* The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

MODULAR CORDS PLUGS & JACKS

Below are shown only a sampling of the many modular cords, plugs and jacks available from CORD. Custom molded plugs and jacks assure a high quality and uniform product.

All modular telephone items are manufactured to FCC requirements under the license of Western Electric. If a standard cord assembly does not suit your application, CORD will welcome the opportunity to develop cord assemblies to your specifications.

Catalogs are available on the product lines shown here. Call or write CORD today.

Cord offers a complete line of Modular Jack Connectors for 2, 4, 6 and 8 wire connections.

DABURN

SHRINKABLE IRRADIATED POLYOLEFIN TUBING 2:1, 4:1, SHRINK/MELT

This series is designed for maximum mechanical strength at stress or points of connection. It is strong, abrasion resistant and is supplied in expanded sizes. It insulates, jackets, splices, encapsulates, weatherproofs components, connectors, cables and irregular shaped objects. When exposed to heat 250°F the tubing shrinks 50% in diameter, 5% longitudinal contraction. Controlled shrinkage to exact requirement takes place. SH275 meets or exceeds UL STD 224, MIL-I-23053B/5 Class 1 (colors) and 2 (clear), and MIL-R-468464 (MI), TY 5, CL 1. SH290 meets or exceeds MIL-I-23053/6. SH275 is available with UL approval. AMS 3636B (colors), 3637A (clear). Flame retardant (except clear).

SPECIFICATIONS —

All Tests Made on Tubing in Recovered Dimension

Continuous Operating Temp: 135°C	Shrinkage Ratio: 2:1 (50%)
Longitudinal Change: 5% Max.	Dielectric Strength: 500 V/MIL Min.
Tensile Strength: 1500 PSI Min.	Dielectric Constant: 2.87 Max.
Ultimate Elongation: 200% Min.	Corrosive Resistance: Non-Corrosive
Special Gravity: 1.29 Max.	Resistance to Soldering Iron: Excellent
Low Temp. Flexibility (−54°C): No Cracking	Fuel, Oil, Solvent, Acid, Alkali, Hydraulic Fluid Resistance: Excellent

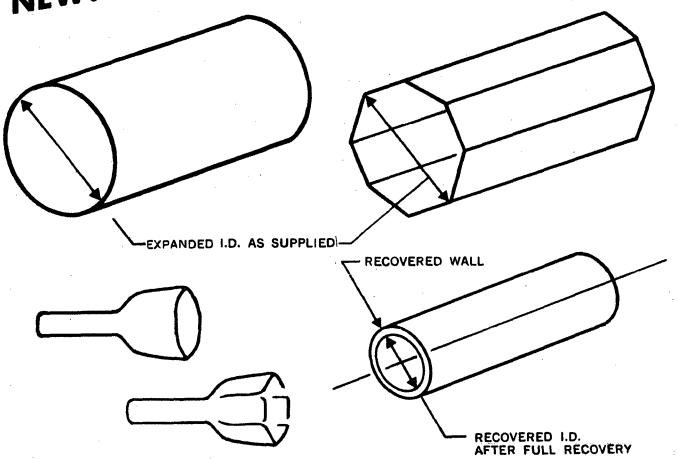
STOCK COLORS: Black, White, Red, Clear. Additional colors available. Although processed by hi-energy radiation the **Daflex SH275** and **SH290** shrinkable tubings **do not** at any time become radioactive or possess any residual radioactivity.

* Wall thickness will be less if recovery is restricted.
** 4' lengths, long length package available.
† STOCK: Black 4' lengths. Colors avail.
†† Also stocked: 4', ½", and 1" lengths.
*† **STOCK COLORS:** Black, Clear. Additional Colors to order.
NOTE: Extra flexible, & industrial grade shrinkable polyolefin is available to order.

NEW! 4:1 SHRINKABLE POLYOLEFIN TUBING



DAFLEX SH277 shrinkable irradiated polyolefin tubing recovers to 25% of its supplied size when full recovery is permitted. Material will shrink with the application of 120°C (250°F); is rated for continuous operation from −55°C to 135°C and will withstand up to 300°C (572°F) for short durations. 500V/MIL. Minimum dielectric strength.

SH277 is flame retardant and meets or exceeds the specified properties of MIL-I-23053/5 Class 1 and 3. Its longitudinal shrinkage is a maximum of 10%. **DAFLEX SH277** can be hot stamped.

Typical applications are where tubing must fit over a large object such as the repair or replacement of cable jacketing, with a connector in place.

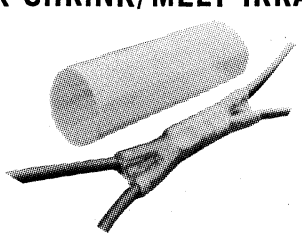
NEW! DAFLEX SHRINK/MELT IRRADIATED POLYOLEFIN TUBING LARGE SHRINK RATIO



Daburn's dual wall polyolefin heat shrinkable tubing is designed to provide a tight moisture proof encapsulating seal. It is suitable as end cap, strain relief, whip cord for ropes and may be used as a selective potting and/or molding compound over wires and cables. When 125°C is applied, the inner wall melts and flows, as the outer wall shrinks; forcing the melting wall to fill voids and interstices and to encapsulate what is covered. The result is a semi-rigid mass.

Daflex SM270 series is ideal for covering splices, cable junctions and as a shield for coarse surfaces. SM270 is flame retardant. It resists oil, hydraulic fluids, acids and alkalis.

It meets or exceeds MIL-I-23053/4, AMS3634, is UL approved VW-1 for 105°C.

STANDARD COLOR: Black. Clear (not flame retardant) available to order.

STANDARD LENGTH: 100', 1000', in 4' lengths, additional lengths to order.

DABURN

MIL-W-16878 INSTRUMENTATION—SHIELDED • UNSHIELDED • TEFLON • VW-1 • KAPTON WIRE

DESCRIPTION: One or more conductors, each conductor silver plated concentrically stranded copper wire. Type E, MIL-W-16878E/4 extruded TFE .010″ insulation. When shielded, braided silver plated copper shield over conductor(s), 90% shield coverage. When covered, either a TEFLON* impregnated fiberglass braid or a .010″ TEFLON* fused, double tape jacket overall. Fungus, solvent, moisture, flame, acid, alkali and oil resistant. Multiconductors are twisted.

TEMP. RATING: −65°C to +200°C. FOR 250°C USE N.P. CONDUCTOR.

VOLT. RATING: 600V. VW-1

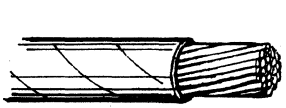
H FILM KAPTON* WIRE — DALITE™
HIGH TEMPERATURE HOOK-UP AND AIRFRAME WIRE
200°C CONTINUOUS TEMPERATURE RATING (a)



INSULATED WITH DUPONT KAPTON* POLYIMIDE FILM WITH TEFLON* — FEP HEAT SEALED COATING CONFORMS TO MIL-W-60904 & MIL-W-81381.

CHARACTERISTICS: Dalite™ insulated wire provides high temperature stability, low temperature flexibility, high radiation resistance, resistance to cold flow, impervious to most chemicals, high dielectric strength, low dielectric constant, smaller diameters and lighter weight than any other comparable wire used for continuous operation up to 200°C. This hook-up wire meets the test requirements of MIL-W-16878 for 300 V, 600 V and 1000 V with **smaller wall thicknesses, weight and dimensions.**

(a) Temperature based on lowest temperature rating of materials in the insulation — FEP 200°C. Will pass 96 hour heat age tests at 250°C per MIL-W-16878.

DESCRIPTION: Single conductor, silver plated annealed copper conductors, Type H* Polyimide film with Teflon* FEP coating tape wrapped.

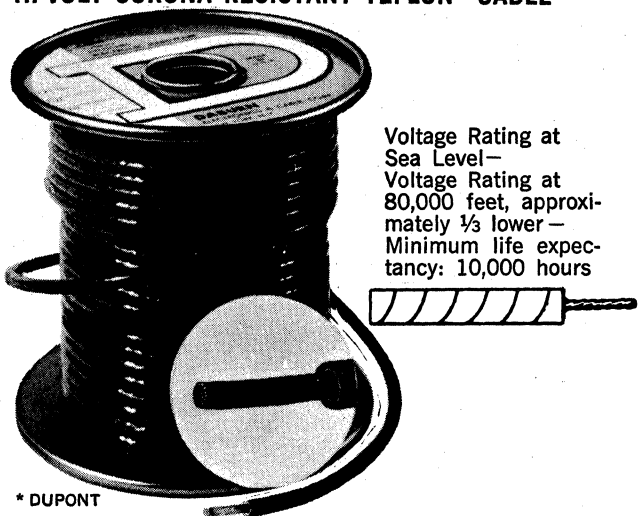
DABURN

HI-VOLTAGE CABLE

HI-VOLT CORONA RESISTANT TEFLON* CABLE©



Voltage Rating at Sea Level—
Voltage Rating at 80,000 feet, approximately ⅓ lower—
Minimum life expectancy: 10,000 hours

* DUPONT

SMALL SIZE: You do not need bulky, thick, insulation jacketing as used with silicone rubber and polyethylene insulations to get your hi-voltage requirements. Wire used is MIL-SPEC QQ-W-343 and MIL-W-16878. Insulation used conforms to and surpasses MIL-SPEC-W-16878.

AVOID CORONA PROBLEMS: Corona Resistant Teflon construction is specifically designed to retard and prevent corona penetration.

Temperature variations from −60°C to +250°C have no life effect on the corona resistant Teflon. In addition, there is no stress or crack failure under severe, adverse conditions including mechanical strain, moisture, corona or chemical conditions.

DESCRIPTION: Single Conductor, Stranded Silver Plated Copper, Corona Resistant Teflon* Insulation.

TEMPERATURE RATING: −90°C to +250°C.

VOLTAGE RATING: Based on insulation thickness.

AVAILABLE COLORS: White, Black, Red, Green, Yellow, Lt. Blue, Brown, Orange, Gray, Violet. (Also available in tracer colors)

PUT-UP: 250′, 500′, 1000′.

HI-VOLTAGE CABLE

One conductor, stranded copper tinned, flame retardant polyethylene insulation, braided tinned copper overall when shielded. Used as hi-voltage leads in electronic equipment to minimize RF radiation in equipment. UL style 1067, 1068, 1069 available.

DESCRIPTION: One conductor; stranded copper tinned; flame retarding polyethylene insulation. Available white/red tracer. Temp. Rating: 90°C.

Shielded: Same as above with tinned copper braided shield overall. Special construction available to order.

RIBBON CABLE — HI-TEMP — CONTROLLED IMPEDANCE — BONDED MIL-W-16878 UL • 20424 UL • 2651 UL 2555 VW-1

TEFLON HIGH TEMPERATURE FLAT RIBBON CABLE

UL STYLE 20424 • 200°C • 300 VOLTS • VW-1

Each conductor is 28 AWG, 7 strand of 36 AWG silver plated copper with flexible FEP insulation overall. Conductors are spaced on .050″ ±.002″ centers, allowing for mass termination with conventional insulation displacement connectors.

The insulation strips and slits easily using conventional equipment available today. It resists corrosion and adhesion and offers the positive properties of Teflon in an IDC configuration.

Daburn FEP ribbon cable reduces crosstalk, compared to PVC constructions. It provides high-fidelity and dense signal transmission with low dielectric constant. Its low coefficient of friction and excellent abrasion resistance provide a unique non-adhesive and self lubricating surface quality which is ideal for robotic or printer head applications.

Cables are listed under UL STYLE 20424, VW-1.

NEW! CONTROLLED IMPEDANCE FLAT RIBBON CABLE

UL STYLE 2651 — 105°C — 300 VOLTS — VW-1

DESCRIPTION: Each conductor is 28 AWG, 7 strand of 36 AWG T.C. with .010″ nominal wall of extruded PVC insulation overall. Conductors are to provide .050″ ±.002″, center to center conductor spacing allowing for nominal impedance of 105 Ohms (measured ground-signal-ground). Cables are listed under UL style 2651 and meet UL VW-1 flame test. Conductors separate cleanly and one has a red stripe for polarity. Because of controlled center to center spacing, cables may be mass terminated with insulation displacement connectors designed for .050″ spacing of conductors. Crosstalk is also controllable.

AWG: 28 (7/36) T.C.

FLAT RIBBON CABLE • TYPES B & C PER MIL-W-16878D • VW-1

DESCRIPTION: Each conductor is stranded T.C. with extruded PVC insulation, bonded together to form a flat ribbon cable. Conductors separate easily for clean terminations with standard wire connectors, jacks and pins. Ribbon cable saves space and time on circuit interconnecting assemblies, wiring harnesses, sliding drawers and drop assemblies and simplifies identification. Resists acid, alkalis, flame, moisture, oil, solvents and fungus.
TEMPERATURE RATING: −55°C to +105°C. Insulation meets or exceeds UL VW-1 vertical flame test.

Per MIL-W-16878 — TYPE B — 600 V — (UL) 2713 (150 V 80°C)

MULTI-CONDUCTOR PLASTIC JACKETED FLEXIBLE UNSHIELDED AUDIO CABLE (UL) VW-1
(UL) 2576, 2905

Each conductor is #22 AWG 7/30 tinned copper with .010″ wall of color coded plastic insulation. Conductors are twisted and covered by a gray vinyl jacket overall. Suitable for signal, P.A. systems, computers — for indoor and outdoor use.

OPERATING VOLTAGE: 200V. UL Style 2576-150V, Style 2905 — No rating.
OPERATING TEMPERATURE:
−20°C to +80°C

NOTE: #1922 is designed for IBM System 34-5250 (Cable #736221), #1923 is designed for Wang System (Cable #420-0057).

PLASTIC JACKETED TINNED COPPER BRAID SHIELD CABLE

(UL) STYLE 2095, 1108 VW-1

The braided tinned copper construction allows ease of pigtailing and provides additional strength for the cable.
Each conductor is stranded tinned copper with PVC insulation, color coded, twisted, braided tinned copper shield and an overall gray vinyl jacket, .020″. Suitable for outdoor installation.
Operating Temperature: −20°C to +80°C
VOLTAGE RATING: 450V (300V U/L).

* 1 conductor — UL 1108.
NOTE: Plenum constructions similar to the above are available to order.

MULTI CONDUCTOR SHIELDED AUDIO CABLE SPIRAL WRAP SHIELD —

(UL) STYLE 1108 AND 2095 VW-1

Each conductor is tinned copper with plastic insulation. Conductors are color coded and twisted then wrapped with spiral tinned copper shielding. Jacket is gray polyvinylchloride.
The spiral shield provides almost 100% shield coverage and simplifies pigtailing and grounding.
OPERATING TEMPERATURE: −20°C to +80°C
OPERATING VOLTAGE: UL-300V. Others-450V.

DABURN

MICROPHONE • CONTROL CABLE • BRAID & POLYESTER FOIL • SHIELD • SOLID & STRANDED SHIELDED PAIRS • (UL) VW-1

NEW HEAVY DUTY MICROPHONE CABLE

Studio type heavy duty plastic, shielded microphone cable. The hi-gloss, abrasion resistant jacket will withstand rough usage.
DESCRIPTION: 2 conductor #18 AWG stranded tinned copper, fillers where necessary. Braided tinned copper shield and black jacket overall.
OPERATING TEMPERATURE: −20°C to +80°C

DABURN No.	Conds.	Size	Strand	Nom. Cap.	Nom. O.D.
2779	2	18	41/34	45 MMF*	.293″

STD. PUT-UP: 500′, 1000′. Red jacket to order
COLOR CODE: 1-White, 2-Black.
* Between one conductor and remaining conductor connected to shield.

MULTI-CONDUCTOR MICROPHONE AND CONTROL CABLE — PLASTIC

Each conductor tinned copper, polyethylene insulation — color coded. Multi-conductors cabled with fillers, textile wrapped, tinned copper braided shield, gray polyvinyl jacket overall.
OPERATING TEMPERATURE: −20°C to +80°C, 600 Volts.

COLOR CODE: 1-Red, 2-Black, 3-Green, 4-White.

SHIELDED MICROPHONE CABLE ONE CONDUCTOR

Will withstand abuse and is resistant to oil, moisture, aging. Have low capacitance, Hi insulation resistance and low attenuation. Will not strain or mark. Uses tinned copper for ease in soldering — extremely flexible-plastic.

2772 — For hi impedance microphone.
2773 — For crystal, ribbon, etc. mikes. All are suitable for hi-fi interconnecting cables.
2774 — For hi impedance lapel mikes.
OPERATING TEMPERATURE: −20°C to +60°C

* 3 strand tinned copper, 4 strand tinned copperweld.

SHIELDED ULTRA LOW CAPACITY MICROPHONE CABLE — BRAIDED SHIELD

Plastic Jacket — Cellular Foam Polyethylene Insulation
DESCRIPTION: Constructed with white foam polyethylene insulation, braided tinned copper shield, chrome gray vinyl jacket. The low loss foam polyethylene construction has lower capacitance and attenuation than standard polyethylene mike cables — as much as 50%. This increases the effective length of cable as much as 50% without signal loss.
OPERATING TEMPERATURE: −20°C to +60°C

CONDUCTOR COLOR CODE: 1-White, 2-Black.
* 3 strands tinned copper, 4 strands tinned copperweld.

FOIL SHIELD PLASTIC JACKETED CABLE (UL) ‡ 2092, 2093, 2094

Extremely light in weight, provides 100% shield coverage-small diameters. Each conductor is stranded tinned copper — color coded with polyethylene insulation, twisted with an overall aluminum polyester foil shield. Drainwire provides quick and easy grounding.
OPERATING TEMPERATURE: −20°C to +80°C (UL +60°C).
OPERATING VOLTAGE: 400 (300 for U/L). Passes VW-1.
‡ 2 cond.-UL style 2092, 3 cond.-UL style 2093, 4 cond.-UL style 2094.

STD. PUT-UP: 500′, 1000′. * Not UL Listed
CONDUCTOR COLOR CODE: 1-Black, 2-Red, 3-White, 4-Green.
NOTE: Plenum constructions similar to the above are available to order.

AUDIO AND DATA SHIELDED PAIRS — STRANDED CONDUCTOR

(UL) Style 2493 — Individually Polyester Foil Shielded Pairs
Each conductor is #22 AWG stranded tinned copper, insulated with color coded, high density polyethylene-twisted pairs. Each pair is shielded with a laminate of aluminum polyester foil and stranded tinned copper drain wire. Pairs are jacketed with a chrome gray PVC jacket. Passes VW-1.
NOM. CAP. BETWEEN CONDUCTORS OF A PAIR: 25 Pf/Ft. **CAPACITANCE OF A SINGLE CONDUCTOR TO A SHIELD:** 45 Pf/Ft. #2933/2 35 Pf/Ft between conductors.
OPERATING TEMPERATURE: −40°C to +60°C
OPERATING VOLTAGE: 300V. **NOTE:** UL—No specified voltage.

DABURN MINIATURE RETRACTILE COMMUNICATION CORDS — (UL) SHIELDED — UNSHIELDED 300V .5 AMP

1, 2 Foot Retracted — 5, 10 Foot Extended

Miniature. Suitable for compact equipment. Cords are #28 AWG. 19/40 soft tinned copper, color coded, where shielded, aluminum polyester foil shield, overall black plastic jacket. 1 Ft. retracted — 12″ tangents; 2 Ft. retracted — 6″ tangents.

OPERATING TEMPERATURE: −20°C to +60°C

Color Code: 1-Black, 2-White, 3-Red, 4-Green, 5-Orange, 6-Blue, 7-Yellow, 8-Brown.

STANDARD PACKAGE: 10.
* Not UL construction.

The above cords are also available in 3 Ft. and 4 Ft. retracted, which extend to 15 and 20 feet respectively.

Additional cords available in tough TPE (Thermo Plastic Elastomer) with many of the properties of rubber and superior retractability.

DABURN

MODULAR PLUG CABLES STRAIGHT AND RETRACTABLE CABLES

Each Daburn modular cord is 28 AWG 7/36 soft tinned copper, color coded with an overall PVC jacket and modular plugs at each end. Shielded constructions use an overall aluminum/polyester shield and drain wire.

Daburn modular cords are suitable for data equipment, interface, keyboards, audio, telephone handsets, security and alarm applications.

They resist oils, grease, acids, fumes and are abrasion resistant. They will not mar surfaces with which they come in contact.

Note: "Half-Modular" cords — lugs on one end, keyed plugs and UL approved styles are available to order.

DAFLEX ULTRA FLEXIBLE SUB-MINIATURE WIRE U/L STYLE 1568, 1605

Daflex ultra flexible sub-miniature hook-up wire is designed for continuous flexing applications, such as data processing, mercury thermostats, magnetic memory drums and rotation servo platforms. It offers superior limpness and flexing characteristics.

DESCRIPTION: Stranded soft bare copper conductor, insulated with a special formulation of flexible PVC to minimize kinking and fatigue.
OPERATING TEMPERATURE: −40°C to +80°C

COMPUTER CABLE MULTIPAIR FOIL SHIELD TO UL STYLE 2464

DESCRIPTION: Each conductor is #24 AWG 7/32 tinned copper, color coded, .009" wall of semi-rigid PVC (UL Style 1061, CSA Type S-R PVC). Conductors are twisted in pairs. Overall aluminum/polyester foil shield and 7 strand tinned copper drain wire. Gray PVC jacket. To UL style 2464.

Construction is suitable for computer, communication and control applications.

Cable resists acids, alkalis, oil, solvents, moisture and fungus.

TEMPERATURE RANGE: −20°C to +80°C
VOLTAGE RATING: 300V
FLAMMABILITY: Passes UL VW-1

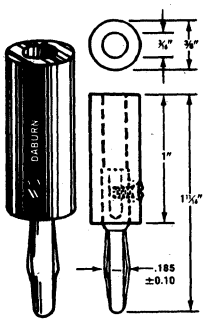
PLUGS & JACKS

INSULATED BANANA PLUG
SOLDERLESS

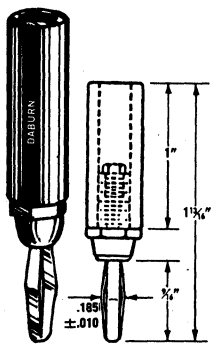


Mates with any standard banana jack. Side set screw secures wire without soldering. Plug is brass, nickle plated. Plastic handle.

COLORS: Red, Black, Yellow, Green, Blue (specify)

Spring	
DABURN No.	**Std. Pkg.**
19-46 Phosphor Bronze N.P.	50
19-46A Beryilium Copper N.P.	50

INSULATED BANANA PLUG
SOLDERLESS

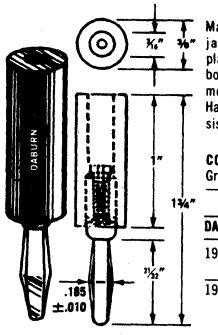


Mates with any standard banana jack. Plug is Hex Brass, nickle plated. Wire may be soldered to body or passed thru hex brass stud, flared and secured by screwing into body. Shock resistant plastic handle.

COLORS: Red, Black, Yellow, Green, Blue (specify)

Spring	
DABURN No.	**Std. Pkg.**
19-04 Phosphor Bronze N.P.	50
19-04B Beryilium Copper S.P.	50

INSULATED BANANA PLUG
SOLDERLESS

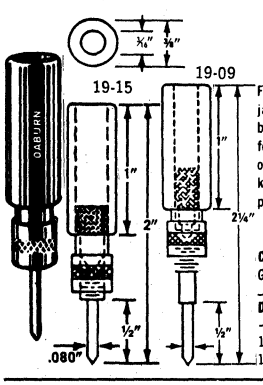


Mates with any standard banana jack. Plug is brass, nickel plated. Wire may be soldered to body or secured by solderless means, as with our #19-04. Handle is flush fitting, shock resistant. Plastic.

COLORS: Red, Black, Yellow, Green, Blue, (specify)

Spring	
DABURN No.	**Std. Pkg.**
19-65 Phosphur Bronze N.P.	50
19-65B Beryllium Copper S.P.	50

MIL-C-28901/5 INSULATED PHONE TIP
SOLDERLESS JUNIOR & SENIOR

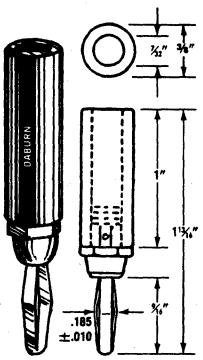


Fits any standard phone tip jack. Brass, nickle plated body. Solderless connection for wire which fits thru body of tip and secured under knurled nut. Shock resistant plastic handle.

COLORS: Red, Black, Yellow, Green, Blue. (specify)

DABURN No.		Std. Pkg.
19-15	Junior	50
19-09	Senior	50

INSULATED BANANA PLUG
SOLDERLESS

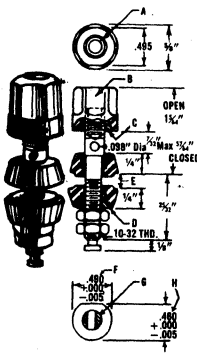


Mates with any standard banana jack. Wire may be soldered or passed through side hole and dressed around brass, nickle plated body to be secured by flush fitting shock resistant plastic handle.

COLORS: Red, Black, Yellow, Green, Blue (specify)

Spring	
DABURN No.	**Std. Pkg.**
19-63 Phosphur Bronze N.P.	50

BINDING POSTS - MULTI-PURPOSE
Wrap Around

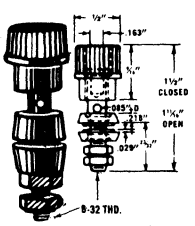


Molded nylon body. Accepts tip plug, spade lug. banana plug, wire alligator clip and direct solder connection. Has molded-in brass inserts in head and washer. Rated at 30 amps. AC Capacitance 5. OMMFD. Banana plug recepticle .161" I.D. head non-removable from stud and washer completely insulates post from panel. For panels 1/16" to ¼" thick; drill ½" hole for mounting washers. Wire hole is at right angle to flat on insulated washer.

COLORS: Red, Black (specify)

DABURN No.		Std. Pkg.
18-72	Fluted Head Post	100
18-75	Hex-head Post	100

STANDARD DUTY BINDING POST

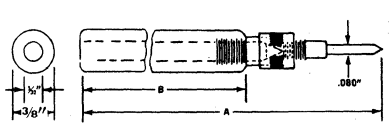


Molded nylon captive head. Brass, nickle plated stud and nuts. Rated at 15 amps. AC, capacitance 3.0 PF. Mounts in ¼" round hole in panels up to ⅛" thick.

COLORS: Red, Black (specify)

DABURN No.		Std. Pkg.
18-78	All insulated type	100
18-79	Grounded type	100

SOLDERLESS TEST PROD



Body is brass, nickle plated with molded plastic handle. Solderless connection for wire fits thru handle and plug body and wraps under knurled nut.

COLORS: Red, Black (specify)

LACING CORD-TAPE TO MEET MIL-T-713C TYPE P* AND MIL-T-43435 COMP. P-TYPE S NYLON FLAT BRAIDED LACING TAPE

TYPE I FIN. B

Addtl. fin. to order.

Nylon fiber flat braided impregnated with MW microcrystaline fungicidal wax. Stays flat. Designed to create a wider contact to distribute the stress. Flexible. Won't slip when knotted. Resistant to fungus, flame, abrasion, acids, MIL-T-43435 (new) supersedes MIL-T-713 (old).

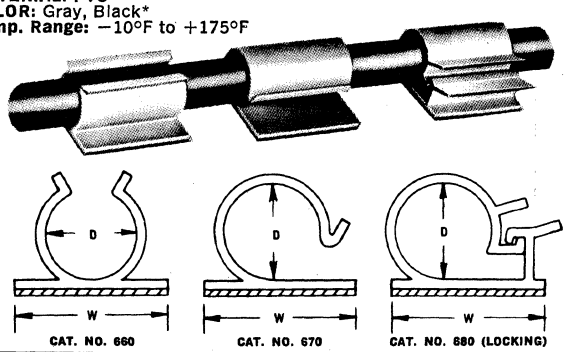
DABURN STIK KLIPS™ — SELF ADHESIVE

MATERIAL: PVC
COLOR: Gray, Black*
Temp. Range: −10°F to +175°F



For fast secure mounting on smooth surfaces. No need to screw, nail or staple in place. Fastens in a flash — just peel off the protective backing and press in place on a clean, dry, smooth surface. For best results allow a few seconds for adhesive to set before applying load.

These plastic clips are insulating, strong and elastic. They have many uses, such as keeping telephone wires off the floor, holding wire, cable, tubing rods, etc. in position.

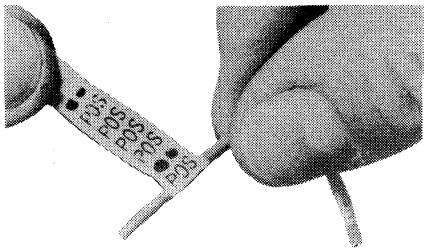
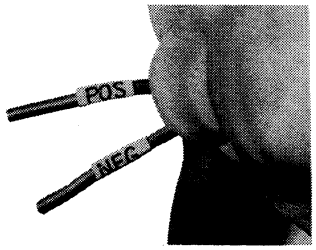
DATAK FLEXY•MARKER™ cabelabel™

RUGGED, CONFORMABLE MARKERS FOR ALL WIRE SIZES

ADJUSTS FOR ALL WIRE SIZES





CLEAR PERMANENT MARKINGS

WITH ONE FLEXY-MARKER, YOU CAN:
- **MARK** with a full wrap around #0 solid wire, **OR**
- **MARK** a terminal strip and any two wires from #24 to #14, **OR**
- **MARK** just one wire and replace the rest of the marker on its card for later use.

Flexy-Marker is a radically new style of wire marker. Ultra-thin and flexible, it will neatly wrap around and mark wires as small as #24. Yet, the same marker will make a full wrap around wires as large as .350" diameter. The secret is in the mechanical design. Each marker has four sections divided by perforations that are graduated in strength. The smallest section, with one legend, is held by the weakest perforation and will mark a terminal. The second section, with two legends, is held by a stronger perforation and will mark a thin wire (#24 to #14). The third section, with four legends, is held by the strongest perforation and will mark wires from #24 to #5. The fourth section is the applicator tab and has no adhesive. You can apply only part of the marker, pull off the rest, and save it for later use.

THE FLEXY-MARKER PACKAGE

Flexy-Marker wire markers are supplied in packs of 24 sheets bound into a handy pocket-sized pad. You receive 1056 two-figure markers, 768 three-figure markers, or 624 four-figure markers.

MARKER ASSORTMENT PACKS

Datak No. FBUS Electrical Assortment—Contains 32 each of POS, NEG, GND, HOT, PH1, PH2, PH3; 44 each of L1, L2, L3, L4, NEUT, T1, T2, T3, AC, DC; 26 each of XTRA; and 8 sets of A through Z, 854 total. Net Each.....**$7.65**

Datak No. F1S104 Number Assortment—Contains 24 sets of consecutive numbers 1-22 and 6 sets of consecutive numbers 23-104. 1014 total consecutive numbers. Net Each.....**$7.65**

OTHER CONSECUTIVE NUMBER PACKS

The following consecutive number packs are available. Two-digit packs have 1056 markers. Three-digit packs have 768 markers.

WRITE-ON FLEXY MARKERS

Supplied in sets of 6 identical 8½" × 9¾" sheets suitable for typewriter or platen-feed printers. Markers are spaced in 1/6" multiples for easy typing. Will also accept pen or pencil. A treated area absorbs ink slowly so that corrections may be made if done at once. The write-on portion is protected by a clear vinyl overwrap when marker is wrapped around a wire.

Datak No.	Dimensions, Ins. W	L1	L2	Max. Wire Diam.	Markers per Set

FLEXY-MARKER SPECIFICATIONS

Dimensions: 0.25" nominal w. × 1.125" lg.
Base Film: 0.003" ultra-soft vinyl plastisol.
Adhesive: Modified acrylic.
Temperature Range: For Class A or B insulations. −55° C to 130° C. May be used to 150° C, but yellowing will occur when at this temperature for long periods.
Resistance to Petroleum Products: Unaffected by immersion in most lubricating and hydraulic oils.
Max. Wire Diam. for Full Wrap: 0.350". Marker holds securely without full wrap on Kynar, Vinyl, Nylon, Fiberglas, asbestos, cotton, Polyethylene, Polypropylene, and silicone rubber. Use a full wrap on other rubber insulations and on Teflon. Note: Your conditions may vary from the test conditions. Test this product under your conditions to determine its suitability.

CABELABEL™ WRITE-ON MARKERS FOR RIBBON CABLE

Ultra flexible write-on labels use same plastic as flexy-markers. They adhere securely to the ribbed surface of vinyl ribbon cable without wrapping around the back side. A clear vinyl overlay seals over and all around write-on portion for full protection from abrasion and oil. Labels handle repeated sharp bends without separating from cable.

Datak No.	Label Length	Dims. Depth	Labels per Set
FCL-1	1.8"	0.25"	108
FCL-2	1.8"	0.50"	72

Ribbon Cables

Our round conductor ribbon cables are available in almost any configuration you can imagine: singles, pairs, coaxial leads, high voltage lines, optics, tubing for liquids—or any combination of these. Available in a variety of high performance insulation materials, these cables offer:

- Design flexibility to meet your specific needs
- Added strength through load sharing
- Weight and space savings
- Wide temperature range (—65°C to +260°C) and virtual immunity to solvents and other chemicals
- Ease of termination

Ribbon Cables for IDCs

High performance ribbon cables reduce installation costs by making it possible to use insulation displacement connector (IDC) systems in many critical applications —from high-speed printers to avionics. The PTFE and GORE-TEX® expanded PTFE insulation of our IDC ribbon cables contribute to their:

- Continuous flex life of up to 100,000,000 cycles at ¾" radius
- Virtual immunity to lubricants, solvents, oils, acids, and other chemicals
- Wide operating temperature range: —65°C to +260°C
- Extremely low dielectric constant
- Low capacitance and crosstalk (they can often be used instead of twist & flat wires)
- Faster signal speeds

Various shielding options are also available.

Assemblies

The cable-connector interface is critical to the performance of your system. We can supply complete, zero-defect cable assemblies for those applications which require the highest possible levels of performance and reliability.

Our extensive experience in the engineering, assembly, inspection, calibration and testing of cable assemblies is matched by our continuing commitment to the advancement of this technology. Gore engineers and product specialists work closely with major connector manufacturers in developing high-performance, cost-effective methods of cable termination.

Each assembly is inspected and documentation of test results can be supplied for each and every unit, if required.

An assembly, utilizing any of the cables shown in this brochure, can be engineered and manufactured by Gore to help you maximize the physical and electrical performance of your system.

Flat Conductor Flat Cables

Thin-profile flat conductor flat cables insulated with self-extinguishing polyester provide a low-cost, high-density, and abrasion-resistant way to interconnect assemblies. We can meet your specific requirements with one of our many configurations of signal lines, power lines, or combinations of the two. The excellent heat-dissipation characteristics of flat conductors make them especially useful for power transmission. These cables are easy to terminate, and are available in constructions compatible with any low or zero insertion force connectors.

Gore flat conductor flat cables (also available with PTFE insulation) feature:

- Extremely thin profiles (.011")
- Extended flex life
- High cut-through and abrasion resistance
- High power handling capability (to 150 amps at .020" profile)
- Controlled electrical characteristics, tailored to your specifications
- UL approval (available with cable style 2690)

We also supply these cables in high-density pluggable assemblies.

Round Cables, Coil Cords

Gore round cables can fulfill your electrical, space, weight, flexibility, reliability and other design requirements like no off-the-shelf product can. We will design and build the exact cable you need, using those materials best suited to the job.

We also make round cable coil cords to your specifications—coil cords with superior mechanical and electrical properties that remain stable over the life of your product.

Our round cables and coil cords are:

- Smaller
- Tougher
- More flexible
- Engineered to your electrical requirements (controlled impedance, capacitance, velocity of propagation)
- Tailored to your environmental requirements (operating temperatures, chemical exposure, abrasion resistance)
- Available, design through delivery in just a few weeks

Coaxial Cables

High speed digital system designers use our custom designed coaxial cables to meet their packaging and electrical requirements. The microporous structure of our GORE-TEX® expanded PTFE provides a low dielectric constant (1.3) insulation system which is tough enough to be applied in thin walls over small conductors. The result is a reliable interconnect which is optimized to meet the specific needs of your system. Typical benefits are:

- Higher packaging density
- Higher signal fidelity
- Lowest propagation delay (about 1.2 nsec/ft)
- Lower capacitance

The benefits of the GORE-TEX® dielectric can also be utilized in controlled impedance pairs for differential signals. For critical signal bussing applications our coaxes and pairs can be cabled in ribbon form.

Gore can complete your interconnection system by providing fully tested assemblies. Where standard connectors won't work, we will develop custom assemblies designed to suit your mechanical or electrical requirements.

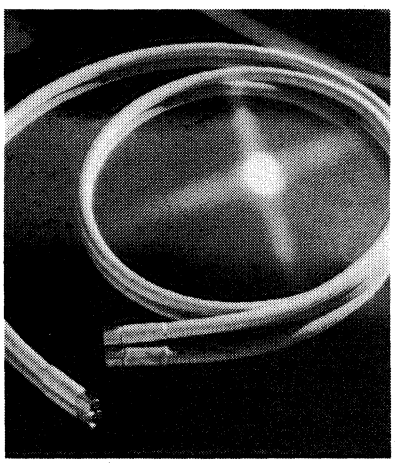
Signal Transmission Line

Our ribbon cable signal transmission lines are designed for digital signal bus applications which require both high density *and* high fidelity. PTFE insulation and silver-plated copper conductors combine to produce a cable with:

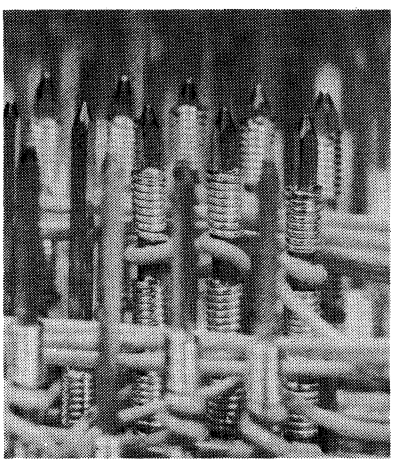
- High signal wire density (on .050" —or smaller—centers)
- High signal fidelity (second only to coax)
- Resistance to aging phenomena (will not degrade physically or electrically for the life of your equipment)
- Unbalanced or balanced designs (for single-end or differential signals)
- Efficient termination (compatible with .100" x 100 connectors and other rectangular connectors)



Microwave Coaxial Assemblies

The unsurpassed flexibility of our GORE-TEX® Microwave Coaxial Assemblies (GMCAs) makes installation easy and eliminates the need for a large inventory of specially-shaped interconnects. And performance is in no way compromised to achieve flexibility: our Type 5 GMCAs have 25% less insertion loss than .141" semi-rigid assemblies (38% less than .195" flex assemblies) at 18 GHz; the Type 2 GMCAs have five times greater thermal stability than do .141" semi-rigid assemblies.

- Low insertion loss (specifications guaranteed up to 40 GHz)
- Optimized VSWR (specifications guaranteed up to 40 GHz)
- Excellent shielding effectiveness
- High power handling capability
- MIL-C-39012 interface compatibility



Wrappable Hook-up Wire & Cable

To help increase the speed and reduce the costs of automatic wire wrapping operations, Gore has developed a family of hook-up wires with insulation that is significantly tougher, thinner, and more durable than ordinary extruded insulations. We also manufacture wrappable coaxes, twisted pairs, shielded twisted pairs —or any combination of these in precision-designed round or flat multiple conductor cables. Our wrappable wires and cables offer:

- Greatly increased cut-through protection
- Greatly increase cold-flow protection
- Up to 37% reduction in back-panel density and harness bulk
- Superior break strength (for increased automatic wrapping machine speeds)
- Conformance to UL, military and BSP specifications

GSI CORPORATION

HIGH PERFORMANCE FLAT WOVEN CABLE

GSI Woven Cable is produced to order and shipped on spools in continous lengths, as straight or branched harnesses, or as elements of complex assemblies.

Weave Patterns and materials are engineered to provide attributes such as wide or close spacing between conductors, flexibility or rigidity, permanent bonding or fast and easy lead separation.

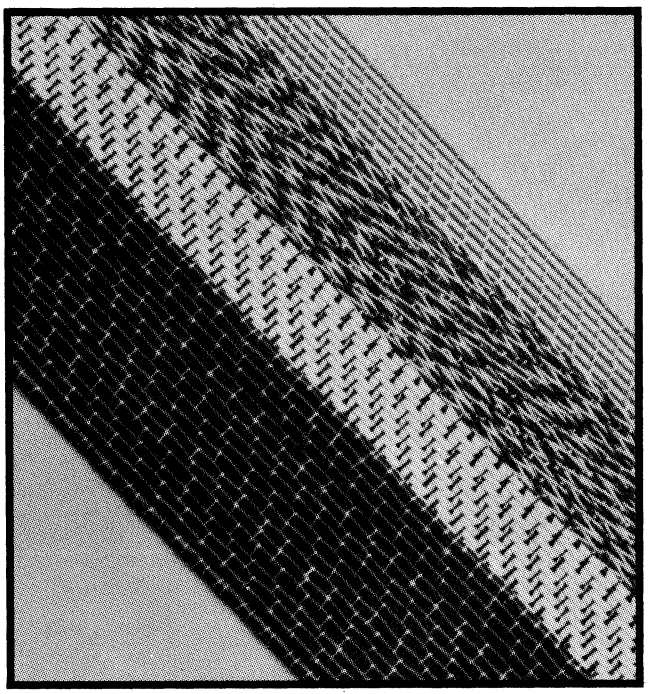
Conductor Types have virtually no limit. Wire may be MIL spec or UL listed of many formulations. Twisted pairs, triplets, coax and other constructions are readily handled. Flexible conductors of 10 AWG to 40 AWG are standard.

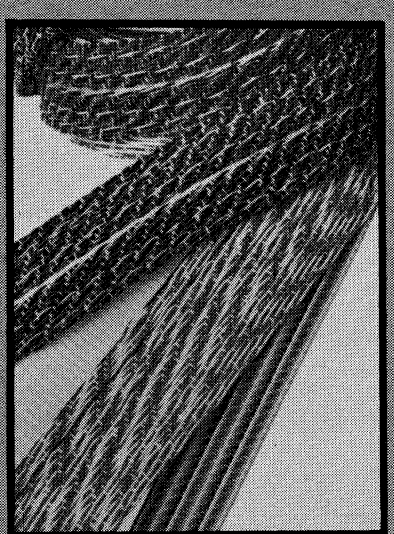
Color Coding options are many and varied. NEMA color sequence is a popular choice for wire, but other combinations are available for conductors and weave material.

Space and Weight are saved with woven cable. Weave elements such as Kevlar provide strength, and flat designs require less space than round cables.

Mixing of Components is a unique feature of woven cable. Conductors of different sizes or constructions can be placed side by side in the same cable.

Wire Preparation is made easy and fast without risk of damage to components. Wires are individually insulated. Color coding and placement of conductors makes identification nearly foolproof.

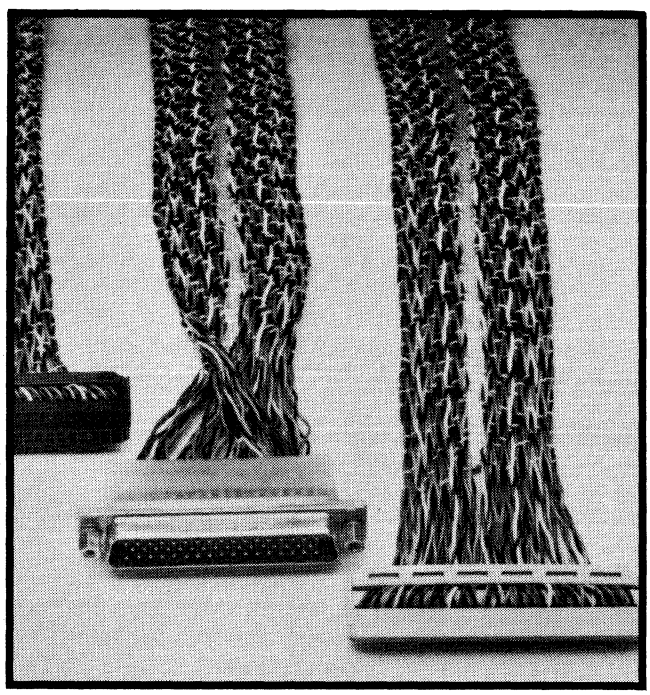


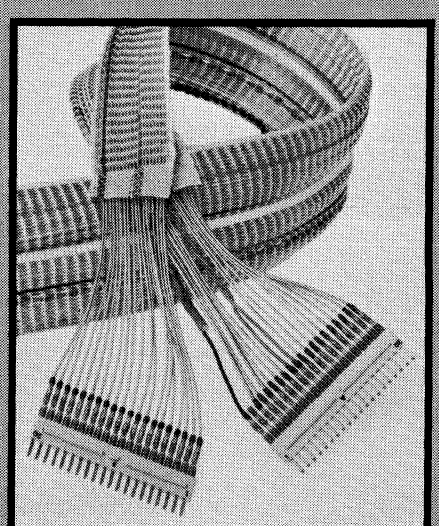


GSI CORPORATION · 1917 Greenspring Drive · Timonium, Maryland 21093 · (301) 252-1768

HIGH PERFORMANCE WOVEN CABLE SYSTEMS

GSI CORPORATION





Programmed Harnesses provide dimensional accuracy at low cost. These machine made assemblies look great, work perfectly, and save on installation time.

Cut or Fold Lines can be designed-in to allow for rapid separation of groups of wires and the folding and stacking of woven elements.

Multiple Layers may be utilized so that the cable assumes a space-efficient box shaped cross section.

UL Labeling is available for GSI wire and for GSI woven cable and harness assemblies.

Terminations are available in a wide range of industrial and military styles. Woven cable is easily adapted to mass termination systems.

Composite Construction combines diverse technologies. Flat woven cable may be combined with contrahelically twisted round cable and other construction methods to achieve optimum design and performance.

MIL-Spec procedures and processes guarantee satisfaction on military jobs. Inspection to MIL-I-45208A, high reliability soldering to MIL-S-45743E and calibration to MIL-STD-45662 are integral to GSI's operations.

GSI CORPORATION · 1917 Greenspring Drive · Timonium, Maryland 21093 · (301) 252-1768

GSI CORPORATION

HIGH PERFORMANCE INTERCONNECTION SYSTEMS

Complex Assemblies are produced from customer drawings by skilled operators. Assembly and test operations are performed in appropriate controlled environments.

Shields and Jackets may be braided onto both round and flat cable. RFI, EMI, EMP and Tempest requirements are met with multiple layers of dense shielding.

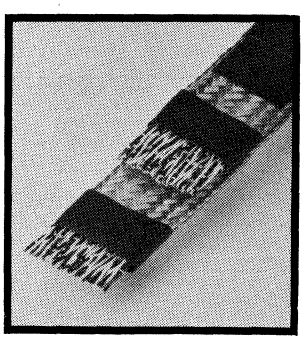
Wire Markers have been a GSI specialty for over 20 years. Products include both shrinkable and non-shrinkable tubing in a number of standard colors. Cable ties and marker plates are also permanently imprinted.

Color Banding is a superior process for marking fine wire for military aircraft and other high technology applications. Up to five colored bands make up to 100,000 discrete color codes available for white wire from 12 AWG to 30 AWG. GSI color banded wire is used in advanced U.S. military aircraft and submersibles.

Soldering is done by certified operators in designated clean facilities with controlled temperature, humidity and air pressure. Equipment includes resistance reflow soldering systems for mass terminations.

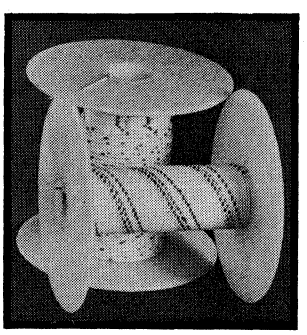
Testing and Certification are available for all GSI products. Hi-pot and electronic tests may be specified in addition to standard continuity and spark tests. Abrasion, pull, hardness and other mechanical tests are routinely performed.

COMPLEX ASSEMBLIES



SHIELDS AND JACKETS

WIRE MARKERS



COLOR BANDING

System Integration is another option offered by GSI. Cable assemblies may be combined with termination devices, other hardware and cabinetry to form complete assemblies or major subassemblies. GSI's complementary skills and technologies ensure competitive price and delivery.

Technical Support is available for the asking. GSI's engineering staff has expert knowledge and can work quickly to solve problems. And, since GSI is not wedded to one technology, each problem is approached objectively.

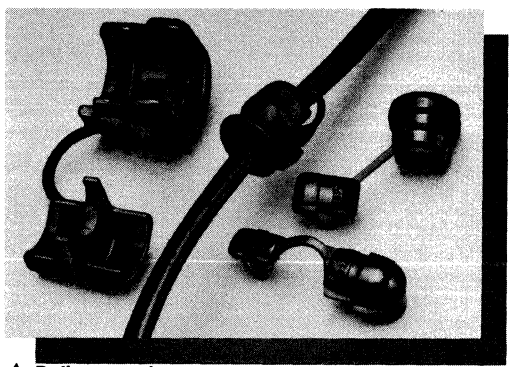
SOLUTIONS IN NYLON BY HEYCO®



▲ **Relieve strain...**

Strain Relief Bushings insulate and protect cables against pull, push, flex and twist. 63 sizes.

- Straight-through.
- Bell-mouth.
- Right angle.
- International.

▼ **Seal out liquids...**

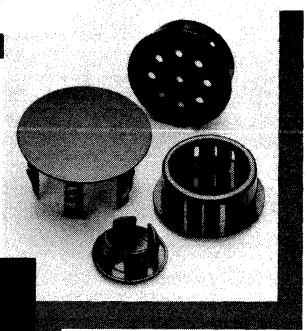
Liquid Tight Fittings seal on cable or tubing. 10 sizes for diameters of 3/32" to 1". VDE and SEV accepted. Flex extender prevents sharp bends.

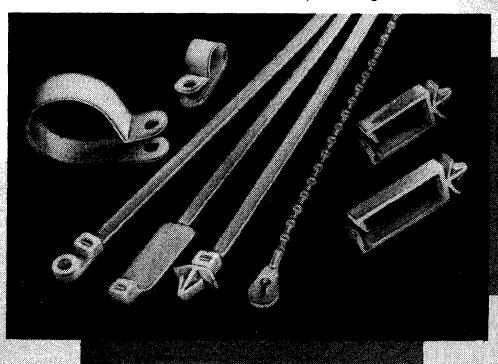
- Regular Liquid Tight Fitting.
- Flex Liquid Tight Fitting.

Plug holes... ▶

Hole, Vent and Pry-out plugs close unneeded holes and provide needed ventilation. 21 sizes for 1/4" to 2 1/2" diameter holes.

- Vent Plug.
- Hole Plug.
- Pry-out Plugs.

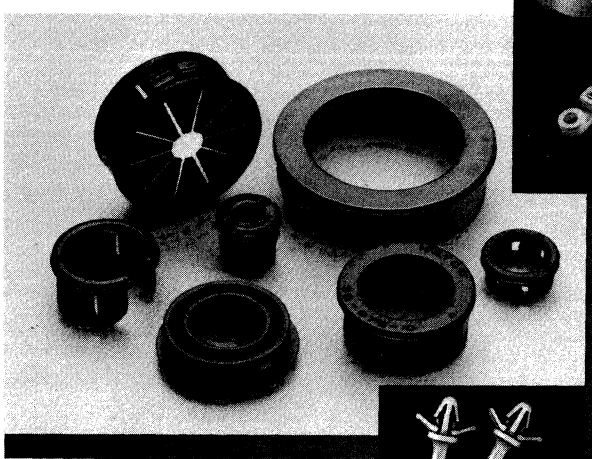




Gather and tie...

Cable Ties, Holders and Clamps bundle, anchor and direct cables, tubings, etc.

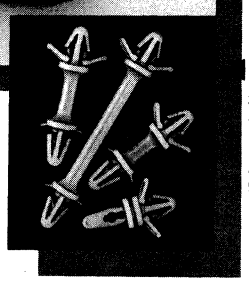
- Cable Clamp.
- Nytye® Cable Tie.
- Beaded Wire Tie.
- Wire & Cable Holder.



Insulate cables...

Insulating Bushings in 73 sizes and types to protect cables from raw-edged holes. Finger-tip installation.

- Shorty Bushing.
- Double Insulated Bushing.
- Open-closed Bushing.
- Snub Bushing.



Connect wires... ▶

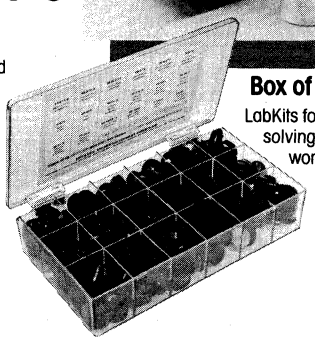
Turn-on and Crimp-on wire connectors for quick, easy, low-cost and secure connection of #6 to #22 AWG conductors.

- Polypropylene & Phenolic Turn-on.
- Urea All Plastic Turn-on.
- Nylon Crimp-on.

For spacing...

Spacer Supports provide needed 3/16" to 1 3/8" spacing between boards or boards and chassis.

2 Nylon materials: 94V-2 and 94V-0.



Box of Solutions...

LabKits for handy problem solving or development work. Clear plastic, compartmentalized box with lid.

PIONEERS IN IRRADIATED WIRE

JUDD WIRE is a diversified wire and cable company offering hook-up wire, multiconductor cable and many specialized products for the electronics industry. Products are available for applications in the temperature range of -55°C to 200°C.

In addition to conventional products JUDD WIRE has pioneered and specializes in the manufacture of irradiation cross linked wire and cable product lines.

JUDD WIRE's design engineers work daily on providing solutions to wire and cable problems. Our customer count on JUDD WIRE to meet their requirements for engineering, manufacturing, testing, and packaging everything from the smallest hook-up wire to complex, state of the art multiconductor cables.

Decades of experience and thousands of design efforts back the commitment of JUDD WIRE to engineer solutions for today and tomorrow's wire and cable needs.

PCA THE UNIVERSAL HOOK-UP WIRE

PCA is JUDD WIRE's tradename or an acronym for Polychloroalkene, which is an exclusive irradiation cross-linked polyvinylchloride insulation.

In order to process PVC by electron beam, it is necessary to improve the formulation of the plastic insulation to withstand the high energy electrons that bombard the wire insulation. Electron beam irradiation of the special PCA formula results in a superior thermoset that improves the inherent desirable characteristics of PVC.

Compare the product advantages of PCA with conventional non-irradiated PVC and learn why billions of feet are sold annually to a variety of industries which prefer the superior characteristics and cost savings of JUDD WIRE's PCA hook-up wire.

FLEXRAD 125® HIGH TEMPERATURE HOOK-UP WIRE

FLEXRAD 125 is a flexible irradiation cross-linked polyethylene wire with a high temperature rating of 125°C. This proven high temperature hook-up wire with a flame retardant rating of VW-1 (FR-1), offers excellent abrasion and solder resistance and an unusual ability to withstand exposure to many chemicals and solvents.

FLEXRAD 125 has a variety of uses in many industries. Its high temperature and flame retardant ratings recommend it as a replacement for many other UL and CSA approved wires. It is also approved for military applications under Specification Mil-W-16878, Revision E, slash sheets 14, 15 and 16.

Electrical and electronic component and equipment manufacturers now have an alternative to solve the problems encountered while using conventional PVC. The problems of a limited temperature range, solder iron shrinkback, creeping insulation during automated cut and strip operations, and poor abrasion resistance can now be eliminated by utilizing FLEXRAD 125.

Silver plated copper wire conductors must be used in order to withstand the high heat encountered when processing many fluorocarbon constructions. Fluctuations in the precious metals market over the past several years have caused many users of fluorocarbon insulated wires to review their use of these expensive constructions and seek comparable alternatives that provide similar quality.

FLEXRAD 125, processed with tinned copper conductors, provides an ideal alternative to fluorocarbon insulations for most applications where the maximum operating temperature does not exceed 125°C.

Production problems associated with fluorocarbon insulations, such as poor cold flow, low adhesion, poor cut through resistance, short lengths, limited flexibility, and poor potability, will be alleviated by specifying FLEXRAD 125.

CUSTOM CABLE DESIGN

JUDD WIRE can custom design, or manufacture to your specification, a broad spectrum of special cables. Cables are available without shielding, or with conventional braids, spiral braids, aluminum foils, or conductive plastics. JUDD WIRE's cable jacketing facilities extrude irradiation cross-linked compounds as well as vinyls, nylons, polyethylenes, polyurethanes, and 150°C fluorocarbons. JUDD WIRE is a completely integrated wire and cable manufacturing facility combining technology with superior customer service.

PCA cables offer all the advantages of JUDD WIRE's exclusive irradiation cross-linked polychloro alkene insulation in a multi-conductor package.

Manufacturers of computers, data processing equipment, communication systems, and test equipment can use the superior characteristics and cost saving benefits of PCA cables.

EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3)
KSR keyboard send /receive

L
LC inductance capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
μF microfarad
MHz megahertz
MIB microcomputer interface board
MIC microwave IC
MIPS million instructions per second
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

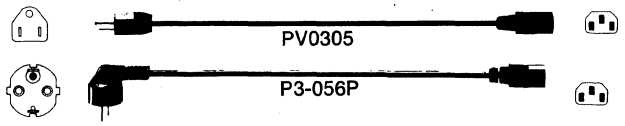
Y
YIG yttrium iron garnet

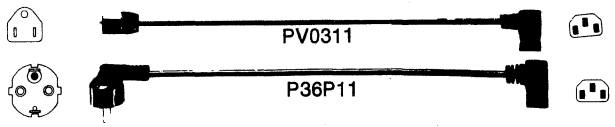
Z
ZIF zero insertion force

CABLE ASSEMBLIES

STANDARD AND CUSTOM ASSEMBLIES TO YOUR SPECIFICATION.
WE CAN MAKE ANY CABLE OR MOLDED CABLE TO YOUR REQUIREMENTS.
SEND US YOUR PRINT OR SPEC.
THE FOLLOWING ARE SOME REPRESENTATIVE EXAMPLES OF OUR PRODUCT LINE.

AC POWER CORDS

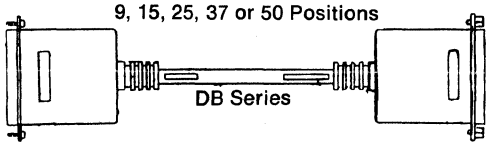




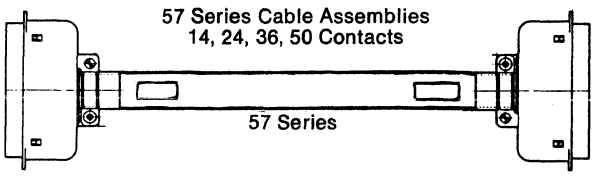
To UL, CSA, VDE, SAA and other standards.

COMPUTER & PERIPHERALS CABLES

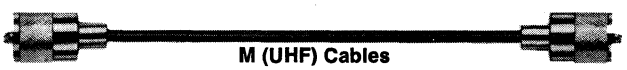
"D" Sub Cable Assemblies
9, 15, 25, 37 or 50 Positions



57 Series Cable Assemblies
14, 24, 36, 50 Contacts

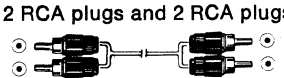


COAXIAL CABLES: BNC, N, F, UHF, TNC, TWINAXIAL, ETC.

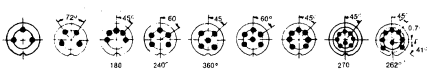


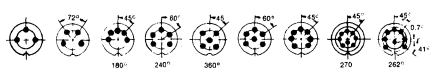
AUDIO CABLE ASSEMBLIES

2 RCA plugs and 2 RCA plugs



DIN PLUG OR JACK CABLE ASSEMBLIES

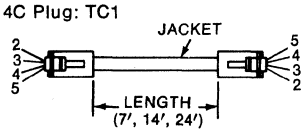




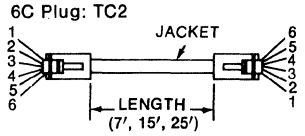
Available in coiled, straight or Shielded Cords, molded or assembly type.

TELEPHONE LINE CORDS AND COILED CORDS

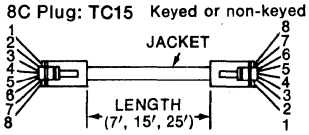
4C Plug: TC1



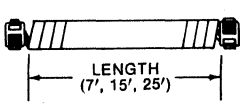
6C Plug: TC2



8C Plug: TC15 Keyed or non-keyed



4C Coiled Cord: TC8
6C Coiled Cord: TC9



Custom Color, Custom Length and Cords to your own specification are welcome.

FLAT RIBBON CABLES: 10, 14, 16, 20, 26, 34, 40, 50, 60 POSITIONS

Fujikura Ltd.

Electronic Wiring Materials

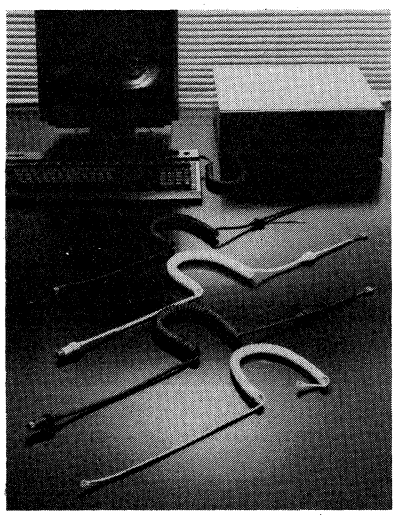
PROVEN QUALITY SINCE 1885

The history of Fujikura Ltd. literally represents the development of Japan's electric cable industry. Since its establishment in 1885, Fujikura has become a leading manufacturer of wiring products by constantly developing new technology. By achieving the highest technical levels in every field of cable engineering, we have made contributions to industry in Japan and in the rest of the world. Today, Fujikura does over $900 million in sales annually and employs more than 4300 persons worldwide.

An example of our technical achievement in telecommunications is the pioneer development of ultralow-loss optical fiber cables and their related systems, now being used commercially.

Other Fujikura innovations are being used in many new applications of wiring materials and components. Our products are approved by UL, CSA and other international standards bodies. Today we are able to offer a very broad "product menu" of wiring products designed to meet the needs of virtually every segment of the electronics industry. This brochure contains certain typical products selected from that "menu."

COILED CABLE ASSEMBLIES



Recognizing the sharply rising demands for office automation equipment and the need for properly shield-protected products, Fujikura has developed a complete line of coiled cable assembly sets for use on keyboards, telephones, and wireless equipment. Available as either cables or assembly sets, these products satisfy the needs for high-grade technical power involving FCC shielding measures, excellent bending characteristics and other important factors. Cable and connector terminations can be manufactured according to users' specifications.

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

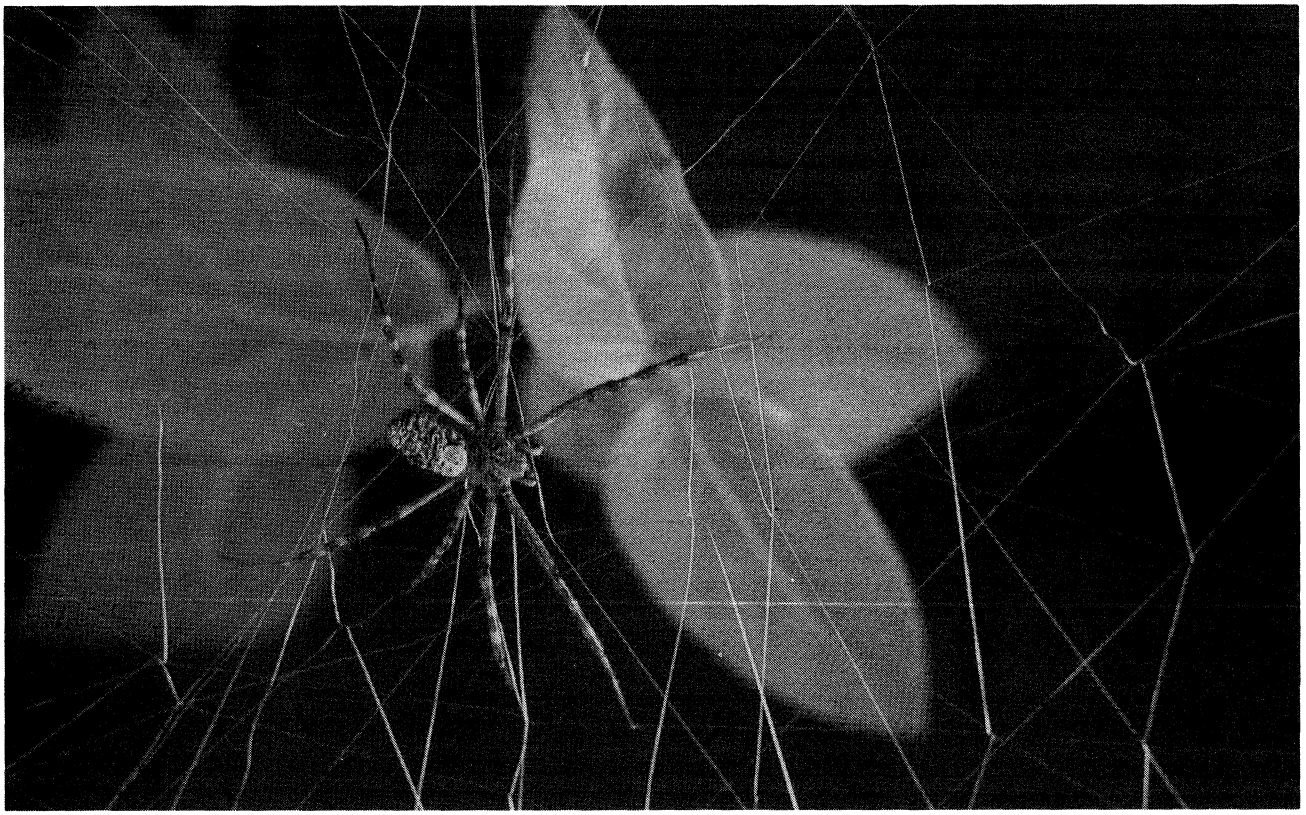
You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

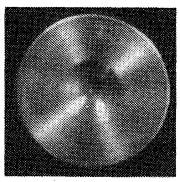


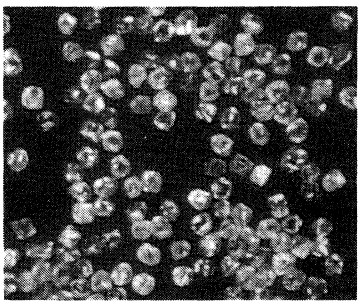
Molecu's custom wire is so precise and fine, it will impress even an expert

The web you're looking at was "spun" from Molecu's .0015" Moleculoy® wire. (And frankly, this is the only bug you'll ever see in it).

Every foot of custom Molecu wire is produced to meet very demanding standards: yours. So no matter how tough your process or product parameters, you can specify the ultra-close tolerances you need—in size, resistance, temperature coefficient, temper, and finish.

Precision drawing through near gem quality diamond dies lets you specify bare metal or alloy wire of any type—resistance, thermal expansion, mechanical, or electrical conductor—as small as .0002" ± .00050" in diameter.





▲ *Your Molecu wire is drawn through near gem quality diamond dies, up to a full carat in size, to control diameter and finish precisely. Each die is so hard, that 400 tons of copper could be drawn through it into wire fine enough to circle the earth 20 times before showing any wear.*

◀ *Each Molecu die blank is made from tool steel in our own die shop. Based on the properties of the metal or alloy your wire is made of, we engineer and mill every crucial drawing angle to within fine tolerances.*

And, if your wire application calls for enameling or precious metal plating, Molecu's strict QA and QC assure tight coating purity, thickness, and concentricity for the precise, consistent operation you need.

In short, if your next project calls for better than run-of-the-mill, call or write to Molecu Wire for further information or a quotation.

Molecu Wire

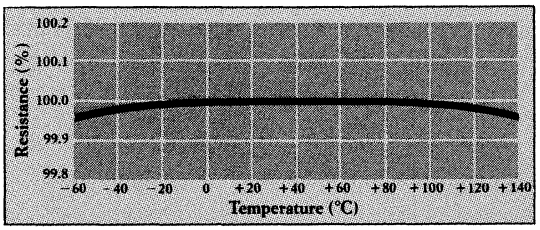
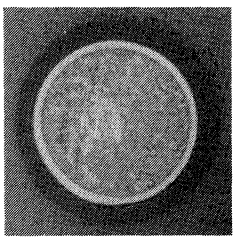
Sampling of custom wires shown at 5X magnification.

How Molecu Wire's precision custom wire assures your project's success

You can specify premium wires in diameters from .0002" to .050", in any metal or alloy, with any coating and in any configuration. Superb engineering, quality control and quality assurance mean you always get the precise qualities and tolerances you need.



Standard Moleculoy® resistance wire has ±5 ppm temperature coefficient of resistance. Tolerances as close as ±1 ppm are also available.



QA includes metallographic testing for concentricity. Shown at 450X magnification is a cross-section of a .0019" ± .0001"diameter copper wire, including 70 µ-inch ± 10 µ-inch soft gold plating insulated with.00018"to.00024" polyurethane.

Now you can meet impossibly tight TCs... create a totally noise-free environment... guarantee positive wire brazing... deliver consistent operation within any temperature range... assure uniform and ultra-concentric enameling or plating...

No matter how tough your process or product parameters are, we'll create the solutions you need. At Molecu Wire, every foot of wire is made to meet your most exacting specifications.

Turn to Molecu Wire for fine-sized wires of all kinds: resistance, stranded, twisted pair, bifilar, thermocouple, flat ribbon/voice coil, braided, insulated, metal coated (gold, silver, nickel, and others), color-enameled and more.

Whether your field is aerospace or data processing... medical devices or robotics... telecommunications, consumer electronics, or virtually anything else, Molecu Wire's accomplished R&D staff can help you bring your design to reality.

Call or write to discuss your next project, for more information or a quotation.

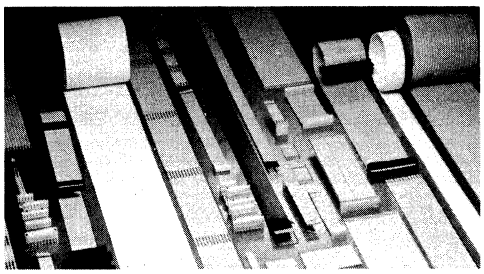
Planar Cable Products

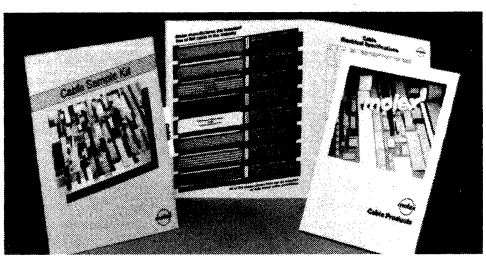
Molex manufactures the broadest line of flat cable in the industry.



- .050" center round conductor flat cable
- Gray PVC insulation
- Up to 68 circuits; 26 and 28 AWG
- UL Style 2651 - 300 V, 105°C, V W-1

- .100" center round conductor flat cable
- Gray PVC insulation
- Up to 36 circuits; 22, 24, 26 and 28 AWG
- UL Style 2651 - 300 V, 105°C VW-1

- .156" center round conductor flat cable
- Gray PVC insulation
- Up to 24 circuits; 18 and 22 AWG
- UL style 2651 - 300 V, 105°C, VW-1



Write for free sample kit

- .050" center foil shielded cable
- Reduces EMI/RFI
- Gray PVC insulation/black PVC jacket
- Up to 60 circuits
- UL style 2651 - 300 V, 105°C, VW-1

- .050" center foil ground plane cable
- Reduces crosstalk/controls impedence
- Gray PVC insulation/Black PVC jacket
- Up to 60 circuits
- UL style 2651 - 300 V, 105°C, VW-1

- .100" and .156" centers Polyshield™ cable
- Alternative to coax below 5 MHz
- Reduces crosstalk and EMI/RFI
- UL style 20325 - 300 V, 80°C VW-1

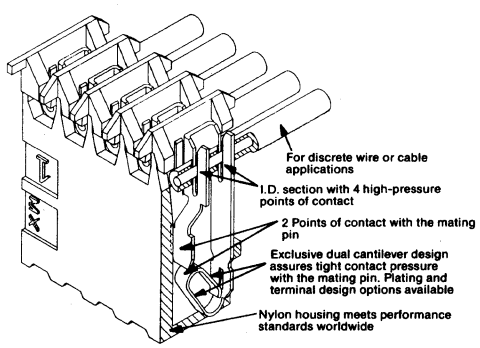
- .100" center heavy duty composite cable
- Tough insulation resists cut/melt through
- Natural irradiated PVC/Tan PVC insulation
- Up to 24 circuits

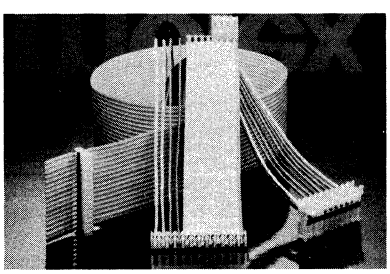
IDT™ Insulation Displacement Technology

Molex offers a complete insulation displacement system including harness and non-harness board connectors, edge connectors, and UL listed round conductor flat cable.

Molex IDT connectors are offered on five center spacings: .050", .098", .100", .156", and .200".

Detail of Standard IDT Connector





IDT features

- **Mass termination to lower your applied costs**
- Housings are pre-loaded with IDT terminals
- Proven double cantilever contacts
- Accepts round conductor flat cable and discrete wires
- Optional locking ramp and voided circuits
- Polarizing keys and pegs available
- Molded-in strain reliefs on each side of daisy chain connectors
- Drop in replacement for Molex crimp-type connectors
- Optional dust covers available

FACILITIES/SERVICES

CUSTOM ENAMELING
In our custom enameling facilities we enamel most metals from .072″ to .0004″ round or square and rectangular sizes smaller than 14 AWG or 3500 sq. mil. cross-sectional area. Insulations are available in special colors, builds and bondable overcoats. All insulations meet NEMA MW 1000, 105-220°C, single thru quadruple film builds. Up to 10 insulation colors are available to aid in conductor identification.

WIRE SHAPING
MWS produces a complete line of miniature square and rectangular wires in a variety of metals. Sizes smaller than 14 AWG sq. and rectangular shapes smaller than 3500 sq. mils. are produced bare as well as film insulated.

RIBBON ROLLING
MWS operates facilities for production of flat ribbon wire in a wide variety of metals. Thicknesses range from .0005″ with widths up to .125″. Ribbon wires are available bare, film insulated and plated.

DRAWING AND ANNEALING
Our drawing and annealing capabilities round out our custom manufacturing facilities. These capabilities allow us to fabricate most metals from .064″ through .0004″ diameter in the temper and quantity you require.

TESTING LABORATORY
Expanded test facility provides complete chemical, physical and electrical test data for applicable military, federal, commercial and customer standards. Metallurgical and I/R spectro analysis are also available. We can provide you with fast and accurate answers to your technical questions.

CUSTOM PACKAGING
MWS has designed custom molded, individual foam shipping containers for our 2½″, 3″, 5″ and 6″ plastic spools. These containers eliminate damage in shipping, and later prevent breakage in storage and production line handling.

WIRE TWISTING
MWS operates facilities for twisting 2 or more conductors 24 AWG and finer. Twisting tightness up to 33 twists per inch and to tolerances of ±1%. Conductor materials include copper, silver, plated conductors and specialty alloys, in bare and insulated constructions.

WIRE SPOOLING
Spooling facilities handle every size wire from heavy square and rectangular to ultra-fine. This enables you to buy the quantity of wire you need on the spool size you want.

Our goal is to have the wire you need, when you need it. That's why MWS stocks the largest inventory of specialty wires in the country. Over 20,000 types and sizes. If we don't have the wire you need in stock, we'll custom manufacture it. Our short run capabilities provide an alternative to large factory minimums and long deliveries.

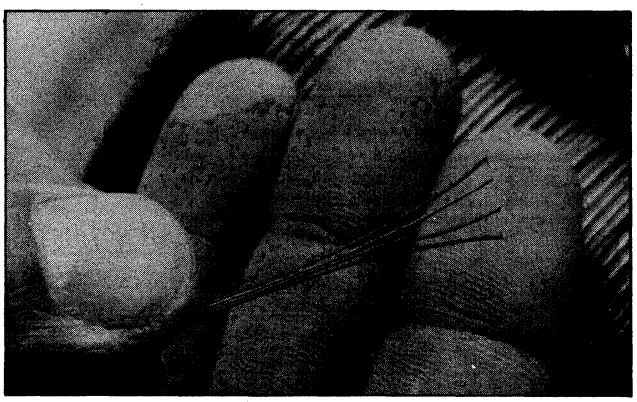
®Multifilar is a registered trademark of MWS Wire Industries.

MULTIFILAR® MAGNET WIRE



Whenever two or more magnet wires travel together, MULTIFILAR magnet wire is worth a closer look. This parallel-bonded, color-coded magnet wire offers many benefits for both small and large users.

Engineers should specify it when they're concerned with space, weight and reliability. Where consistent capacitance and impedance characteristics are needed, MULTIFILAR magnet wire outperforms windings where two separate magnet wires are used.

Production users benefit from increased layer winding speeds, reduced labor and handling. Color-coding assists in conductor identification and reduces termination errors.

MULTIFILAR magnet wires are custom produced by MWS. We guarantee flat, parallel construction in an array of sizes 16 AWG and finer, with up to 20 conductors in some sizes.

Both round and flat constructions are available. Color-coded conductors are available in most insulations with up to 10 different colors in some sizes. Conductor separation is also guaranteed with certain bonding mediums.

For an even closer look, send for a free sample, specifications and ordering information. Production minimums are as low as 500 feet.

* Solderable Insulations † Trademark of DuPont

NOTE: The above referenced insulations, bonding films, and bond thickness are standard. Other insulations, films and thicknesses are available upon request.
CONDUCTOR SEPARATION: Bonding films can be softened and removed by immersion in appropriate solvents. Some mechanical action (i.e. wiping wires following immersion in solvent) may be required to affect conductor separation.

PART NUMBER ORDERING SYSTEM

Make your own 8 digit part number by following the guidelines outlined below.

EXAMPLE **B-2 3 8 1 1 1 1**

- **B-** Product letter for all multifilar magnet wire
- **2** Number of conductors. Use ( ) for more than 9 conductors
- **3** AWG gauge sizes
- **8** Insulation thickness 1= single 2=heavy 3=triple 4=quadruple
- **1** Insulation type "See above chart for correct code number"
- **1** Color coded conductors 0=none required 1=red/green 2=green/clear 3=red/green/clear *9=special – call for color code
- **1** Bonding film "See above chart for correct code number"

EXAMPLE = 2 Conductors–38AWG Single Polyurethane–Red/Green–Butyral Bond
* Denotes Change

If you have any questions regarding how to specify a correct part number for the **multifilar** wire you need, don't hesitate to call us. Our salesmen or engineering staff will be happy to assist you.

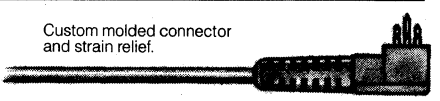
MWS Wire Industries

MICRO CABLE SOLUTIONS

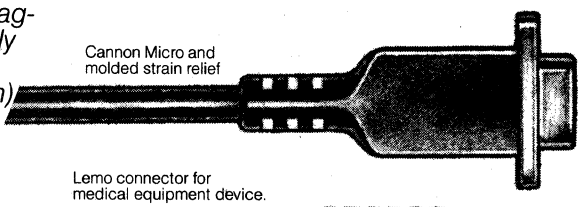
National Electric Cable designs, tests, produces, and improves cables, connectors and complete cable assemblies for specific applications in instrumentation and medical electronics. Our experience has taught us that advanced cable technology not only influences system design but frequently determines whether a system is functionally and economically viable and reliable. We are the leading U.S. manufacturer of micro-miniature cable assemblies and have successfully supplied companies like General Electric Medical Systems, Hewlett-Packard, Tektronix, and Phillips.

Electronic Cable Assemblies

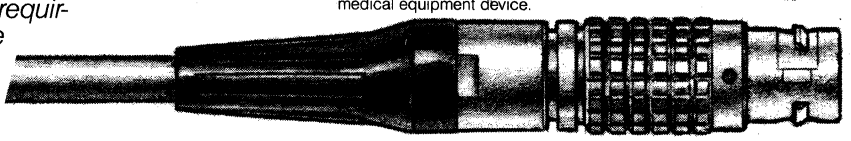
We design and produce exceptionally high quality cable assemblies for high tech products ranging from logic analyzers to medical diagnostic machines. We manufacture cables with extruders that apply insulation as thin as .002in. (0,05mm) with taping machines that apply low density materials on wires as small as .0048in. (0,12mm) in diameter, with braiding machines that can braid strands as small as .002in. (0,05mm). Assemblies involving standard or molded connectors, stringent military standards, micro-miniature soldering and other processes requiring automated termination techniques are typical of the ongoing projects in our new manufacturing facility. Tell us your needs and we will build you a prototype.



Custom molded connector and strain relief.



Cannon Micro and molded strain relief

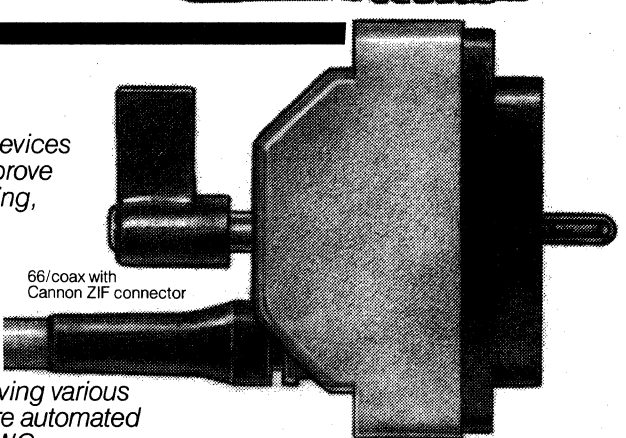


Lemo connector for medical equipment device.

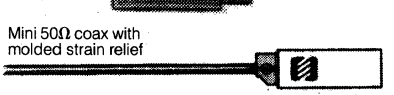
Cables & Connectors

If you are designing electronic equipment using hand-held devices or high speed data transmission, let us show you ways to improve miniaturization, flexibility, flex life, abrasion resistance, shielding, capacitance, specific impedance and other critical cable requirements. Think of us as an extension of your design department for the latest in cable technology.

We usually terminate our cables to connectors like Cannon Micro-D and ZIF, Fischer, Lemo, Amp CPC's and Coaxicon, Berg Mini PV, SMA and SMB, Selectro Nanohex and military circulars. We also design and build custom connectors involving various moldings and strain reliefs in our cable assembly plant, where automated crimping is done to 36 AWG and precision soldering to 40 AWG.



66/coax with Cannon ZIF connector



Mini 50Ω coax with molded strain relief

75Ω mini-coax/Selectro Nanohex connector

After 7/1/87 name changed to Precision Interconnect Corp.

Micro-miniature Coaxes

Ultrasmall cables designed for maximum flex-life and flexibility are our specialty. Coaxes (50-125ohm) are of Tex-L 88® low density Teflon,® foamed Teflon, full-density Teflon and irradiated cross-linked polyolefin dielectrics over 34-38 AWG center conductors with braid, tape, or spiral shields. We have produced 133 coaxial conductors in one cable with an outside diameter of .530in. (0,135mm).

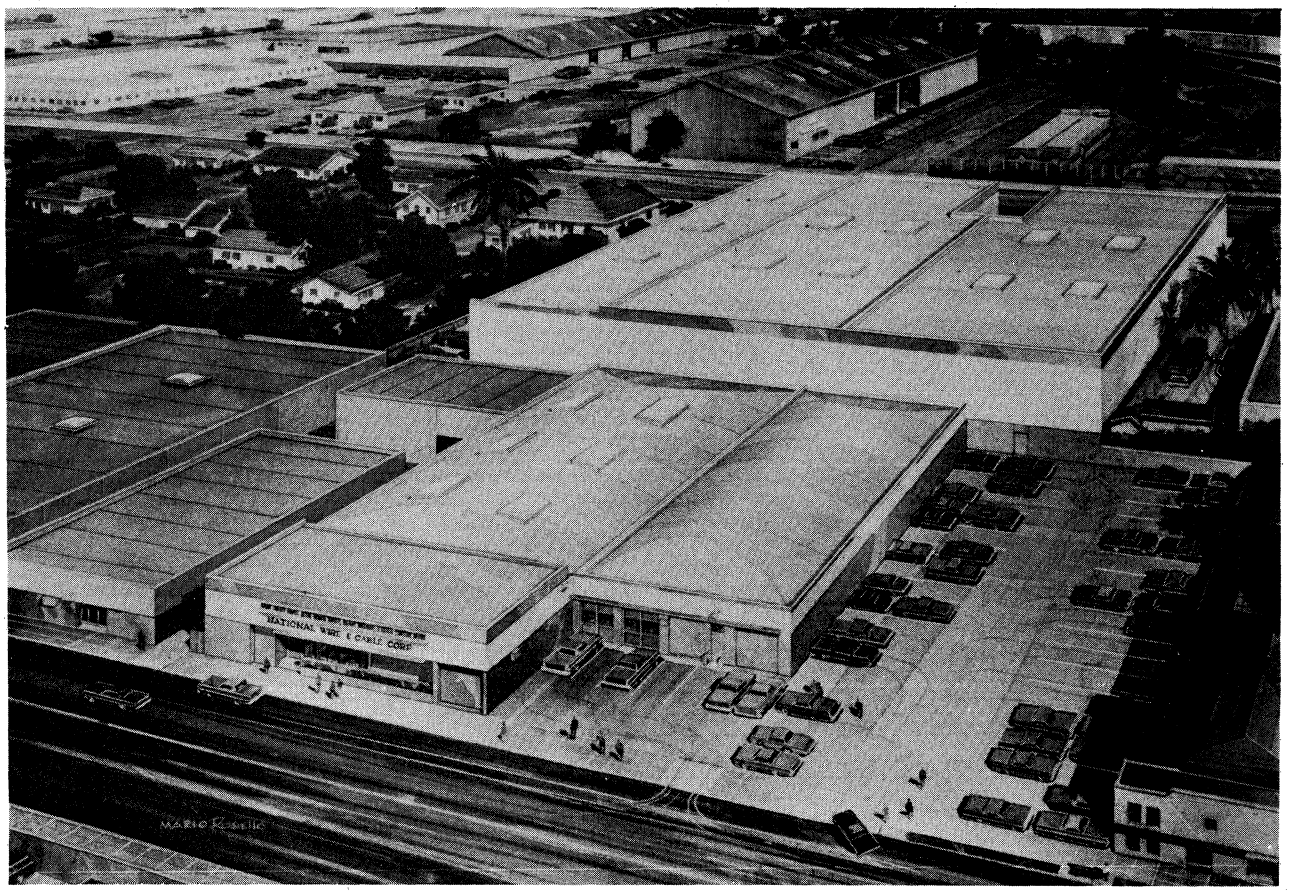
NATIONAL ELECTRIC CABLE

After 7/1/87 name changed to Precision Interconnect Corp.

NATIONAL WIRE AND CABLE CORPORATION

Dept. EM, 136 San Fernando Rd., Los Angeles, CA 90031
Phone: (213) 225-5611, TWX: 910-321-4155, TLX: 181409,
FAX: (213) 225-4630. Fed. Stock Code H4-04569



As a manufacturer of wire and cable products . . . with warehouses on both East and West coasts, National Wire & Cable is ready to fill your immediate needs. Choose from our standard lines of wire or cable . . . OR let us design and custom manufacture exactly what you require for your application.

Our wire inventory is now over 200 million feet, and our 500 different standard multi-conductor cables total in excess of 2.0 million feet!

When you call National Wire, you'll find we are especially well equipped to handle your large as well as minimal requirements. If our "standard" items won't meet your application, we have the wire inventory, the machinery, the expertise to come up with exactly what you need. 180,000 square feet of manufacturing area and our expert engineering staff are at your disposal!!! All cable components are produced within our own facility in order to assure complete quality control.

Review the following catalog pages. If you need some assistance with your specific requirement, call our factory direct, or call our representative nearest you. See Manufacturers and Sales Office Directory Yellow Pages.

CAVEAT EMPTOR

LET THE BUYER BEWARE

National Wire and Cable Corporation is proud of its quality and good name, and has made it a practice of enforcing its copyrights to protect its customers from imitators who would pass off its own products as ours, by using our part numbers on reels and packing slips.

WHAT IS MEANT BY: "OR EQUAL"?

When a "similar" product is represented as being "equal" the buyer should demand proof of equal quality in all details, that all components are identical in temperature and voltage ratings, and that cable geometry, manufacturing practices, flexibility, life expectancy, quality control procedures, and packaging, are truly "equal".

We wish to point out to all that the part numbers shown on the following pages are the copyrighted property of National Wire and Cable Corporation and are not "generic" part numbers for anyone else to use. Our part numbers and company name are always printed on the cable jacket. If you receive a cable without this information printed on the cable jacket, we respectfully suggest that you assure yourself that you have not been the victim of an unfair practice through misrepresentation. Demand proof!

Sincerely,

National Wire and Cable Corporation

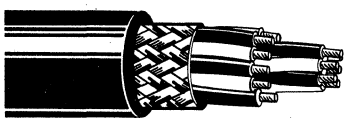
Miniature Signal & Control Cables Single Conductors (NX Series)



(NX1922SJ shown)

National Wire & Cable Corporation manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cabled pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010" wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type B. Insulated for 600 volts working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) All are coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier under shields. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C. vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. LISTED STYLE 2343 COMPUTER CABLE; rated 80°C. (Higher temp. ratings apply for any non-U.L. service.)

U.L. and C.S.A. certification furnished only when requested.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

IN STOCK

MIL-SPEC U.L. LISTED COMPUTER GRADE STYLE 2343

For light duty, gray jacketed version of these cables in the U.L. Style 2464, see NQ Series on following pages.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage: Greater than 5000 volts AC RMS, 60 cps.

Capacitance: Nominal capacitance from a wire to all else in a cable ranges from 45. to 70. pf/ft. at 1. kc, depending on gauge and position.

Insulation Leakage: 200. megohms/1000 ft. min. @ 500. VDC from any conductor to all else in cable.

Sheath Leakage: 10. megohms/1000 ft. min. @ 500 VDC from shield or conductor group through sheath to ground.

Temperature Range: Suitable for continuous use from −40°C. to +105°C. (U.L. Service limited to +80°C.)

Bending Characteristics: All cables are suitable for flexing to a circle diameter of 6. cable diameters from +105°C. to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°C.

MULTICONDUCTOR STOCK CABLED SINGLES

Miniature Signal & Control Cables Twisted Pairs (NXP Series)

IN STOCK MIL-SPEC

U.L. LISTED COMPUTER GRADE STYLE 2343 & 2344

For light duty, gray jacketed version of these cables in the U.L. Style 2464, see NQ Series on following pages.

National Wire & Cable Corporation manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cabled pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010" wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type B. Insulated for 600 volts working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) All are coded using 10 standard colors plus stripes on white per table below.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier under shields. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C. vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. LISTED STYLE 2343 COMPUTER CABLE; rated 80°C. (Higher temp. ratings apply for any non-U.L. service.)

U.L. and C.S.A. certification furnished only when requested.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Denotes U.L. Style 2344.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage: Greater than 5000 volts AC RMS, 60 cps.

Capacitance: Nominal capacitance from a wire to all else in a cable ranges from 45. to 70. pf/ft. at 1. kc, depending on gauge and position.

Insulation Leakage: 200. megohms/1000 ft. min. @ 500. VDC from any conductor to all else in cable.

Sheath Leakage: 10. megohms/1000 ft. min. @ 500 VDC from shield or conductor group through sheath to ground.

Temperature Range: Suitable for continuous use from −40°C. to +105°C. (U.L. Service limited to +80°C.)

Bending Characteristics: All cables are suitable for flexing to a circle diameter of 6. cable diameters from +105°C. to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°C.

Impedance: (24. AWG pairs) **Balanced: 87. ohms ±5%** **Unbalanced: 52. ohms ±5%**

MULTI-CONDUCTOR STOCK CABLED PAIRS

Cond: 22, 24 are 7 strand; 20 AWG is 19 strand

Heavy Duty Signal & Control Cables Single Conductors (NW Series)

IN STOCK

MIL-SPEC U.L. LISTED — STYLE 2343 & 2344

National Wire & Cable Corporation manufactures a complete line of multiple conductor control cable. Conductors are stranded tinned copper with 1/64" wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type C.* Insulated for 1000 volts working voltage. Color coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape serve over cable bundle. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078, and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C vinyl meeting MIL-I-631 Class F. All materials are self-extinguishing and fungus resistant. All cables are U. L. LISTED STYLE 2343; rated 80°C. (Higher temp. ratings apply to any non-U.L. service.) U.L. certification furnished only when requested.

Standard Putups: 100, 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

For applications in extreme environments, consult factory for alternative sheath materials.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage: Greater than 8000 volts AC RMS, 60 cps.

U.L. Voltage Rating: 300 volts RMS AC (appliance use). 600 volts RMS AC (electronic use).

Military Voltage Rating: 1000 volts RMS.

Capacitance: Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 mmfd per ft., @ 1000 cps; dependent on gauge and position.

Insulation Leakage Res.: 200. megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.

Sheath Leakage Res.: 10. megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.

Usable Temp. Range: Suitable for continuous use from +105°C to −55°C.

Cold Bending Capability: All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C. For continuous flexing applications consult factory.

* Insulated wires also meet U.L. style 1007 and CSA type TR-64.
† Denotes U.L. Style 2344.

Conductor sizes 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

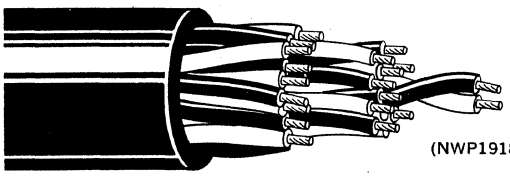
Heavy Duty Signal & Control Cables Twisted Pairs (NWP Series)



(NWP1918J shown)

IN STOCK MIL-SPEC

U.L. LISTED

Identical to National's NW-Series Cables except offered as twisted pairs.

National Wire & Cable Corporation manufactures a complete line of multiple pair control cables. Conductors are of tinned copper strand with 1/64" vinyl primary insulation for use up to 105° C per MIL-W-16878D Type C. Insulated for **1000** volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per table below.

All pairs are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black vinyl plastic per MIL-I-631; or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification. (Neoprene at added cost and only available for non-U.L. applications).

SHIELDED CABLES

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage: Greater than 8,000 volts AC RMS, 60 cps.

Capacitance: Nominal capacitance wire to wire for a pair ranges from 27. to 40. mmfd/ft. Capacitance from both wires tied together measured to all else in common ranges from 35. to 60. mmfd/ft. dependent on gauge and position. Overall shield has negligible effect on W-W capacitance.

Insulation Leakage Res.: 200. megohms / 1000 ft. min. at 500 VDC from any conductor to all else in cable.

Sheath Leakage Res.: 10. megohms / 1000 ft. min. at 500 VDC from overall shield through sheath to outside world.

Usable Temp. Range: Suitable for continuous use from +105°C to −55°C.

Cold Bending Capability: All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C. For continuous flexing applications consult factory.

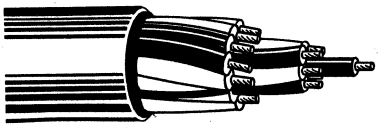
Miniature Signal & Control Cables Single Conductors (NQ Series)

EXTRA FLEXIBLE — GRAY PVC JACKET



(NQ1928J shown)

GRAY PVC JACKET

National Wire & Cable Corporation manufactures a complete line of highly flexible micro-miniature low-voltage instrument control cable. These are available as cabled pairs or singles, with optional overall shield of either foil with drain or a braided shield. Stocked with braided shields.

Conductors are stranded tinned copper with .010" wall of tough extruded polyvinyl chloride primary insulation, rated for 300 volt use at +80°C under U. L. listed style 1061.* All are color coded using ten standard colors plus white with stripes per MIL-STD-681. Coded pairs use the same sequence as type NXP and NWP.

Conductors are planetary cabled and helically laid for optimum flexibility, with a barrier under braids. Shielded cables have a tinned copper braid of 90% coverage per MIL-C-7078, with braid angles below 40° for easy pushback; or have a 100% coverage foil shield in intimate contact with a drain wire for easy termination. See Section 3 of our master catalog for relative shield effectiveness.

Outer jacket is highly flexible abrasion-resistant gray polyvinyl chloride thermoplastic, meeting the requirements of U.L. listed style 2464.**

Military certification furnished only when requested.
All materials are flame retardant and fungus resistant.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Wire also meets MIL-W-16878 type B, rated 600 volts, +105°C.

MIL-SPEC & U.L. LISTED STYLE 2464

TECHNICAL DATA (all cables)

Insulation breakdown voltage:	Greater than 3000 volts AC RMS, 60cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 pf/ft at 1kc, depending on gauge and position.
Insulation Leakage:	200 megohms/1000 feet minimum @ 500VDC from conductor to all else in cable.
Sheath Leakage:	10 megohms/1000 feet minimum @ 500VDC from shield or conductor group through sheath to ground.
Temperature Range:	U.L. rating: +80°C per U.L. style 2464. Military: Continuous use from −40°C to +105°C.
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°. For continuous flexing applications consult the factory.
Foil Shielded Cables:	The nominal overall diameter of foil shielded cables will be .006" greater than the non-shielded cables of the same conductor count and wire size.
Characteristic Impedance: (NQP Paired Cables)	Ranges from 150 ohms to 45 ohms, dependent on wire size (AWG), geometry and drive method. Consult our technical staff for data on specific cable types.

MULTI-CONDUCTOR STOCK CABLED SINGLES

Conductor sizes 28, 26, 24, 22 are 7 strand. All others 19 strand.

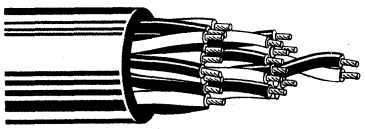
Miniature Signal & Control Cables Twisted Pairs (NQP Series)

EXTRA FLEXIBLE — GRAY PVC JACKET



(NQP1928J shown)

MIL-SPEC & U.L. LISTED **STYLE 2464**

GRAY PVC JACKET

National Wire & Cable Corporation manufactures a complete line of highly flexible micro-miniature low-voltage instrument control cable. These are available as cabled pairs or singles, with optional overall shield of either foil with drain or a braided shield. Stocked with braided shields.

Conductors are stranded tinned copper with .010" wall of tough extruded polyvinyl chloride primary insulation, rated for 300 volt use at +80°C under U. L. listed style 1061.* All are color coded using ten standard colors plus white with stripes per MIL-STD-681. Coded pairs use the same sequence as type NXP and NWP.

Conductors are planetary cabled and helically laid for optimum flexibility, with a barrier under braids. Shielded cables have a tinned copper braid of 90% coverage per MIL-C-7078, with braid angles below 40° for easy pushback; or have a 100% coverage foil shield in intimate contact with a drain wire for easy termination. See Section 3 of our master catalog for relative shield effectiveness.

Outer jacket is highly flexible abrasion-resistant gray polyvinyl chloride thermoplastic, meeting the requirements of U.L. listed style 2464.**

Military certification furnished only when requested.

All materials are flame retardant and fungus resistant.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Wire also meets MIL-W-16878 type B, rated 600 volts, +105°C.

** Jacket material is military rated for +105°C; meets MIL-I-631, Class F.

TECHNICAL DATA (all cables)

Insulation breakdown voltage:	Greater than 3000 volts AC RMS, 60cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 pf/ft at 1kc, depending on gauge and position.
Insulation Leakage:	200 megohms/1000 feet minimum @ 500VDC from conductor to all else in cable.
Sheath Leakage:	10 megohms/1000 feet minimum @ 500VDC from shield or conductor group through sheath to ground.
Temperature Range:	U.L. rating: +80°C per U.L. style 2464. Military: Continuous use from −40°C to +105°C.
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°. For continuous flexing applications consult the factory.
Foil Shielded Cables:	The nominal overall diameter of foil shielded cables will be .006" greater than the non-shielded cables of the same conductor count and wire size.
Characteristic Impedance: (NQP Paired Cables)	Ranges from 150 ohms to 45 ohms, dependent on wire size (AWG), geometry and drive method. Consult our technical staff for data on specific cable types.

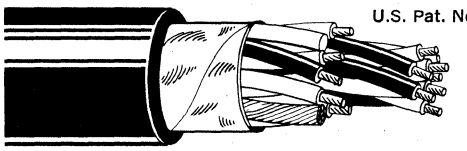
IN STOCK

Digital Data Transmission Cables

(D-200 Series)

UL AWM STYLE 2835



U.S. Pat. No. 3489844

Grey (Extra Flexible) or Black Vinyl Jackets
D-200 XX (XX designates number of pairs)
D-200 XXRF (RF designates braided shield over aluminum mylar foil shield) △

LOW VOLTAGE COMPUTER CABLE

THE D-200 SERIES CABLES ARE MULTIPLE-PAIR FLEXIBLE CABLES DESIGNED FOR TRANSMISSION OF DIGITAL PULSE SIGNALS BETWEEN A COMPUTER AND ITS PERIPHERAL EQUIPMENT.

DESIGN FEATURES OF THE D-200 SERIES DIGITAL DATA CABLE

Unlike conventional flexible cable construction, the primary features offered by the D-200 series data cable are the high and accurately controlled characteristic impedance of every pair, regardless of its position in the cable and special geometry chosen to reduce crosstalk.

ADVANTAGES

1. Less crosstalk and noise from mismatched loads, due to proper matching.
2. Uniform light loading on drivers allows direct I.C. drive, accurate prediction of current demands from power supply, and driver power dissipation.
3. Proper load match reduces re-flection and inversion noise where driver end is not matched to line. (Typical of TTL.)
4. Special geometry and pair construction provides exceptionally close capacitance balance between pair wires, reducing differential crosstalk.

USAGE

We recommend use of balanced drive and differential-input line receivers for lowest crosstalk and best pulse reproduction, utilizing the 110 ohm balanced impedance of the pairs. With such a system, TTL speeds have been used on D-200 cable at 1 mc data rates over 1000 ft.

Where the system is single-ended drive and receive, all pairs exhibit the 78 ohm impedance. Since these line receivers cannot discriminate between noise and the desired signal, crosstalk limits the cable distance over which transmission is reliable. Typical runs for DTL having 50 ns risetimes are 200 ft. Where risetimes can be slowed to longer than 100 ns, run lengths are practical to 500 ft. Without differential line reception, runs over 500 ft are not recommended for D-200 cable due to external noise aspects.

The D-210 series cable are recommended for high noise or long-run application. (Utilizing individual shields.)

Although use of balanced drive and differential line reception will avoid most noise problems, there are some installations where the expected external noise is unknown but assumed to be very great. Here, the use of data cables having individually-shielded pairs may be considered as conservative engineering practice. The assurance of a lower received noise may justify the increased size, cost and rise-time.

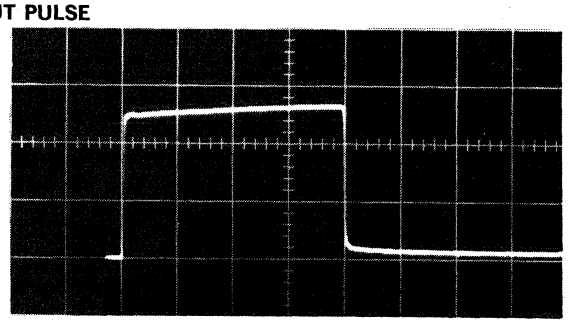
For these high noise-long run applications, Dynatronic Cable Engineering Corp has developed the D-210 series data cables. Electrical performance is essentially the same as the D-200 series cables, which use only an overall shield. △ An overall tinned-copper shield braid may be specified on either series by the suffix -RF on the part number. Standard D-200 shield is aluminum-mylar foil.

For runs of 1000-5000 ft. or where extra-fast output pulse risetime is required, we offer the D-220 series cable: a larger version of the D-200 series having improved transmission properties with sufficient mechanical strength for long pulls in conduit. Consult factory for technical data.

PULSE TRANSMISSION LOSS in D-series data cables causes a moderate amplitude loss, with definite rounding of the leading and trailing edges from 50% to 90% amplitude. The photos below (for a 1.25 megabit clock rate) show typical waveforms. The D-220 and D-222 series cables offer even lower losses than the D-200 or D-210 cables for long-run or fast-clocked applications.

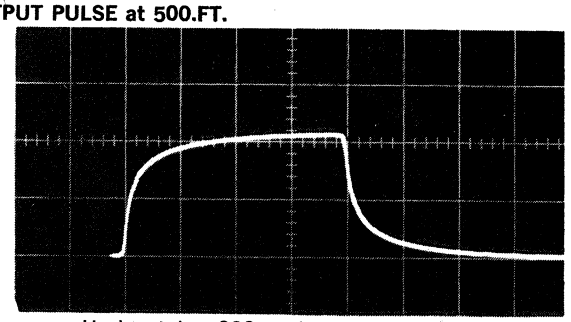
Contact our factory engineering staff for detailed pulse-shape versus distance information, or for special applications.

INPUT PULSE



Horizontal: 200. ns/cm
Vertical : 2. volts/cm

OUTPUT PULSE at 500.FT.



Horizontal: 200. ns/cm
Vertical : 2. volts/cm

We invite your telephone inquiries for technical information on data cables. Contact Mr. Frank Motley or Steve Keith in our Engineering Dept.

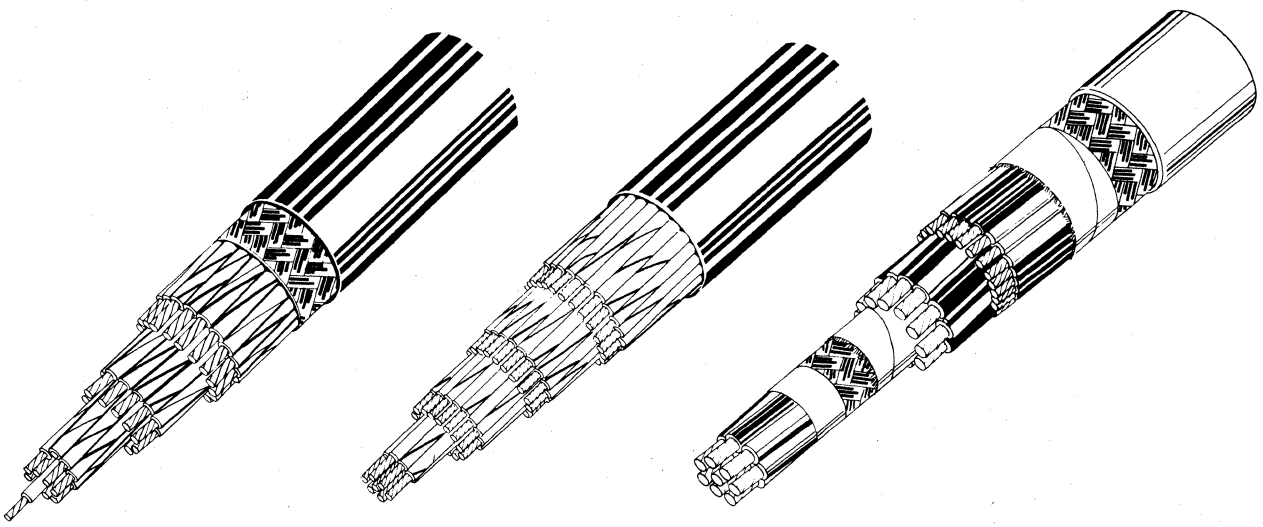
CUSTOM-MADE CABLE TO YOUR OWN SPECIFICATIONS....



COMPLETE WIRE AND CABLE FACILITIES TO MEET YOUR NEEDS

If the standard cables shown on the preceeding pages do not meet your application requirements, Custom-Made cables to your own specifications are available promptly—and at lower cost than you may suppose . . . **including cables or cable assemblies with both copper conductors, and optical fiber components.**

BECAUSE NATIONAL HAS:

1- The organization & experience to handle short-runs or rush schedules with consistent quality.

2- All types of mill machinery for fabricating cable and all intermediate operations.

3- An enormous wire inventory to draw from for material for your cable. Over 200 million feet of our own manufacture in stock.

4- Technical consultants to aid you in properly specifying your cable needs.

Mr. DESIGNER: May we suggest:

A- Ask our nearest representative for his assistance and for our larger "Engineers & Designers Master Catalog". His name and address is shown on inside back cover.

B- Call our engineering department (213-225-5611) and discuss your needs with our technical consultants. They understand your problem and may have just the answers you need.

C- Our consultants will assist you in design, obtain cost and delivery information, provide formal quotations and drawings, and assist with sales & procurement liaison.

D- On most custom cables, we can print your company name and part number at regular intervals on the outside jacket at no extra cost. This will make your packaging truly "Custom".

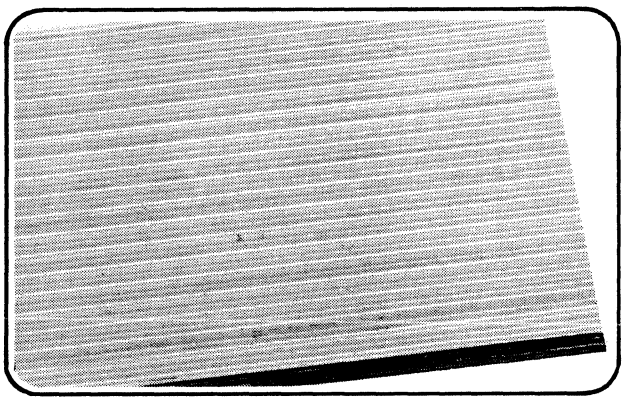
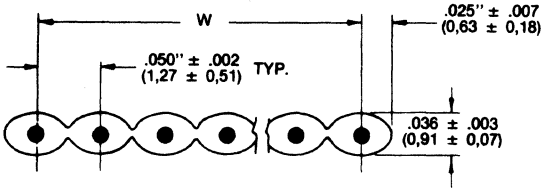
LAMINATED FLAT CABLES

GREY PVC LAMINATE
(NFG Series) UL Listed Style 2651



National Wire & Cable Corporation offers a wide variety of laminated flat cables, utilizing grey PVC insulation laminated around uninsulated stranded tinned copper conductors. The conductors are on .050" centers which make the cables compatible with most insulation displacement connectors (IDC). The cables are marked with one red edge to indicate conductor number one, and the laminate is applied in a manner to allow for simple conductor separation. Packaged in 100 foot lengths. Other lengths available on special request.



TECHNICAL DATA

Conductors:	28 AWG 7 x 36 Stranded Tinned Copper
Insulation:	Grey PVC
Cond. Spacing:	.050 ± .002
Cable Thickness:	.036 ± .003
Voltage Rating:	300V
Temp. Rating:	105 C
Impedance:	105 ohms Nom.
Capacitance:	14 pf/ft Nom.
Propagation Delay:	1.4 ns/ft Nom.

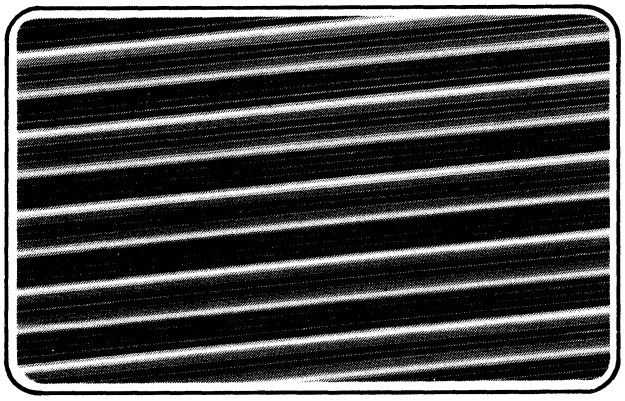
COLOR-CODED, CLEAR LAMINATE
(NFC Series) UL Listed Style 2697



National Wire & Cable Corporation offers a wide variety of flat cables, utilizing clear PVC insulation, laminated over preinsulated, stranded tinned copper conductors manufactured to UL Style 1061. The conductors are on .050" centers which make the cables compatible with most insulation displacement connectors (IDC). The preinsulated wires are color-coded for easy identification, and the clear laminate is applied in a manner to allow for simple conductor separation. Packaged in 100 foot lengths. Other lengths available on special request.

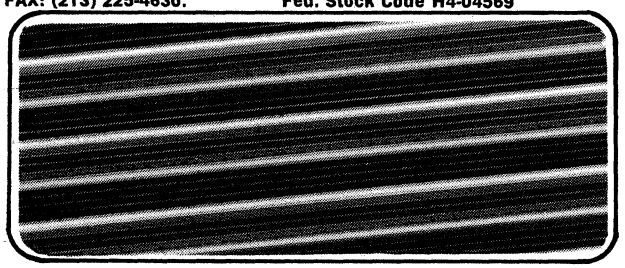
BONDED AND WOVEN FLAT CABLES



BONDED FLAT CABLES

(NFBC Series)

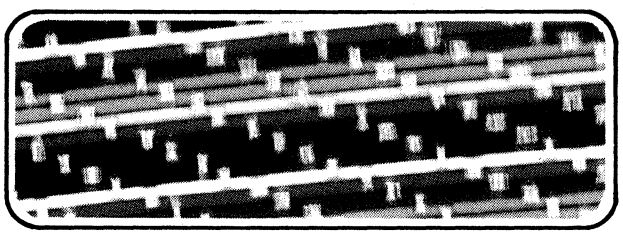
UL Listed Style 2697

National Wire and Cable Corporation offers a wide selection of bonded flat cables by bonding together preinsulated, stranded tinned copper conductors. This cable series is listed as Cable Style 2697, and can utilize any stranded PVC style of insulated wires. Stocked with UL1061 conductors, from 16–30 AWG. Other component styles available on special request. Color-coded BROWN through BLACK as shown below. Available in any number of conductors, providing total width does not exceed 4 inches. Packaged in 100 foot lengths.

PART NUMBER GENERATION

NFBC 10 20 19 B (UL 1061)
C (UL 1007)
D (UL 1015)
- Insulation Code (Select One)
- No. of Strands
- AWG of Conductors
- No. of Conductors
- Series Identification

NOTE: Certain gauges are available only in one specific stranding. Consult sales department when placing order.



WOVEN FLAT CABLES, SINGLES

(NFWS Series)

National Wire and Cable Corporation offers a wide selection of woven flat cables by weaving together preinsulated, stranded tinned copper conductors. The weave is a twill type utilizing nylon, which allows conductors to move under flexing, creating a highly flexible cable. Stocked with UL1061 conductors from 16–30 AWG. Other component styles available on special request. Color-coded BROWN through BLACK as shown below. Available in any number of conductors providing total width does not exceed 3 inches. Packaged in 100 foot lengths.

PART NUMBER GENERATION

NFWS 20 26 7 B (UL 1061)
C (UL 1007)
D (UL 1015)
- Insulation Code (Select One)

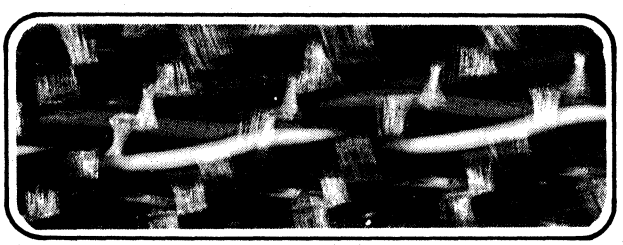
- No. of Conductors
- Series Identification

NOTE: Certain gauges are available only in one specific stranding. Consult sales department when placing order.



WOVEN FLAT CABLES, PAIRS

(NFWP Series)

National Wire and Cable Corporation offers a wide selection of woven flat cables made with twisted pairs, by weaving together the preinsulated, stranded tinned copper conductor pairs. The weave is a twill type utilizing nylon, which allows the pairs to move under flexing, creating a highly flexible twisted pair cable. Stocked with UL1061 conductors from 16–30 AWG. Other component styles available on special request. Color-coded BROWN through BLACK as shown below. The common conductor in each pair is black. Available in any number of pairs, providing total width does not exceed 3 inches. Packaged in 100 foot lengths.

PART NUMBER GENERATION

NFWP 12 24 7 B (UL 1061)
C (UL 1007)
D (UL 1015)
- Insulation Code (Select One)
- No. of Strands
- AWG of Conductors
- No. of Conductors
- Series Identification

NOTE: Certain gauges are available only in one specific stranding. Consult sales department when placing order.

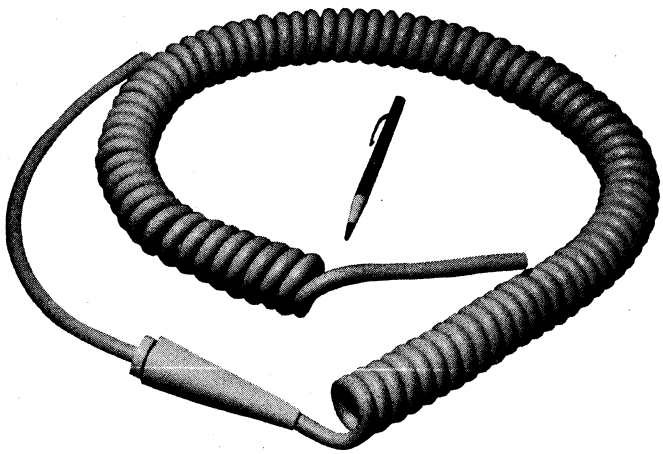
Coiled Instrumentation Cables for Custom Applications



Our new, automated coiling department is ready to design, and manufacture coiled instrumentation cables for your specific requirements. These cables are available in any number of conductors, and in gauge sizes 18 through 30 AWG. They are designed for high reliability, ultra-flexible long-life applications, as encountered in computer interconnects, bio-medical electronics, and optimum retractability, and general control cable use. Call our technical staff to discuss your custom application!

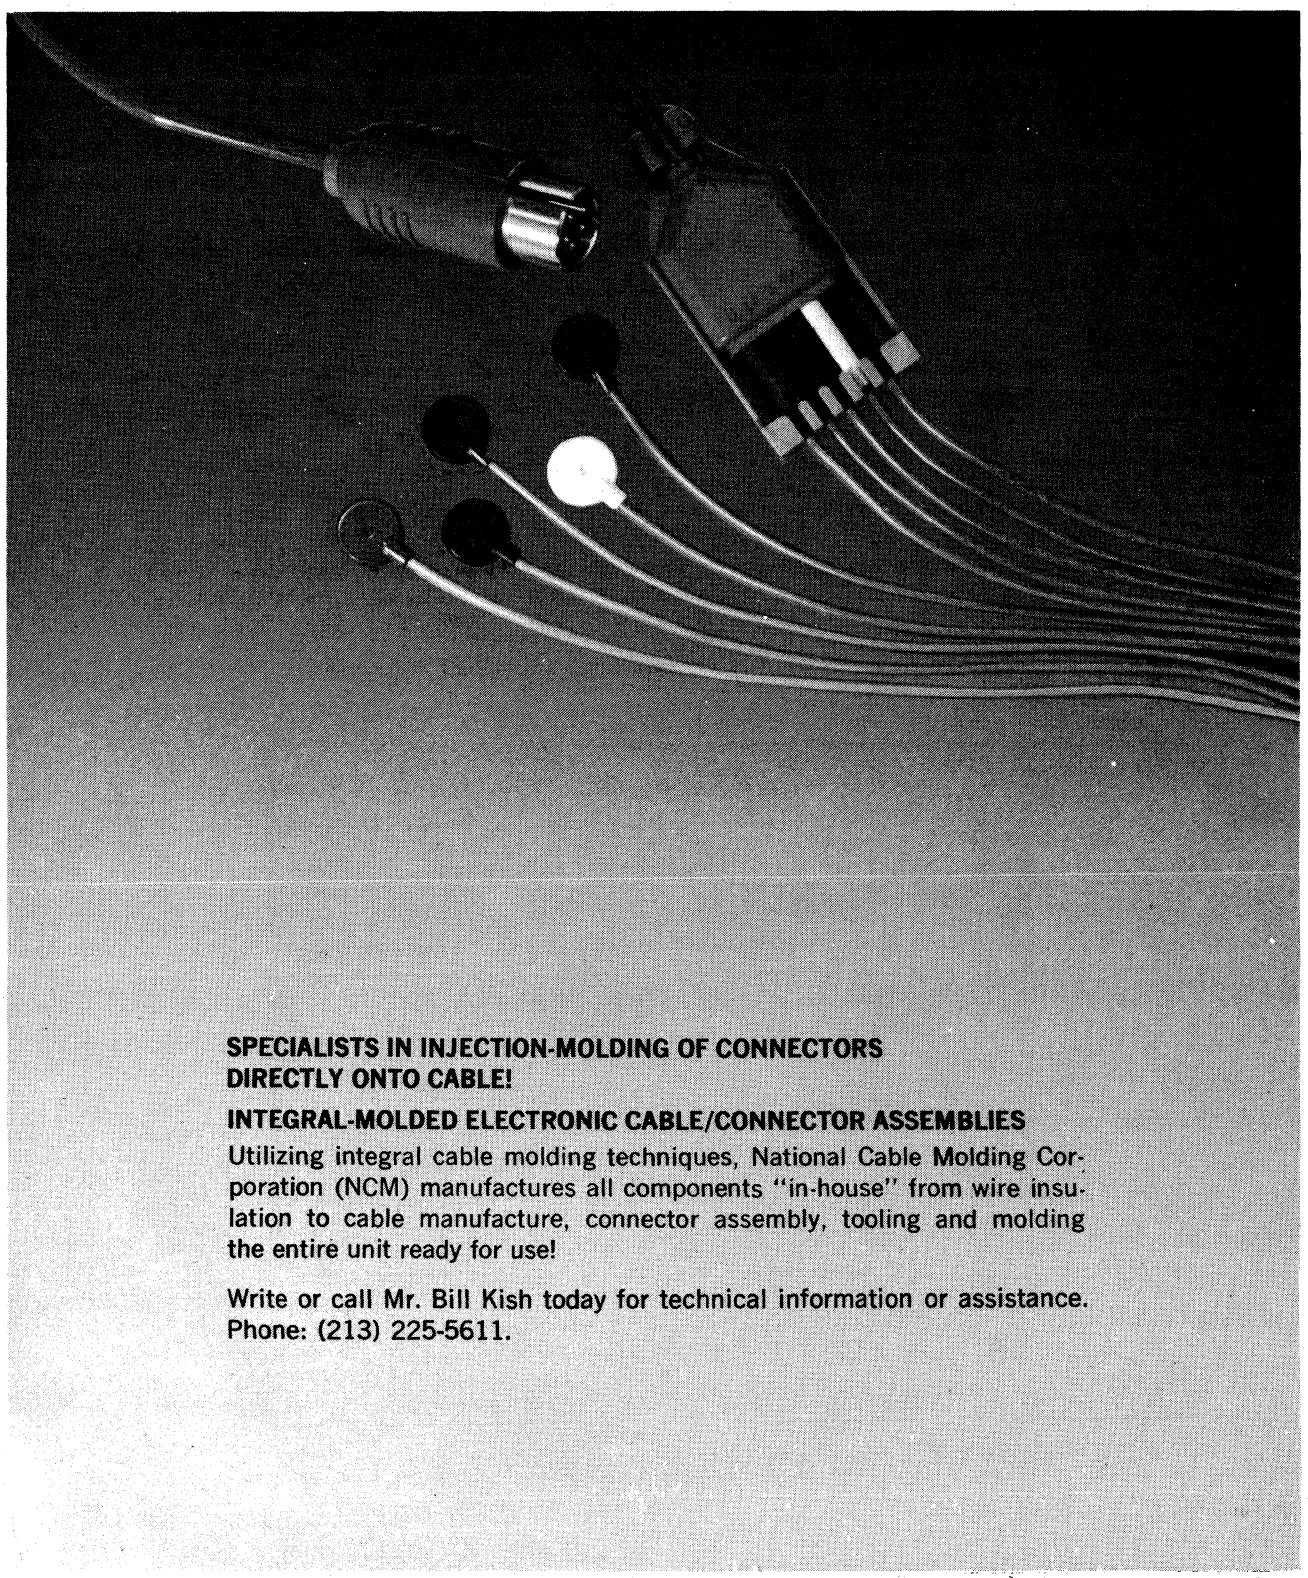
Molded Instrumentation Cables for all Types of Medical & Electronic Applications



SPECIALISTS IN INJECTION-MOLDING OF CONNECTORS DIRECTLY ONTO CABLE!

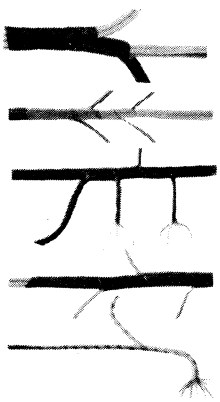
INTEGRAL-MOLDED ELECTRONIC CABLE/CONNECTOR ASSEMBLIES

Utilizing integral cable molding techniques, National Cable Molding Corporation (NCM) manufactures all components "in-house" from wire insulation to cable manufacture, connector assembly, tooling and molding the entire unit ready for use!

Write or call Mr. Bill Kish today for technical information or assistance. Phone: (213) 225-5611.

Heli-Tube®

SPIRALLY CUT CABLE WRAP for bundling wires, hoses, and cables.



Exceptional Features and Uses:

- **Bundles wires, cables or hoses firmly, allowing flexibility.**
- **Organizes messy clusters of wires.**
- **Resists abrasion and protects steel braided hose.**
- **Wire break-outs can be in any orientation.**
- **Colors available for color coding.**

NOMOGRAPH VOLTAGE DROP

NOMOGRAPH OF VOLTAGE DROP ACROSS LOAD SUPPLY LEADS
(as a function of wire size and load current)

THIS NOMOGRAPH CAN BE USED TO FIND:

Maximum current carrying capacity recommended for any standard wire size.*

1) With a straight edge, connect from the wire size on Scale 2 to the point "A" on Scale 3.
2) Read I_{max} on Scale 1.

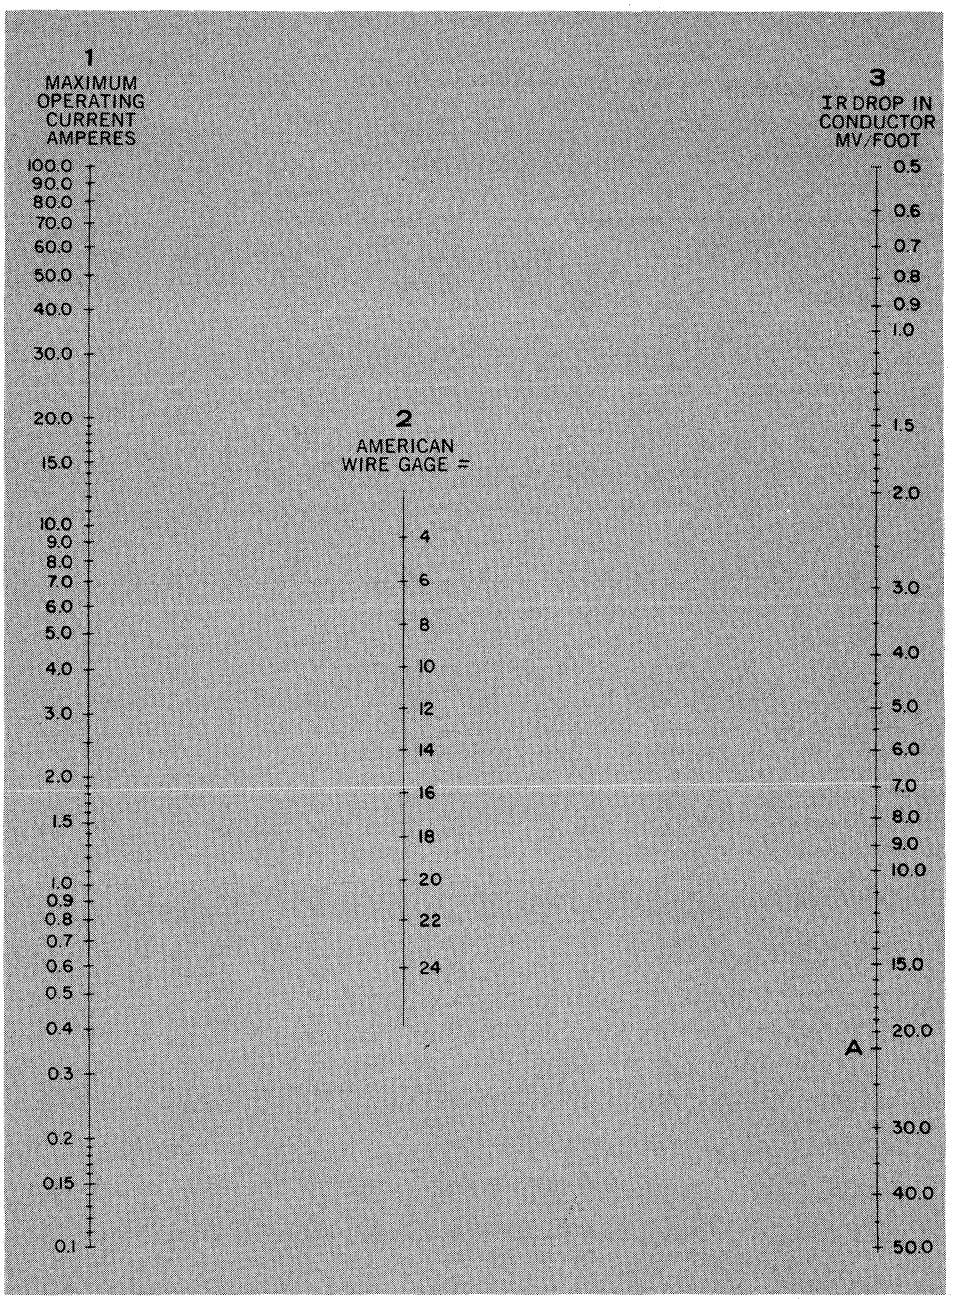
Voltage drop in millivolts per foot for known wire size and operating current.

1) With a straight edge, connect the known current on Scale 1 and the wire size on Scale 2.
2) Read voltage drop on Scale 3.

Wire size required for known operating current and known maximum tolerable voltage drop across supply leads.

1) Determine maximum tolerable drop in millivolts **per foot** of lead (sum of positive and negative leads).
2) Connect the value on Scale 3 (as determined in step 1) to the known current on Scale 1.
3) Read wire size on Scale 2.

** Based on an arbitrary minimum 500 circular mils per ampere. High-temperature class insulation will safely allow higher currents.*



NOTE: A voltage stabilized Power Supply controls the voltage across its output terminals. Hence, the wire conductors used to connect the load must be considered as part of the load. At high load currents, the voltage drop across the supply leads may appreciably degrade stablization at the load. Kepco models equipped with the *remote error sensing* feature can automatically compensate for voltage drops of up to 500 mV across each load supply lead.

THERMOCOUPLE WIRE AND CABLE

✓ ***OMEGA® Features:***
Uninsulated Base Metal Thermocouple Wire from .0005 to .032 inch diameters

✓ ***Insulated Duplex Thermocouple Wire—Insulations Include:***

- ***Polyvinyl***
- ***Nylon***
- ***Teflon***
- ***Glass***
- ***Ceramic***

✓ ***Metal Clad Thermocouple Cable 304 SS and Inconel 600 OMEGACLAD™ in Diameters from .010 to .250***

OMEGA® offers the Largest Selection of Products for Temperature, Pressure, pH, Flow Measurement and Control.

Thousands of Products Ready for Immediate Delivery!

PANDUIT® WIRING PRODUCTS

CABLE TIES
Designed to increase productivity and reduce total installed cost

The Largest Selection of Sizes, Styles, Colors and Materials
■ For bundle diameters up to 13″ ■ Locking and releaseable styles ■ Low threading force ■ Finger grip tip ■ No sharp edges ■ Bent tip ■ Choose from nylon, polypropylene or fluoropolymers to meet application environments ■ Choose the color to blend in with the application ■ Meet all applicable military and U.L. specifications.

Clamp Ties
Flexible head permits mounting *before* wire installation. Eliminates the need for inventory of various fixed diameter clamps.

Pushmount Ties
Available in two styles. Integral mounting device eliminates need for separate mounting hardware. For bundle diameters to 1¾″ and panel thicknesses to .125″.

Marker Ties
Clean, permanent identification of wire bundles and harnesses. Convenient, marker and tie in one.

Mounting Accessories
The largest selection used with or without cable ties— adhesive backed mounts, tie mounts, tie anchors, low profile mounts, control panel mounts, adhesive backed cord clips, fixed diameter clamps, flat cable mounts, flat cable clips in wide range of sizes.

Cable Tie Installation Tools
Complete line of tooling, from simple hand tools to semi-automatic and automatic installation equipment, including systems designed for robotics applications.

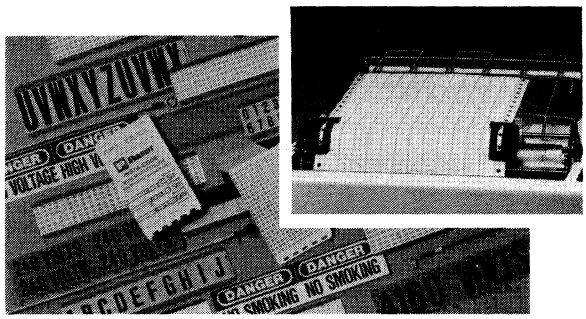
PANDUIT® WIRING PRODUCTS

INSTA-CODE® Wire and Identification Markers



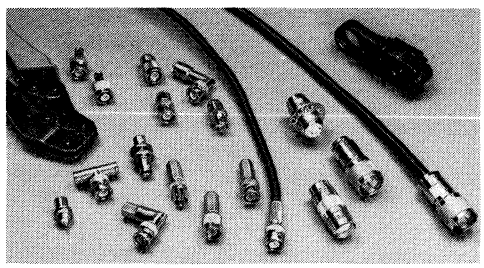
Crisp legends—complete line—proven service
Wire markers available in vinyl cloth, vinyl polyester, aluminum or acetate, on dispenser cards with full or half sizes, in a large variety of legends.

EDP printable labels for in-house custom capability. A large selection of sizes, materials and colors.

Clip-on markers—seven sizes from .075″ up to .617″.

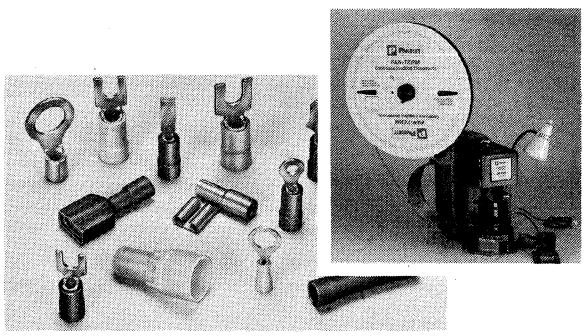
Custom markers—any legend, size or color to meet your specific requirements.

Coax Connectors



Designed to provide fast, reliable connections
- Twist-on, wedge clamp and crimp types
- BNC, TNC or Twinax
- Coax sizes RG-58, 59 or 62/U and industry standard Twinax
- Plugs, jacks, adapters and receptacles
- Individually packaged for convenient storage and use
- Stripping and crimping tools

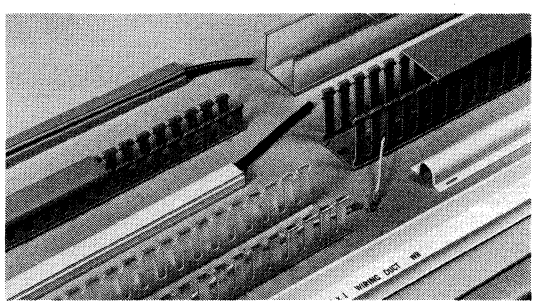
PAN-TERM® Terminals



- Complete line of terminals, disconnects, splices and wire joints for #26 through #2 AWG wire
- Funnel entry available on most terminals and disconnects to speed assembly
- Electrolytically refined copper for optimum crimping, low resistance and high conductivity
- All applicable sizes UL listed and CSA certified and meet MIL specs

Continuously Molded Terminals and Disconnects

For high volume production, terminals and disconnects furnished on reels
- TERMO™ continuously molded, barrel insulated terminals
- DISCO™ continuously molded, barrel and fully insulated disconnects
- Guaranteed alignments due to molded-in carrier strip
- Color coded insulation speeds wire size identification and die selection
- Universal applicator, combined with a minimum number of die sets, speeds changeover for greater productivity and versatility



PANDUCT® Plastic Wiring Duct

The number one name in wiring duct—the largest selection of sizes, styles, colors and materials.
- Type "E" features snap-in slot design to hold break-out wires and assure complete accessibility
- Complete line of accessories available for installation
- Universal mounting holes for maximum design and layout flexibility
- Standard color: light gray; white and dark gray available
- Also available: Type "S" solid wall duct
  Type "D" round hole duct
  Type "NE" & "NS" chlorine-free high temperature duct
  Type "PE" & "PS" clear polycarbonate high temperature duct
  and . . . matching non-slip covers for all styles.
  Outdoor materials also available.

r.m.s. voltage	$V_{r.m.s}$	volt	V	see e.m.f.
slit separation	s	metre	m	fundamental unit
tension	T	newton	N	see force
temperature, Celsius	θ	degree C	°C	from kelvin
temp. interval	θ	degree	° or K	—
temp. absolute	T	kelvin	K	fundamental unit
thickness	d	metre	m	fundamental unit
time	t	second	s	fundamental unit
torque	T	Nm	—	see moment
turns ratio	T	*a ratio*	—	n_{sec}/n_{prim}
(unit of electricity)	—	kW h	—	kilowatt × hour
velocity	u,υ	ms^{-1}	—	distance/time
velocity, angular	ω	$second^{-1}$	s^{-1}	angle/time
velocity, e.m.waves	c	m s^{-1}	—	—
velocity of sound	υ	m s^{-1}	—	—
volume	V	metre cubed	m^3	l × b × h
wavelength	λ	metre	m	fundamental unit
work	w	joule	J	force x distance (Nm)
weight	W	newton	N	kg m s^{-2} or mg

INTERNATIONAL Cords, Cordsets and Cordage

1. Detachable cordsets:

Detachable cordsets offer flexibility for both the equipment manufacturer and user.

The manufacturer can meet most international cord requirements with just one product model that is equipped with an IEC 320/CEE-22 connector. Then a cordset with the mating IEC 320 connector and the appropriate international plug can be specified at the time the product is shipped to the end user. The table below describes eight standard PCC cordsets.

International cordsets have some limitations. First, current ratings are limited to 6 amps by European agencies. The limitation is derived from restrictions placed on the IEC 320 connector. Equipment which draws more than 6 amps at 220 VAC should be equipped with permanently installed power cords described below. (For applications up to 10 amps, some countries allow the use of a new replaceable connector which is patterned after the IEC 320 unit but which is polarized to prevent insertion of the 6 amp models.)

Secondly, addition of the connector adds to the cost of the power cord. Typically, the IEC 320 connector which is molded to the cord adds 50-75 cents to the cord cost. A panel mounting IEC 320 receptacle is about 50 cents. Both prices assume purchases in the 100-piece range. Clearly, a trade-off between added cost and manufacturing flexibility has to be made.

(See our North American cordsets on next page.)

NOTE 2: Conductors are color-coded blue, brown, green/yellow.

2. Unterminated IEC 320/CEE-22 cords:

With some products, export volume does not justify stocking different cordsets for even major foreign markets. In other situations, sales volume in Germany and the U.K. may be large enough to justify unique cordsets, whereas export volume to Switzerland, Denmark, Australia, and Israel, for example, are not sufficient.

In both of these cases, the equipment manufacturer can specify the model 86525000 unterminated IEC 320/CEE-22 cord for use in low-volume markets. Cordsets described in the previous section would be specified for high-volume markets.

The disadvantage to this approach is, of course, that your customer or sales people must attach a suitable power plug to the cord. The decision on this issue will depend on the cost of stocking an additional cordset vs. the size of the affected market segment and the cost of field termination. (Call us for our brochure on international plugs and sockets.)

TABLE 2

86525050 Universal

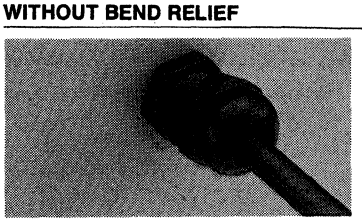
Part Number	Color	Length	Conductor Size	Current Rating	Approval(s)
86525050	Black	2.5 meters (98.4 inches)	0.75 mm²	6A	VDE, OVE, KEMA, CEBEC, NEMKO SEMKO, FEI, SEV, UTE

NOTE: Free end on model 86525000 is stripped 50/5 mm.

Strain Reliefs

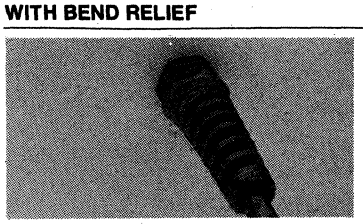
Power supply cords all require some type of mechanical mounting device which positively secures them to an enclosure or piece of equipment. PCC strain reliefs provide an effective cable grip with or without an integral bend relief. Furthermore, the strain relief comes with a neoprene compression gland which prevents moisture intrusion along the cord when used with round cordage and when the cord and strain relief have been selected and assembled properly. UL recognized and CSA certified.

WITHOUT BEND RELIEF



PCC Part No.	Cordage O.D. Range
85810010	.187-.312 in. 4.7-7.9 mm
85810020	.231-.394 in. 5.9-10.0 mm
85810030	.270-.480 in. 6.9-12.2 mm

WITH BEND RELIEF



PCC Part No.	Cordage O.D. Range
85810040	.187-.312 in. 4.7-7.9 mm
85810050	.231-.394 in. 5.9-10.0 mm

From Panel Components Corporation

3. International power supply cords:

Permanently installed power supply cords are specified when the equipment requires more than 6 amps at 220-240 VAC. Generally, for applications in which the current requirement is 6-10 amps, 1.0 mm^2 conductors are specified. For applications rated at 10-16 amps, 1.5 mm^2 conductors should be specified. For comparison purposes, 16 AWG is 1.23 mm^2 and 14 AWG is 1.95 mm^2. (Note: the limit for portable equipment in Switzerland is 10 amps; in the U.K., 13 amps. In most other European countries, the limit is 16 amps. In equipment that draws greater amounts of current, the equipment must be permanently connected to the power system or connected via an IEC 309 connector pair [see PCC cat. pages section 2100.])

Power supply cords may also be used to reduce component costs, especially in very high-volume production. This is particularly true in Class II (two wire, ungrounded) appliances. The model 86532000 cord described below is intended for these applications.

The power supply cords illustrated below are supplied with standard cut and strip terminations (50/5 or 50/8 mm) on the free end. Panel Components will customize these cords to meet your requirements.

4. International cordage:

When neither a molded power supply cord or cordset is suitable, international cordage with appropriately sized conductors may be the best alternative. This cordage is tested and certified to HAR (HD-21) standards as written by CENELEC.

CABLE **Universal**

*86010081	3 x 1.50	16A	8.5 mm	Gray	PVC	H05VVF3G1.50	14 AWG
86010121	3 x 2.50	25A	10.2 mm	Black	PVC	H05VVF3G2.50	12 AWG

Four and five-wire cordage is used in 3-phase applications. The cordage below complies with CENELEC requirements.

TABLE 5 – FIVE WIRE CORDAGE FOR 3-PHASE APPLICATIONS

Part Number	Conductor (mm^2)	Max. Curr.	O.D.	Jacket Color	Jacket Material	HD-21 Number
86010311	5 x 0.75	6A	8.3	Black	PVC	H05VVF5G0.75
86010331	5 x 1.00	10A	8.8	Black	PVC	H05VVF5G1.00
*86010351	5 x 1.50	16A	10.4	Black	PVC	H05VVF5G1.50
*86010371	5 x 2.50	20A	12.4	Black	PVC	H05VVF5G2.50
*86010410	5 x 4.00	32A		Black	Rubber	H07RNF5G4.00

(rubber insulated, rated at 450-750V)

*These sizes can be used with IEC 309 plugs, sockets and connectors for use in high power mains connections. See our ad in EEM section 2100.

Custom Cord Termination, Preparation And Packaging Services

We offer cords terminated in accordance with special requirements, i.e., special lengths, special cut and strip requirements, solderless terminals, special labeling, packaging, coiling and hanking. We specialize in short runs of 500-1000 pieces with quick turn-arounds. No minimum order.

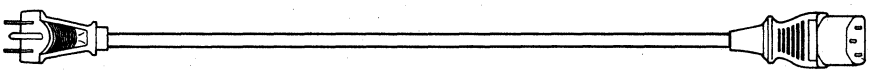
PANEL COMPONENTS CORPORATION P.O. Box 6626, Santa Rosa, CA 95406 • (707) 523-0600 • TX 176-747

North American Cordsets, Adapter & Jumper Cords

North American Cordset P/N 86537030

Standard North American cordset with NEMA 5-15P plug, IEC 320/CEE-22 connector and SJT cordage, rated for use at 10 amps.
Approvals: UL recognized; CSA certified.
Cordage specifications: see below
Delivery: stock to 10 weeks

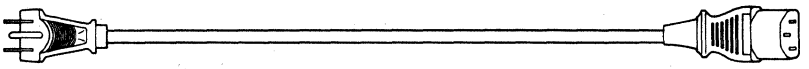
Model	Conductor Size	Maximum Current Rating	Color	Length (± 4 inches)	Termination/ Drawing #	Delivery Status
86537030	3 x 18 AWG	10 Amp	Black	8 feet	CEE-22	Standard



North American Cordset P/N 86551000

Standard North American cordset with NEMA 5-15P plug and IEC 320 connector. Similar to P/N 86537030 above but 6″ shorter and utilizing lighter-weight SVT cordage.
Approvals: UL recognized; CSA certified.
Cordage specifications: see below
Delivery: stock to 10 weeks

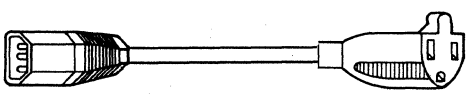
Model	Conductor Size	Maximum Current Rating	Color	Length (± 4 inches)	Termination/ Drawing #	Delivery Status
86551000	3 x 18 AWG	10 Amp	Black	7′ 6″	CEE-22	Standard



IBM PC* Adapter Cord P/N 8656000

Designed for use with an IBM PC* and a monitor, printer, or other accessory which has a permanently installed U.S. power supply cord, this adapter cord has a NEMA 5-15S socket on one end and a male IEC 320 connector on the other. Note: accessory should not draw more than 750 mA or the accessory power outlet may become overloaded.
Approvals: UL recognized; CSA certified.
Cordage specifications: see below (SJT)
Delivery: stock to 10 weeks

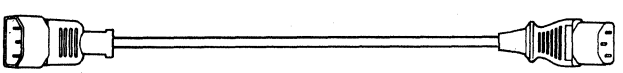
Model	Conductor Size	Maximum Current Rating	Color	Length	Plug End Termination	Connector End Termination	Delivery Status
865600000	3 x 18 AWG	10 Amp	Black	1 foot	NEMA S-15S	Molded-on male IEC 320/ CEE-22	Standard



Accessory "Jumper" Cord P/N 86548030

Intended for use in accessory power applications, this jumper cord has a male IEC 320/CEE-22 connector on one end and a female IEC 320 connector on the other.
Approvals: UL recognized; CSA certified.
Cordage specifications: see below (SJT)
Delivery: stock to 10 weeks

Model	Conductor Size	Maximum Current Rating	Color	Length	Plug End Termination	Connector End Termination	Delivery Status
86548030	3 x 18 AWG	10 Amp	Black	1 meter	Male IEC 320/ CEE-22	Molded-on female IEC 320/ CEE-22	Standard



Cordage Specifications:

Cordage compiles with UL 817 and CSA C22.2 used in cordsets on this page. Color-coding of conductors: brown—line; blue—neutral; green/yellow—ground.

Conductor size	Current rating	Stranding	Jacket	Outside Diameter
3 x 18 AWG	10 Amp	41 strands of 0.16 mm O.D.	PVC	8 mm (± 0.3 mm)

The Wire of the Future Here Today!

MHW
MICROMINIATURE HOOK-UP WIRE

Using the best insulation known to man and capitalizing on experience in the insulating of Teflon®, dating back to 1951, Phoenix Wire has developed a Multi-layer thin wall wire to aid in miniaturization.

● 300 Volt Service ● Operating temperature – 90° to + 260°C ● Silver Plated Conductor ● Multi-layer TFE-Teflon® insulation insures uniformity, quality, and concentricity ● Extreme Flexibility; long lengths ● No danger from Soldering Irons ● Chemically Inert — Weather resistant, non-flammable; zero moisture absorption; natural lubricity ● Available in 10 Bright colors ● Space & Weight savings invaluable in miniaturization programs ● Parallel flat, triangular, and twisted multi-conductor cables available.

POWER CORDS

Power Dynamics now offers a line of internationally approved Cord Sets, consistent with our line of IEC Connectors. Selection of the proper Cord Set allows your international customer the convenience of a finished product ready for use immediately upon unpacking. The proper selection of a Cord Set also makes the product easier to use by overseas customers and enhances its overseas marketing value.

Power Dynamics offers seven basic Cord Sets to meet most international requirements. Each Cord Set is molded to indicate the appropriate National Safety Agency approvals as follows:

UNITED STATES	UL	BELGIUM	CEBEC	NETHERLANDS	KEMA

RICHARDS

Quality Thermocouple Wires

Bare Wire
is available in Types B, E, J, K, N, R, S, T and W5R in gauges 38 to 6.

Insulated Thermocouple Wire
is available in Types E, J, K and T, gauges 30 to 14.

Extension Wire
is available in Types BX, EX, JX, KX, NX, RSX, TX and W5RX gauges 20 to 14.

Insulations
available are Ceramic fibre, high temperature glass fibre, Silicon impregnated fibre glass, Kapton PVC, Extruded teflon, Fused tape teflon, and Vitreous Silica fibre.

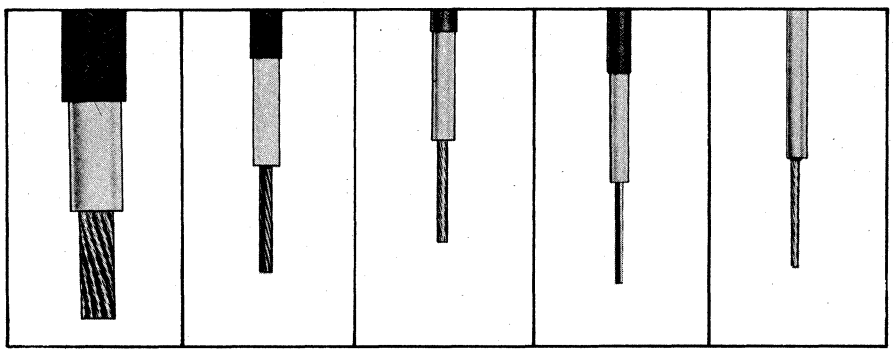
ROWE KNOWS WIRE AND CABLE

High Temperature silicone rubber wire and cable.

Rowe's silicone rubber insulation offers better performance and longer life than natural rubber or thermoplastic insulation. For example, our high temperature wire and cable is: heat stable to 200°C and flexible to −90°C, unaffected by severe thermal cycling, ultraviolet radiation, ozone or corona, resistant to ageing, moisture and chemicals, highly flame retardant and tough enough for unbraided lead wire.

Choose from a variety of UL listed styles or ask us to design one that meets your special requirements.



Power cable for 600 volts +.

Appliance & fixture wire for 300 volts +.

Apparatus & motor lead wire for 600 volts +.

Lighting wire for 600 volt transmission with solid tinned copper conductor, silicone rubber insulation and fiberglass braided covering.

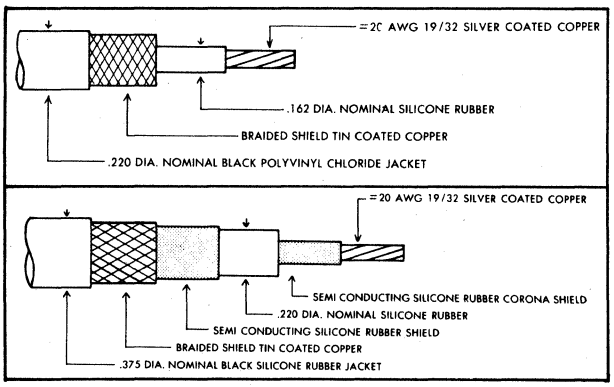
High Temp NB especially suited for motor lead wire. No braided covering necessary. Tinned copper, stranded or solid tinned copper conductor. Silicone rubber insulation in 10 colors.

All the above wire and cable feature tinned copper, stranded conductors, silicone rubber insulation, with fiberglass braided covering.

Hi-V cable, wire, and interconnections.

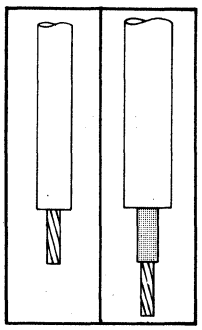
Well suited for a variety of industrial and military applications including accelerators, radar, x-ray, ECM and others. Hi-V combines semi-conducting, corona-suppressing layers with thermosetting materials for noise-free, corona-free cable and wire. It is available in single conductor, coaxial and triaxial configurations.

COAXIAL.



Features: 5-100KV minimum voltage ratings, 8-22 AWG corona-free and ozone resistant, 80°C to 200°C operating temperature range. Excellent for high pulse applications and for use with Rowe high voltage miniature coaxial connector series, G series connectors, Hi-pulse 40KV series and Rowe R75 connector series. All exhibit good corona-free RFI-EMI capabilities and have excellent flexibility properties.

SINGLE CONDUCTOR, UNSHIELDED.



Features: 5-60 KVDC minimum voltage ratings, 10-20 AWG corona-free, ozone-resistant material, 200°C operating temperature, excellent flexibility at high and low temperatures.

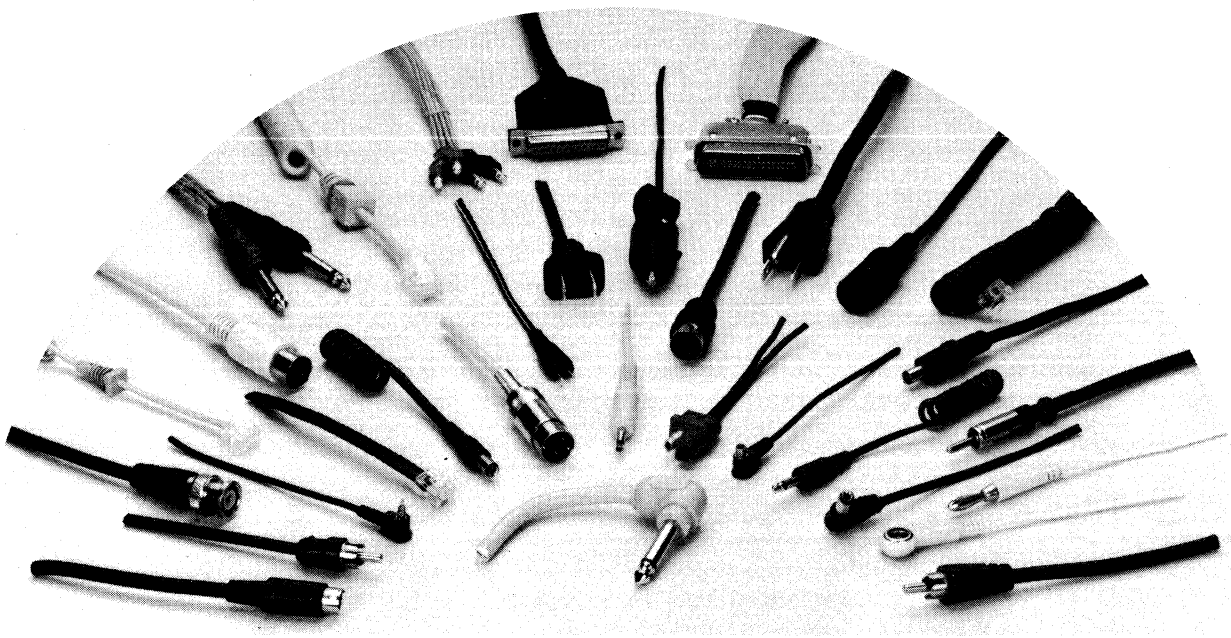
CORD SETS AND CABLE ASSEMBLIES



TELECOMMUNICATION

Coiled or straight; round, flat or oval; copper, stranded or tinsel. Available with 4, 6 or 8-position modular plugs or spade lugs, keyed or unkeyed to mate with any standard modular connector.

AUDIO

A wide variety of molded plugs and in-line jacks for stereo or mono are offered shielded or unshielded with single or multi-conductors.

ZIP

Manufactured in standard or custom lengths, gauges, insulation thickness and jacket colors. Also available with molded DC plugs (2.1mm and 2.5mm) or phone plugs (2.1mm, 2.5mm, 3.5mm and 6.3mm). For use with wall-plug transformers.

COMPUTER and VIDEO

Designed to interface with all major computer/video products. Manufactured with molded or crimped "D" connectors, from 9 to 50 pins, male or female, plastic or metal, for round or flat cable. Teminations may be low-profile, edgewise or multipolar. DIN cables produced to spec and available with shielding.

POWER

Custom made to specified current and temperature ratings or produced in standard types including SPT-1, SPT-2, ST, SVT, SJT, XT or PXT with UL/CSA approval.

Cord sets and cable assemblies may be ordered to OEM specifications — length, AWG, number of conductors, color, etc. All Shogyo products are manufactured under one roof and quality assurance is 100% guaranteed.

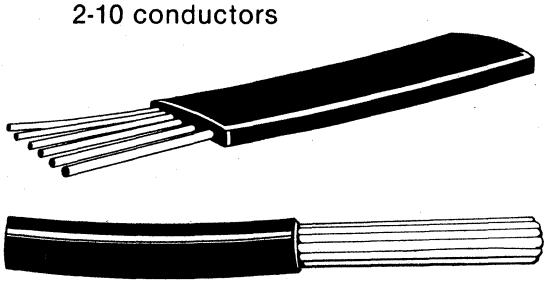
Virginia Plastics Company U.L. Recognized Modular Wiring Harnesses.

To meet your interconnection wiring needs Virginia Plastics provides the complete system. A complete modular interconnection system is reliable, inexpensive and simple to install. We can meet your needs for FCC approval. Virginia Plastics has two different types of cable material: A) Single Shielded, and B) Non-Shielded.

Flat/oval and round multi conductor
2-10 conductors

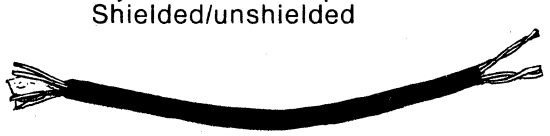


Data transmission/telecommunications

Aluminum/Mylar/Aluminum Foil Tape is wrapped around the conductor with a minimum overlap of 20%. Each signal conductor in the conductor bundle is in intimate contact with the shielding tape. The shield ground (drain) conductor is in high compression contact with the shield tape at any and every point along the length of the cable.

Multi purpose data
2-10 conductors—shielded

LAN Systems twisted pair
Shielded/unshielded



Local area networking/impedance matched data transmission

MINIGLOSSARY CONNECTORS

Connector terminology is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

Shape—Circular, cylindrical, and rectangular.

Electrical application—High voltage, RF, microwave, input/output, etc.

Mechanical application—Printed circuit, rack & panel, cable, etc.

Conductor type—Coaxial, flat cable, ribbon cable, flex circuit, etc.

Termination method—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

Contact: The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination*. This is the point where the wires or PC board is attached to the connector.

ents: Often called *con-* ...es the amount of al- ...ement within the ...s self-alignment.

Male vs. female: In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

Closed entry: A female contact which prevents entry of a male contact larger than a specific size.

Open entry: A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

Hermaphrodite: Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

Hermetic seal: Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

Waterproof seal: May or may not be truly *waterproof*. May prevent easy entrance of casual water by means of a rubber or other boot.

Printed circuit connector: Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

Edgeboard. May be called *edge* or *card*. The printed circuit (PC) board edge enters the connector.

Two-piece: One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

Readout: Describes the arrangement at the terminating edge of a PC board. May be single or double. A double readout PC board has termination strips on each side not usually interconnected.

Ribbon connectors: A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

Ribbon contact connector: Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

Solderless terminal: Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement.*

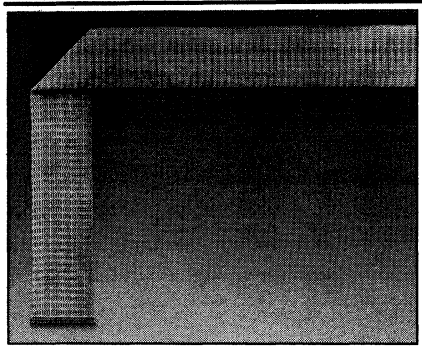
Crimp termination: A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

Insulation displacement: Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

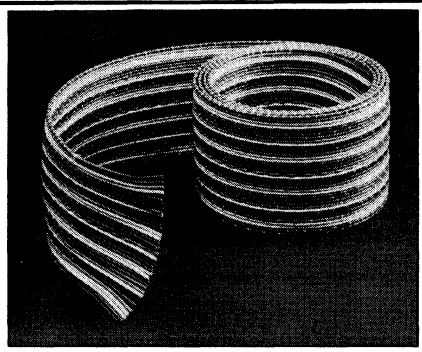
Service rating: The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage.* Can be confused with the term used to describe how many times a connector may be mated and separated.

Withstanding voltage: Also called *test voltage.* The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

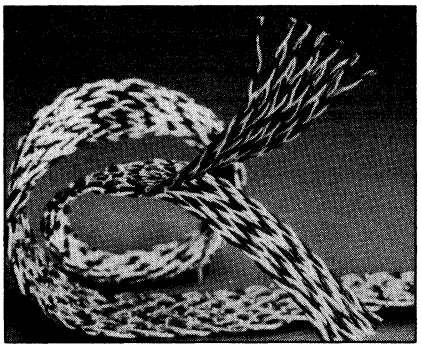
C-1925



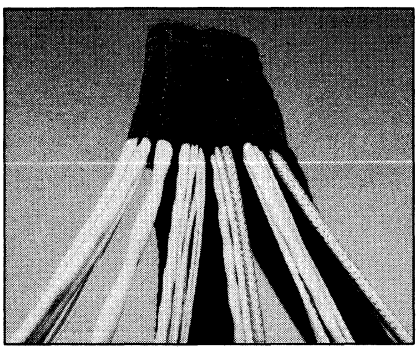
Space-Mizer™ Cable



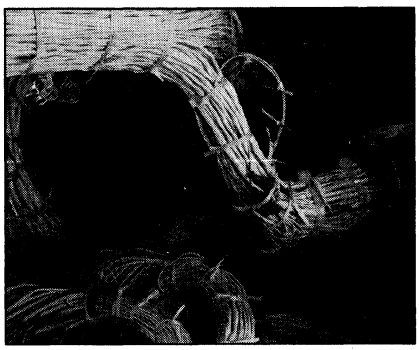
Woven Ribbon Cable



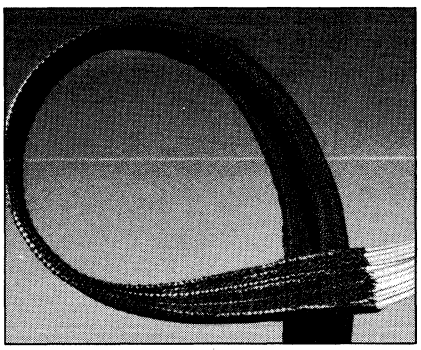
Multi-Layer™ Cable



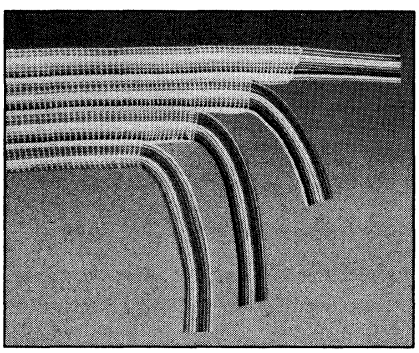
Dense-Pak™ Cable



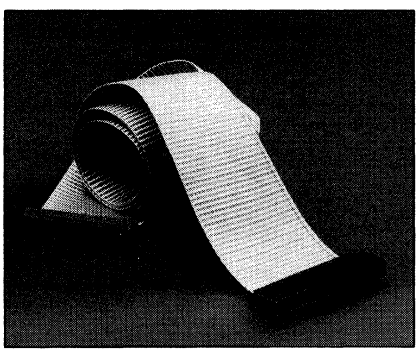
Custom Harnesses



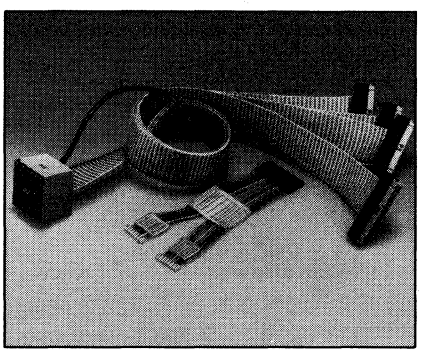
Flat-To-Round™ Cable



Programmed Breakouts



Controlled Impedance Cable



Test & Instrumentation Cable

We take on cable problems, and weave 'em all behind us.

Our product is woven cable, but our business is solving interconnect problems. (Including those that non-woven cable simply can't solve.)

Got a product design with severely limited internal space? Our Dense-Pak™ Cable puts more conductors in less space than any other round-wire product.

Need cable with both hinge flexing and all-direction flexibility? Our Flat-To-Round™ Cable gives both.

Tired of wrestling with predetermined lengths of twist and flat cable? Switch to our Space-Mizer™ Cable, and terminate to exact lengths — with standard IDC connectors.

For solutions, call us! We've been solving problems with woven cable longer than anyone else. So we're that much closer to solving yours. Call now.

SUPER SAVER!

Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on a copy of the IC Master. The Master will save you both time and money. Here's how.

The Master list every single IC you can buy. Better yet, the Master lists ICs by *function*. You know what you want to do. The Master tell you who makes what you want to do.

There's more! The Master lists every known alternate source to every intgrated circuit. If somebody makes a substitute for an IC, the Master tell you. Fast!

to find a custom or semicustom IC? The ...ls you how to go about it. Want to design ...e Master tells you who makes the tools ...about it.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the systems work.

There's more! The Master has a section on microprocessor development tools. There's another section on microcomputer boards. There's a section on applications notes.

If your question has anything to do with integrated circuits, you need the IC Master. Order your copy now. . . . Call 516/227-1300. The operator will answer, "Hearst Business Publishing." Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, write to Marie, Hearst Business Publishing, 645 Stewart Ave., Garden City, NY 11530. Order forms for the IC Master will be mailed to you promptly.

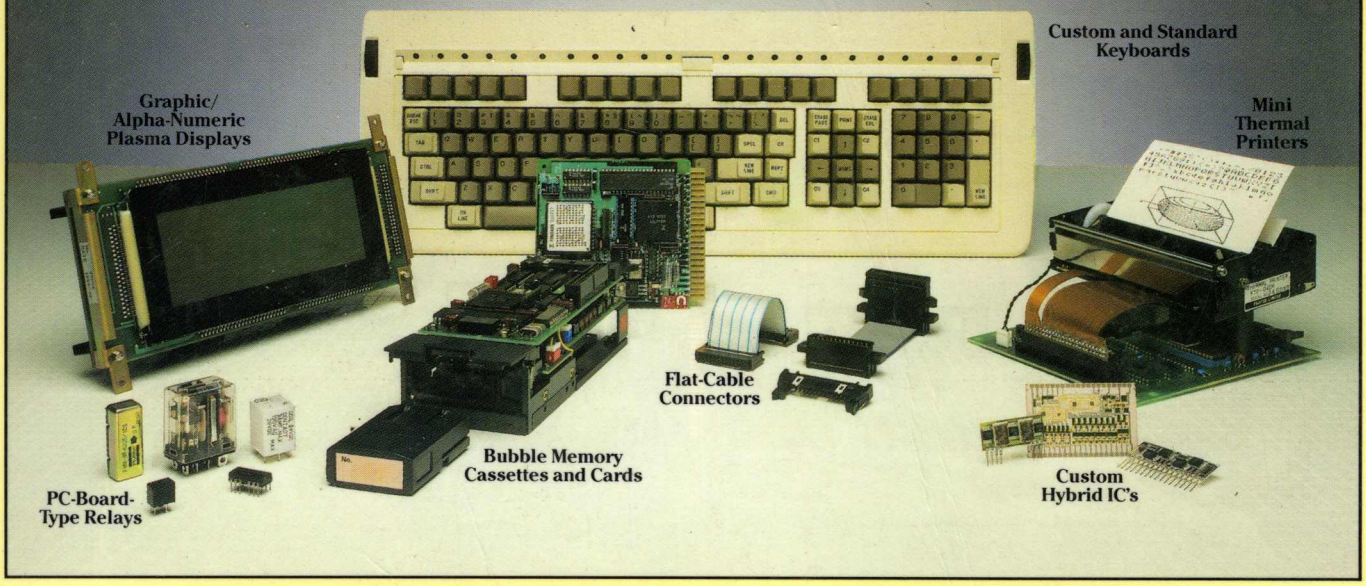
Products of Superior Quality Begin with Fujitsu Components



Design them in. They don't let you down.

PC-Board-Type Relays • Electromechanical, Reed, Mercury-Wetted • UL Recognized, CSA Certified • Printed Circuit Board Mounting • FBR-20—World's Smallest EMR • Comprehensive Line Application: Process Control, Telecommunications, Automotive and Automatic Test Equipment

Custom Hybrid IC's • Two-Sided Mounting Design Perfect for Low-Profile Package Construction • Ideal for Computers, Electronic Switching Systems, Office Automation Equipment and Data Communications Systems • T-Squared—Combines Cost Efficiency of Thick Film, Accuracy of Thin Film on One IC

Mini Thermal Printers • Swift, Sharp, Silent and Maintenance-Free • 20 and 40-Column Models • Last-Line Visibility • Compact, Light Weight • Fixed Printing Head • Meets Centronics Standards

Flat-Cable Connectors • Compatible with 3M • Unique U-Contact Pierces Insulation Twice at the Same Place • Superior PBT Construction • Full Range Available: Shrouded & Block Headers, Socket & Receptacle, Card Edge, PC-Board Transition, Delta Ribbon, D-Subminiature

Custom and Standard Keyboards • Low Profile Design • "Snap-Action" Key Touch • Tactile Feedback "Touch" Panel • Tilt-Angle Adjustments • Meets Ergonometric & DIN Standards • Available with or without Electronics • PC/AT Plug Compatible Units Available Off the Shelf

Bubble Memories • New Compact One Megabit Bubble Cassette System—50% Smaller than Present Systems • One Megabit Cards & Cassettes • Cards to 4 Megabits • One Megabit Single-Power-Source Cassette Systems • Non-Volatile Memory • Generates without Seed Bubble • One Megabit Bubble Memory Module Kit for Custom Design • Compatible with RS-232C, GPIB (IEEE488), Multibus* • Great for Hostile Environments

**Multibus is a registered trademark of Intel Corp.*

Graphic/Alpha-Numeric Plasma Displays • Generous 640 x 400 Full-Dot Matrix High-Resolution Graphics Display (FPF8050HFUF) • Dark-Surface Panel Delivers Brightness and Sharp Contrast • Easy to Read, Even in Direct Sunlight • Easily Connected through CRT Controller to Virtually any System Bus • Unique AC Panel, Monolithic IC Drive Circuit and LSI Logic Circuit Guarantee High Reliability • Use of IC's Throughout Reduces Power Consumption • Thinner and More Compact than Conventional Models

Spec us just once.
We'll become your best supplier.
